AXA IM Fixed Income Investment Strategies - US Corporate Intermediate Bonds

A Sub-Fund of AXA IM Fixed Income Investment Strategies

Share class: AXA IM Fixed Income Investment Strategies - US Corporate Intermediate Bonds F Distribution Monthly USD (ISIN : LU2496290730)

This Sub-Fund is managed by AXA Funds Management S.A., part of the AXA IM Group

Objective and Investment Policy

Investment Objective

The Sub-Fund seeks to achieve a mix of income and capital growth by investing mainly in investment grade corporate debt securities denominated in USD, over a medium term period.

Investment Policy

The Sub-Fund is actively managed in order to capture opportunities in the US investment grade debt market, primarily investing in securities that are part of the Bloomberg Barclays US Corporate Intermediate benchmark index (the "Benchmark") universe. As part of the investment process, the Investment Manager has broad discretion over the composition of the Sub-Fund's portfolio and can take, based on its investment convictions, exposure to companies, countries or sectors not included in the Benchmark or take different positioning in terms of duration, geographical allocation and/or sector or issuer selection compared to the Benchmark, even though the Benchmark constituents are generally representative of the Sub-Fund's portfolio. Thus, the deviation from the Benchmark is likely to be significant. The following investment decisions are undertaken after comprehensive macroeconomic and microeconomic analysis of the market:

- issuer selection
- sector allocation
- credit curve positioning (the credit curve illustrates the relationship between investment term and credit yield)
- instrument selection

The Sub-Fund invests essentially in USD denominated corporate, government or public institutions bonds rated.

The Sub-Fund may also invest on an ancillary basis in securities which are rated sub-investment grade at the time of purchase.

Investment grade securities will be rated at least BBB- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager. Sub-investment grade securities will be rated between BB+ and B- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager.

In case of downgrade below B- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager, securities will be sold within 6 months.

If two different ratings of rating agencies exist, the lower rating will be considered, if more than two different ratings of rating agencies exist, the second highest rating will be considered.

The Sub-Fund may also hold money market instruments.

Within the limit of 200% of the Sub-Fund net assets, the investment strategy may be achieved by direct investments and/or through derivatives, especially

by entering into Credit Default Swaps. Derivatives may also be used for hedging purposes.

The Sub-Fund may invest up to 10% of net assets in contingent convertible bonds (CoCos).

The Sub-Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

Past performance

The Sub-Fund was launched on 17/05/2004.

The performance of the Sub-Fund is not tracking the benchmark index. For the different shareclasses of the Sub-Fund, the performance of the benchmark is displayed in the "Past Performance" section either as converted to the currency of the relevant shareclass or hedged against the reference currency of the Sub-fund in the case of hedged shareclasses ("hedged benchmark"). For some cases where the hedged benchmark is not available, the benchmark is displayed in the reference currency of the Sub-Fund, thus the performance of the displayed benchmark may deviate from the one of the relevant shareclass due to the performance differential inherent within the currency hedging activity not reflected in the benchmark.
