What is this product?

Type

The Product is a share class of the Sub-Fund "AXA World Funds - Euro 7-10" (the "Sub-Fund") which is part of the SICAV "AXA World Funds" (the "Company").

Term

This product has no maturity date, although it has been created for 99 years and could be liquidated under the conditions laid down in the articles of incorporation of the company.

Objectives

Investment Objective

The Sub-Fund's investment objective is to seek performance by investing mainly in governments and corporate debt securities in Euros, over a medium term period. The Sub-Fund will be managed with an interest rate sensitivity between 5 and 10.

Investment Policy

The Sub-Fund is actively managed in reference to the FTSE EMEA Euro Broad Investment Grade Bonds 7-10 Yrs benchmark index (the "Benchmark") in order to capture opportunities in the Euro corporate and government bonds market. The Sub-Fund invests at minimum one third of its net assets in the components of the Benchmark. Depending on its investment convictions and after comprehensive macroeconomic and microeconomic analysis of the market, the Investment Manager can take more active positioning in terms of duration (duration measures in numbers of years, the portfolio's sensitivity to interest rate variations), geographical allocation and/or sector or issuer selection compared to the Benchmark. Thus, the deviation from the Benchmark is expected to be significant. However, in certain market conditions (high credit market volatility, turmoil...), the Sub-Fund's positioning on the above indicators may be close to the Benchmark.

The following investment decisions are undertaken after comprehensive macroeconomic and microeconomic analysis of the market:

- duration positioning (duration measures, in number of years, the portfolio's sensitivity to interest rate variations)
- yield curve positioning (the yield curve illustrates the relation between investment term and bond yield)
- geographical allocation
- issuer selection

The Sub-Fund invests permanently at least two thirds of its total assets in governments and corporate debt securities denominated in Euro.

The Sub-Fund will mainly invest in investment grade transferable debt securities issued by corporate and government entities.

Investment grade securities will be rated at least BBB- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager. Sub-investment grade securities will be rated between BB+ and B- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager. In case of downgrade below B- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated

then deemed to be so by the Investment Manager, securities will be sold within 6 months. If two different ratings of rating agencies exist, the lower rating will be considered, if more than two different ratings of rating agencies exist, the second highest rating will be considered.

The total assets of the Sub-Fund may be invested in or exposed to callable bonds.

The Sub-Fund may invest up to one third of its net assets in money market instruments, money market funds and bank deposits.

The selection of credit instruments is not exclusively and mechanically based on their publicly available credit ratings but also on an internal credit or market risk analysis. The decision to buy or sell assets is also based on other analysis criteria of the Investment Manager.

The Sub-Fund may invest up to 5% of net assets in contingent convertible bonds (CoCos).

Within the limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives, especially by entering into Credit Default Swaps. Derivatives may also be used for efficient portfolio management or hedging purposes.

The Sub-Fund will be managed with an interest rate sensitivity between 5 and 10. If interest rates increase by 1%, the Net Asset Value of the Sub-Fund may decrease by 5% up to 10%.

The Sub-Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

Income

For Distribution share classes (Dis), the dividend is distributed.

The product is constituted as a separate entity from AXA Investment Managers Paris S.A. In case of default of AXA Investment Managers Paris S.A., the assets of the product kept by the custodian will not be affected. In case of default of the custodian, the risk of financial loss of the product is mitigated because of the legal segregation of the assets of the custodian from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	€389	€588
Annual cost impact (*)	3.9%	2.0% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.06 % before costs and 1.09 % after costs.

We may share part of the costs with the person selling you the Product to cover the services they provide to you. They will inform you of the amount.
