Directors' Report

The year under review turned out to be a strong one for most asset classes. With a few exceptions – notably commodities – risk assets outperformed perceived safe havens.

The period started with an element of relief, as swift action by financial regulators soothed concerns of contagion effects from the banking failures in the US and Europe in March last year. Core government bonds benefited temporarily from the mini-banking crisis on hopes that tighter credit conditions might mean fewer interest-rate hikes would be needed to bring inflation back to target levels. However, yields rose again over the second and third quarters of 2023. Although the Federal Reserve (Fed), European Central Bank (ECB) and Bank of England (BoE) paused interest rate hikes during this period, they maintained a hawkish bias amid persistently high core inflation and strong labour markets.

Risk assets mostly overcame global growth fears and continued to advance into the summer. However, sentiment deteriorated in the autumn as sticky inflation and resilient US economic data pushed up bond yields (which move inversely to price) amid expectations that the Fed would keep interest rates 'higher for longer'. Disappointing economic data from China and the eurozone added to the risk-off tone, as did rising geopolitical tensions following the terrible events in Israel and Gaza.

The tide turned thereafter, however, as slower-than-expected inflation in the US and Europe, together with a dovish pivot from the Fed, fuelled anticipation of earlier and more aggressive rate cuts. Core bond yields fell, which proved beneficial for equities, particularly growth-oriented stocks. Credit spreads (the yield premiums over 'risk-free' government bonds) also resumed their tightening amid improved risk appetite and rising hopes of a 'soft landing' for the US economy. Towards the end of 2023, risk assets were further supported by easing fears of an escalation of hostilities in the Middle East. However, these concerns resurfaced at the start of 2024 as rebel groups attacked Red Sea shipping routes and US military bases in the region.

In terms of monetary policy, the Fed slowed the pace of its interest-rate hikes early in 2023 and raised rates for the final time in July. This brought the total of rate hikes to 50 basis points (bps) over the 12 months under review, with the federal funds rate reaching a 22-year high of 5.25%-5.5%. The Fed's communications in September cautioned that the fight against inflation was not over, bolstering the view that rates would stay higher for longer. However, the central bank moderated its tone in December, with Fed Chair Jerome Powell appearing to lay the groundwork for rate cuts in 2024. The Fed subsequently kept interest rates flat at its first two meetings of the new year, which led government bonds and rate-sensitive sectors such as real estate to give back some of their gains from the tail end of 2023. However, it was not enough to halt the rise in equities, which were buoyed by strong earnings from large-cap US firms. In March, further company updates and signs of strength in the US economy saw the rally broaden to include more cyclical sectors such as industrials, financials and energy, taking the S&P 500 index to a new all-time high towards the end of the reporting period.

The BoE raised rates by a total of 100 bps over the year under review, pausing its hiking cycle in August amid signs of easing inflation and growing economic concerns. These worries were amplified in February 2024 following the announcement that the UK had entered a technical recession following a contraction in Q4 GDP. In continental Europe, the ECB also implemented 100 bps of hikes over the 12-month period and paused its tightening cycle in September. Elsewhere, the Bank of Japan (BoJ) retained negative interest rates until just before the period end. The BoJ's rate hike in March was its first increase since 2007, and followed several signals that the central bank's era of ultra-loose monetary policy may be coming to an end. Inflation has exceeded the BoJ's target for some time and Japan's biggest companies recently announced the largest wage rises for more than 30 years amid the higher cost of living. Despite the BoJ's pivot, the yen weakened further towards the end of the review period, finishing at a 37-year low against the US dollar.

Overall, global equities performed strongly, with the MSCI All-Country World index (ACWI) gaining 25.0% in local-currency terms over the 12 months to the end of March 2024. By region, Japan and the US fared best. Japan's exporter-heavy stock market was supported by the weaker yen, and investors welcomed robust company earnings and shareholder-friendly corporate reforms. Meanwhile, the US market's dominance by large-cap technology stocks bolstered returns and helped it outperform the MSCI ACWI. Continental European equities ended higher but underperformed the global index. Elsewhere, emerging-market equities also underperformed amid concerns about the pace of China's post-pandemic economic recovery and the country's heavily indebted property sector. UK shares ended higher but lagged other regions. Elevated inflation drove expectations that the BoE may be slower than its peers to cut interest rates. For much of the year, the UK market also suffered from its underweight exposure to technology shares relative to the ACWI and S&P 500. This trend eased slightly in March thanks to the outperformance of banking and energy shares, where the UK market has more exposure.

In fixed income, core government bond yields were volatile over the period, rising significantly in the autumn of 2023 before retracing most of these moves later in the period. In the US, the 10-year Treasury yield hit multi-year highs in October as markets priced in the Fed's higher-for-longer rate outlook, before easing to end the period at 4.20%, 73 bps higher over the 12 months. In the UK, the 10-year gilt yield finished the year 44 bps higher at 3.93%, while the equivalent German Bund yield ended the period just 1 bp higher at 2.30% amid concerns for the eurozone economy.

Credits spreads on investment-grade and high-yield corporate bonds tightened over the review period. Corporate bonds were initially supported by signs of falling core inflation, lower gas prices and hopes of an improving economic outlook. Spreads subsequently ballooned after the bank failures in March last year, but later tightened as contagion fears eased. Aside from a brief spell of widening in October, spreads continued to tighten in the second half of the review period as better-than-expected corporate earnings helped overcome economic growth concerns in some regions.

Our main focus in managing the CT (Lux) European Select Fund is on stock selection. We seek to identify high-quality companies with the pricing power to sustain strong returns. During the year, new holdings included Saint-Gobain, Richemont and Publicis. Saint-Gobain specialises in construction and industrial materials. The trend towards urbanisation is supportive, as is the increasing demand for home renovations to meet tighter environmental standards. Luxury-goods firm Richemont has strong brands and sales figures, with jewellery (Cartier and Van Cleef) performing particularly well. Publicis was trading on an attractive valuation and leads peers with its technology offering. The advertising and PR agency is continuing to grow revenues, particularly through Epsilon and Sapient. Sales included Lonza (pharmaceuticals, biotechnology and nutrition) and Pernod Ricard (drinks). The outlook for both companies had weakened.

