# AXA IM Fixed Income Investment Strategies - Europe Short Duration High Yield

A Sub-Fund of AXA IM Fixed Income Investment Strategies

Share class: AXA IM Fixed Income Investment Strategies - Europe Short Duration High Yield F Capitalisation EUR (ISIN : LU0658026603)

This Sub-Fund is managed by AXA Funds Management S.A., part of the AXA IM Group

## Objective and Investment Policy

### Investment Objective

The Sub-Fund is actively managed without reference to any benchmark and seeks to generate income by investing in high yield debt securities (sub-investment grade corporate bonds) denominated in European currencies while seeking to avoid the risk of defaults.

### Investment Policy

The Sub-Fund is actively managed in order to capture opportunities in high yield European currency debt markets.

The following investment decisions are undertaken after comprehensive macroeconomic and microeconomic analysis of the market:

- issuer selection
- sector allocation
- credit curve positioning (the credit curve illustrates the relationship between the investment term and the credit yield)

The Sub-Fund invests primarily in high yield bonds denominated in a European currency and with an expected life term or redemption less than 3 years on the basis of the asset manager's expectations. Such high return bonds have a rating lower than BBB- according to Standard & Poor's (or equivalent rating by Moody's or other rating agencies) or are not rated.

The Sub-Fund may also invest in Investment Grade debt securities denominated in a European currency issued by foreign corporations or governments or governmental agencies or instrumentalities.

Within the limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives, in particular by entering into Credit Default Swaps. Derivatives may also be used for hedging purposes.

The Sub-Fund may invest up to 10% of net assets in contingent convertible bonds (CoCos). The Sub-Fund may also, and up to 10%, hold Distressed and Defaulted Securities as a result of holding bonds whose rating would have been downgraded to be defaulting or distressing, if, in the opinion of the Investment Manager, such bonds are consistent with the Sub-Fund's investment objective.

The Fund is a financial product that neither promotes environmental and/or social characteristics nor has a sustainable investment objective within the meaning of the articles 8 and 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

### Income

For Capitalisation share classes (Cap), the dividend is reinvested.

### Sub-Fund Currency

The reference currency of the Sub-Fund is EUR.

### Investment Horizon

The Sub-Fund is designed for investors who plan to invest for at least three (3) years.

### Processing of subscription and redemption orders

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent on any Valuation Day no later than 10 a.m. Luxembourg time. Orders will be processed at the Net Asset Value applicable to such Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors.

The Net Asset Value of this Sub-Fund is calculated on a daily basis.

## Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Sub-Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

### Why is this Sub-Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which are subject to some levels of variation, which may result in gains or losses.

### Additional Risks (risks materially relevant to the fund which are not adequately captured by the indicator)

Counterparty Risk: Risk of bankruptcy, insolvency, or payment or delivery failure of any of the Sub-Fund's counterparties, leading to a payment or delivery default.

Liquidity Risk: risk of low liquidity level in certain market conditions that might lead the Sub-Fund to face difficulties valuing, purchasing or selling all/part of its assets and resulting in potential impact on its net asset value.

Credit Risk: Risk that issuers of debt securities held in the Sub-Fund may default on their obligations or have their credit rating downgraded, resulting in a decrease in the Net Asset Value.

Impact of any techniques such as derivatives: Certain management strategies involve specific risks, such as liquidity risk, credit risk, counterparty risk, legal risk, valuation risk, operational risk and risks related to the underlying assets.

The use of such strategies may also involve leverage, which may increase the effect of market movements on the Sub-Fund and may result in significant risk of losses.
