Information to the Shareholders

The annual general meeting of the Shareholders of the Company is held at the registered office of the Company or at such other place in Luxembourg as indicated in the convening notice on the last Monday of February of each year at 2 p.m. Luxembourg time. If this day is not a business day, the annual general meeting shall be held on the next following full business day.

To the extent required by Luxembourg law, notices of all general meetings will be published in the *Recueil Electronique des Sociétés et Associations* on the *Registre du Commerce des Sociétés* ("RCS") website of Luxembourg (the "RESA"), in a Luxembourgish newspaper and in any other newspapers that the Board of Directors of the Company may determine and will be sent by mail to the registered shareholders, at least 8 days before the date of the general meeting.

The financial year ("Financial Year") of the Company starts on the first day of November in each year and ends on the last day of October of the next year.

The annual reports including audited financial statements are published within 4 months after the end of the Financial Year and the unaudited semi-annual reports are published within 2 months at the end of the relevant period. The reports include separate information on each of the Sub-Funds as well as combined information on all Sub-Funds. The reports are available at the registered office of the Company during normal business hours.

A detailed schedule of portfolio changes during the year is available free of charge upon request at the registered office of the Company.

The Company has been established for an undetermined period.

Report of the Board of Directors of the Company

Lyxor Index Fund - Lyxor Core Stoxx Europe 600 (DR)

The Lyxor Core STOXX Europe 600 (DR) - UCITS ETF Acc is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the STOXX Europe 600 (Net Return) EUR benchmark index. The index represents European large-, mid- and small-cap companies.

Lyxor Index Fund - Lyxor MSCI EMU ESG Broad CTB (DR)

The Lyxor MSCI EMU ESG (DR) - UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate, both upwards and downwards, the benchmark MSCI EMU ESG Broad Select Net Total Return Index. This index has an investment universe identical to that of the MSCI EMU index (parent index). It covers mid- and large-cap securities on developed markets in the eurozone (Economic and Monetary Union). An ESG filter is included in the investment universe to exclude companies exposed to controversial activities and/or major ESG controversies. An optimisation process is also implemented to maximise exposure to companies with the highest ESG scores while maintaining a risk/return profile close to that of the parent index. For more information on the index, please visit www.msci.com.

Lyxor Index Fund - Lyxor Core Euro Stoxx 50 (DR)

The Lyxor Core EURO STOXX 50 (DR) - UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the EURO STOXX 50 Net Return EUR benchmark index. The EURO STOXX 50 Net Return EUR index is representative of the performance of the eurozone's large-cap equity markets.

Lyxor Index Fund - Lyxor ESG USD Corporate Bond (DR) UCITS ETF

The Lyxor ESG USD Corporate Bond (DR) UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the benchmark Bloomberg Barclays MSCI USD Corporate Liquid SRI Sustainable Index. This index reflects the performance of investment-grade bonds, denominated in USD and issued by companies (US or other), with maturities greater than or equal to one year. The index excludes issuers with an MSCI ESG rating below BBB, issuers involved in certain controversial activities (weapons, alcohol, tobacco) and issuers with an MSCI "red flag" ESG controversy score. For more information on this index, please visit www.bloomberg.com.

Lyxor Index Fund - Lyxor ESG USD High Yield (DR) UCITS ETF

The Lyxor ESG USD High Yield (DR) UCITS ETF is an ETF (Exchange Traded Fund) compliant with the UCITS Directive. Its objective is to replicate, both upwards and downwards, the Bloomberg Barclays MSCI US Corporate High Yield SRI Sustainable index. This index represents the performance of the USD-denominated high-yield bond market, with maturities of at least one year. It only includes issuers with an ESG rating of BBB or higher according to MSCI and excludes issuers linked to certain sectors such as controversial military activities, as well as companies with a "red" score according to MSCI's controversy score. More information on the index and methodology can be found at www.bloomberg.com.

Lyxor Index Fund - Lyxor \$ Floating Rate Note UCITS ETF

The Lyxor \$ Floating Rate Note UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the benchmark Bloomberg Barclays MSCI USD Corporate Liquid FRN 0-5 Year SRI Sustainable Index. This index reflects the performance of investment-grade floating-rate bonds, denominated in USD and issued by companies (US or other), with maturities ranging from 1 month to less than 5 years. The bonds that comprise this index have a variable coupon, which adjusts according to movements in the 3m USD LIBOR. The index excludes issuers with an MSCI ESG rating below BBB, issuers involved in certain controversial activities (weapons, alcohol, tobacco) and issuers with an MSCI "red flag" ESG controversy score. The EUR hedged portion has a simple monthly currency hedging mechanism integrated into the investment product, an effective foreign exchange risk management solution for EUR investors. For more information on this index, please visit www.bloomberg.com.

Lyxor Index Fund - Lyxor EuroMTS 1-3Y Italy BTP Government Bond (DR) UCITS ETF

The Lyxor EuroMTS 1-3Y Italy BTP Government Bond (DR) UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the MTS Mid Price Italy Govt 1-3 y (EUR) benchmark index. The MTS Mid Price Italy Govt 1-3 y (EUR) index measures the performance of the Italian government bonds segment with maturities of between one and three years.

Report of the Board of Directors of the Company (continued)

Lyxor Index Fund - Lyxor EuroMTS 10Y Italy BTP Government Bond (DR) UCITS ETF

The Lyxor EuroMTS 10Y Italy BTP Government Bond (DR) UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the MTS Target Maturity Government Bond Italy (Mid Price) Index. The MTS Maturity Government Bond Italy (Mid Price) Index measures the performance of the Italian government bond segment with 10-year target maturities. It is denominated in EUR.

Lyxor Index Fund - Lyxor MSCI EMU Growth (DR) UCITS ETF

The Lyxor MSCI EMU Growth (DR) UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the benchmark MSCI EMU Growth Net Return EUR Index. The MSCI EMU Growth Net Return EUR Index consists of a sample of companies representative of growth shares within the MSCI EMU index. A growth share is typically a company with good earnings growth prospects and generally above industry and market average financial ratios. The index methodology is available at www.msci.com

Lyxor Index Fund - Lyxor MSCI EMU Small Cap (DR) UCITS ETF

The Lyxor MSCI EMU Small Cap (DR) UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the benchmark MSCI EMU Small Cap Net Return EUR Index. The MSCI EMU Small Cap Net Return EUR Index is an equity index representative of the most liquid shares in the eurozone with a capitalisation of between USD 200 million and USD 1.5 billion. The MSCI EMU Small Cap Net Return EUR Index aims to represent, in the universe of shares with the required capitalisation, 40% of the total market capitalisation of each industry group, in each eurozone state. The index methodology is available at www.msci.com.

Lyxor Index Fund - Lyxor MSCI EMU Value (DR) UCITS ETF

The Lyxor MSCI EMU Small Cap (DR) UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the benchmark MSCI EMU Small Cap Net Return EUR Index. The MSCI EMU Small Cap Net Return EUR Index is an equity index representative of the most liquid shares in the eurozone with a capitalisation of between USD 200 million and USD 1.5 billion. The MSCI EMU Small Cap Net Return EUR Index aims to represent, in the universe of shares with the required capitalisation, 40% of the total market capitalisation of each industry group, in each eurozone state. The index methodology is available at www.msci.com

Lyxor Index Fund - Lyxor BofAML € Short Term High Yield Bond UCITS ETF

The Lyxor BofAML € Short Term High Yield Bond UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate the BofA Merrill Lynch BB-CCC 1-3 Year Euro Developed Markets High Yield Constrained Index. This index reflects the performance of the euro-denominated short-term non-investment grade corporate bond market.

Lyxor Index Fund - Lyxor Euro Government Bond 25+Y (DR) UCITS ETF

The Lyxor Euro Government Bond 25+Y (DR) UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate the Bloomberg Barclays Euro Treasury 50bn 25+ Year Bond Index. This index reflects the performance of euro-denominated government bonds issued by countries of the Economic and Monetary Union with a minimum of €50 billion in issues. Eligible securities must have maturities of at least 25 years, with assets of at least €300m.

Lyxor Index Fund - Lyxor EuroMTS Covered Bond Aggregate UCITS ETF

The Lyxor EuroMTS Covered Bond Aggregate UCITS ETF is a UCITS compliant exchange traded fund that aims to track the benchmark index FTSE MTS Covered Bond (Mid Price) Index. The FTSE MTS Covered Bond (Mid Price) Index measures the performance of the euro-denominated covered bonds from non-sovereign EU issuers, listed on the MTS trading platforms and with at least one year to maturity. These securities include, German Oeffentliche and Hypothekenpfandbriefe, French Obligations Foncières, Spanish Cédulas, Irish ACS and UK bonds backed with mortgages and/or public loans. Lyxor ETFs are efficient investment vehicles listed on exchange that offer transparent, liquid and low-cost exposure to the underlying benchmark index.