Our main focus in managing the CT (Lux) Pan European Smaller Companies Fund is on stock selection, informed by macroeconomic and thematic views. We favour companies that have a competitive advantage and pricing power generated by brands, patented processes, regulatory barriers to entry and strong market positions. During the year, new positions included Rotork, Convated and Konecranes. Rotork is a market leader in flow control and instrumentation solutions, across oil and gas, chemical processing and the water and power sectors. Convated manufactures medical and surgical equipment. The company

Directors' Report

(continued)

continues to grow organically, launching new products, and margins are improving. The new CEO has ambitious plans to improve execution. Konecranes operates in a concentrated market and generates reliable, repeat revenues from the service industry. Sales included SimCorp and Big Yellow. We sold financial software firm SimCorp following a takeover bid. We switched from self-storage business Big Yellow into Safestore on valuation grounds.

Our main focus in managing the CT (Lux) Pan European Equity Dividend Fund is on stock selection, informed by macro-economic and thematic views. We favour high-quality companies with the pricing power to sustain strong returns and growing dividends. During the year, new positions included FinecoBank (online banking a brokerage), Smurfit Kappa (packaging) and Ashtead (industrial equipment rental). FinecoBank was trading at an attractive valuation, is a beneficiary of higher interest rates and has a strong dividend yield compared to its peers. Smurfit Kappa is a high-quality sustainability leader and is pushing through price increases to offset higher input costs. The Westrock acquisition should generate synergies and allow the company to penetrate the US market. Ashtead was trading at a reasonable valuation after a period of weakness. The company possesses strong ESG credentials, sound management and good capital allocation. We sold Roche; the pharmaceutical firm published weak results and has a soft product pipeline. Other sales included BNP Paribas; we switched into the Italian bank Intesa Sanpaolo on valuation grounds.

Within the CT (Lux) – American Fund, we initiated positions in Nvidia, Meta and J.M. Smucker. Semiconductor firm Nvidia is a leader in 3D graphics processing units and widely considered a crucial player in Al development. Positive sentiment around Al has seen Nvidia become one of the biggest companies in the world by market capitalisation over recent months, and we opened a small position to restrict any impact on the risk profile of the portfolio. Meta is a social media technology company and the premier social advertising platform, with a daily userbase of around two billion. The company's massive reach and engagement continue to drive network effects, and its ability to target users provides significant value to advertisers. We expect further monetisation opportunities in 2024, including advertising on Facebook and Instagram "Reels". J.M. Smucker is one of the largest US food manufacturing and catering companies, with leading positions in several growing categories and steadily increasing sales. We initiated a position after the share price fell on concerns around the impact of weight-loss drugs and increased leverage following the acquisition of Hostess Brands. However, we believe Smucker has potential to reduce its debt burden more quickly than expected and meet its synergy targets. Sales included Marvell Technology, State Street and Electronic Arts.

New holdings in the CT (Lux) — American Select Fund during the year included Charles Schwab, Meta and Global Payments. Charles Schwab provides processing and custody services to independent financial advisors, as well as retail brokerage, financial advisory and banking services. Cash sorting (clients transferring their cash out of low-interest-rate accounts into higher-yielding assets) now appears to be less of a headwind, providing an opportunity for the company to shrink its balance sheet. Meanwhile, Charles Schwab's acquisition of TD Ameritrade offers potential for cross-selling and cost synergies. Meta is a social media technology company and the premier social advertising platform, with a daily userbase of around two billion. The company's massive reach and engagement continue to drive network effects, and its ability to target users provides significant value to advertisers. We expect further monetisation opportunities in 2024, including advertising on Facebook and Instagram "Reels". Global Payments is a leading provider of payment technology and software solutions. The firm boasts recurring tech-enabled revenue and a diverse portfolio across geographies and industries which tend to be less impacted during economic downturns, and it is now realising the benefits of its 2019 acquisition of Total System Services. Sales included State Street, Northern Trust and Electronic Arts.

In the CT (Lux) American Smaller Companies Fund, new holdings included FIGS, Glaukos and ATI. FIGS is a direct-to-consumer healthcare apparel retailer, focused on scrub wear. The company has achieved high profitability by disrupting the historically unbranded and commoditised global healthcare apparel industry; as supply-chain and cyclical headwinds abate, it has an opportunity to expand its currently small share of this large and fragmented market. Ophthalmic medical device company Glaukos focuses on minimally invasive surgical treatment of glaucoma and corneal degeneration (keratoconus). Following its approval by the Food and Drug Administration, the firm's iDose implant drug-delivery system, which is used to treat glaucoma, has potential to take market share as it lasts four times as long as its closest competitor. ATI is a global supplier of melt and mill products, such as titanium, titanium alloys and nickel-based alloys and superalloys, for multiple industries. The firm is transitioning to focus on aerospace and defence, and it is exiting its zero-margin businesses. Future growth should be supported by customers diversifying away from Russian titanium and strong appetite for commercial aircraft engines, as well as increased demand for maintenance, repair and overhaul services. Sales included Wingstop, Morningstar and Nutanix.

In the CT (Lux) Global Focus Fund, new positions during the period included Visa, Applied Materials and Insulet. Visa provides exposure to the fast-growing, oligopolistic payments industry. Its long-established network is difficult for competitors to replicate, making Visa well positioned to benefit from several secular trends, including the switch from cash to card and the continued growth of e-commerce. We favour Applied Materials for its scale as the world's largest semiconductor fabrication equipment supplier and its diverse revenue streams in the growing semiconductor industry. Insulet is a medical device company that develops, manufactures and markets an insulin infusion system for people with insulin-dependent diabetes. Benefiting from an experienced leadership team, the company is gaining market share in the US and has potential to expand beyond the 25 end-market countries it currently services. In addition, Insulet's pay-as-you-go business model boosts its appeal as a long-term investment. Sales included HDFC Bank due to some concerns about the wider macro environment. We also exited Lonza during the period.

In the CT (Lux) Global Select Fund, new positions during the period included Procter & Gamble, Compass Group and Marvell Technology. Procter & Gamble offers a defensive earnings profile and has historically been a best-in-class earnings compounder. In addition, the consumer staples giant is delivering enhanced operating leverage, which should support earnings growth. Food catering and outsourcing firm Compass is gaining significant market share from smaller competitors in areas such as healthcare and senior living. Compass enjoys strong win rates in the US and is replicating this success in Europe. Over the longer term, we believe sales are likely to benefit from the shift towards first-time outsourcing and a focus on healthier eating trends. Marvell is a developer and producer of data infrastructure and semiconductor solutions. Its expertise in digital semiconductors acts as a high barrier to entry and positions the company to benefit from the trend towards cloud computing and Al. Marvell is also benefiting from a number of growth drivers across its datacentre, 5G and automotive segments. To help fund these purchases, we sold out of JPMorgan after a period of strong performance and exited PepsiCo given short-term concerns around earnings. We also sold out of offshore wind power leader Ørsted as we wanted to allocate the capital elsewhere.

