The material provisions are as follows:

2.2.1 The value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued and not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof shall be arrived at after making such discount as the Board of Directors of the Company may consider appropriate in such case to reflect the true value thereof.

2.2.2 Securities listed on a recognised stock exchange or dealt on any other Regulated Market that operates regularly, is recognised and is open to the public are valued at their last available closing prices or in the event that there should be several such markets on the basis of the main market for the relevant security. In accordance with its valuation policy, the securities held by the Sub-Fund Lyxor Smart Overnight Return were valued based on the latest available closing prices as at April 25, 2023.

2.2.3 In the event that the last available closing price does not, in the opinion of the Board of Directors of the Company, truly reflect the fair market value of the relevant securities, the value of such securities is defined by the Board of Directors of the Company based on the reasonably foreseeable sales proceeds determined prudently and in good faith by them.

2.2.4 Securities not listed or traded on a stock exchange or not dealt on another Regulated Market are valued on the basis of the probable sales proceeds determined prudently and in good faith by the Board of Directors of the Company.

The liquidating values of futures, forward or options contracts traded on exchanges or on other Regulated Market are based upon the last available settlement prices of these contracts on exchanges and Regulated Markets on which the particular futures, forward or options contracts are traded by the Company; provided that if a futures, forward or options contract could not be liquidated on the day with respect to which Net Assets are being determined the liquidating value of such contract is such value as the Board of Directors of the Company may deem fair and reasonable.

2.2.9 In case of short term instruments which have a maturity of less than 90 days, the value of the instrument based on the net acquisition cost, is gradually adjusted to the repurchase price thereof. In the event of material changes in market conditions, the valuation basis of the investment is adjusted to the new market yields.

2.2.10 The Company may more specifically enter into securities lending transactions provided that Sub-Funds may lend securities in their portfolios to a borrower. To guarantee this transaction, the Sub-Fund receives collateral. ⁽¹⁾ The amount of assets engaged in total return swaps is equal to the market value of the basket of securities engaged in total return swaps at the closing date, increased by the marked-to-market value of the TRS at the closing date.

Returns and costs incurred from total return swaps transactions during the period ended April 30, 2023, are included in the valuation of the swaps. All transactions are bilateral transactions.

Efficient Portfolio Management Technique

The Sub-Fund Lyxor Index Fund - Lyxor Smart Overnight Return enters into securities lending transactions, concluded in connection with a Total Return Swap (TRS). In this case, the Management Company uses Société Générale as counterparty to both the TRS and the securities lending transactions.

Return and cost from the securities lending activities incurred during the period ended April 30, 2023 are included in the valuation of the TRS.

Revenues arising from securities lending transactions benefit to the Fund via an amelioration of the price of the TRS, and the Fund will not be charged additional direct and indirect operational costs/fees from the securities lending agent or the Management Company.
