

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Berenberg Sustainable World Equities - unit class M D

WKN / ISIN: A2N6AP / LU1878855821

The fund is managed by Universal-Investment-Luxembourg S.A. (the "management company").

Objectives and investment policy

The Fund is actively managed.

The fund's investment objective is to achieve an appropriate and steady performance.

To achieve this, at least 51% of Fund assets will be invested in global equities. Investments are made primarily in standard stocks and in high-growth small-caps and mid-caps. The Fund endeavours to outperform its benchmark, MSCI® World (Ticker MSDEWIN). However, the Fund does not aim to replicate the performance of the benchmark index. The Fund aims to achieve long-term capital appreciation, while taking into account its sustainable investment objective. The sustainable investment objective is to make a positive contribution to solving global challenge (so called positive impact). The focus here is on four global challenges or fields of action that have been defined by the Berenberg Wealth and Asset Management ESG Office in cooperation with the Berenberg Wealth and Asset Management portfolio management units. In accordance with Article 41(1)(e) of the Law of 17 December 2010, no more than 10% of net Fund assets may be invested in target funds (UCITS and other UCIs). The Fund invests maximum 10% of net Fund assets in bonds and bond-like securities. Maximum 10% of the net Fund assets may be invested in subordinated bonds (contingent convertible bonds only). No more than 10% of net fund assets may be invested in 1:1 certificates on stocks and indices. No more than 5% of net Fund assets may be invested in real estate investment trusts (REITs). Financial derivative instruments (FDIs) traded on a regulated market or over the counter (OTC) may be used for investment and hedging purposes. This Fund aims to be a sustainable investment under Article 9 of the Disclosure Regulation (Regulation (EU) 2019/2088).

The benchmark for the fund is: 100% MSCI World NR (EUR). This benchmark is determined for the fund by the investment management company and may be changed. The fund does not aim to reproduce the benchmark. The portfolio manager may invest at their own discretion in securities or industries not included in the benchmark in order to capitalise on specific investment opportunities. The investment strategy will restrict the extent to which the portfolio holdings may deviate from the benchmark. This deviation may be material.

Within this scope, the choice of the individual assets is performed by the Fund manager.

Returns from the Fund (where applicable, of this share class) will be distributed; interim distributions are possible.

Investors may, in general, redeem their units with the management company on each trading day, i.e. each entire bank working day in Luxembourg and Frankfurt am Main. The fund may, however, suspend redemptions when extraordinary circumstances exist which, taking into consideration the interests of the unitholders, make a suspension appear necessary.

Recommendation: This fund may not be suitable for investors that are planning to withdraw their monies from the fund within a period of less than 5 years.

Risk and reward profile

This indicator relies on historic data and cannot be used for a prediction of future developments. The categorisation of the Fund may change in the future and is not a guarantee. Even a fund in category 1 is not an entirely risk-free investment.

The Fund has been placed in category 6 because its share value fluctuates strongly and therefore the chance of profit but also the risk of loss can be high.

It may be that due to the calculation model not all risks are accounted for when placing the fund in a risk category. An extensive description of the risks is included in the section "Notes on Risks" in the prospectus. The following risks have no direct bearing on the categorisation but may nevertheless be of relevance to the fund:

- Credit risks: The fund may invest a part of its assets in debt securities issued by governments or companies. The issuers of these debt securities may become insolvent which may result in the partial or full loss of the value of their debt securities.
- Risks from the use of derivatives: The fund may use derivatives for the purposes described above under "Objectives and Investment Policy". This does result in both increased opportunities and increased risk of loss. The use of derivatives to hedge against losses may also reduce the profit opportunities of the fund.
- Custody risks: The custody of assets, particularly abroad, may involve a risk of loss arising from the possibility that the custodian or sub-custodian becomes insolvent, breach duties of due care or engages in abusive conduct.
- Operational risks: The Fund may become a victim of fraud or other criminal actions. It may also suffer losses caused by misunderstandings or mistakes of employees of the investment management company or third parties or it may suffer damages caused by external occurrences such as natural disasters.

Charges

One-off charges taken before or after you invest:

Entry charge / Exit charge: 0.00% / 0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the Fund over the year:

Ongoing charge: 0.99%

Charges taken from the Fund under certain specific conditions:

Performance fee: none

The ongoing management and custody of the fund's assets as well as the distribution of the units are financed through the fees and other costs. Arising costs decrease the chances of return for the investor.

The ongoing charge mentioned here was incurred in the preceding financial year of the fund which ended in December 2023. The ongoing charge may vary from year to year. The ongoing charges figure does not include Performance fees and charges for the purchase and sale of assets (Portfolio transaction costs). The funds' annual report for each financial year will include detail on the exact charges made. Further information about costs can be found in the detailed description of the fund in "Appendix - fund overview" of the prospectus.

Past performance

Past performance is not a guarantee for the future.

In this calculation, all costs and fees with the exception of the entry charge have been deducted.

The fund was set up on 11.12.2018. This share class was set up on 11.12.2018.

The past performance was calculated in Euro.