Lyxor Index Fund - Lyxor Global Gender Equality (DR) UCITS ETF

The Lyxor Global Gender Equality (DR) UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate the Solactive Equileap Global Gender Equality Net Total Return Index. This index is comprised of 150 equally weighted companies around the world that have obtained the best gender equality score according to 19 criteria established by Equileap, a research organisation specialising in this field. Companies whose business is related to weapons, gambling, tobacco and those included on the Norwegian Ethics Council list are excluded.

Report of the Board of Directors of the Company (continued)

Lyxor Index Fund - Lyxor ESG Euro High Yield (DR) UCITS ETF

The Lyxor ESG Euro High Yield (DR) UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate, both upwards and downwards, the Bloomberg Barclays MSCI Euro Corporate High Yield SRI Sustainable index. This index represents the performance of the euro-denominated high-yield bond market, with maturities of at least one year. It only includes issuers with an ESG rating of BBB or higher according to MSCI and excludes issuers linked to certain sectors such as controversial military activities, as well as companies with a "red" score according to MSCI's controversy score. More information on the index and methodology can be found at www.bloomberg.com.

Lyxor Index Fund - Lyxor Global High Yield Sustainable Exposure UCITS ETF

The Lyxor Global High Yield Sustainable Exposure UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate, both upwards and downwards, the Bloomberg Barclays MSCI Global Corporate High Yield SRI Sustainable index. This index represents the performance of the overall high-yield bond market, with maturities of at least one year. It only includes issuers with an ESG rating of BBB or higher according to MSCI and excludes issuers linked to certain sectors such as controversial military activities, as well as companies with a "red" score according to MSCI's controversy score.

Lyxor Index Fund - Lyxor Stoxx Europe Select Dividend 30 UCITS ETF

The Lyxor STOXX Europe Select Dividend 30 UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the STOXX Europe Select Dividend 30 Net Return EUR benchmark index. The STOXX Europe Select Dividend 30 Net Return EUR index consists of 30 shares selected by Stoxx in the universe of 600 European shares in the DJ Stoxx 600 index. The 30 companies selected from those that have seen non-negative growth in dividend per share over five years are those that offer the highest net dividend rates in their country. The weighting of the various shares in the index is based on the respective dividend rates. As a result, the index's dividend rate is particularly high. The index methodology is available at www.stoxx.com.

Lyxor Index Fund - Lyxor Smart Overnight Return

The investment objective of the sub-fund Lyxor Index Fund – Lyxor Smart Overnight Return is to generate a return linked to money market rates.

The sub-fund Lyxor Index Fund – Lyxor Smart Overnight Return is actively managed within a strict risk and liquidity control environment.

The index used as benchmark is the ESTER (Euro Short Term Rate) compounded rate.

The reference benchmark for investments in share-classes not denominated in Euro is the equivalent overnight money market rate for the currency of the related share class.

The net asset value of the share IE of the sub-fund Lyxor Index Fund - Lyxor Smart Overnight Return reached EUR 977.991 as of the end of October 31, 2022, posting a negative performance of -0.20% over a one year period. The relevant benchmark is ESTER compounded rate, which returned -0.36% (in EUR) over the same period. The performance since inception of the share class IE reached -2.20%.

The net asset value of the share IG of the sub-fund Lyxor Index Fund - Lyxor Smart Overnight Return reached GBP 1 045.2783 as of the end of October 31, 2022, posting a positive performance of +1.05% over a one year period. The relevant benchmark remains the SONIA compounded rate, which returned +0.91% (in GBP) over the same period. The performance since inception of the share class IG reached +4.53%.

The net asset value of the share IU of the sub-fund Lyxor Index Fund - Lyxor Smart Overnight Return reached USD 1 094.1202 as of the end of October 31, 2022, posting a positive performance of +1.24% over a one year period. The relevant benchmark remains the Federal Funds compounded rate, which returned +1.04% (in USD) over the same period. The performance since inception of the share class IU reached +10.44 %.

The net asset value of the share UCITS ETF C-EUR of the sub-fund Lyxor Index Fund - Lyxor Smart Overnight Return reached EUR 97.7991 as of October 31, 2022, posting a negative performance of -0.19% over a one year period. The relevant benchmark remains the EONIA compounded rate, which returned -0.36% (in EUR) over the same period. The performance since inception of the share class UCITS ETF C-EUR reached -2.19%.

The net asset value of the share UCITS ETF C-GBP of the sub-fund Lyxor Index Fund - Lyxor Smart Overnight Return reached GBP 1 045.2783 as of October 31, 2022, posting a positive performance of +1.05% over a one year period. The relevant benchmark remains the SONIA compounded rate, which returned +0.91% (in GBP) over the same period. The performance since inception of the share class UCITS ETF C-GBP reached +4.51%.

Report of the Board of Directors of the Company (continued)

The net asset value of the share UCITS ETF C-USD of the sub-fund Lyxor Index Fund - Lyxor Smart Overnight Return reached USD 1 094.1202 as of October 31, 2022, posting a positive performance of +1.22% over a one year period. The relevant benchmark remains the Federal Funds compounded rate, which returned +1.04% (in USD) over the same period. The performance since inception of the share class UCITS ETF C-USD reached +9.35%.

The net asset value of the share UCITS ETF D-EUR of the sub-fund Lyxor Index Fund - Lyxor Smart Overnight Return reached EUR 99.4195 as of October 31, 2022, posting a negative performance of -0.21% over a one year period. The relevant benchmark is ESTR compounded rate, which returned -0.36% (in EUR) over the same period. The performance since inception of the share class UCITS ETF D-EUR reached -0.74%. Investment techniques over the period.

In order to meet the investment objective, the sub-fund Lyxor Index Fund – Lyxor Smart Overnight Return has entered in a Total Return Swap (TRS) and into efficient portfolio management techniques (securities lending), both with Société Générale. In connection with the TRS, both parties, on a daily basis, adjust swap parameters in order to reset the market value, offsetting counterparty risk. The change in the composition of the assets of the basket must respect specific rules, agreed by both parties. For the avoidance of doubt, the sub-fund Lyxor Index Fund – Lyxor Smart Overnight Return did not invest in money market papers over the period.

Lyxor Index Fund - Lyxor Alpha Plus Fund

After touching a low point in October 2021, risky assets recovered, buoyed by supportive macro readings and corporate earnings. In this context, central banks prepared markets to a new regime, the end of the stimulus and ultra-low yield period. US bond yields increase and the spread of the Omicron variant on Europe did not dent optimism, which prevailed until the end of the year. Equity markets ended 2021 close to historical record levels.

Markets conditions worsened markedly in 2022. Persistently high inflation, major central banks turning increasingly hawkish and intensifying geopolitical pressure in Eastern Europe coalesced to bring equities in a bear market. Beneath the surface, major sector and factor rotations favored value stocks, especially within the energy and financial segments, supported by rallying oil prices and rising yields.

The Fed took central stage in January. Multiple comments from its members pointed at a first rate hike and the tapering of its purchase program in March. Throughout the first quarter, the bond market progressively priced in more aggressive central banks' rate hikes in the US, and also in the UK, and in Eurozone, amid continued upward inflation surprises.

After mid-February, investors increasingly focused on escalating tensions in Ukraine. The repricing of geopolitical risk accelerated when Russia recognized the two self-proclaimed independent republics in the Donbas region, but the full-scale invasion that started on February 24 surprised most market participants. Western countries coordinated to inflict maximum financial pain with multiple sanctions hitting the Russian financial system, while supplying Ukraine with military equipment and intelligence. The unclear Russian endgame, growing risk of escalation between the West and Russia, and nuclear infrastructures being targeted, resulted in a market panic early March. Later, rounds of talks between Ukraine and Russia, and signs of Russian military setbacks helped markets stage a temporary rally.

Inflation has amplified by the war and the rise in commodity prices. From being temporary, inflation has now described as sticky. At the Federal Reserve meeting in March 2022, the fed fund rate has raised by 25bps. This was followed throughout the year by increases of 50bps in May, followed by 4 increases of 75bps in June, July, September and November and eventually by a 50bps increase in December. The ECB followed on the hiking path with some delay. The desynchronization of the monetary policies of the various central banks led to a strong appreciation of the dollar.

