The AMF ("Autorité des Marchés Financiers") is responsible for supervising Amundi Asset Management in relation to this Key Information Document.

Amundi Asset Management is authorised in France under number GP-04000036 and regulated by the AMF.

Key Information Document production date: 02/04/2024.

What is this product?

Type: Units of AMUNDI EURO LIQUIDITY SHORT TERM SRI, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

Term: The Fund has an unlimited duration. The Management Company may dissolve the Fund by means of liquidation or merger with another fund in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): Short-Term Variable Net Asset Value Money Market UCI

Objectives: By subscribing to AMUNDI EURO LIQUIDITY SHORT TERM SRI, you are investing in money market instruments and debt securities (bonds, Treasury bills etc.), with a maximum maturity of 397 days, with a very low exposure to interest rate risk.

The objective is to outperform the capitalised €STR, an index representing the Eurozone money market rate, after taking into account ongoing charges and while incorporating ESG criteria into the Fund's security analysis and selection criteria. However, in certain market situations such as the €STR being very low, the net asset value of your fund may experience a structural decline and negatively impact the yield of your fund, which may compromise the objective to maintain the capital of your fund.

The fund incorporates ESG (environment, social and governance) criteria into the analysis and selection of securities, in addition to financial criteria (liquidity, maturity, profitability and quality).

The non-financial analysis results in an ESG rating for each issuer on a scale ranging from A (highest rating) to G (lowest rating). At least 90% of securities in the portfolio have an ESG rating.

In addition, the Fund implements an SRI strategy based on a combination of approaches:

- "rating improvement" approach (the portfolio's average ESG rating must be higher than the ESG rating of the investment universe after eliminating at least 20% of

the lowest-rated securities);

- regulatory and sector exclusion approach: exclusion of issuers rated F and G; exclusions of controversial weapons; exclusion of businesses that severely and repeatedly violate one or more of the ten principles of the United Nations Global Compact; and sector exclusions for coal and tobacco according to the current Amundi exclusion policy.

- Best-in-Class which aims to give priority to issuers that are leaders in their business sectors based on ESG criteria identified by the Management Company's team of non-financial analysts. The Best-in-Class approach does not exclude any business sectors a priori; the Fund may therefore be exposed to certain controversial sectors. To limit the potential non-financial risks of these sectors, the Fund applies the exclusions set out above, coupled with a commitment policy that aims to promote dialogue with issuers and support them in improving their ESG practices.

To achieve this, the management team selects high-quality money market instruments in euro or foreign currencies, taking into account their residual life. These securities are selected from within a previously determined investment universe according to an internal risk assessment and monitoring process. In order to assess the credit quality of these instruments, the management company may refer to investment grade ratings from recognised ratings agencies it deems the most relevant, on a non-exclusive basis, when purchasing an instrument; it shall however endeavour to avoid any mechanical dependence on these ratings throughout the period of time in which the securities are held.

Foreign currency securities are hedged against currency risk.

By way of derogation, the 5% limit of the UCI assets may be increased to 100% of its assets when the Fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union as outlined by European Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017.

The Fund may enter into temporary purchases and sales of securities. Eligible forward financial instruments may also be used for hedging purposes.

The UCI is actively managed. The index is used a posteriori as a performance comparison indicator. The management strategy is discretionary and has no index-related constraints.

The mutual fund is classified under article 8 of Regulation (EU) 2019/2088 on the publication of sustainability information in the financial services sector (the «Disclosure Regulation»).

Intended retail investors: This product is intended for investors with a basic knowledge and little or no experience of investing in funds, who are seeking to increase the value of their investment while preserving all or part of their invested capital over the recommended holding period and who are prepared to assume a medium level of risk on their initial capital.
