Comprehension Alert: You are about to purchase a product that is not simple and may be difficult to understand

What is this product?

Type: The Product is shares in an exempted limited company incorporated under the laws of the Republic of Ireland.

Objectives: The Fund seeks total return through capital appreciation and current income. The Fund invests primarily in a diversified portfolio of equities (including American and Global depository receipts), convertible and non-convertible fixed-income securities (with a maximum of up to 10% in structured notes) and directly or indirectly in eligible financial indices. The Investment Manager seeks to invest (directly or indirectly) across different asset types and is unconstrained by market capitalization, sector allocation, investment theme and allocation across asset classes. Under normal market conditions, the Fund intends to invest a majority in U.S. securities and up to 25% of its net assets in non-U.S. securities (securities of issuers incorporated outside of the U.S.). Subject to the investment restriction set out in the Prospectus, the U.S. and non-U.S. securities in which the Fund invests shall be listed, traded or dealt in on any Regulated Market worldwide (with the exclusion of Russia). The Fund will not invest more than 20% of its net assets in Emerging Markets securities. The Fund may also invest in Rule 144A securities (range between 15% and 45% of the Fund's net assets) and the Fund may use derivatives for efficient portfolio management and/or hedging purposes and/or investment purposes (limited to currency forwards, futures, options, warrants, interest-rate swaps). The remaining assets may be invested in eligible collective investment schemes (no more than 10% of its net assets), cash, money market instruments and cash equivalent securities, such as commercial paper, certificates of deposit or treasury bills and/or do so pending investment or re-investment or, at any time, for temporary defensive purposes. The Fund uses the S&P; 500 Index and the ICE BofA All U.S. Convertible EX Mandatory Index. as comparator benchmarks to compare performance. The Fund is actively managed and is not constrained by any benchmark. For Accumulating classes, any income or gains of the Fund net of expenses will be accumulated and reinvested into the net assets of the Fund.

For Distributing classes, any income less expenses earned will be distributed in accordance with the distribution policy in the Prospectus.

Investors can redeem shares in the Fund on every business day meaning a day on which banks in Ireland and on which the New York Stock Exchange, are open for normal business subject to the 'Dealing Days for Subscription and Redemptions' section of the Supplement of the Fund and the 'Issue of Shares' and 'Redemption of Shares' section of the Supplement. For full details please refer to the 'Investment Objective and Policy', 'Issue of Shares' and 'Redemption of Shares' sections of the Supplement and 'The Shares' section of the Prospectus.

Recommendation: The Fund is suitable for investors that have a moderate to high risk tolerance, long-term time horizon, and must be able to accept temporary capital losses due to the potentially volatile nature of the underlying assets, therefore, investment in the Fund may not be appropriate for investors planning to withdraw their money within 3 to 5 years.

Intended retail investor: The Fund is not listed on an exchange and as such is intended for investors who understand the risks of investing in private funds and are willing to assume the potential for capital loss associated with investment in such companies including the loss of the total sum invested. The minimum investment per investor is the euro equivalent of US \$ 100,000. The Fund has a long-term investment policy and is not intended for investors who will need access to their investment before the end of the recommended holding period of 3 years.

Maturity date: The Product has no maturity date. Calamos is not entitled to terminate the Product unilaterally. The Fund may not grow to or maintain an economically viable size, in which case its directors may determine to wind up the Fund at a time that may not be opportune for investors.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. This indicator is based on historical data and may not be a reliable indication of the future risk profile of the fund.

The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean investment is 'risk free'. This indicator is not a measure of the risk that you may lose the amount you have invested.

We have classified this product as 3 out of 7, which is a below average risk class.

This rates the potential losses from future performance at a below average, and poor market conditions could impact the capacity of the Fund to pay you. For a more detailed explanation of the risks, please refer to the "Risk Factors" section of the Prospectus and the "Risk Warnings" section of the Supplement.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance scenarios

Investment EUR 10,000			
Scenarios		1 Year	3 Years (Recommended Holding Period)
Stress	What you might get back after costs	5,268	4,558
	Average Return Each Year	-47.32%	-23.04%
Unfavourable	What you might get back after costs	6,427	3,728
	Average Return Each Year	-35.73%	-28.03%
Moderate	What you might get back after costs	8,395	5,919
	Average Return Each Year	-16.05%	-16.04%
Favourable	What you might get back after costs	10,952	9,383
	Average Return Each Year	9.52%	-2.10%

This table shows the money you could get back over the next 3 years (recommended holding period), under different scenarios, assuming that you invest EUR 10,000. The scenarios shown illustrate how your investment could perform.

You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on proxies of similar products, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if GemCap is unable to pay out?

As a shareholder in the Fund, you would face a financial loss in the event of a default of the Fund. You would not be able to make a claim to the Financial Services Compensation Scheme or any other compensation body about the Fund in the event that the Fund were unable to pay any amounts due to you on a winding up at the end of its life.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest EUR 10 000. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment Scenarios EUR 10,000	If you cash in after 1 year	If you cash in at the end of the recommended holding period
Total costs	227	493
Impact on return (RIY) per year	2.27%	2.27%

Composition of Costs

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period

This table shows the impact on return per year			
One-Off Costs	Entry costs	0.00%	The impact of the costs you pay when entering your investment.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing Costs	Portfolio transaction costs	0.27%	The impact of the costs of buying and selling underlying investments for the product.
	Other ongoing costs	2.00%	The impact of the costs that we take each year for managing your investments.
Incidental Costs	Performance fees	0.00%	The impact of the performance fee. We take these from your investment if the product outperforms its high water mark, of (a) the highest previous net asset value per share of the series concerned at the end of a performance period; and (b) the initial issue price of the shares of that series.
	Carried interests	N/A	The impact of carried interests. We do not charge carried interests to the Company.

How long should I hold it and can I take my money out early?

Recommended holding period: 3 years

The recommended holding period for the product is minimum of 3 years. The Fund investment strategy is intended for long term investment and returns can be volatile. Investors may request the redemption of all or some of their shares on any Dealing Day (being the last business day of each month and/or such other or further day or days as may be determined by the Fund directors in their discretion from time to time), subject to written notice being received by the Administrator (RBC Investor Services) not less than 20 business days prior to the relevant Dealing Day (or such shorter notice period as the Fund directors may in their discretion determine generally or in respect of specific requests).