During the second part of the year, as economic activity slowed down and the rise in inflation diminished, markets started a Fed pivot. This resulted in volatile market with frequent reversals and rallies. Whether at the Jackson Hole symposium in August or at its November meeting, each time hopes have been dashed by Jerome Powell hammering the Fed's determination to bring inflation back to its target level of 2%. It was only after the 20th National Congress of the Chinese Communist Party, quickly followed by China's decision to abandon its 0-covid policy in October that the markets eventually staged a rebound that lasted until the end of the year. Optimism was amplified by inflation figures in the US and Europe that seemed to have peaked in the last quarter of the year.

Alternative part

In this context, alternative strategies helped mitigate the fall in the equity markets thanks to their prudent positioning and hedging. Over the period, the HFR Index, a gauge for the overall alternative industry, lost -5.33%, while global equities lost -18.06% (NDDUWI Index), and global bonds -20.23% (LEGATRUU Index)

Report of the Board of Directors of the Company (continued)

The CTA and Global Macro funds outperformed throughout the year and contributed the most to performance. Their long dollar, short duration and neutral equity positions allowed them to post impressive performances. The commodity exposure of the CTA funds also contributed significantly during the year. However, it was more complicated for the Global Macro funds in emerging markets due to the slowing Chinese economy and the rising dollar.

Thanks to reduced exposures and their value bias, L/S equity managers withstood the decline in global equities with limited damage. The resilience of value stocks also supported beta neutral L/S funds. Developed country credit L/S strategies contributed negatively to performance as credit spreads widened, but remained resilient to the downside.

Lyxor Index Fund - Lyxor Stoxx Europe 600 Real Estate UCITS ETF

The objective of Lyxor Index Fund - Lyxor Stoxx Europe 600 Real Estate UCITS ETF is to replicate the movements of the euro-denominated STOXX® Europe 600 Real Estate (Net Return) Index, as closely as possible, both upwards and downwards. This ETF offers investors exposure to the most important listed European real property securities in a single transaction. For more information, you may also consult the Fund's prospectus or KIID.

Lyxor Index Fund - Lyxor FTSE EPRA/NAREIT Global Developed UCITS ETF

The Lyxor FTSE EPRA/NAREIT Global Developed UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the FTSE EPRA/NAREIT Developed Index Net TRI USD benchmark index. The FTSE EPRA/NAREIT Developed Index Net TRI USD index measures the performance of listed companies operating in the real estate market in developed countries. The index is denominated in US\$. The index is calculated by FTSE, which is a trademark of the London Stock Exchange Plc. "NAREIT®" is a trademark of the National Association of Real Estate Investment Trusts and "EPRA®" is a trademark of the EPRA, all used under licence by FTSE International Limited (hereinafter "FTSE").

Lyxor Index Fund - Lyxor Stoxx Europe 600 Construction & Materials UCITS ETF

Lyxor Index Fund - Lyxor MSCI Robotics & AI ESG Filtered UCITS ETF

The Lyxor MSCI Robotics & AI UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate, both upwards and downwards, the MSCI ACWI IMI ROBOTICS & AI ESG FILTERED benchmark index. This index aims to represent the performance of shares that are expected to generate significant revenues in areas such as robotics/artificial intelligence, the IoT/smart homes, cloud computing, cybersecurity, medical robotics, social media automation and vehicle automation. A set of relevant keywords and expressions derived from the above activities is used to identify companies that could benefit from the increased adoption and use of robotics and artificial intelligence-related products and services.

Report of the Board of Directors of the Company (continued)

Lyxor Index Fund - Lyxor MSCI Smart Cities ESG Filtered (DR) UCITS ETF

The Lyxor MSCI Smart Cities ESG Filtered (DR) UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate the MSCI ACWI IMI Smart Cities ESG Filtered Net Total Return Index. This index reflects the performance of companies that are expected to generate significant revenues in areas such as smart connectivity (IoT), smart buildings, smart homes, smart safety and security, smart mobility, smart waste and water management, and energy and smart grids. The method of selecting shares in the index uses a series of keywords on theme-related products, services and concepts, built using natural language processing and data analysis techniques. These keywords are used to identify and target companies based on the percentage of their revenues that can be linked to the smart cities theme. Each year, the general framework of the index's objectives and the underlying themes associated with them are reviewed with the advisory input of a thematic industry expert selected by the MSCI. The index applies filters based on MSCI ESG ratings, controversy scores and certain sectors. The final weightings applied for each share are based on an overall score that takes into account three main measurements: year-on-year sales growth, return on investment and the percentage of revenue devoted to Research & Development and Capex.

Lyxor Index Fund - Lyxor MSCI Digital Economy ESG Filtered (DR) UCITS ETF

The Lyxor MSCI Digital Economy ESG Filtered (DR) UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate the MSCI ACWI IMI Digital Economy ESG Filtered Net Total Return Index. The index reflects the performance of companies that are expected to generate significant revenues in areas such as e-commerce, digital payments, cybersecurity, social media, cloud computing, robotics and the sharing economy. The method of selecting shares in the index uses a series of keywords on theme-related products, services and concepts, built using natural language processing and data analysis techniques. These keywords are used to identify and target companies based on the percentage of their revenues that can be linked to the digital economy theme. Each year, the general framework of the index's objectives and the underlying themes associated with them are reviewed with the advisory input of a thematic industry expert selected by the MSCI. The index applies filters based on MSCI ESG ratings, controversy scores and certain sectors. The final weightings applied for each share are based on an overall score that takes into account three main measurements: year-on-year sales growth, return on investment and the percentage of revenue devoted to Research & Development and Capex.

Lyxor Index Fund - Lyxor MSCI Disruptive Technology ESG Filtered (DR) UCITS ETF

The Lyxor MSCI Disruptive Technology ESG Filtered (DR) UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate the MSCI ACWI IMI Disruptive Technology ESG Filtered Index. The index reflects the performance of companies that are expected to generate significant revenues in areas such as 3D printing, the Internet of Things, cloud computing, financial technology, digital payment, healthcare, robotics, clean energy, smart grids and cybersecurity. The method of selecting shares in the index uses a series of keywords on theme-related products, services and concepts, built using natural language processing and data analysis techniques. These keywords are used to identify and target companies based on the percentage of their revenues that can be linked to the disruptive technology theme. Each year, the general framework of the index's objectives and the underlying themes associated with them are reviewed with the advisory input of a thematic industry expert selected by the MSCI. The index applies filters based on MSCI ESG ratings, controversy scores and certain sectors. The final weightings applied for each share are based on an overall score that takes into account three main measurements: year-on-year sales growth, return on investment and the percentage of revenue devoted to Research & Development and Capex.

Lyxor Index Fund - Lyxor MSCI Future Mobility ESG Filtered (DR) UCITS ETF

The Lyxor MSCI Future Mobility ESG Filtered (DR) UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate the MSCI ACWI IMI Future Mobility ESG Filtered Net Total Return Index. The index reflects the performance of companies that are expected to generate significant revenues in areas such as electric vehicles and their components and materials, autonomous vehicles and related technologies, new passenger and freight transport methods, electrochemical energy storage technologies, shared mobility, and mining and metal companies involved in battery manufacturing. The method of selecting shares in the index uses a series of keywords on theme-related products, services and concepts, built using natural language processing and data analysis techniques. These keywords are used to identify and target companies based on the percentage of their revenues that can be linked to the mobility of the future theme. Each year, the general framework of the index's objectives and the underlying themes associated with them are reviewed with the advisory input of a thematic industry expert selected by the MSCI. The index applies filters based on MSCI ESG ratings, controversy scores and certain sectors. The final weightings applied for each share are based on an overall score that takes into account three main measurements: year-on-year sales growth, return on investment and the percentage of revenue devoted to Research & Development and Capex.

Report of the Board of Directors of the Company (continued)

Lyxor Index Fund - Lyxor MSCI Millennials ESG Filtered (DR) UCITS ETF

The Lyxor MSCI Millennials ESG Filtered (DR) UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate the MSCI ACWI IMI Millennials ESG Filtered Net Total Return Index. The index reflects the performance of companies that are expected to generate significant revenues in areas such as social media, entertainment, healthcare, fitness, fashion, food, travel, leisure, housing and household goods, and financial services. The method of selecting shares in the index uses a series of keywords on theme-related products, services and concepts, built using natural language processing and data analysis techniques. These keywords are used to identify and target companies based on the percentage of their revenues that can be linked to the generation Y theme. Each year, the general framework of the index's objectives and the underlying themes associated with them are reviewed with the advisory input of a thematic industry expert selected by the MSCI. The index applies filters based on MSCI ESG ratings, controversy scores and certain sectors. The final weightings applied for each share are based on an overall score that takes into account three main measurements: year-on-year sales growth, return on investment and the percentage of revenue devoted to Research & Development and Capex.

