What is this product?

Type: Shares of Amundi Öko Sozial Global High Yield Bond, an investment fund.

Term: The term of the Fund is open-ended. The Management Company may terminate the Fund by dissolution or merger with another fund, in accordance with the legal provisions.

Objectives: This product has a financial investment objective and a sustainable investment objective. **Amundi Öko Sozial Global High Yield Bond** is a financial product that promotes ESG characteristics in accordance with Article 8 of the Disclosure Regulation. More detailed information can be found in the prospectus under Section 14, "Investment objective", and in the "Additional investor information" annex under "Pre-contractual information" or "Sustainability (ESG) principles".

Financial investment objective: Steady yield with adequate diversification of risk

Sustainable investment objective: To achieve a higher ESG rating than the ICE BOFA Global High Yield Bond Index (Euro Hedged)

Investment strategy and instruments: The Fund invests at least 66% of its assets in corporate bonds. These individual securities are acquired directly (not through investment funds or derivatives) and have credit ratings below "investment grade" (S&P ratings below BBB-). The Fund may also be invested in other bonds offered by other issuers with investment grade or sub-investment grade credit ratings. It may not be invested in bonds with a rating below CCC-. Although the Fund may invest in both developed and emerging markets

, investment in developed markets is preferred. Up to 30% of the Fund's assets may be held in subordinated bonds, of which a maximum of 5% of the Fund's assets may be held in contingent convertible bonds. Equities generated from the conversion of contingent convertible bonds may be acquired.

As part of the investment strategy, up to 34% of the Fund's assets may be invested in derivative instruments (calculated on the basis of current market prices) which are used for hedging purposes. Derivative instruments are

used to permanently hedge assets not denominated in the currency of the Fund. As a result, there may be an increased risk of loss of the Fund's assets, at least

temporarily. The fund is listed in EUR. It is actively managed and is not based on any benchmark to achieve its financial investment objective. The Fund Management uses market analyses in combination with analysis of individual bond issuers to identify bonds that appear to have a higher credit rating than their ratings suggest. In an attempt to achieve a higher level of growth than the market average, bonds (predominantly corporate bonds) are selected, adjustments are made on the basis of interest rate fluctuations and derivative instruments are used.

External fund management: Amundi Asset Management US, Inc.

Intended Retail Investor: This product is intended for investors with a basic knowledge and with no or limited experience of investing in funds, seeking to increase the value of their investment over the recommended holding period and who are prepared to take on a high level of risk to their original capital.

Redemption and Dealing: Shares may be sold (redeemed) as stated in the prospectus and investor information document at the respective dealing price (net asset value). Further details can be found in the prospectus or the investor information document of Amundi Öko Sozial Global High Yield Bond.

Distribution Policy: As this is a distributing share class, investment income is distributed.

What are the risks and what could I get in return?

RISK INDICATOR

Lower risk

Higher risk

The risk indicator assumes you keep the product for five years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is medium-low risk class. The risk of potential losses from future performance is therefore classified as medium-low. In unfavourable market conditions, it is unlikely that our ability to pay you will be compromised.

Additional risks: Market liquidity risk could amplify the variation of product performances.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Product's performance. Further information can be found in the prospectus or the investor information document of Amundi Öko Sozial Global High Yield Bond.
