## What is this product?

### Type

This is an open ended UCITS fund.

### Term

There is no maturity date of the fund.

### Investment objective

The fund aims to provide capital growth and income in excess of the ICE BofA 3 Month US Treasury Bill Index +2.5% before fees have been deducted\* over a three to five year period by investing in bonds. The fund will invest in bonds issued by governments, government agencies, supra-nationals and companies of emerging market countries, whose activities the investment manager considers create positive social or environmental impact and which the investment manager deems to be sustainable investments.

\*For the target return after fees for each share class please visit the Schroder webpage:

<https://www.schroders.com/en/lu/private-investor/investing-with-us/historical-ongoing-charges/>

The fund is actively managed and invests its assets in (i) sustainable investments, which are investments that contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs by contributing positively towards social development and environmental themes and (ii) investments that the investment manager deems to be neutral under its sustainability criteria, such as cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the fund more efficiently.

The investment manager will select sustainable investments from a universe that have been determined as meeting the investment manager's impact criteria. The impact criteria include an assessment of an investment's contribution to the UN SDGs and the investment manager's assessment of impact via its proprietary impact investment management framework and tools. The investment manager's process is also aligned with the Operating Principles for Impact Management.

The fund will invest in bonds issued by governments, government agencies, supra-nationals and companies with the aim to foster financial inclusion and provide decisive funding to economically vulnerable communities globally as well as bonds related to sustainable infrastructure projects and clean energy initiatives.

The fund will help to advance one or more of the UN SDGs, including but not limited to: the end of poverty in all its forms; the provision of access to affordable, reliable, sustainable and modern energy; the provision of inclusive and sustainable economic growth, employment and decent work for all; the building of resilient infrastructure, the promotion of sustainable infrastructure and fostering of innovation; and the reduction of inequality within and among countries.

The fund invests at least two-thirds of its assets in bonds denominated in various currencies and issued by governments, government agencies, supra-nationals and companies of emerging market countries.

The fund may invest up to 50% of its assets in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds).

The fund may also invest up to one third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash. The investment strategy of the fund and the use of derivatives may lead to situations where it is considered

appropriate that prudent levels of cash and money market investments will be maintained, which may be substantial or even represent (exceptionally) 100% of the fund's assets. This will be limited to a maximum of six months (otherwise the fund will be liquidated).

The fund does not directly invest in the sectors included in the BlueOrchard's Public Asset Exclusion List [https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy\\_Public-Assets.pdf](https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy_Public-Assets.pdf)

The fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the investment manager's rating criteria.

The investment manager may also engage with companies held by the fund to seek to improve sustainability practices and enhance social and environmental impacts generated by underlying investee companies.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

The fund is valued with reference to the net asset value of the underlying assets.

**Benchmark:** The fund's performance should be assessed against its target benchmark being to exceed ICE BofA 3 Month US Treasury Bill Index +2.5% over a three to five year period and compared against the J.P. Morgan Corporate EMBI Broad Diversified Composite Index. The comparator benchmark is only included for performance comparison purposes and does not determine how the investment manager invests the fund's assets. The fund's investment universe is expected to overlap to a limited extent with the components of the comparator benchmark. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the comparator benchmark. The investment manager will invest in companies or sectors not included in the comparator benchmark.

The target benchmark has been selected because the target return of the fund is to deliver or exceed the return of that benchmark as stated in the investment objective. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund.

**Dealing Frequency:** You may redeem your investment upon demand. This fund deals daily.

**Distribution Policy:** This share class pays an annual distribution at a variable rate based on gross investment income.

**Depositary:** J.P. Morgan SE

### Intended retail investor

The fund is intended for retail investors (i) with basic investment knowledge; (ii) who understand the basics of buying and selling shares in stock market listed companies and the way these shares are valued; (iii) who can accept large short-term losses; and (iv) wanting growth over [the longer term] but with easy access to their cash. This investment should form part of a varied investment portfolio. This product is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

## What are the risks and what could I get in return?

### Risks

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

### Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period:		3 years	
Example Investment:		GBP 10000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	GBP 8060	GBP 8520
	Average return each year	-19.4%	-5.2%
Unfavourable	What you might get back after costs	GBP 8740	GBP 8900
	Average return each year	-12.6%	-3.8%
Moderate	What you might get back after costs	GBP 10060	GBP 10700
	Average return each year	0.6%	2.3%
Favourable	What you might get back after costs	GBP 11040	GBP 11510
	Average return each year	10.4%	4.8%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The maximum loss you could incur would be the full value of your investment

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

Be aware of currency risk. If you choose a foreign currency share class you will be exposed to currency risk and your final return will depend on the exchange rate between the foreign currency and your local currency. The risk is not considered in the indicator shown above.

**Liquidity risk:** In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

**Credit risk:** A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

You can find more information about the other risks in the prospectus at: <https://api.schroders.com/document-store/SISF-Prospectus-LUEN.pdf>

## What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depositary, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- GBP 10 000,00 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	GBP 208	GBP 427
Annual cost impact (*)	2.1%	1.4% each year

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1,0 % before costs and -0,4 % after costs.

## Composition of costs