Lyxor Index Fund - Lyxor MSCI World Catholic Principles ESG (DR) UCITS ETF

The Lyxor MSCI World Catholic Principles ESG (DR) UCITS ETF is an ETF (exchange traded fund) compliant with the UCITS Directive. Its objective is to replicate the MSCI World Select Catholic Principles ESG Universal and Environment Net USD benchmark index. The index is designed to represent the performance of a strategy that aims to select companies that have a low carbon footprint and a higher environmental, social and governance (ESG) performance than their sector. Companies involved in controversial activities such as weapons, gambling or adult entertainment are excluded. The index also excludes companies involved in abortion and contraception, stem cell research and animal experimentation.

Lyxor Index Fund - Lyxor iBoxx \$ Liquid Emerging Markets Sovereigns UCITS ETF

The Lyxor iBoxx \$ Liquid Emerging Markets Sovereigns UCITS ETF is an ETF compliant with the UCITS Directive that seeks to replicate the performance of the Markit iBoxx USD Liquid Emerging Markets Sovereigns Mid Price TCA TRI benchmark index. The Markit iBoxx USD Liquid Emerging Markets Sovereigns Mid Price TCA TRI index includes some of the most liquid bonds in the Markit iBoxx \$ Emerging Markets Sovereigns index. It contains bonds denominated in USD and issued by sovereign states of low or middle income countries as defined by the World Bank. The index is based on transparent and objective construction rules, according to the usual specifications of iBoxx family indices.

REPORT OF THE *RÉVISEUR D'ENTREPRISES AGRÉÉ*

Report on the Audit of the Financial Statements

Opinion

We have audited the Financial Statements of Lyxor Index Fund (the "Company") and of each of its sub-funds, which comprise the statement of net assets and the schedule of investments as at October 31, 2022 and the statement of operations and changes in net assets for the year then ended and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company and of each of its sub-funds as at October 31, 2022 and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the EU Regulation N° 537/2014, the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "*Commission de Surveillance du Secteur Financier*" (CSSF). Our responsibilities under the EU Regulation N° 537/2014, the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "*Responsibilities of the "réviseur d'entreprises agréé" for the Audit of the Financial Statements*" section of our report. We are also independent of the Company in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of the audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Existence and valuation of OTC derivative instruments (Index swaps)

Key audit matter description

Twenty-eight sub-funds of Lyxor Index Fund are investing in index swaps. These index swaps are OTC ("Over-the-counter") derivative instruments. We refer to Note 9 to the financial statements for the description of the OTC derivative instruments held. The commitment on these investments is significant to the sub-funds' investment activity. Some of those OTC derivative instruments are neither directly held by the Depositary nor kept by credit institutions but are contracts between the parties. This requires specific procedures by the Depositary on the statements received from OTC derivative instruments' counterparties to ensure their existence and the correct manual accounting input after each transaction. We refer to Note 2.8. related to the valuation of swaps. Index swaps are valued on the basis of directly observable market data.

How the matter was addressed in the audit?

Our audit procedures over the existence and valuation of the Company's OTC derivative instruments consisted in:

- obtaining an understanding of the Administrative Agent's and the Depositary's internal controls, including controls in place around the transaction processing of OTC derivative instruments, the reconciliation of holdings between fund accounting and broker and/or counterparty statements of holdings at valuation date and valuation of different kinds of OTC derivative instruments held;
- requesting from the Depositary a confirmation of all assets including derivatives held directly as well as all other assets held outside the Depositary network;
- inspecting reconciliations performed by the Depositary at year-end between their records and the statements of OTC derivative instruments held obtained from counterparties;
- reading the prospectus to understand how the Company describes to shareholders its valuation policy for OTC derivative instruments, and assessing that the described valuation method is commonly used by market players and adequate for each type of OTC derivative instruments;
- performing substantive procedures to analyse the correlation of the performance of the index of specific index swaps with the performance of the net asset value per share of the related sub-fund for a sample of sub-funds.

Other information

The Board of Directors of the Company is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the "*réviseur d'entreprises agréé*" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Company for the Financial Statements

The Board of Directors of the Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the EU Regulation N° 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the EU Regulation N° 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Company.
- Conclude on the appropriateness of the Board of Directors of the Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter.

Report on Other Legal and Regulatory Requirements

We have been appointed as "*réviseur d'entreprises agréé*" by the General Meeting of the Shareholders on February 28, 2022 and the duration of our uninterrupted engagement, including previous renewals and reappointments, is 12 years.

We confirm that the prohibited non-audit services referred to in the EU Regulation N° 537/2014 were not provided and that we remained independent of the Fund in conducting the audit.

For Deloitte Audit, *Cabinet de révision agréé*

Elisabeth Layer, *Réviseur d'entreprises agréé*

Notes to the financial statements

1 - General

Lyxor Index Fund (the "Company") is an Investment Company with Variable Capital (SICAV) incorporated under Luxembourg Law on June 16, 2006 and listed on the official list of Undertakings for Collective Investment in Transferable Securities. The Company is governed by the provisions of Part I of the amended Luxembourg law of December 17, 2010 relating to Undertakings for Collective Investment in Transferable Securities.

The Articles of Incorporation (the "Articles of Incorporation"), as amended on February 7, 2007, on September 8, 2009, on April 17, 2012, and on January 28, 2014 are deposited and available for inspection at the *Registre de Commerce et des Sociétés* of Luxembourg.

The Articles of Incorporation were published in *Mémorial C, Recueil Spécial des Sociétés et Associations* (the "Mémorial") on July 13, 2006.

A novation to the Main Delegation Agreement dated April 9, 2014 was signed between Lyxor Index Fund and Lyxor International Asset Management S.A.S. and appointed Lyxor International Asset Management S.A.S as management company of the Company.

On June 01, 2022, Lyxor Asset Management S.A.S was merged into Amundi Asset Management S.A.S, which replaced Lyxor Asset Management S.A.S and acted as Management Company.

The Company is registered with the Luxembourg Trade Register under number B 117 500.

As at October 31, 2022, 48 Sub-Funds are available:

The index of the following Sub-Fund has changed:

On June 01, 2022:

- MSCI EMU ESG Broad Select Net Total Return Index into MSCI EMU ESG Broad CTB Select Net Total Return Index.

2 - Significant accounting policies

2.1 Presentation of financial statements

The financial statements of the Company are presented in accordance with Luxembourg laws and regulations relating to Undertakings for Collective Investment in Transferable Securities. They are prepared in accordance with generally accepted accounting principles in Luxembourg.

2.2 Valuation of assets

The basic accounting principles for determining the Net Asset Value of the Sub-Funds are set forth in the Articles of Incorporation.

The material provisions are as follows:

2.2.1 The value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued and not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof shall be arrived at after making such discount as the Board of Directors of the Company may consider appropriate in such case to reflect the true value thereof.

2.2.2 Securities listed on a recognised stock exchange or dealt on any other Regulated Market that operates regularly, is recognised and is open to the public are valued at their last available closing prices or in the event that there should be several such markets on the basis of the main market for the relevant security. For the financial statements as at October 31, 2022, such securities are valued with the closing prices of October 31, 2022 for all Sub-Funds except for Lyxor Smart Overnight Return. In accordance with its valuation policy, the securities held by the Sub-Fund Lyxor Smart Overnight Return were valued based on the latest available closing prices as at October 29, 2022.

Lyxor Smart Overnight Return – In accordance with its valuation policy, the securities held by the sub-fund Lyxor Smart Overnight Return were valued based on the latest available closing prices as at October 31, 2022 (i.e. closing prices as at October 28, 2022).

2.2.3 In the event that the last available closing price does not, in the opinion of the Board of Directors of the Company, truly reflect the fair market value of the relevant securities, the value of such securities is defined by the Board of Directors of the Company based on the reasonably foreseeable sales proceeds determined prudently and in good faith by them.

2.2.4 Securities not listed or traded on a stock exchange or not dealt on another Regulated Market are valued on the basis of the probable sales proceeds determined prudently and in good faith by the Board of Directors of the Company.

