#### d) Valuation of assets

1. The net assets of the Company are shown in US-Dollar (USD) ("reference currency").

### Notes to the financial statements as at June 30, 2024 (continued)

- The value of a share ("net asset value per share") is denominated in the currency laid down in the relevant Annex to the Sales Prospectus ("sub-fund currency") unless any other currency is stipulated for any other share classes in the relevant Annex to the Sales Prospectus ("share class currency").
- 3. The net asset value per share and the issue, redemption and exchange price per share for each sub-fund are determined on each full business day (valuation day) and are calculated on the following business day (calculation date).
- 4. Insofar as information on the situation of the net assets of the Company must be specified in the annual or semi-annual reports and/or other financial statistics pursuant to the applicable legislative provisions or in accordance with the conditions of these Articles of Association, the value of the assets of each sub-fund is converted to the reference currency. The net sub-fund assets is calculated according to the following principles:
  - a) Securities which are officially listed on a stock exchange are valuated at the last available market price. If a security is officially listed on more than one stock exchange, the last available listing on the stock exchange which represents the major market for this security shall apply.
    - The Management Company may stipulate for individual sub-funds that transferable securities, money market instruments, derivative financial instruments (derivatives) and other assets officially listed on a securities exchange are valued at the latest available closing price which provides a reliable valuation. Details on this can be found in the Annexes to the Sales Prospectus for the relevant sub-funds.
  - b) Securities not officially listed on a securities exchange but traded on a regulated market are valued at a price that may not be lower than the bid price and not higher than the offered price at the time of valuation and which the Management Company deems in good faith to be the best possible price at which the securities can be sold.
    - The Management Company may, on behalf of individual sub-funds, determine that transferable securities, money market instruments, derivative financial instruments (derivatives) and other assets which are not officially listed on a securities exchange (or whose stock exchange rate is not deemed representative, e.g. due to lack of liquidity) but which are traded on another regulated market, shall be valued at the latest available price there, and which the Management Company considers in good faith to be the best possible price at which the transferable securities, money market instruments, derivative financial instruments (derivatives) and other investments can be sold. Details on this can be found in the Annexes to the relevant sub-funds.
  - c) OTC derivatives shall be evaluated on a daily basis using a method to be determined and validated by the Management Company in good faith on the basis of the sale value that is likely attainable and using generally accepted valuation models.
  - d) UCITS and UCIs are valuated at the most recently established and available redemption price. In the event that the redemption of the investment units is suspended, or no redemption prices are established, these units together with all other assets are valued at their appropriate market value, as determined in good faith by the Management Company and in accordance with generally accepted valuation standards.

### Notes to the financial statements as at June 30, 2024 (continued)

- e) If the prices in question are not fair market prices, if the financial instruments under (b) are not traded on a regulated market, and if no prices are set for financial instruments different from those listed under (a)–(d), then these financial instruments and the other legally permissible assets shall be valued at their current market value, which shall be established in good faith by the Management Company on the basis of generally accepted and verifiable valuation rules (e.g. suitable valuation models taking account of current market conditions).
- f) Liquid funds are valued at their nominal value plus profit.
- g) The market value of securities and other investments which are denominated in a currency other than the currency of the relevant sub-fund shall be converted into the currency of the sub-fund at the last mean rate of exchange. Gains and losses from foreign exchange transactions are on each occasion added or subtracted.

The Management Company may stipulate for individual sub-funds that the transferable securities, money market instruments, derivative financial instruments (derivatives) and other assets denominated in a currency other than that of the sub-fund shall be converted into the sub-fund currency at the exchange rate of the trading day. Profits and losses from foreign exchange transactions shall, on each occasion, be added or subtracted. Details on this can be found in the Annexes to the Sales Prospectus for the relevant sub-funds.

Any distributions paid out to sub-fund shareholders is deducted from the net assets of the sub-fund.

5. The net asset value per share is calculated separately for each sub-fund pursuant to the aforementioned criteria. However, if there are different share classes within a sub-fund, the net asset value per share is calculated separately for each share class within this fund pursuant to the aforementioned criteria. The composition and allocation of assets always occurs separately for each sub-fund.

#### e) Net realised gain/loss on sales of investments

The net realised gain/loss on sales of investments is calculated on the basis of the weighted average cost of the investments sold.

### f) Cost of investment securities