In the CT (Lux) Global Equity Income Fund, new positions during the period included Broadcom, ConocoPhillips and DSM. The highly profitable Broadcom boasts strong market positions in data centres, networking and recurring software. The firm is also a leading player in the AI ASIC (application-specific integrated circuit) market and helps design custom AI chips for large companies such as Alphabet. Broadcom should therefore benefit from growing demand

Directors' Report

(continued)

related to generative Al. ConocoPhillips is one of the best-managed oil and gas businesses, with significant reserves, a low cost base and a diversified asset base with a low rate of decline. These factors, along with the firm's robust balance sheet, mean that Conoco is well positioned to withstand periods of volatile oil prices. DSM is an innovator in nutrition, health and beauty products and benefits from a broad product portfolio, diverse end markets and a resilient business model with a clear focus on sustainable solutions for nutrition and health. Sales included Novartis and 3i Group following their strong performances. We also exited State Street amid concerns about the impact of high interest rates and bond yields on its margins.

In the CT (Lux) Global Smaller Companies Fund, new positions during the period included Clean Harbors, Vita Coco and Kokusai Electric. Clean Harbors provides environmental and industrial services, including waste disposal for companies and public authorities, and benefits from strong pricing power and a healthy mix of services. The stock is also attractively valued relative to industry peers. Vita Coco is the leading producer of coconut water drinks and boasts a strong brand image, substantial market share and robust supply chain. Vita Coco also benefits from longstanding relationships with coconut producers, which provides access to a previously untapped market. Kokusai Electric manufactures equipment used in the production of semiconductors. The company continues to invest in R&D to maintain its competitive moat in batch atomic layer deposition (ALD), a process used to precisely deposit thin films of semiconductor material on the base materials of chips. Kokusai is also gaining market share in treatment equipment for improving the quality of the films used in semiconductor manufacturing, which could form an important source of growth. We sold out of VAT Group after a period of strong performance. We also exited BlackLine, as we see increasing competition in the cloud-based software industry, potentially impacting the firm's growth outlook.

In the CT (Lux) Global Extended Alpha Fund, new positions in the long book included Bio-Techne, Procter & Gamble and S&P Global. Bio-Techne provides tools, instruments and consumables for various life sciences and diagnostics-focused end markets. Beyond its legacy leadership position in proteomics reagents, the company's exposure to fast-expanding areas of the life sciences industry has the potential to drive organic growth. Bio-Techne also benefits from a best-in-class financial profile. Procter & Gamble offers a defensive earnings profile and has historically been a best-in-class earnings compounder. In addition, the consumer staples giant is delivering enhanced operating leverage, which should support earnings growth. S&P Global is a leading global provider of financial market intelligence and analytics. We believe the potential for issuance normalisation should support management's aims of achieving top-line growth, expanding margins and delivering low-to-mid-teens earnings growth. The company also boasts key competitive advantages based on its strong global brand and integration in the financial services industry. To help fund these purchases, we sold out of JP Morgan after a period of strong performance and exited PepsiCo given short-term concerns around earnings. We also sold out of renewable energy firm Ørsted as we wanted to reallocate capital elsewhere. In the short book, new positions included an auto parts company, an investment management company and an amusement park corporation. We exited positions in an alternative asset manager, a shipping company and a software and consulting business.

In the CT (Lux) UK Equities Fund, AstraZeneca and Shell were the biggest new holdings. Both stocks have large weights in the benchmark FTSE All-Share, and we therefore initiated positions to limit the impact of large rallies in these names on the fund. AstraZeneca has an excellent sales and earnings-growth profile, with pipeline opportunities in asthma treatments and lung, breast and ovarian cancer drugs. It also has the potential to improve margins, earnings quality and cashflows. Shell boasts market-leading positions in liquid natural gas and petrochemicals and a resilient business model. With a new management team and a best-in-class marketing capability, Shell is an exemplar in energy transition. The fourth quarter of 2023 was a particularly busy period for activity as we initiated several new positions and closed others to increase the sustainability focus of the fund as it became categorised as Article 8 in November. We therefore sold Rio Tinto and Weir due to their exposure to the broad mining sector. New positions included Wheaton Precious Metals, IMI, Antofagasta and Cranswick. Over the year, we also sold some stocks which we felt did not meet the quality and growth criteria for this fund, including Smith & Nephew, Synthomer and Legal & General.

In the CT (Lux) UK Equity Income Fund, new positions included real-estate investment trusts Land Securities and Segro. Both were trading at discounts to their net asset values. In addition, we believe Land Securities' strategy of diversifying across sectors provides an advantageous risk-reward profile, and the company's capital allocation has become more disciplined over the last three years. For Segro, we believe the business is well positioned for steady earnings growth thanks to the diversity of its clients and the improved quality of leasing agreements. Segro's balance sheet is strong, with a loan-to-value ratio of 34% and no concerns around covenants. We also opened a position in Hargreaves Lansdown, the UK's leading direct-to-consumer investment platform. The company's market is still expanding, and there could be significant growth potential if Hargreaves Lansdown can use its leadership position to deliver educational materials and nudge people into saving. We profitably sold out of Ferguson, 3i Group and BAE Systems following a period of good returns for all three stocks. We also exited Melrose Industries as we felt the shares had fully priced in the benefits of the company's internal restructuring efforts and the wider cyclical recovery in aerospace demand.

Our view on the health of the global economy has strengthened. The US continues to grow apace, and inflation in general is declining. We are seeing something of a 'Goldilocks' cycle – decent growth, and inflation that softens without labour market weakness. In our view, what makes this unusually resilient cycle different to the classic 'boom and bust' conditions of previous iterations includes a combination of reasonable company balance sheets and decent earnings growth. Sadly, it is the government sector around the world that has not been so disciplined, and which is likely to find the higher level of interest rates more challenging.

