What is this product?

Type

This product is an investment fund.

Objectives

Investment objective The company CB-ACCENT LUX offers easy access to the different financial markets, while providing risk diversification.

Investment policies CB-ACCENT LUX - Erasmus Bond Fund invests at least two thirds of its net assets in fixed or variable rate bonds of first class issuers of an OECD Member State. Said transferable securities should be rated at least as Investment Grade. Up to 10% of assets may be invested through other collective investments.

However, up to 30% of net assets may be invested in instruments with a rating lower than Investment Grade and/or of issuers from non- OECD Member States.

On an ancillary basis, the Sub-fund may also hold liquidity and use derivative instruments for risk hedging or efficient portfolio management.

As with all vehicles that invest in transferable securities, the value of the Sub-fund may change. Therefore, net asset value per share may increase or decrease depending on market performance.

Redemption and Dealing Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy This Share Class does not pay dividends. Earned income is retained in the NAV.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of ADEPA Asset Management S.A. to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at corner.ch.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between October 2019 and October 2022.

Moderate: this type of scenario occurred for an investment between February 2017 and February 2020.

Favourable: this type of scenario occurred for an investment between December 2018 and December 2021.

What happens if CB-Accent Lux is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should we default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 CHF is invested.

Example Investment 10,000 CHF	if you exit after 1 year	if you exit after 3 years (recommended holding period)
Total Costs	188 CHF	563 CHF
Annual cost impact*	1.9%	1.9% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.1% before costs and 0.2% after costs.
