

**Key Investor Information Document:** This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Barings German Growth Fund a sub-fund of Barings Investment Funds plc Class B EUR Acc - ISIN No. IE00BG7PHW03

Barings Investment Funds plc is an Open Ended Investment Company. Baring International Fund Managers (Ireland) Limited is the Manager of the Company.

### OBJECTIVE AND INVESTMENT POLICY

**Objective:** To provide long-term capital growth by investing in Germany.

**Investment Policy:** To invest at least 75% of the fund directly or indirectly in the shares of German companies or which generate the majority of their income from Germany.

- The fund is also permitted to invest to a lesser extent in shares of companies outside of Germany (excluding emerging markets), and in fixed income and cash.
- The fund may use derivative instruments for both investment and hedging purposes. The return on a derivative is linked to movements in an underlying instrument referenced by the derivative such as currency or interest rates. The base currency of the fund is EUR.

**Distribution Policy:** N/A - Income will be rolled up into the value of your investment.

**Dealing Frequency:** Daily. Investors can buy and sell their shares on demand on each Business Day (as defined in the prospectus and supplement).

**Benchmark:** 'HDAX® (Total Return) Index'. The fund is actively managed and is not designed to track the Benchmark so its performance may deviate materially from the Benchmark. The investment manager has complete discretion in making investments and is not constrained by the Benchmark. The fund may invest significantly in instruments which are not included in the Benchmark. The Benchmark is used only for risk management and performance comparison purposes. The investment manager may consider, for example, issuer exposures, sector weights, country weights and tracking error in each case relative to the Benchmark but does not use the Benchmark as an investment limitation.

**For further details please refer to the prospectus and supplement.**

### RISK AND REWARD PROFILE

Lower risk ← Higher risk  
Typically lower rewards ← Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk number is based on the rate at which the value of the simulated data of the fund has moved up and down in the past, and is an indicator of absolute risk.

- Historical and simulated data may not be a reliable indicator for the future
- The fund's ranking is not guaranteed and may change over time
- The lowest risk category does not mean the investment is risk free
- The fund is categorised as a 6 for the purposes of this table due to the nature of its investments
- The value of investments and the income may go down as well as up and investors may not get back the amount they invest

**The following risks may not be captured by the risk and reward indicator:**

- During exceptional market conditions there may be insufficient buyers and sellers to allow the Fund to buy and sell investments readily which could affect the Fund's ability to meet investors' redemption requests

- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund's value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Changes in exchange rates between the currency of the Fund and the currencies in which the assets of the Fund are valued can have the effect of increasing or decreasing the value of the Fund and any income generated.
- Country or region specific funds have a narrower focus than those which invest broadly across markets and are therefore considered to be more risky.
- Investments in equities may be subject to significant fluctuations in value.
- The Fund can hold smaller company shares which can be more difficult to buy and sell as they may trade infrequently, in small volumes and their share prices may fluctuate more than those of larger companies.
- A more complete description of the risk factors is set out in the prospectus under "Risk Considerations" and in the supplement for the fund.

## CHARGES FOR THIS FUND

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	1.56%
Charges taken from the fund under specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges and may vary from year to year. An estimate has been used as it provides a more accurate figure. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

The Fund will incur portfolio transaction costs which are paid from the assets of the Fund.

For more information on charges, please refer to the relevant sections of the Prospectus.

## PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The performance shown is based on the net asset value, after the deduction of all ongoing charges and portfolio transaction costs, with distributable income reinvested.
- The fund launched in 2019. The share class launched in 2019. The chart shows past performance of the share class and of the Benchmark for all full calendar years available since the share class was launched.
- The past performance calculation does not take into account the entry and exit charges but does take into account all other ongoing charges.
- The fund is not designed to track the Benchmark.