In our view, investors remain overly concerned with second-guessing when central banks in the US, UK and the eurozone will start to cut interest rates. We believe the crux of the matter is that the market still expects rates to be at fairly tight levels over the next one to two years. However, if inflation is indeed benign going forward — as we anticipate — we do not believe there will be any reason for monetary policy to remain restrictive. Whatever the exact timing of rate cuts may be, our view is that their eventual scale is likely to surprise on the upside.

The Board of Directors

July 4, 2024

Past performance is not a guide to future performance. The value of investments and any income from them may go down as well as up.

Audit report

To the Shareholders of Columbia Threadneedle (Lux) I

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Columbia Threadneedle (Lux) I (the "Fund") and of each of its sub-funds as at 31 March 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the aggregated statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 March 2024;
- the aggregated statement of operations and changes in net assets for the Fund and the statement of operations and changes in net assets for each of the sub-funds for the year then ended;
- the portfolio statement as at 31 March 2024; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors for the financial statements

The Board of Directors is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
 a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
 involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
 control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors;

- conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

1 GENERAL

Columbia Threadneedle (Lux) I (the "SICAV") is an investment company with variable capital (*Société d'Investissement à Capital Variable*) governed by Part I of the law of December 17, 2010, relating to Undertakings for Collective Investment, as amended.

The SICAV offers investors the opportunity to invest in separate Portfolios (the "Portfolios"). Each Portfolio has a different investment objective and is a separate portfolio of assets represented by separate Shares. Each Portfolio may have one or more Classes of Shares (the "Share Classes") related to it. The SICAV as a whole, including all of the existing Portfolios and all future Portfolios, is one legal entity. However, with regard to third parties and, in particular, with regard to the SICAV's creditors and as between Shareholders, each Portfolio shall be exclusively responsible for all liabilities attributable to it

Significant events during the year:

New Prospectuses

New Prospectuses have been issued in September and November 2023.

Launching and closing of Portfolios

The CT (Lux) Global Social Bond Portfolio launched on December 6, 2023.

The CT (Lux) Japan Equities Portfolio launched on December 15, 2023.

With effect from April 28, 2023 the Threadneedle (Lux) - Euro Dynamic Real Return Portfolio was put into liquidation and the final redemption occurred on the same day.

With effect from July 13, 2023 the Threadneedle (Lux) - American Absolute Alpha Portfolio was put into liquidation and the final redemption occurred on July 21, 2023.

With effect from July 13, 2023 the Threadneedle (Lux) - Emerging Market ESG Equities Portfolio was put into liquidation and, as from June 21, 2023, its Shares were no longer available for subscription. The liquidation became necessary as the portfolio was too small to be managed in an economically efficient manner and was unlikely to attract new investors in the future. Due to a number of outstanding operational actions, the Management Company was not able to finalize the liquidation within the statutory deadline of nine months following the date on which the Board of Directors resolved to liquidate the portfolio. The Management Company therefore obtained regulatory approval for the extension of the above mentioned deadline and continues to engage with relevant stakeholders in order to complete the liquidation as soon as possible.

With effect from October 11, 2023 the CT (Lux) Asia Contrarian Equity Portfolio was put into liquidation. Due to an outstanding operational action, the Management Company was not able to finalize the liquidation within the statutory deadline of nine months following the date on which the Board of Directors resolved to liquidate the portfolio. The Management Company therefore obtained regulatory approval for the extension of the above mentioned deadline. As of the publication of the accounts, such action has been closed and the liquidation has been completed.

Launching and closing of Share Classes

'As at March 31, 2024, these Portfolios have been authorised by the Securities and Futures Commission in Hong Kong and are available to the public of Hong Kong.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements are prepared and presented in accordance with generally accepted accounting principles applicable to UCITS (Undertakings for Collective Investments in Transferable Securities) investment funds in Luxembourg and require management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

The financial statements are presented on the basis of the Net Asset Value of the Portfolios which are calculated as of March 31, 2024. The last official trading Net Asset Value of the corresponding Portfolios has been calculated as of March 28, 2024.

(continued)

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(continued)

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to investment funds under the going concern basis of accounting except for the Threadneedle (Lux) - Euro Dynamic Real Return Portfolio, which was put into liquidation on April 28, 2023, for the Threadneedle (Lux) - Emerging Market ESG Equities Portfolio and the Threadneedle (Lux) - American Absolute Alpha Portfolio which were put into liquidation on July 13, 2023, and for the CT (Lux) Asia Contrarian Equity Portfolio, which was put in liquidation on October 11, 2023. As such, the financial statements for those Portfolios have been prepared on a non-going concern basis and any additional costs in respect of the termination of those Portfolios will be borne by the Management Company.

I) Valuation of securities

Transferable securities, money market instruments and any financial assets listed or dealt in on a regulated market are valued at their last exchange price in the relevant market at the time of closure of the market. If such prices are not representative of their fair market value, such securities are stated at the fair value at which it is expected they may be resold, as determined in good faith by or under the direction of the Board of Directors.

Fixed income securities not traded on such markets are valued at the last available price or yield equivalents obtained from one or more dealers or pricing services approved by the Board of Directors, or any other price deemed appropriate by the Board of Directors.

Money Market Instruments (or other instruments in line with market convention in the jurisdiction in which the instrument is held) with a remaining maturity of 90 days or less will be valued by the amortised cost method, which approximates market value. Under this valuation method, the relevant Portfolio's investments are valued at their acquisition cost or the last market value prior to the 90 day period commencing (where an instrument at purchase date originally had more than 90 days to maturity) and adjusted for amortisation of premium or accretion of discount rather than at market value.

Units or shares of open-ended undertakings for collective investments ("UCIs") are valued at their last determined and available net asset value (the "Net Asset Value") or, if such price is not representative of the fair market value of such assets, then the price shall be determined by the SICAV, on a fair and equitable basis. Units or shares of closed-ended UCIs are valued at their last available stock market value.

The directors of the SICAV (the "Directors"), in their discretion, may permit some other method of valuation to be used if they consider that such valuation better reflects the fair value of any asset of the SICAV.

II) Forward Currency Exchange Contracts

For the purpose of hedging against specific currency risk or investing in other currencies, the SICAV may enter into forward currency exchange contracts. At the year-end, open forward currency exchange contracts are valued at the forward rates applicable for the remaining period until maturity. The net movement in the unrealised gain/(loss) arising on forward currency exchange contracts is recorded in the Statement of Operations and Changes in Net Assets. The contracts outstanding as at March 31, 2024 are disclosed in Note 9.

