Unit A EUR Acc (ISIN: LU1966631001)
a sub-fund of the Carmignac Portfolio SICAV

Carmignac Gestion Luxembourg is the management company of this UCITS.

Objectives and investment policy

The key features of the sub-fund are as follows:

- The objective of the Sub-Fund is to achieve long-term capital growth and involves active, flexible management with a focus on equity markets.
- This Sub-Fund is an actively managed UCITS. An actively managed UCITS is one where the investment manager has discretion over the composition of its portfolio, subject to the stated investment objectives and policy. This Sub-Fund is actively managed in reference to its Reference indicator: the MSCI WORLD NR (USD) index (Bloomberg code: M1WO) calculated with net dividends reinvested. The Sub-Fund's investment universe is at least partly derived from the Reference indicator in terms of allocation by region, sector or market capitalisation. The Sub-Fund's investment strategy is not dependent on the Reference indicator; therefore, the Sub-Fund's holdings and the weightings may substantially deviate from the composition of the Reference indicator. There is no limit set on the level of such deviation.
- In order to achieve its investment objective, the Sub-Fund seeks to invest in companies considered by the Investment Manager to be of high quality. The equity strategy is implemented through a portfolio of direct investment in securities and to a lesser extent, derivatives. The Sub-Fund is not constrained by any benchmark and is free to invest in the Investment Manager's choice of equities irrespective of industry and geography.
- Investments in high-quality companies are determined based upon a quantitative screening and fundamental analysis. The Sub-Fund may also, on an ancillary basis, hold cash and/or invest in other transferable securities.

Other information:

- In order to achieve its investment objective, the Sub-Fund may invest in futures traded on Eurozone and international markets, including emerging markets, for exposure or hedging purposes. The other derivatives that may be used by the portfolio manager for exposure or hedging purposes include CFDs (contracts for difference), forwards, forward exchange contracts, options (simple, barrier, binary), and swaps (including performance swaps), involving one or more risks/underlying instruments in which the portfolio manager may

invest.

- At least 51% of the portfolio is invested in developed and emerging market equities, without restrictions in terms of allocation by geographical zone, sector type or market capitalisation.
- Additional extra-financial analysis such as Environmental, Social and Governance criteria are also implemented in the Sub-Fund to contribute to stock selection decision.
- The sub-fund may invest up to 10% of its net assets in units or shares of investment funds. The portfolio manager also reserves the right to invest up to 10% of the net assets in bonds with a rating below investment grade.
- This sub-fund may not be suitable for investors planning to withdraw their investment within five years.
- Investments may be redeemed each business day on request. Subscription and redemption requests are centralised on each NAV calculation and publication day before 18:00 CET/CEST and are executed on the next business day using the previous day's NAV.
- This unit is an accumulation unit.

Risk and reward profile

This indicator represents the annual historical volatility of the sub-fund over a 5-year period. Its aim is to help investors understand the uncertainty attached to gains and losses that may have an impact on their investment.

- Historical data used to calculate this indicator may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category of this sub-fund is not guaranteed and may change over time.
- Category 1 does not mean the investment is risk-free.
- This sub-fund is placed in category 6 owing to its exposure to the equity markets and interest rate, emerging markets, credit and currency risks.
- The sub-fund's capital is not guaranteed.

Risks to which the sub-fund may be exposed and which could lead to a fall in the net asset value to which the indicator gives too little consideration:

- Counterparty risk: the sub-fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations, especially in the case of derivatives traded OTC.
- For more information on risks, please refer to the prospectus of the sub-fund.
