Capital International Japan Equity

This fund is a sub-fund of Capital International Fund. The investment adviser of the fund is Capital International Sàrl, part of The Capital Group Companies.

Class	B EUR
ISIN	LU0235150082
SEDOL	B1LH288

Objectives and investment policy

The fund seeks to achieve long-term growth of capital by investing normally in companies domiciled and/or having their principal place of business in Japan.

Investors can buy and sell shares of the fund on a daily basis. This fund may only be appropriate for long-term investment.

Essential features

The fund invests primarily in equity of Japanese companies that are admitted to an official listing or dealt in on another regulated market. It is managed on a stock-by-stock basis without reference to index weighting. It is focused on investing in companies with long-term growth potential. The fund does not use short-selling or leverage.

Dividends

The shares in this class are accumulating and no dividends are distributed.

Risk and reward profile

The fund is rated 6 due to the nature of its investments which include the risks listed below. These factors singularly or in combination may impact the value of the fund's investments or expose the fund to losses.

- **Equities risk:** The prices of equity securities may decline in response to certain events, including those directly involving the companies whose securities are owned by the fund, overall market changes, local, regional or global political, social or economic instability and currency fluctuations.
- **Liquidity risk:** Some securities, primarily unlisted securities and/or those traded in OTC markets, under certain circumstances may not be traded quickly enough in the market to prevent a loss.
- **Operational risk:** This fund may invest on markets where settlement systems are less well organised than those of developed markets. Thus settlement may be delayed and cash or securities belonging to the fund may be in jeopardy.
- **Counterparty risk:** Other financial institutions provide services to the fund such as safekeeping of assets or may serve as a counterparty to financial contracts such as derivatives. There is a risk the counterparty will not meet their obligations.
- **Derivative instruments risk:** While the fund intends to use derivative instruments in a prudent manner and primarily for hedging and/or efficient portfolio management purposes, derivative instruments may expose a fund to additional risks related to the credit risks of the counterparty and potential for increased volatility and reduced liquidity in comparison to the underlying security positions.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser or distributor about this. Exit charges are only applied when there is excessive trading or market timing.

The ongoing charges are based on expenses for the year ending December 2011. This figure may vary from year to year. It excludes portfolio transaction costs which do affect returns.

For more information about charges, please see the 'Expenses' section in the prospectus and the latest annual or semi-annual reports, available at capitalinternational.com.
