## Objectives and investment policy

The Fund is an index-tracking UCITS passively managed.

The investment objective of Fund is to reflect both the performance of the Bloomberg Barclays Euro Treasury 50bn 25+ Year Bond Index (the "Benchmark Index") denominated in Euros, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the "Tracking Error").

The Bloomberg Barclays Euro Treasury 50bn 25+ Year Bond Index consists of fixed-rate, investment grade public obligations of the sovereign countries participating in the European Monetary Union. Only bonds denominated in euros with a maturity over 25 years are included.

The anticipated level of Tracking Error in normal market conditions is indicated in the prospectus.

Additional information about the Benchmark Index can be found at <https://www.bloomberg.com/professional/product/indices/bloomberg-barclays-indices/>.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.
