**2 SWING PRICING**

On business days when it believes that trading in a sub-fund's shares will require significant purchases or sales of portfolio investments, the Board may adjust the sub-fund's NAV to more closely reflect the actual prices of the underlying transactions, based on estimated dealing spreads, costs, and other market and trading considerations. In general, the NAV will be adjusted upward when there is strong demand to buy sub-fund shares and downward when there is strong demand to redeem sub-fund shares. For any given business day the adjustment will normally not be larger than 2% of the NAV, but the Board can raise this limit when necessary to protect the interests of shareholders.

As at 31 March 2023, the swing pricing adjustment has been applied for some sub-funds. The Net Asset Value per share after application of swinging pricing is detailed in the Financial details.

The swing factor is the amount by which the NAV is swung when the swing pricing process is triggered after net subscriptions or redemptions exceed the swing threshold. The factors to consider when setting the swinging factor include net broker commissions paid by the sub-fund and fiscal charges (e.g. stamp duty and sales tax).

For the period ended 31 March 2022, the maximum swing factors have been applied to the following sub-funds:
