This Sub-Fund is managed by AXA Funds Management S.A., part of the AXA IM Group

### Objective and Investment Policy

#### Investment Objective

The Sub-Fund seeks to achieve a mix of income and capital growth by investing mainly in investment grade corporate debt securities denominated in USD, over a medium term period.

#### Investment Policy

The Sub-Fund is actively managed in order to capture opportunities in the US investment grade debt market. The following investment decisions are undertaken after comprehensive macroeconomic and microeconomic analysis of the market:

- issuer selection
- sector allocation
- credit curve positioning (the credit curve illustrates the relationship between investment term and credit yield)
- instrument selection

The Sub-Fund invests essentially in USD denominated corporate, government or public institutions bonds rated, at the date of purchase, between AAA and BBB- according to Standard & Poor's or equivalent rating (Moody's or any other rating agency).

The Sub-Fund may also hold money market instruments.

Within the limit of 200% of the Sub-Fund net assets, the investment strategy may be achieved by direct investments and/or through derivatives, especially by entering into Credit Default Swaps. Derivatives may also be used for hedging purposes.

The Unit Class aims at hedging the foreign exchange risk resulting from the divergence between the reference currency of the Sub-Fund and the currency of this Unit Class by using derivatives instruments whilst retaining the exposure to Investment Policy described above.