III) Futures Contracts

The SICAV may enter into futures exchange contracts. Open futures contracts are valued at the prices on the exchange for which the contracts are traded on. The net movement in the unrealised gain/(loss) arising on futures contracts is recorded in the Statement of Operations and Changes in Net Assets. The contracts outstanding as at March 31, 2024 are disclosed in Note 11.

IV) Swaps

The SICAV may enter into Interest Rate Swaps ("IRS"), Credit Default Swaps ("CDS") and Total Return Swaps ("TRS"). IRS are valued on the basis of their market value established by reference to the applicable interest rate curve. CDS are valued by reference to the net present value of the expected future cash flows based on the market interest rates and the markets expected default and recovery rate of the underlying asset. An upfront payment, if any, made by the SICAV is recorded as an asset in the Statement of Net Assets. An upfront payment, if any, received by the SICAV is recorded as a liability in the Statement of Net Assets. TRS are valued by reference to the mark to market value based on the market value of the underlying asset. The net movement in the unrealised gain or loss arising on swaps is recorded in the Statement of Operations and Changes in Net Assets. The contracts outstanding as at March 31, 2024 are disclosed in Note 10. Dividends payable on swaps short positions, if any, are recorded as a liability in the Statement of Net Assets.

V) Options

Options traded on a regulated market are valued at the market price on the valuation date. Such options open as at March 31, 2024 are shown in the Schedule of Investments. Over-the-counter ("OTC") options are valued based on prices received from third party pricing agents/models. Such options open as at March 31, 2024 are shown in Note 12. Unrealised gains or losses arising at the time of reporting from the valuation of options trades are taken into account in the Statement of Operations and Changes in Net Assets.

(continued)

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(continued)

VI) Translation of currencies

The accounts of each Portfolio are kept in the currency in which its net assets are expressed. The relevant Statement of Net Assets, Statement of Operations and Changes in Net Assets and the Schedule of Investments are expressed in this currency (the "base currency").

During the year, transactions, income and expenses denominated in a currency other than the base currency are recorded on the basis of exchange rates prevailing on the date they occur or accrue to the Portfolio.

At the date of the Statement of Net Assets, monetary assets and liabilities denominated in a currency other than the base currency are translated into the base currency on the basis of exchange rates prevailing on that date. Exchange differences are included in the Statement of Operations and Changes in Net Assets.

The aggregated Statement of Net Assets and Statement of Operations and Changes in Net Assets are presented in USD based on the exchange rates ruling at the date of the Statement of Net Assets. Exchange rates used as at March 31, 2024 are: 1 USD = 1.532802 AUD, 1 USD = 0.925926 EUR, 1 USD = 0.791609 GBP, 1 USD = 0.900700 CHF, 1 USD = 10.692557 SEK, 1 USD = 6.906507 DKK, 1 USD = 10.848576 NOK, 1 USD = 1.349601 SGD, 1 USD = 151.345003 JPY

The difference between the opening net assets stated at exchange rates ruling at the beginning of the year and their value at the end of the year is shown as a currency translation adjustment in the Aggregated Statement of Operations and Changes in Net Assets under the heading Exchange differences.

VIII Cash at hank

The cash at bank reflected in the Statements of Net Assets includes also the margins on futures contracts and cash collateral paid by the Portfolios for swaps transactions and forward currency exchange contracts.

Cash and margins on futures contracts are valued at cost, which approximates the market value.

VIII) Term deposits

Term deposits are valued at cost, which approximates the market value.

IX) Investment transactions and investment income

Securities are recorded at cost, and where applicable on the basis of exchange rates prevailing on the date they are purchased.

Results on sales of securities are determined on the basis of the average cost method. Investment transactions are accounted for on the trade date. Dividends are accounted for on the ex-dividend date. Interest income is recorded on an accrual basis. Discounts/Premium on zero coupon bonds are accreted as adjustments to interest income.

Interest, dividends and capital gains on securities may be subject to withholding or capital gains taxes in certain countries.

X) Distribution policy

The policy of the SICAV in respect of all Share Classes of Portfolios, with the exception of Classes whose denomination ends in 'C', 'M', 'P' or 'T', is to make no distributions, to accumulate in such Portfolios all net earnings and to reinvest these within the same Portfolio and Class. In respect of Classes whose denomination ends in 'C', 'M', 'P' or 'T', the SICAV intends to make distributions, with a frequency, at least annually, and in an amount to be determined by the Directors. The Shareholders of these Share Classes have the option to receive the dividend or to reinvest it in the same Share Class.

XI) Asset management fee rebates

Cross investments and investments in other Columbia Threadneedle funds are either made in non-fee paying Share Classes or any management fee paid is fully rebated. Please also refer to note 18 for details on cross investments.

3 TAXATION

Under current laws and practice, the SICAV is not liable to any Luxembourg income tax, or any Luxembourg capital gains on the realised capital appreciation of the assets of the SICAV nor are dividends paid by the SICAV liable to any Luxembourg withholding tax.

Under the prevailing law and regulations, the SICAV is subject, in the Grand Duchy of Luxembourg, to an annual subscription tax ("taxe d'abonnement") of 0.05%, payable on a quarterly basis and assessed on its Net Asset Value at the end of each quarter. No tax is due on the assets held by the SICAV in other UCITS already subject to that tax in Luxembourg.

In respect of the Institutional Share Classes, a reduced annual subscription tax of 0.01% is levied on the Net Asset Value at the last day of each calendar quarter in accordance with the law of December 17, 2010, as amended.

(continued)

3 TAXATION

(continued)

In addition, those portfolios whose sole object is the collective investment in money market instruments and the placing of deposits with credit institutions are also subject to a reduced tax of 0.01%. Again, no such tax is due on the portion of the assets of the SICAV invested in other Luxembourg UCITS, if any, which are themselves subject to that tax.

For the avoidance of doubt, this taxe d'abonnement forms part of the SICAVs Operating Expenses.

Although the SICAV's realised capital gains are not taxable in Luxembourg, whether short-or-long term, these realised capital gains may be subject to tax in the countries of origin.

4 MISCELLANEOUS FEES

The miscellaneous fees are mainly composed of penalties due under the Central Securities Depositories Regulation and compensation to investors negatively impacted by a NAV error.