2.2.5 Money market instruments not listed or traded on a stock exchange or not dealt with on another Regulated Market are valued at market value determined by the Board of Directors of the Company plus any accrued interest or an amortised cost basis.

2.2.6 Investments in open-ended UCI are valued on the basis of the last available prices of the units or shares of such UCI.

2.2.7 All other transferable securities and other permitted assets are valued at fair market value as determined in good faith pursuant to procedures established by the Board of Directors of the Company.

Notes to the financial statements (continued)

2.2.8 The liquidating value of futures, forward or options contracts not traded on exchanges or on other Regulated Markets shall mean their net liquidating value determined, pursuant to the policies established by the Board of Directors of the Company, on a basis consistently applied for each different variety of contracts. The liquidating values of futures, forward or options contracts traded on exchanges or on other Regulated Market are based upon the last available settlement prices of these contracts on exchanges and Regulated Markets on which the particular futures, forward or options contracts are traded by the Company; provided that if a futures, forward or options contract could not be liquidated on the day with respect to which Net Assets are being determined the liquidating value of such contract is such value as the Board of Directors of the Company may deem fair and reasonable.

2.2.9 In case of short term instruments which have a maturity of less than 90 days, the value of the instrument based on the net acquisition cost, is gradually adjusted to the repurchase price thereof. In the event of material changes in market conditions, the valuation basis of the investment is adjusted to the new market yields.

2.2.10 The Company may more specifically enter into securities lending transactions provided that Sub-Funds may lend securities in their portfolios to a borrower. To guarantee this transaction, the Sub-Fund receives collateral. Securities on loan are delivered to a third party broker and these assets continue to be valued as part of the portfolio of the Sub-Fund. Upon termination of a loan, the Sub-Fund is required to return to the borrower the collateral received. Loans can be terminated by the parties at any time. Securities lending generates additional income for the Sub-Fund according to the contractual arrangements. This remuneration is accounted in the Statement of Operations and Changes in Net Assets.

2.3 Currency exchange

The value of the assets and liabilities denominated in a currency other than the Reference Currency of the relevant Sub-Fund or Class are translated at the prevailing exchange rates in Luxembourg at the time of the determination of the corresponding Net Asset Value.

Income and expenses in currencies other than the Reference Currency of the respective Sub-Fund are translated at the exchange rate prevailing at the transaction date. The resulting net realised gains and losses and net change in unrealised profits or losses on currencies are included in the Statement of Operations and Changes in Net Assets.

The cost of investments expressed in currencies other than the Sub-Fund's Reference Currency is translated into the Sub-Fund's Reference Currency at the exchange rate prevailing at the purchase date.

The total Net Asset Value of the Company is equal to the sum of the Net Assets of the various Sub-Funds translated into USD at the prevailing exchange rates in Luxembourg on the relevant valuation day.

2.4 Combined financial statements

The combined Statement of Net Assets and combined Statement of Operations and Changes in Net Assets represent the total of the Statements of Net Assets and Statements of Operations and Changes in Net Assets of the individual Sub-Funds, expressed in USD.

2.5 Net realised gain or loss on sale of investments

The net realised gain or loss on sales of investments is determined on the basis of the average cost of investments sold and are recorded in the Statements of Operations and Changes in Net Assets.

2.6 Forward foreign exchange contracts

Net unrealised profits and losses on forward foreign exchange contracts is valued on the basis of forward exchange rates prevailing at the relevant valuation date and are included in the Statement of Net Assets under the item "Unrealised appreciation/depreciation on forward foreign exchange contracts".

Net change in unrealised profits and losses and net realised gain/loss are recorded in the Statement of Operations and Changes in Net Assets.

2.7 Futures contracts

Futures contracts are valued at their liquidation value based on the closing price on the market on which these futures

Notes to the financial statements (continued)

contracts are quoted.

Futures contracts are disclosed in the Statement of Net Assets under the item "Unrealised appreciation/depreciation on financial futures contracts".

Net change in unrealised profit/ loss and net realised gain/loss are recorded in the Statement of Operations and Changes in Net Assets.

2.8 Swaps

Swaps pegged to indexes or financial instruments shall be valued at their market value, based on the applicable index or financial instrument. The valuation of the swaps tied to such indexes or financial instruments shall be based upon the market value of said swaps, in accordance with the procedures laid down by the Board of Directors of the Company.

Swaps are disclosed in the Statement of Net Assets under the item "Swaps at market value".

2.9 Income

Dividends are recorded net and credited to income on the date upon which the relevant securities are first listed as "ex-dividend".

Interest income is accrued on a daily basis.

2.10 Formation expenses

The fees and expenses in connection with the incorporation and registration of the Company were borne by the Management Company except for the Sub-Fund Lyxor Index Fund – Lyxor Alpha Plus Fund.

The incorporation fees borne by new Sub-Funds are amortised over a maximum period of five years. In the case of liquidation of a Sub-Fund, the liquidation fees will be borne by this Sub-Fund in their entirety.

2.11 Other expenses

Other expenses comprise liquidation fees and other fees.

2.12 Other income

The "Other income" presented in the Statement of Operations and Changes in Net Assets mainly include the subscription and redemption fees.

2.13 Transaction costs

The transaction costs include broker fees and fees charged by the depositary for securities and derivatives transactions. The broker fees are excluded from the cost of securities and derivatives purchased and sold. All these fees are recorded under caption "Transaction costs" in Statement of Operations and Changes in Net Assets.

3 - Management fees

On June 01, 2022, Lyxor Asset Management S.A.S was merged into Amundi Asset Management S.A.S, which replaced Lyxor Asset Management S.A.S and acted as Management Company. The management fees are paid out of the assets of each Sub-Fund on a monthly basis in arrears to the Management Company. The management fees are calculated for each Class of Shares within each Sub-Fund on the quarterly average of the Net Asset Value of each Sub-Fund over such quarter.

Notes to the financial statements (continued)

The Management fees rates applicable at October 31, 2022, are as follows :

The total management fees includes the investment management fees paid to the investment manager.

Notes to the financial statements (continued)

4 - Performance Fees

Lyxor Index Fund - Lyxor Alpha Plus Fund shall pay to the Management Company out of the assets of the relevant Class (Class IE-D) a Performance Fee calculated in accordance with the principles of the high water mark mechanism and equal to 5% multiplied by the relevant Class Net New Profits.

The Performance Fee is calculated and accrued on every Valuation Day for each Class of the Sub-Fund and payable in EUR at the end of each Class Performance Period (each year period ending on the last Valuation Day of December).

Following the Guidelines of the European Securities and Market Authority on performance fees (ESMA34-39-992), the impact of performance fees data as at October 31, 2022, are as follows:

Sub-Fund	Share Class	Class Currency	ISIN	Amount of the performance fees crystalized during the accounting year due to redemptions (in Class currency)	Amount of the performance fees realized at the end of the observation period (in Class currency)	Average Total Net Assets (in Class currency)	% of the NAV of the Share Class
Lyxor Index Fund - Lyxor Alpha Plus Fund	Class IE-D	EUR	LU1409505481	7 249	126 605	104 921 083	0.13%

5 - Depositary, Administrative, Registrar Agent and other fees

The fees of the Depositary Agent, of the Administrative Agent, of the Registrar Agent, the Intermediaries, nominees, any Paying Agents and the other financial agents mandated by the Company, the Management Company, are determined through mutual agreement with the relevant entity at the rate and according to the market practices in Luxembourg.

6 - Taxation

A subscription tax (*Taxe d'abonnement*) equal to (i) 0.01% per annum for all Classes of Shares dedicated to institutional investors and (ii) 0.05% per annum for the Classes of Shares dedicated to other investors, is payable quarterly to Luxembourg authorities and calculated on the basis of the Net Assets of each Sub-Fund on the last day of the quarter.

The portion of the assets of any Sub-Fund invested in other Luxembourg UCI, already subject to this tax, is not subject to the aforesaid tax.

No tax or charge is payable in Luxembourg following the issue of Shares, except for a capital duty of 1 250 EUR payable by the Company on incorporation. Under Luxembourg law, no tax is payable in Luxembourg on capital gains made in respect of any Shares.

Some Company income (in the form of dividends, interest or profits from sources outside Luxembourg) may be subject to withholding tax, at a variable rate, which may not be recoverable.

There is no subscription tax (*Taxe d'abonnement*) payable for UCITS ETF Classes within the meaning of the article 175 (e) of the amended Law of December 17, 2010 on undertakings for collective investment.

