What is this product?

Type

This is an investment fund established as a Company With Variable Capital (SICAV).

Objectives

Investment objective The Sub-Fund is a feeder sub-fund. The Feeder Fund is actively managed, being invested at least for 85% of its assets in units of the actively managed Master Fund (AZVALOR BLUE CHIPS, FI) which qualifies as a "master UCITS". The objective of this Sub-Fund is to achieve capital appreciation through investment in the Master Fund.

Investment policies The Master Fund is a collective investment fund, established and existing under the laws of Spain, registered with the Spanish supervisory authority Comisión Nacional del Mercado de Valores (CNMV) under registration number 5112. It was established on 27th January, 2017 and is regulated and authorized by the CNMV as a UCITS fund. The benchmark mentioned below in the Investment objective and policy of the Master Fund does not necessarily represent the investment universe or a constraint for the portfolio allocation of the Manager of the Master Fund.

The investment objective of the Master Fund is to ensure sustained profitability over time, by applying a value investing philosophy selecting undervalued assets with high upside potential. At least 75% of total exposure shall be in equities from all sectors, investing over 75% of exposure to equities in large caps (3 billion euro minimum), and the rest in small and mid-caps.

Investments shall be mainly in OECD issuers/markets, and up to 35% of total exposure may be invested in emerging issuers/markets. Geographical or sectoral concentration may temporarily occur. Currency risk shall be 0-100% of total exposure.

The rest of total exposure shall be invested in fixed income, mainly public yet also private (including liquid money market instruments both listed and unlisted) from issuers/markets of the Euro zone. Fixed income issues shall have a credit rating equal to or greater than that of the Kingdom of Spain at any given moment.

The choice of assets is guided by value.

Benchmark The Sub-Fund refers to MSCI World Index.

Redemption and Dealing This product is designed for longer term investments; you should be prepared to stay invested for at least 5 years. However, you can redeem your investment without penalty at any time during this period, or hold the investment longer.

Distribution Policy This Share Class does not pay dividends. Earned income is retained in the NAV.

Launch date The sub-fund was launched on 19/12/2017. The share class was launched on 27/01/2022.

Sub-fund Currency The reference currency of the Sub-Fund is EUR.

Switching between Funds Shareholders may switch all or part of their holdings into shares of another sub-fund provided they meet the minimum holding requirements of the destination Sub-Fund. Switching orders must be provided in writing. Full details of the switching process are given in the prospectus.

Intended retail investor

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get

depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at <https://funds.waystone.com/public>.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 March 2015 and 31 March 2020.

Moderate: this type of scenario occurred for an investment between 28 June 2014 and 28 June 2019.

Favourable: this type of scenario occurred for an investment between 29 December 2012 and 29 December 2017.

| Recommended holding period | | 5 years | |
|----------------------------|---|--------------------------|--|
| Example Investment | | 10,000 EUR | |
| Scenarios | | if you exit after 1 year | if you exit after 5 years (recommended holding period) |
| Minimum | There is no minimum guaranteed return. You could lose some or all of your investment. | | |
| Stress | What you might get back after costs Average return each year | 906 EUR -90.9% | 716 EUR -41.0% |
| Unfavourable | What you might get back after costs Average return each year | 5,260 EUR -47.4% | 5,510 EUR -11.2% |

What happens if the Sub-Fund is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should we default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

| Example Investment 10,000 EUR | if you exit after 1 year | if you exit after 5 years (recommended holding period) |
|-------------------------------|--------------------------|--|
| Total Costs | 265 EUR | 1,851 EUR |
| Annual cost impact* | 2.6% | 2.9% |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.0% before costs and 5.1% after costs.

Composition of costs

| One-off costs upon entry or exit | | Annual cost impact if you exit after 1 year |
