## What is this product?

### Type

This product is an Undertaking for the Collective Investment in Transferable Securities (UCITS) Fund.

### Term

This product is an open-ended fund and has no maturity date. However, Artemis reserves the right to close the product should there be a business case to do so.

### Objectives

To increase the value of shareholders' investments primarily through capital growth.

#### Investment policy:

- The fund is actively managed.
- The fund invests principally (at least 80% of its assets) in equities of companies selected on a global basis.
- The Investment Manager aims to identify long-term growth trends that are not seasonal or cyclical or dependent on current economic events. Companies are sought which may benefit from these trends and which exhibit characteristics such as high and persistent barriers to entry, competent management teams whose remuneration is aligned to the success of the company, exposure to external factors, and high governance standards.
- Shares in the following types of companies (held either directly or indirectly via derivatives) are automatically excluded:
  - Tobacco: companies which derive more than 10% revenue from tobacco;
  - Gambling: companies which derive more than 10% of revenue from gambling;
  - Weapons: companies:
    - involved in the production of controversial weapons (including cluster munitions, landmines, biological and chemical weapons); or
    - which derive more than 10% revenue from conventional or nuclear weapons, related components and systems;
  - Fossil fuels: companies which derive more than 10% revenue from:
    - mining or sale of thermal coal; or
    - extraction, production or refining of either oil or gas.
- The fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. In that respect, the Investment Manager assesses the sustainability of each investment, including environmental, social and governance (ESG) factors such as a company's remuneration policy, energy and social supply policy, board diversity and any unequal voting rights alongside traditional financial metrics. However, investments are chosen on the basis of many quantitative (financial or ESG) or qualitative (e.g. quality and/or growth characteristics) attributes and need not rate highly on any or all of these sustainability factors to be included in the portfolio.

- In addition to ESG criteria considered during company selection, other sustainability criteria are taken into account in the thematic analysis at sector and company level.
- Stock selection is determined by the Investment Manager using information provided by the companies (for example company sustainability reports) and third-party data focusing on scores and metrics which the Investment Manager considers to be relevant.
- More information about the environmental or social characteristics for this fund is available in the pre-contractual disclosure for financial products referred to in Article 8 under SFDR in the fund's prospectus.
- At times the fund may invest in ADRs, GDRs, participatory notes and contracts for difference. Participatory notes and contracts for difference would be used to access markets where direct access to purchase equities may be difficult. Their use is not intended to create leverage. Investments in participatory notes and contracts for difference shall not exceed 10% of the fund's Net Asset Value.
- The fund may invest up to 10% of its Net Asset Value in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect.
- The fund may use derivatives and other techniques for hedging and for efficient portfolio management. The fund's derivatives may include, but are not limited to, futures and forward currency contracts.
- Subject to the limits set out in the 'Investment Restrictions' section of the fund's prospectus, the fund may also hold ancillary liquid assets for treasury purposes.
- Subject to the limits set out in the 'Investment Restrictions' section of the fund's prospectus, the fund may invest in bank deposits, money market instruments and money market funds in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. Higher levels of investments in bank deposits, money market instruments or money market funds may be held in periods of elevated equity market valuations to reduce risk.
- The fund may invest up to 10% of its Net Asset Value in other collective investment schemes.

#### Benchmark: MSCI AC World Index

The benchmark is a point of reference against which the performance of the fund may be measured. Management of the fund is not restricted by this benchmark. The deviation from the benchmark may be significant and the portfolio of the fund may at times bear little or no resemblance to its benchmark.

The benchmark does not take into account environmental and/or social characteristics promoted by the fund.

#### Intended retail investor

This product is intended for investors who are willing to invest for a long term and who plan to stay invested for at least 5 years. Investors should be prepared to take on a relatively high level of risk of loss to their original capital in order to get a higher potential return.

## What are the risks and what could I get in return?

### Risk

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level and poor market conditions could impact the value of your investment.

**Be aware of currency risk. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Other materially relevant risks for the fund are: Market volatility risk, Currency risk, Emerging markets risk and ESG risk. Please refer to the fund's prospectus, available at [www.artemisfunds.com/literature](http://www.artemisfunds.com/literature), for full details of these and other risks which are applicable to this fund.

## Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor.

The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of Artemis Funds (Lux) – Global Select Class I accumulation shares, USD, over the last 10 years. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

## What happens if FundRock Management Company S.A. is unable to pay out?

The Management Company is responsible for administration and management of the Fund, and does not typically hold assets of the Fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Management Company, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any, of this loss.

Depositary: Northern Trust Global Services SE.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is USD 10,000.

Investment: USD 10,000	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	142 USD	1,054 USD
<b>Annual cost impact (*)</b>	1.4%	1.5%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.3% before costs and 9.8% after costs.

#### Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	We do not charge an entry fee.	0 USD
<b>Exit costs</b>	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 USD
Ongoing costs taken each year		If you exit after 1 year
<b>Management fees and other administrative or operating costs</b>	0.9% of the value of your investment per year. This is an estimate based on actual costs over the last year.	91 USD
<b>Transaction costs</b>	0.5% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	51 USD
Incidental costs taken under specific conditions		If you exit after 1 year
<b>Performance fees</b>	There is no performance fee for this product.	0 USD

## How long should I hold it and can I take money out early?

### Recommended holding period: 5 years

The fund is designed to be held over the long term and we recommend that you hold this investment for at least 5 years.

You can request to take out some or all of your money at any time. You can typically request to buy or sell shares in the sub-fund on any business day (as set out in the fund's prospectus).

If you cash in at an early stage this will increase the risk of lower investment returns or a loss.

## How can I complain?
