## US Growth, a Subfund of the SICAV BNP Paribas Funds, short named as BNP Paribas

Class "Classic H EUR Capitalisation" - ISIN code LU0823434401

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group

## Objectives and Investment Policy

The Fund seeks to increase the value of its assets over the medium term by investing in shares issued by US companies or companies operating in the USA, with greater-than-average potential for growth and/or relatively stable growth in profits.

Although the majority of the Fund equity securities may be components of the index Russell 1000 Growth (RI) (the «benchmark»)(hedged in EUR), the Investment Manager uses its wide discretion in relation to the benchmark to invest in companies and sectors not included in the benchmark in order to take advantage of specific investment opportunities. This results in a concentrated portfolio of approximately 50 stocks, weighted by conviction and diversified across sectors and issuers in order to reduce risks.

The Investment Manager applies also BNP PARIBAS ASSET MANAGEMENT Sustainable Investment Policy, which takes into account Environmental, Social and Governance (ESG) criteria in the investments of the Fund.

Internal investment guidelines have been defined, including in reference to the benchmark, and are regularly monitored to ensure the investment strategy remains actively managed, while staying within pre-defined risk levels. Due to diversification and similar geographical/thematic constraints, investors should be aware that the Fund's risk and return profile may, from time to time, be comparable to the risk and return profile of the benchmark.

Income are systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days).

This share class aims at hedging its currency exchange risk against the Fund's portfolio exposure currency. However, the currency exchange risk cannot be completely neutralized as the hedging technique is based of the Fund's NAV.

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.

- Why is the Fund in this specific category?  
The risk category is justified by the investment mainly in Stocks and Shares, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:
