The Sub-Fund integrates Sustainability Factors in its investment process as outlined in section "Overview of Responsible Investment Policy" in the Prospectus. The management process involves an investment allocation by the Investment Manager across four principal pillars of investment strategy based on the objective and policies of the Sub-Fund in order to select the Sub-Fund's investments. These comprise alpha (active return) generating macro, satellite, and selection strategies and a macro hedging strategy. The strategies involve a combination of a bottom up analysis of fundamentals, top-down analysis of macroeconomic developments as well as the selection of less correlated investments and the use of macro hedging to preserve return or mitigate risk.