Notes to the financial statements (continued)

15 - Active Investment Breach Lyxor Alpha Plus Fund

On the NAV dated October 25, 2022, the sub-fund "Lyxor Alpha Plus Fund" was not compliant with the limit of the Article 50 of the Law of December 17, 2010 : "A UCITS may borrow provided that such a borrowing is on a temporary basis and represents no more than 10% of its assets; " and reached an overdraft amounting to 34.39% of the NAV. The breach occurred after the settlement of a redemption. The sub-fund was brought back within the limit on November 8, 2022. The active breach generated a loss of EUR 11 703, which was reimbursed to the sub-fund on January 18, 2023.

16 - Subsequent events

The Board of Directors has decided on October 31, 2022 to :

- Update the Lyxor MSCI EMU ESG Broad CTB (DR) (the "Sub-Fund") classification under the Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector (the "SFDR") with effect as of December 21, 2022;
- Change of index name and replication method of the Lyxor Stoxx Europe 600 Oil & Gas UCITS ETF (the "Sub-Fund") and update of the Sub-Fund's classification under the SFDR with effect as from December 9, 2022.

The Board of Directors has decided to merge the following Sub-Funds:

On November 18, 2022:

- Lyxor EuroMTS Covered Bond Aggregate UCITS ETF into Amundi Euro Corp 0-1Y ESG.
- Lyxor STOXX Europe 600 Real Estate UCITS ETF into Amundi FTSE Epra Europe Real Estate.

Remuneration policy (Unaudited Information)

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/EU of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the "AIFM Directive"), and in the Directive 2014/91/EU of July 23rd 2014 on undertakings for collective investment in transferable securities (the "UCITS V Directive"). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 ("SFDR"), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2021 fiscal year, its compliance with the AIFM/UCITS Directives' principles and approved the policy applicable for the 2022 exercise at its meeting held on February 1st 2022.

In 2022, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

In 2022, Amundi Asset Management's headcount increased due to the integration of Lyxor's employees.

During fiscal year 2022, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 673 employees at December 31st 2022) is EUR 202 172 869. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2022:

EUR 134 493 396, which represents 67% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.

- Total amount of variable compensation deferred and non-deferred paid by Amundi Asset Management in 2022: EUR 67 679 473, which represents 33% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, some 'carried interest' was paid by Amundi AM with respect to fiscal year 2022, and is taken into account in the total amount of bonus referred to here above.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 19 393 477 were paid to the 'executives and senior managers' of Amundi Asset Management (31 employees at December 31st 2022), and EUR 16 540 119 were paid to the 'senior investment managers' whose professional activities have a material impact on Amundi Asset Management's risk profile (50 employees at December 31st 2022).

Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its 'Identified Staff', that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions :

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business

- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)
- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

SFT Regulation (Unaudited Information)

1 - Total Return Swaps

Following the Regulation 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions, please find below details about Total Return Swaps for the year ended October 31, 2022:

Efficient Portfolio Management Technique (Unaudited Information)

The Sub-Fund Lyxor Index Fund - Lyxor Smart Overnight Return enters into securities lending transactions, concluded in connection with a Total Return Swap (TRS). In this case, the Management Company uses Société Générale as counterparty to both the TRS and the securities lending transactions.

Return and cost from the securities lending activities incurred during the year ended October 31, 2022 are included in the valuation of the TRS.

Revenues arising from securities lending transactions benefit to the Fund via an amelioration of the price of the TRS, and the Fund will not be charged additional direct and indirect operational costs/fees from the securities lending agent or the Management Company.

Transparency of sustainable investments in periodic reports (Unaudited Information)

Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment (the “Taxonomy Regulation”) sets out criteria to determine which economic activities qualify as environmentally sustainable at Union level.

According to the Taxonomy Regulation, an economic activity shall qualify as environmentally sustainable where that economic activity contributes substantially to one or more of the six environmental objectives defined by the Taxonomy Regulation (Climate change mitigation; Climate change adaptation; Sustainable use and protection of water and marine resources; Transition to a circular economy; Pollution prevention and control; Protection and restoration of biodiversity and ecosystems).

In addition, such economic activity shall not significantly harm any such environmental objectives (“do no significant harm” or “DNSH” principle) and shall be carried out in compliance with the minimum safeguards laid down in Article 18 of the Taxonomy Regulation.

In accordance with Article 7 of the Taxonomy Regulation, the management company draws the attention of investors to the fact that the investments of the below Sub-Funds do not take into account the European Union criteria for environmentally sustainable economic activities.

These Sub-Funds fall under Article 6 of regulation (EU) 2019/2088 (“SFDR”). It does not promote environmental and/or social characteristics, nor it has sustainable investment as its objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Lyxor MSCI EMU ESG Broad CTB (DR)

Legal entity identifier:
549300FFJGQ8UZEPQ702

Sustainable investment objective

Did this financial product have a sustainable investment objective?

X

Yes

No

It made **sustainable investments with an environmental objective: 74.78%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:**

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of this financial product was met through replicating an index meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score *	Coverage
28/02/2022	MSCI EMU ESG BROAD SELECT CTB	7,977	100,00%
28/02/2022	MSCI EMU	7,524	100,00%
31/05/2022	MSCI EMU ESG BROAD SELECT CTB	8,232	100,00%
31/05/2022	MSCI EMU	7,522	100,00%
30/11/2022	MSCI EMU ESG BROAD SELECT CTB	8,712	100,00%
30/11/2022	MSCI EMU	7,836	100,00%

* as reported in the PCD

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)

- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.

Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/11/2021 to 31/10/2022**

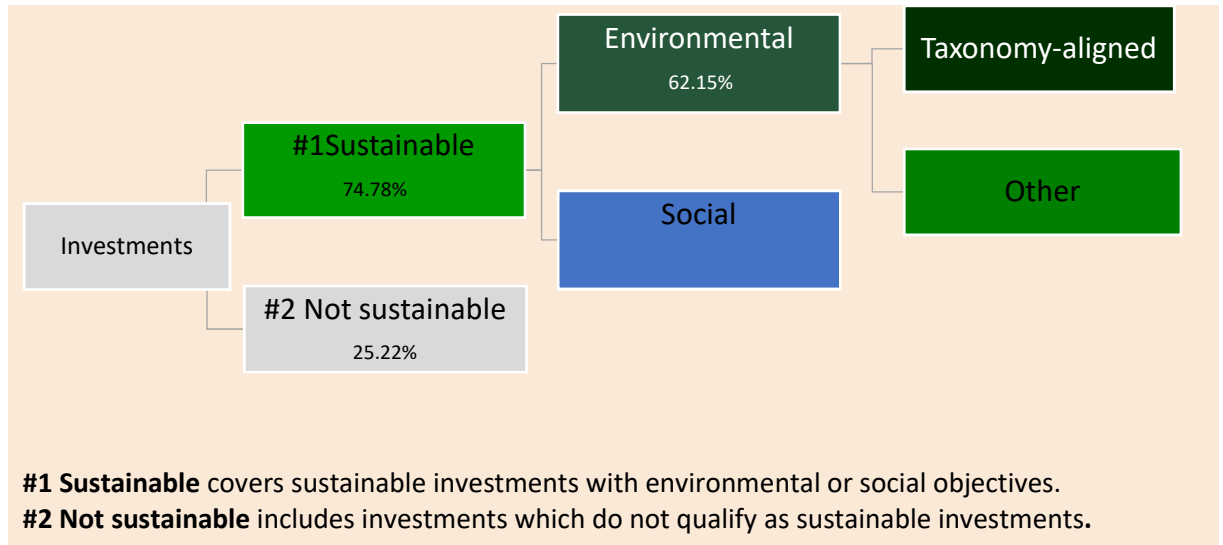

Largest Investments	Sector	% Assets	Country
ASML HOLDING NV	Semiconductors & Semiconductor Equipment	5.60 %	NLD

Taxonomy-aligned activities are expressed as a share of: **-turnover**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **62.15%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

under the EU
Taxonomy.

This product does not commit to have social sustainable investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

What actions have been taken to meet the sustainable investment objective during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**

MSCI EMU ESG Broad Select Net Total Return Index is representative of the performance of large and mid-cap stocks across developed European Economic and Monetary Union (“EMU”) countries selected from the MSCI EMU Index (the “Parent Index”) weighted to maximize exposure to higher ESG scores for a target tracking error budget with respect to its Parent index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- **How did this financial product perform compared with the reference benchmark?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the broad market index?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Lyxor ESG USD Corporate Bond (DR) UCITS ETF

Legal entity identifier:
549300RBBJNIHBHK6K08

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It promotes **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **35.00%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

* as reported in the PCD

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability

matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.

- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/11/2021 to 31/10/2022**

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of: **-turnover**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is 30.29%.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***

The index is representative of the performance of USD denominated, investment grade corporate bonds issued by US and non-US corporates, with maturities of at least 1 year. The index only includes issuers with an MSCI ESG Rating of BBB or higher, and negatively screens issuers involved in certain values-based business involvement criteria, including activities related to controversial military weapons, and those with a “red” MSCI ESG Controversy Score.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Lyxor ESG USD High Yield (DR) UCITS ETF

Legal entity identifier:
549300UNTZ7FKYG3CT58

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **28.04%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/11/2021 to 31/10/2022**

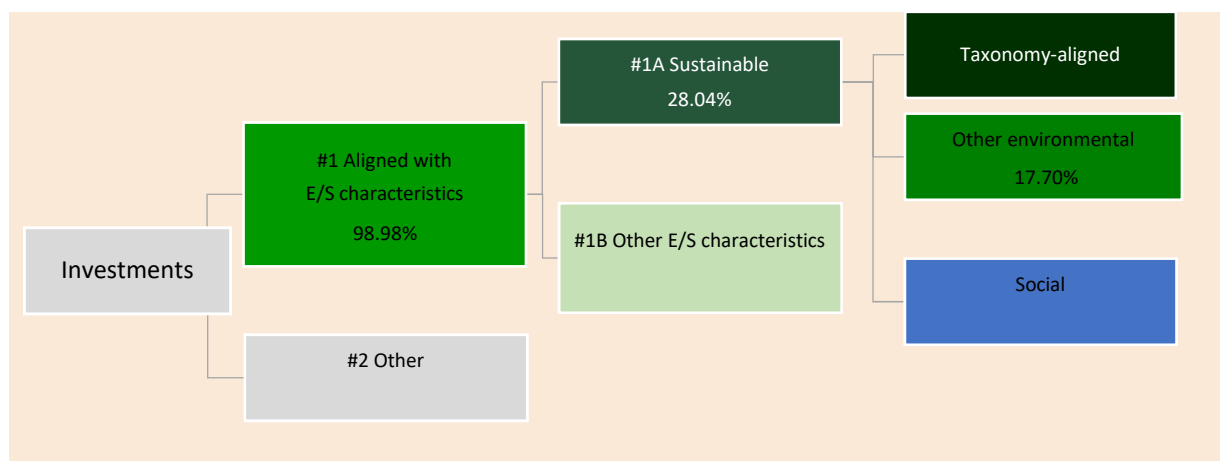

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

<i>Sector</i>	<i>% Assets</i>

Cash	-0.32%

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, first graph shows the Taxonomy alignment in relation to all the investments of the financial product, while the second graph shows the Taxonomy alignment only in relation to the investment in financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

are sustainable investments with an environmental objective that **do not take into**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is 17.70%.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**

The index only includes issuers with an MSCI ESG Rating of BBB or higher, and negatively screens issuers involved in certain values-based business involvement criteria, including activities related to controversial military weapons, and those with a “red” MSCI ESG Controversy Score.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the reference benchmark?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the broad market index?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Lyxor \$ Floating Rate Note UCITS ETF

Legal entity identifier:
549300SKE2JOZKCH3U87

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **32.47%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

* as reported in the PCD

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

The sustainable nature of an investment is assessed at investee company level.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), ESG rating integration into the investment process, engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation

undertaken are also considered in that respect. All criteria are available in fund managers' front office portfolio management system.C.

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- Vote: Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **From 01/11/2021 to 31/10/2022**

What was the proportion of sustainability-related investments?

● **What was the asset allocation?**

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

<i>Sector</i>	<i>% Assets</i>
<i>TREASURIES</i>	<i>93.11 %</i>

------	---------

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

are sustainable investments with

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is 30.74%.

an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***

The iBoxx MSCI ESG USD FRN Investment Grade Corporates TCA Index is a bond index representative of USD denominated investment grade floating rate note (FRN) bonds issued by corporate issuers from developed countries that follows the rules of the iBoxx USD FRN Investment Grade Corporates TCA Index (the "Parent Index") and applies ESG criteria for security eligibility.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Lyxor Global Gender Equality (DR) UCITS ETF

Legal entity identifier:
5493000WPED2NRUIM128

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **61.38%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score *	Coverage
16/09/2022	Solactive Equileap Global Gender Equality Net Total Return Index	64,82	100%
16/09/2022	Solactive GBS Developed Markets Large&Mid Cap	50,48	97%

* as reported in the PCD

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **From 01/11/2021 to 31/10/2022**

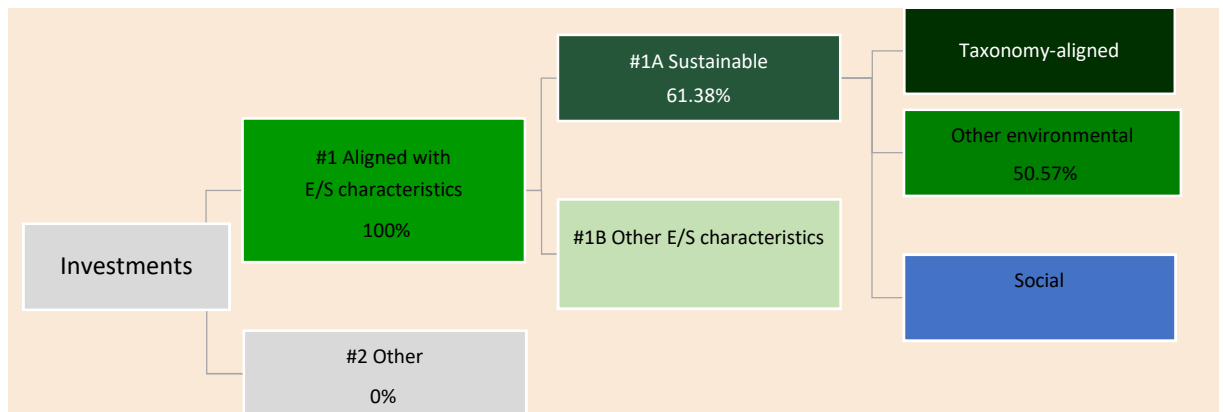

Largest Investments	Sector	% Assets	Country
YARA INTERNATIONAL ASA	Chemicals	0.79 %	BRA
GENERAL MOTORS CO	Automobiles	0.76 %	USA
JPMORGAN CHASE & CO	Banks	0.76 %	USA

MERCK AND CO	Pharmaceuticals	0.73 %	USA
GOLDMAN SACHS GROUP	Capital Markets	0.73 %	USA

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Taxonomy-aligned activities are expressed as a share of: **-turnover**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy is **50.57%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments?**

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***

The “Solactive Equileap Global Gender Equality Net Total Return Index” (the “Index”) offers an exposure to the performance of global leading companies in the field of gender equality.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

* as reported in the PCD

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Principal adverse impacts are the most significant negative

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/11/2021 to 31/10/2022**

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

 are sustainable investments with

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **50.39%**

an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***

The index is representative of the performance of the Euro denominated high yield debt market, with maturities of at least 1 year. The index only includes issuers with an MSCI ESG Rating of BBB or higher, and negatively screens issuers involved in certain values-based business involvement criteria, including activities related to controversial military weapons, and those with a “red” MSCI ESG Controversy Score.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Product name:

Lyxor Global High Yield Sustainable Exposure UCITS ETF

Legal entity identifier:

549300N3YRHQAPZL7P93

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **38.63%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

* as reported in the PCD

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

The sustainable nature of an investment is assessed at investee company level.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/11/2021 to 31/10/2022**

