What is this product?

Type: Shares of Amundi Ethik Fonds Evolution, an investment fund.

Term: The term of the Fund is open-ended. The Management Company may terminate the Fund by dissolution or merger with another fund, in accordance with the legal provisions.

Objectives: This product has a financial investment objective and a sustainable investment objective. The Fund is a financial product promoting ESG characteristics in accordance with Article 8 of the Disclosure Regulation. In other words, it pursues sustainable investment. More detailed information can be found in the prospectus under Section 14, "Investment objective", and in the "Additional investor information" annex under "Pre-contractual information" or "Sustainability (ESG) principles".

Financial investment objective: long-term capital growth with appropriate risk diversification.

Sustainable investment objective: primarily investing in economic activities that contribute to a sustainable future and address some of the global challenges to achieve sustainable growth

Investment strategy and instruments: The Amundi Ethik Fonds Evolution is a mixed fund. The equity portion is invested via direct investments, is internationally oriented and invests in selected companies worldwide. The bond portion is mainly invested in OECD government bonds, bonds issued by supranational issuers, quasi-public bonds (agencies), covered bonds and other collateralised bonds, green bonds and social bonds, denominated in Euro. The entire maturity spectrum (short, medium and long-term duration) can be covered. Only bonds with an investment grade rating (AAA to BBB-) are purchased. Inflation-indexed bonds can be purchased. Investments are made in the form of directly acquired individual securities, not indirectly through investment funds or through derivatives. As part of the investment strategy, up to 34% of the Fund's assets may be invested in derivative instruments (calculated on the basis of current market

prices) which are used for hedging purposes. As a result, there may be an increased risk of loss of the Fund's assets, at least temporarily.

The Fund pursues an active investment strategy and is not based on any reference value to achieve its financial investment objective.

Securities are selected based on a traditional financial analysis combined with a non-financial analysis aimed at assessing the actual contribution and exposure to a sustainable future. To achieve its sustainability objective, the Fund takes into account, in addition to Amundi's Sustainable Investment Principles, additional and specific exclusion criteria for companies and public issuers based on ethically controversial activities and behaviours.

Intended Retail Investor: This product is intended for investors with a basic knowledge and with no or limited experience of investing in funds, seeking to increase the value of their investment over the recommended holding period and who are prepared to take on a high level of risk to their original capital.

Redemption and Dealing: Shares may be sold (redeemed) as stated in the prospectus and investor information document at the respective dealing price (net asset value). Further details can be found in the prospectus or the investor information document of Amundi Ethik Fonds Evolution.

Distribution Policy: As this is a distributing share class, investment income is distributed.

More Information: You can obtain further information about the Fund, including the prospectus, investor information document and financial report, free of charge on request from:
