Objectives

Seeking a capital gain.

This mixed sub-fund invests a minimum of two-thirds of its net assets in shares, debt instruments and money market instruments of issuers based in or exercising a dominant portion of their activities in emerging countries.

The sub-fund invests more than 60% and up to 100% of its net assets in shares at all times.

In terms of bond investments, the investment manager will pay particular attention to ESG criteria by performing an ESG rating of the various issuers based on qualitative and quantitative criteria.

Investments are made without any geographical, sector-based or monetary restrictions.

The investments will be mainly made in securities issued in USD, local currencies or EUR. In principle, the foreign-exchange risk is not hedged. However, in exceptional cases and depending on the valuation outlook, certain currencies may be hedged.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: China Connect risk, Emerging market risk

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

What happens if BL is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Banque de Luxembourg. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

These amounts depend on how much you invest, how long you hold the product and how well the product does.
