BNY MELLON
INVESTMENT MANAGEMENT

BNY Mellon Global Infrastructure Income Fund

EUR H (ACC.) (HEDGED) (ISIN: IE00BZ18VZ93)

a sub-fund of BNY Mellon Global Funds, plc. This Fund is managed by BNY Mellon Fund Management (Luxembourg) S.A.

Objectives and Investment Policy

OBJECTIVE

To maximise total returns from income and capital growth by gaining exposure to companies located worldwide that are engaged in infrastructure and related operations.

POLICY

The Fund will:

- invest anywhere in the world;
- invest primarily (meaning at least 80% of the Fund's Net Asset Value (NAV) in a concentrated portfolio of company shares and similar investments of traditional infrastructure sectors (such as energy, industrials, transportation and utilities) and non-traditional infrastructure sectors (such as telecoms, senior housing, health care and real estate industries), ("Infrastructure Companies");
- invest the majority of its assets in higher yielding companies in order to provide income in the form of dividends to the Fund;
- limit investment in other collective investment schemes to 10%; and
- neither promote environmental and/or social characteristics pursuant to Article 8 of the Sustainable Finance Disclosure Regulation "SFDR" nor have sustainable investment as its objective pursuant to Article 9 of SFDR. Consequently, for the purposes of SFDR it is considered an Article 6 Fund.

The Fund may:

- invest up to 25% in emerging markets (excluding Russia); and

- use derivatives (financial instruments whose value is derived from other assets) with the aim of risk or cost reduction or to generate additional capital or income.

Benchmark: The Fund will measure its performance against S&P Global Infrastructure NR Index (the "Benchmark").

The Fund is actively managed, which means the Investment Manager has absolute discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. However, as the Benchmark covers a significant proportion of the investable universe, the majority of the Fund's holdings will be constituents of the Benchmark but the weightings in the portfolio are not influenced by those of the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

OTHER INFORMATION

Share Class Hedging: The Fund's base currency is USD whereas this share class currency is EUR. In order to reduce the risk of exchange rate movements between the share class currency and the base currency, a hedging strategy is used, although its outcome is not guaranteed.

Treatment of income: net income generated will be retained within the Fund and reflected in the value of your shares.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (Irish Time) on each day which is a business day in Ireland and the U.S. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is EUR 5,000.

The Fund is not subject to the UK sustainable investment labelling and disclosure requirements.

Risk and Reward Profile

We have calculated the risk and reward indicator, as shown above. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility). It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 6 because its historical value has shown relatively high volatility. With a Fund rating of 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

Geographic Concentration Risk: Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.

Objective/Performance Risk: There is no guarantee that the Fund will achieve its objectives.

Currency Risk: This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

Derivatives Risk: Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

Share Class Hedging Risk: The hedging strategy is used to reduce the impact of exchange rate movements between the share class currency and the base currency. It may not completely achieve this due to factors such as interest rate differentials.

Emerging Markets Risk: Emerging Markets have additional risks due to less-developed market practices.

Concentration Risk: A fall in the value of a single investment may have a significant impact on the value of the Fund because it typically invests in a limited number of investments.

Charges to Capital: The Fund takes its charges from the capital of the Fund. Investors should be aware that this has the effect of lowering the capital value of your investment and limiting the potential for future capital growth. On redemption, you may not receive back the full amount you initially invested.

Counterparty Risk: The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

Investment in Infrastructure Companies Risk: The value of investments in Infrastructure Companies may be negatively impacted by changes in the regulatory, economic or political environment in which they operate.

High Yield companies risk: Companies with high-dividend rates are at a greater risk of not being able to meet these payments and are more sensitive to interest rate risk.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
