This Product is authorised in Luxembourg and in accordance with the UCITS Directive.

Date of Production of the KID: 26/03/2024

You are about to purchase a Product that is not simple and may be difficult to understand

What is this product?

Type

The Product is a share of the Sub-fund "AXA World Funds - SUSTAINABLE EQUITY QI" (the Sub-fund) which is part of the SICAV "AXA World Funds" (the "Company").

Term

This product has no maturity date, although it has been created for 99 years and could be liquidated under the conditions laid down in the articles of incorporation of the company.

Objectives

Investment Objective

To seek to achieve a long-term return above that of the MSCI World Total Return Net Index (the "Benchmark"), with lower volatility and to apply an ESG approach.

Investment Policy

The Sub-Fund is actively managed in reference to the Benchmark and seeks to achieve its financial goal by primarily investing in a well-diversified basket of equity securities of issuers that comprise the Benchmark. The investment universe of the Sub-Fund may extend to equity securities listed in countries of the Benchmark that are not constituents of the Benchmark. The investment manager may take, based on its investment convictions, overweight or underweight positions compared to the Benchmark, meaning that deviation from the Benchmark is likely to be significant. However, in certain market conditions, the Sub-Fund's performance may be close to the Benchmark. This could occur, for example, when share performances are closely aligned to earnings growth, there is a low level of macroeconomic risk and the performance of the equity market aligns closely with the performance of the low volatility and quality factors targeted by the investment manager.

The portfolio construction will focus on fundamental drivers of risk and returns assessed through the use of a proprietary quantitative process.

The Sub-Fund invests in equities and equity-related securities of companies of any capitalisation, with a minimum of investment of 51% of net assets in equities, at all times. The Sub-Fund may invest up to 5% of net assets in Money Market Instruments. Within a limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives. Derivatives may be used for efficient portfolio management and hedging purposes.

The Sub-Fund promotes environmental and/or social characteristics by investing in securities that have implemented good practices in terms of environmental impacts, governance and social (ESG).

Firstly, the Sub-Fund bindingly applies at all times AXA IM's Sectorial Exclusion and ESG Standards Policies www.axa-im.com/responsible-investing/sector-investment-guidelines. Secondly, in selecting individual securities, the investment manager applies an ESG 'scoring upgrade' approach which requires the ESG scoring of the Sub-Fund to be higher than the rating of the investment universe after removing at least the 20% worst ESG scores and uses a proprietary

quantitative process designed to identify fundamental drivers of risk and return while seeking to significantly improve the Sub-Fund's ESG profile compared to that of the Benchmark by considering each stock's factor exposure alongside its ESG scores and carbon intensity (measured in CO2 Tonnes/Million \$ revenue) and/or water intensity. This process tilts the portfolio toward stocks with higher ESG scores and lower carbon intensity and/or water intensity while maintaining the desired factor exposure.

The ESG data used are based on methodologies relying in part on third party data and in some cases are internally developed, are subjective and may change over time. The lack of harmonised definitions can make ESG criteria heterogeneous. As such, the different strategies using ESG criteria and ESG reporting are difficult to compare with each other. Strategies incorporating ESG criteria and those incorporating sustainable development criteria may use data that appear similar but which should be distinguished because their calculation method may be different. AXA IM's ESG different methodologies described herein may evolve in the future to take into account any improvements in data availability and reliability, or any developments of regulations or other external frameworks or initiatives -among others.

The Sub-Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

Income

For Distribution share classes (Dis), the dividend is distributed.

Investment Horizon

The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 5 years.

Processing of subscription and redemption orders

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent on any Valuation Day no later than 3 p.m. Luxembourg time. Orders will be processed at the Net Asset Value applicable to such Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors.

The Net Asset Value of this Sub-Fund is calculated on a daily basis.

Intended retail investor

The sub-fund is designed for retail investors who have neither financial expertise nor any specific knowledge to understand the sub-fund but nevertheless may bear total capital loss. It is suitable for clients who seek growth of capital and ESG. Potential investors should have an investment horizon of at least 5 years.

Depository

State Street Bank International GmbH (Luxembourg Branch)

Further Information

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7 which is the a medium risk class. This rates the potential losses from future performance at a medium level. The risk category associated to this product was determined based on past observations, it is not guaranteed and can evolve in the future.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not included in the Summary risk indicator can be materially relevant, such as counterparty risk. For further information, please refer to the prospectus. This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		€10 000	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment		
Stress	What you might get back after costs	€2 590	€3 200
	Average return each year	-74.10%	-20.38%
Unfavourable	What you might get back after costs	€8 490	€9 880
	Average return each year	-15.10%	-0.24%
Moderate	What you might get back after costs	€10 350	€15 790
	Average return each year	3.50%	9.57%
Favourable	What you might get back after costs	€12 810	€18 160
	Average return each year	28.10%	12.67%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable Scenario : This type of scenario occurred for an investment between 12 2021 and 01 2024.

Moderate Scenario : This type of scenario occurred for an investment between 10 2017 and 10 2022.

Favourable Scenario : This type of scenario occurred for an investment between 10 2016 and 10 2021.

An appropriate benchmark of the Product was used to calculate the performance.

What happens if AXA INVESTMENT MANAGERS PARIS S.A. is unable to pay out?

The product is constituted as a separate entity from AXA Investment Managers Paris S.A. In case of default of AXA Investment Managers Paris S.A., the assets of the product kept by the custodian will not be affected. In case of default of the custodian, the risk of financial loss of the product is mitigated because of the legal segregation of the assets of the custodian from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	€627	€1 205
Annual cost impact (*)	6.3%	2.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.72 % before costs and 9.57 % after costs.

We may share part of the costs with the person selling you the Product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	5.50 % of the amount that you pay when you enter the investment. This includes distribution costs of 5.50 % of the amount invested. This is the maximum amount you will pay. The person who sold you the product will inform you of the actual costs.	Up to €550
Exit costs	We do not charge an exit fee for this Product.	€0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.65% of the value of your investment per year. This percentage is based on actual costs over the last year.	€61
Transaction costs	0.17 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	€16
Incidental costs taken under specific conditions		
Performance fees (and carried interest)	There is no performance fee for this Product.	€0

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This Product has no minimum required holding period, the 5 years has been calculated to be in line with the time frame which the Product may need in order to achieve its investment objectives.

You may sell your investment before the end of the recommended holding period without penalty. The performance or risk of your investment may be negatively impacted. The section "What are the costs?" provides information on the impact of costs over time.

Please refer to the "What is this product" section for the redemption procedure.

How can I complain?
