The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

BOND NORDIC INVESTMENT GRADE, a subfund of the SICAV BNP PARIBAS FLEXI I

Class "Classic Distribution" - ISIN code LU2020652959

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

Objectives and investment policy

The Fund is actively managed without reference to an index. The Fund is a feeder fund of the Norwegian master fund ALFRED BERG Nordic Investment Grade (the «Master Fund»). The Fund seeks to increase the value of its assets over the medium term by investing at least 85% of its assets in the Master Fund which has primarily exposure to investment grade Nordic bonds and money market instruments denominated in NOK. After hedging, exposure to currencies other than NOK will be minimal at Master Fund level.

The Fund and Master Fund performance may differ due to ancillary assets held by the Fund, and potential discrepancies in operating expenses across both structures. The Master Fund is actively managed without reference to a benchmark.

A dividend may be distributed.

Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
The risk category is justified by the investment mainly in Interest Rate instruments. The investor's attention is drawn to the fact that an increase in interest rates results in a decrease in the value of investments in bonds and debt instruments and more generally fixed income instruments.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Credit Risk:** This risk relates to the ability of an issuer to honour its commitments: downgrades of an issue or issuer rating may lead to a drop in the value of associated bonds.
- **Counterparty Risk:** This risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.

In order to be processed at a specific net asset value, requests for subscriptions, conversions and redemptions must be received by local agents or distributors or directly by the transfer agent before 16:00 CET (for STP orders) or 12:00 CET (for non STP orders) in Luxembourg on the day preceding the valuation day. Subscriptions in kind are not authorised.

In order to be processed at a specific net asset value, requests for subscriptions, conversions and redemptions of the Master Fund must be received by local agents or distributors or directly by the transfer agent of the Master Fund before 12:00 CET (for STP and non STP orders) in Norway on the valuation day. Payment take place within two trading days of the valuation day.

- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.
- **Derivatives Risk:** When investing in over the counter or listed derivatives, the Fund aims to hedge and/or to leverage the yield of its position. The attention of the investor is drawn to the fact that leverage increases the volatility of the subfund.