5 RELATED PARTY TRANSACTIONS

The SICAV may, on behalf of the different Portfolios, enter into borrowing arrangements (subject to the restrictions set out under "Investment Restrictions" in Appendix A of the Prospectus) with, and buy from or sell transferable securities, foreign exchange or other financial instruments through Threadneedle Asset Management Limited ("TAML"), a related entity and its affiliates, provided that such transactions are carried out at normal commercial terms and are in the best interests of the relevant Portfolio and its Shareholders.

For the year ending March 31, 2024, the SICAV did not enter into transactions with connected persons.

The SICAV has appointed Threadneedle Management Luxembourg S.A. (the "Management Company") to serve as its designated Management Company in accordance with Chapter 15 of the law of December 17, 2010, as amended. Under the Management Company Services Agreement, the Management Company provides investment management, administrative and marketing services to the SICAV, subject to the overall supervision and control of the Board of Directors.

Neither the Management Company nor TAML earned commissions related to brokerage transactions. Please also refer to note 6 for details on commission sharing arrangements.

Certain officers and/or directors of the Management Company, the SICAV and other Columbia Threadneedle Group entities are also officers and/or directors of TAML.

The Management Company (on behalf of the SICAV) has delegated certain marketing and/or distribution functions to other Columbia Threadneedle Group entities. The Management Company receives a monthly fee for asset management services at an annual rate detailed in this note, expressed as a percentage of the average daily net assets for each of the Portfolios. The Management Company is responsible for paying sub-distribution fees out of this fee. Some of the sub-advisors are related entities.

As described in Note 8, the Management Company may also receive performance fees with respect to all A, D, I and Z Shares of the Threadneedle (Lux) - American Absolute Alpha* Portfolio, with respect to all J and Y Shares of the CT (Lux) Global Investment Grade Credit Opportunities Portfolio and with respect to all A, D, I, L and Z Shares of the CT (Lux) Pan European Absolute Alpha Portfolio.

All expenses incurred in the operation of the SICAV and defined below (hereafter the "Operating Expenses", "Asset Management Fee" or "Portfolio Charges", together, the "Expenses") are fixed at the rates shown in the tables from page 234 onwards. All expenses are accrued daily based on the Net Asset Value of the relevant Share Class in the relevant Portfolio. The Operating Expenses and the Asset Management Fee are paid out of the assets of the relevant Portfolio and the Initial Sales Charge and Exchange Fee is paid directly by investors.

The Operating Expenses include, among other things, taxes, expenses for legal and auditing services, costs of printing proxies, stock certificates, Shareholders' reports and notices, Prospectuses and Key Investor Information and other promotional expenses, fees and charges of the Depositary and its correspondents, and of the Domiciliary Agent, Administrative Agent, Registrar and Transfer Agent and of any paying agent, expenses of the issue and redemption of Shares, registration fees and expenses in various jurisdictions, listing fees, fees of unaffiliated Directors of the SICAV, expenses of the Directors and officers of the SICAV and the Sub-Advisors relating to attendance at meetings of the Directors and of the Shareholders of the SICAV, translation costs, accounting and pricing costs (including the calculation of Net Asset Value per Share), insurance, litigation and other extraordinary or non-recurring expenses, and all other expenses properly payable by the SICAV. The Operating Expenses also include the service fee payable to the Management Company. The Management Company will bear the excess of any Operating Expenses above the annual rate. Conversely the Management Company will be entitled to retain any amount by which the annual rate of Operating Expenses exceeds the actual expenses incurred by the SICAV.

Furthermore, the Management Company is entitled to receive an asset management fee (the "Asset Management Fee") as more fully described in the tables from page 234 onwards which are accrued daily and paid monthly. An Asset Management Fee is not payable for X Shares and 4 Shares. For the avoidance of doubt, Operating Expenses do not include either Asset Management Fees or performance fees which are separate and distinct.

6 COMMISSION SHARING ARRANGEMENTS

The Management Company and certain Sub-Advisors may enter into commission sharing arrangements with broker-dealers under which certain business services are obtained from such broker-dealers directly or from third parties and are paid for by the broker-dealers out of the commissions they receive on transactions for the SICAV. Consistent with obtaining best execution, brokerage commissions on portfolio transactions for the SICAV may be specifically allocated by the Management Company or each relevant Sub-Advisor to broker-dealers in consideration of any research services rendered as well as for services rendered in the execution of orders by such broker-dealers. Additional information on each Sub-Advisor's practices with respect to commission sharing arrangements is detailed in the section of the Prospectus with the heading "Investment Advisory Arrangements".

Any commission sharing arrangement entered into by the Management Company or a Sub-Advisor will operate under the following conditions: (i) the Management Company or the Sub-Advisor will act at all times in the best interest of the SICAV and of its Shareholders when entering into commission sharing arrangements; (ii) the services provided will be in direct relationship to the activities of the Management Company or Sub-Advisor; (iii) brokerage commissions on portfolio transactions for the SICAV will be allocated by the Management Company or the Sub-Advisor to broker-dealers that are entities and not to individuals; (iv) commission sharing arrangements are not a determining factor in the selection of the broker-dealers; (v) the Management Company or the Sub-Advisor will provide reports to the Directors with respect to commission sharing arrangements including the nature of the services it receives; (vi) neither the Management Company, the Sub-Advisor nor any of their connected persons may retain cash or other rebates from broker-dealers; (vii) the goods or services received are of demonstrable benefit to the Shareholders.; and (viii) periodic disclosure will be made in the SICAV's annual report in the form of statement describing any such commission sharing arrangements, including a description of the goods and services received. The goods and services received may include: research that can add value to a Sub-Advisor's decision making process and execution services that enhance the Sub-Advisor's ability to execute transactions.

Only the Sub-Advisor Columbia Management Investment Advisors, LLC may enter into commission sharing arrangements.

