EQUITY DIVIDEND EUROPE, a subfund of the FCP BNP PARIBAS COMFORT, short named as BNPP COMFORT

Class "Classic Capitalisation" - ISIN code LU0233246957

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

Objectives and investment policy

The Fund belongs to the category of fund of funds. It seeks to increase the value of its assets over the medium term by investing primarily in capitalization shares of other funds that primarily invest in shares issued by European companies or companies operating in Europe, which distribute dividends higher than the average in such markets. The selection of each fund goes through a rigorous process including quantitative and qualitative research to identify the ones that best meet pre-defined selection criteria, including historical performance, investment style, risk profile and consistency of the investment philosophy. The end result is a diversified portfolio of approximately 20 funds offering a broad distribution of risks across countries, sectors, investment styles and market capitalizations. The Fund is actively managed, and as such aims at outperforming the index MSCI Europe (NR) (the "benchmark"). Although neither the Fund nor its underlying's funds intend to track the benchmark, investors should be aware that, due to the diversified exposure obtained through the fund-of-funds approach, the Fund's volatility is automatically reduced and therefore may, from time to time, be comparable to the volatility profile of the benchmark.

Incomes are systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

Risk and reward profile

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
The risk category is justified by the investment mainly in Stocks and Shares, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.

For more information on risks, please see the risks section of the Fund's prospectus, which is available at <http://www.bnpparibas-am.com>.