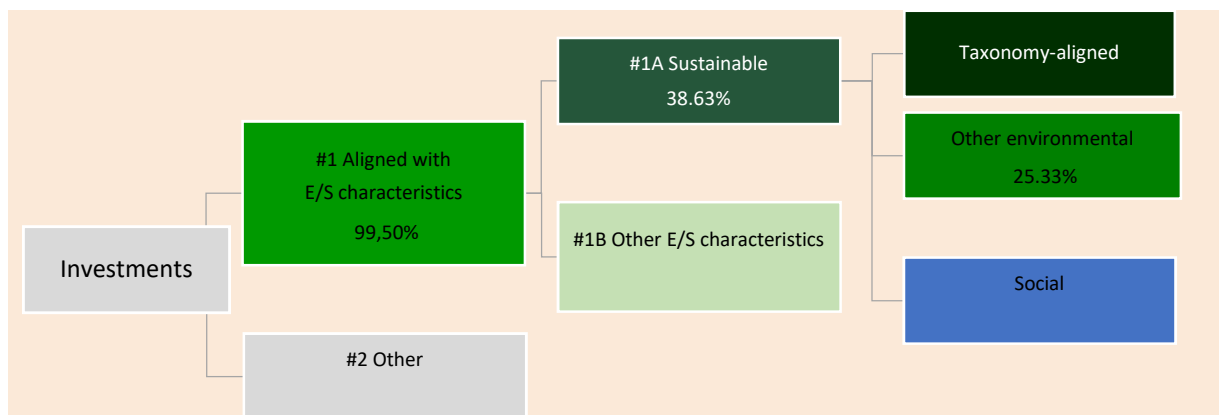

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product, while the second graph shows the Taxonomy alignment only in relation to the investment in sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment in financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

are sustainable investments with an environmental objective that **do not take into account the criteria**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is 25.33%

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***

The index is representative of the performance of the global high yield debt market, with maturities of at least 1 year. The index only includes issuers with an MSCI ESG Rating of BBB or higher, and negatively screens issuers involved in certain values-based business involvement criteria, including activities related to controversial military weapons, and those with a “red” MSCI ESG Controversy Score.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Lyxor MSCI Robotics & AI ESG Filtered UCITS ETF

Legal entity identifier:
549300UVHJRXXKGVW4S52

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It promotes **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **47.31%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score *	Coverage
28/02/2022	MSCI ACWI IMI Robotics & AI ESG Filtered Net Total Return Index	6,601	100,00%

30/11/2022	MSCI ACWI IMI ROBOTICS & AI	6,746	91,32%

* as reported in the PCD

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Taxonomy-aligned activities are expressed as a share of: **-turnover**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is 33.3%.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**

MSCI ACWI IMI Robotics & AI ESG Filtered Net Total Return Index (the “Index”) aims to represent the performance of a set of companies associated with the increased adoption and utilization of artificial intelligence, robots and automation while excluding those involved in certain controversial businesses or with relatively low Environmental, Social and Governance (“ESG”) controversies and ratings scores.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the reference benchmark?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the broad market index?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Lyxor MSCI Smart Cities ESG Filtered (DR) UCITS ETF

Legal entity identifier:
549300VZKSEAWYCHT149

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **39.69%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score *	Coverage
28/02/2022	MSCI ACWI IMI Smart Cities ESG Filtered Net Total Return Index	5,969	100,00%
28/02/2022	MSCI ACWI IMI SMART CITIES	6,298	88,14%
31/05/2022	MSCI ACWI IMI Smart Cities ESG Filtered Net Total Return Index	6,199	99,27%
31/05/2022	MSCI ACWI IMI SMART CITIES	6,658	89,03%
30/11/2022	MSCI ACWI IMI Smart Cities ESG Filtered Net Total Return Index	6,749	99,23%
30/11/2022	MSCI ACWI IMI SMART CITIES	6,746	89,23%

* as reported in the PCD

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **From 01/11/2021 to 31/10/2022**

Largest Investments	Sector	% Assets	Country

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable

● **What was the share of investments in transitional and enabling activities?**

other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Reliable data regarding transitional and enabling activities was not available during the period.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **29.27%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**

Reference benchmarks are indexes to measure whether the

financial product attains the environmental or social characteristics that they promote.

MSCI ACWI IMI Smart Cities ESG Filtered Net Total Return Index (the "Index") objective is to represent the performance of companies that are expected to derive significant revenues from smart solutions for urban infrastructure and exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
<i>Software</i>	36.54 %
<i>IT Services</i>	19.08 %
<i>Internet & Direct Marketing Retail</i>	10.03 %
<i>Interactive Media & Services</i>	5.26 %
<i>Entertainment</i>	3.86 %

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities?**

other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Reliable data regarding transitional and enabling activities was not available during the period.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **29.97%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**

Reference benchmarks are indexes to measure whether the

financial product attains the environmental or social characteristics that they promote.

MSCI ACWI IMI Digital Economy ESG Filtered Net Total Return Index (the "Index") aims to represent the performance of companies that are expected to derive significant revenues from the digital economy value chain and to exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Lyxor MSCI Disruptive Technology ESG Filtered (DR) UCITS ETF

Legal entity identifier:

549300E2AJ0GE7K7JM38

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It promotes **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **51.25%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score *	Coverage
28/02/2022	MSCI ACWI IMI Disruptive Technology ESG Filtered Net Total Return Index	6,241	100,00%
28/02/2022	MSCI ACWI IMI DISRUPTIVE TECHNOLOGY	6,501	90,52%
31/05/2022	MSCI ACWI IMI Disruptive Technology ESG Filtered Net Total Return Index	6,336	100,00%
31/05/2022	MSCI ACWI IMI DISRUPTIVE TECHNOLOGY	6,583	91,20%
30/11/2022	MSCI ACWI IMI Disruptive Technology ESG Filtered Net Total Return Index	7,153	99,60%
30/11/2022	MSCI ACWI IMI DISRUPTIVE TECHNOLOGY	6,858	91,20%

* as reported in the PCD

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

* as reported in the PCD

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Principal adverse impacts are the most significant negative

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

<i>Consumer Finance</i>	0.29 %
<i>Other</i>	0.00 %
<i>Forex</i>	-0.00 %
<i>Cash</i>	0.15 %

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, first graph shows the Taxonomy alignment in relation to all the investments of the financial product, while the second graph shows the Taxonomy alignment only in relation to the investment in financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

are sustainable investments with an environmental objective that do not take into

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **36.35%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**

MSCI ACWI IMI Mobility ESG Filtered Net Total Return Index (the "Index") objective is to measure the performance of companies that are expected to derive significant revenues from energy storage technologies, autonomous vehicles, shared mobility and new transportation methods and to exclude companies which are Environmental, Social and Governance (“ESG”) laggards relative to the theme universe.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the reference benchmark?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the broad market index?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Lyxor MSCI Millennials ESG Filtered (DR) UCITS ETF

Legal entity identifier:

549300TZDKB0R8T6JN58

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **37.43%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score *	Coverage
28/02/2022	MSCI ACWI IMI Millennials ESG Filtered Net Total Return Index	6,268	100,00%
28/02/2022	MSCI ACWI IMI MILLENNIALS	6,332	90,10%
31/05/2022	MSCI ACWI IMI Millennials ESG Filtered Net Total Return Index	6,389	100,00%
31/05/2022	MSCI ACWI IMI MILLENNIALS	6,459	90,61%
30/11/2022	MSCI ACWI IMI Millennials ESG Filtered Net Total Return Index	6,89	100,00%
30/11/2022	MSCI ACWI IMI MILLENNIALS	6,617	90,36%

* as reported in the PCD

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

The sustainable nature of an investment is assessed at investee company level.

By applying the Amundi’s above described Sustainable Investment definition to the Index constituents of this passively managed ETF Product, Amundi has determined that this Product has the minimum proportion of sustainable investments stated in page 1 above. However, please note that Amundi Sustainable Investment definition is not implemented at the Index methodology level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Principal adverse impacts are the most significant negative

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **From 01/11/2021 to 31/10/2022**

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, first graph shows the Taxonomy alignment in relation to all the investments of the financial product, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy is **28.11%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments?**

This product does not commit to have social sustainable investments

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● **How does the reference benchmark differ from a broad market index?**

MSCI ACWI IMI Millennials ESG Filtered Net Total Return Index (the "Index") objective is to measure the performance of companies that are expected to derive significant revenues from industries that target the preferences of the “millennial” generation and to exclude companies which are Environmental, Social and Governance (“ESG”) laggards relative to the theme universe.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

● ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

● ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product, while the second graph shows the Taxonomy alignment only in relation to the investment in financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **40.64%**

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with

an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***

MSCI World Select Catholic Principles ESG Universal and Environment Net Total Return Index (the "Index") is designed to measure the performance of a strategy that aims to select companies having lower carbon exposure and higher Environmental, Social and Governance (ESG) performance than that of the MSCI World Index (the "Parent Index"), while excluding companies that are involved in controversial businesses like weapons, gambling, adult entertainment, etc.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?