7 DIVIDENDS

The SICAV declared the following dividends during the year ended March 31, 2024:

| Portfolio | Share Class | Ex-Date | Share Class currency | Amount per Share (in the Share Class currency) | Total amount (in the Portfolio currency) |
|------------------------------|-------------|------------|----------------------|--|--|

(continued)

8 PERFORMANCE FEES

The Management Company shall receive a performance fee as set forth below with respect to the Share Classes of the Portfolios listed in the table below. Daily provisions shall be set up for the accrual of the performance fee in respect of the performance fee balance (as described below), whereby the amount accrued shall be paid to the Management Company at the end of each calendar year (i.e. December 31). The Management Company is responsible for paying all or part of the performance fee to the Sub-Advisors in accordance with their Sub-Advisory agreement. The amount of this performance fee depends on the performance of the Net Asset Value of the relevant Share Class within the relevant Portfolio compared to the performance of the relevant performance index (the "Performance Index", as per the table below). The Performance Index is subject to a minimum rate of return, to ensure that the Portfolios must deliver a minimum positive rate of return for a performance fee to be paid, in the event that the underlying benchmark return is negative. Accruals will only be made when the performance fee balance is positive and the NAV High Water Mark (defined below) is exceeded.

The performance reference period for each Share Class is the whole life of the Share Class, i.e. from launch until termination.

For the avoidance of doubt, performance of Share Classes includes dividends paid.

| Portfolio | Share Classes | Performance Index | Performance Rate | |
|--|--|--|------------------|--|
| Threadneedle (Lux) - American Absolute Alpha* | A Shares D Shares I Shares Z Shares | Higher of 90-day Average Secured Overnight Financing Rate (SOFR) plus 1.75%, subject to a minimum of 1.50% | 20% | |
| CT (Lux) Global Investment Grade Credit Opportunities | J Shares Y Shares | Higher of Compounded euro short-term rate (€STR) average rate, 1 month tenor plus 1.00%, subject to a minimum of 1.00% | 10% | |
| CT (Lux) Pan European Absolute Alpha | A Shares D Shares I Shares L Shares Z Shares | Higher of 3 month Euro Interbank Offered Rate (EURIBOR) ¹ plus 1.50%, subject to a minimum of 1.50% | 20% | |

The benchmark is provided by the European Money Markets Institute, an administrator included in the ESMA register of benchmark administrators. The Management Company maintains a written plan setting out the actions that will be taken in the event of the benchmark materially changing or ceasing to be provided. This plan is available on request from the Management Company.

The performance of the Threadneedle (Lux) - American Absolute Alpha* Portfolio, the CT (Lux) Global Investment Grade Credit Opportunities Portfolio and the CT (Lux) - Pan European Absolute Alpha Portfolio, including the impact of all applicable fees, is compared to the Performance Index.

NAV High Water Mark: in respect of each Share Class, is the Net Asset Value of a Share of such Share Class as at the last Valuation Date of the last relevant calendar year in which any accrued performance fee was paid. If a performance fee has never been paid, the NAV High Water Mark is the inception price of the relevant Share Class. The NAV High Water Mark can only be increased, and cannot be decreased under any circumstances.

The performance fee balance shall be calculated on the difference between the performance of the Performance Index and the performance of the Share Class concerned (the "Daily Difference"):

- (i) in the event the Daily Difference is positive, the performance fee balance will increase by an amount in respect of the Daily Difference, at the relevant performance rate;
- (ii) if the Daily Difference is negative, the performance fee balance will be reduced by an amount in respect of the Daily Difference, at the relevant performance rate.

If the performance fee balance is positive at the end of the calendar year, i.e. December 31, and the NAV High Water Mark has been exceeded, the accrued amount of the performance fee will be paid to the Management Company within the first quarter of the subsequent calendar year. A performance fee shall only be paid to the Management Company if the Net Asset Value of the relevant Share Class exceeds the NAV High Water Mark and the performance fee balance is positive.

If at the end of the calendar year the performance fee balance is negative and the NAV High Water Mark has not been exceeded, such negative amount will be carried forward and the Management Company shall not receive the payment of a performance fee until the amount of the accrued performance fee balance is positive and the NAV High Water Mark has been exceeded, at any subsequent calendar year's end.

If at the end of the calendar year the performance fee balance is negative and the NAV High Water Mark has been exceeded, such negative amount will be carried forward and the Management Company shall not receive the payment of a performance fee until the amount of the accrued performance fee balance is positive and the NAV High Water Mark has been exceeded, at any subsequent calendar year's end.

(continued)

8 PERFORMANCE FEES

(continued)

In the event that a Portfolio or a Share Class is liquidated or a Portfolio or Share Class becomes dormant, any outstanding performance fee accrual shall be realised and payable to the Management Company. Thereafter, when new Shareholders have invested in such a Portfolio or Share Class, the performance fee balance will be reset.

There is no maximum value on the performance fee that could be taken.

As at March 31, 2024, performance fees have been paid as follows:

| Portfolio | Share Class | Amount per Share in the Portfolio base currency |
|--------------------------------------|-------------|---|
| CT (Lux) Pan European Absolute Alpha | AE | 55,515 |
| | AEP | 1,005 |
| | AUH | 14 |
| | DE | 102,268 |
| | IE | 44,702 |
| | IGH | 3,407 |
| | LE | 4,992 |
| | ZE | 11,006 |
| | ZFH | 1 |
| | ZGH | 12 |
| | | EUR 222,922 |

12 OPTIONS AT MARKET VALUE

As at March 31, 2024, CT (Lux) Global Multi Asset Income had the following Options outstanding:

| Description | Counterparty | Strike | Currency | Contracts | Maturity Date | Commitment in the Portfolio base currency | Market value in the Portfolio base currency | % of Net Assets |
|---------------------|--------------|-----------|----------|-----------|------------------|---|---|--------------------|
| Options on Futures | | | | | | | | |
| Call S&P 500 Index | UBS | 5,340.000 | USD | (37) | 12/04/2024 | 4,724,573* | (52,170) | (0.05) |
| Call FTSE 100 Index | UBS | 8,050.000 | GBP | (20) | 19/04/2024 | 657,687* | (8,843) | (0.01) |
| Call Euro Stoxx 50 | UBS | 5,200.000 | EUR | (64) | 19/04/2024 | 703,740* | (8,709) | (0.01) |
| | | | | | | | USD (69,722) | (0.07) |
| | | | | | | | | |

^{*}The commitment on short call positions is unlimited.

13 POOLING

The SICAV may invest and manage all or any part of the assets established for two or more Portfolios ("Participating Portfolios") on a pooled basis. Any such asset pool shall be formed by transferring to it cash or other assets (subject to such assets being appropriate in respect of the investment policy of the pool concerned) from each of the Participating Portfolios.

The share of a Participating Portfolio in an asset pool shall be measured by reference to notional units of equal value in the asset pool.

