F&C Diversified Growth Share-class A GBP Hedged

(ISIN LU0308885960), a Fund of F&C Portfolios Fund.

The independent Management Company for the Fund is RBS (Luxembourg) S.A.

Objective and Investment Policy

The objective is to achieve an increase in the value of your investment over the medium to long term.

The Fund seeks to achieve this by gaining exposure to or investing in equities (ordinary shares in companies), and bonds as well as indirect investment in property and commodities.

This will be accomplished mainly through a combination of investment in Exchange Traded Funds (A security that tracks an index, a commodity or a basket of assets but is bought and sold like an equity), financial derivatives (an investment contract between the Fund and a counterparty the value of which is derived one or more underlying asset), listed certificates issued by banks (such as a savings certificate that entitles the purchaser to receive interest over a fixed period) and third party collective investments similar in structure to this fund.

The effect that changes in currency exchange rates may have on your investment can be reduced through the purchase

currency forward contracts (the purchase or sale of a specific amount of currency at a predetermined price on a predetermined future date). This is commonly known as a 'Hedge'. The Hedge reduces the effect of both positive and negative changes in exchange rates.

The Fund may also purchase liquid assets (cash, government and corporate bonds and other monetary instruments).

Income generated by the Fund may be paid to you or, at your request, reinvested to increase the value of your investment.

You may withdraw your investment on demand during any working day in Luxembourg. Your withdrawal instruction must be received before 06.00 central European time in order for your investment to be withdrawn the same day. Proceeds will normally be paid to you three business days later.

Risk and Reward Profile

The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historic Fund data.

Historical data may not be a reliable indicator of the Fund's future risk profile thus the risk category shown is not guaranteed and may change over time. The lowest category does not mean 'risk free'.

The given rank reflects the effect of the Fund investing mainly in equities. Equities generally provide higher rewards and higher risk.

The indicator does not take into account the following risks:

Market Risk: the value of shares held by the Fund may go down as well as up. There can be no assurances that the investment objectives of the Fund will be achieved.

Currency Risk: your investment may be adversely affected by changes in currency exchange rates.

Counterparty Risk: to gain greater income the Fund may deposit cash with various approved Counterparties. Return of the cash is dependant upon the continued solvency of the Counterparty.

Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment.

Derivative Counterparty Risk: receiving the profit due from a derivative is dependant upon the counterparty fulfilling its contractual obligation.

Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.