As at March 31, 2024 the SICAV had no pooling of assets, however the CT (Lux) Global Dynamic Real Return Portfolio, for investment management purposes, is split by asset class into multiple baskets solely held by itself.

14 CHANGES IN PORTFOLIO STATEMENTS COMPOSITION

Changes in the Portfolio Statements are available to Shareholders upon request and free of charge at the registered office of the SICAV.

15 DILUTION ADJUSTMENT

The Portfolios may suffer reduction of the Net Asset Value per Share due to dealing spreads, transaction costs and tax charges that arise when purchases and sales of underlying investments are undertaken by the Sub-Advisor to accommodate cash inflows and outflows; this is known as "dilution". A dilution adjustment may be applied to protect the Shareholders of the Portfolios by countering the impact of dilution (the "Dilution Adjustment"). If the net capital activity (including subscriptions, redemptions and conversions into a given Portfolio) on a given Valuation Date exceeds the threshold set by the Management Company from time to time for that Portfolio, the Net Asset Value of the Portfolio may be adjusted upwards or downwards to reflect the net inflows and net outflows respectively.

The Net Asset Value per Share of each Share Class in the Portfolio is calculated separately but any Dilution Adjustment will have an identical effect on the Net Asset Value per Share of each Share Class of the Portfolio. The amount of Dilution Adjustment will be set by the Management Company to reflect the estimated dealing spreads, transaction costs and tax charges that may be incurred by the Portfolio; these costs can vary with market conditions and the portfolio composition. The Dilution Adjustment may therefore be amended from time to time. Such Dilution Adjustments may vary from Portfolio to Portfolio and between daily net inflows and outflows but will not exceed 2% of the original Net Asset Value per Share). A periodic review is undertaken in order to verify the appropriateness of the Dilution Adjustments being applied. In the usual course of business the application of Dilution Adjustment will be triggered mechanically and on a consistent basis, however the Management Company reserves the right to make a discretionary Dilution

(continued)

15 DILUTION ADJUSTMENT

(continued)

Adjustment if, in its opinion, it is in the interests of existing Shareholders to do so, including in the event of exceptional circumstances. Such exceptional circumstances include, but are not limited to, periods of elevated market volatility, and periods of depressed market liquidity.

The Dilution Adjustment may be applied across all Portfolios with the exception of the CT (Lux) Enhanced Commodities Portfolio.

Estimates of the amount of Dilution Adjustment based on securities held in each Portfolio and market conditions at the time of the Prospectus dated November 2023 is published on the website www.columbiathreadneedle.com.

As at March 31, 2024, the following Dilution Adjustment has been applied:

| Portfolio | NAV before Dilution | Dilution Adjustment | NAV after Dilution |
|-------------------------------------|---------------------|---------------------|--------------------|
| CT (Lux) European Smaller Companies | 1,435,064,219 | 3,157,141 | 1,438,221,360 |
| CT (Lux) UK Equities | 38,089,286 | (57,136) | 38,032,150 |

16 TRANSACTION COSTS

For the reporting year, the SICAV incurred transaction costs relating to purchase or sale of transferable securities or money market instruments as follows:

| Portfolios | Currency | Transaction Costs |
|--|----------|-------------------|
| CT (Lux) Global Social Bond ^{1,2} | USD | n/a |

| CT (Lux) Global Extended Alpha | Mitsubishi UFJ Securities | USD | 2,732,472 |
| | ANZ Banking Group Ltd | USD | 4,216,080 |
| | Total | USD | 6,948,552 |

20 OTHER ASSETS/OTHER LIABILITIES

Other assets/Other liabilities might include any withholding tax and/or foreign taxes.

(continued)

21 TOTAL EXPENSE RATIO (TER)

The Total Expense Ratio is calculated following the Asset Management Association Switzerland (AMAS) guideline.

The formula applied is the following:

The TER expresses the sum of all costs and commissions charged on an ongoing basis to each class of shares (Operating Expenses) taken retrospectively as a percentage of their net assets, and is calculated using the following formula:

Where a fund invests more than 10% in other collective investment schemes (target funds), the calculation includes the fund's share of the expenses of the target funds less any rebates received.

The Total Expense Ratios for the year ended March 31, 2024 are as follows:

| Portfolio | Share Class | TER/TER1 | Comments |
|------------------------------|-------------|----------|---|
| CT (Lux) Global Social Bond* | AE | 0.43% | The current TER differs from the full year expected TER due to the small size of the Share Class. |

22 OTHER INFORMATION

The SFDR periodic disclosures are available in the unaudited Annex to the financial statements.

^{*}See note 1.

Global Risk Exposure (unaudited)

Global Exposure and Leverage

The UCITS global exposure is managed under a commitment approach, an absolute Value at Risk (absolute VaR) approach or a relative Value at Risk (relative VaR) approach.

The global market risk exposure information for the year ended March 31, 2024 is as follows:

Commitment approach

In order to monitor and measure the global exposure, all the portfolios which are not under in the VaR approach use the commitment approach.

The global exposure of the sub-funds is calculated based on the commitment approach in accordance with the methodology described in the ESMA's guidelines 10-788.

Var approach

Using the period April 2023 - March 2024:

| | | | | | | | | 1-year Rollii | ng | |

^{*}Calculation method. The VaR model is based on a 99% Confidence interval over a 1-month holding period. The covariance model uses 2 years of data, weighted with a 6 month half-life, and is updated daily. For CT (Lux) Enhanced Commodities, until December 2023, the historical method used 1 year of daily data

Shareholders' Information (unaudited)

The SICAV is an investment company organised as a "Société d'Investissement à Capital Variable" in the Grand Duchy of Luxembourg under the Law of August 10, 1915, as amended, and qualifies as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under Part I of the law of December 17, 2010, as amended.

The SICAV was incorporated on February 10, 1995 for an unlimited period. The SICAV's articles of incorporation were first published in the *Recueil des Sociétés et Associations* of the Grand Duchy of Luxembourg on March 31, 1995 and were last amended effective on November 20, 2023 to reflect the new name of the SICAV and its Portfolios, among other changes.

The SICAV is registered under the Number R.C.S. Luxembourg B-50216.

The annual general meeting of Shareholders of the SICAV is held in Luxembourg as may be specified in the notice of meeting, within six months of the accounting year end. The annual general meeting may be held abroad if, in the absolute and final judgment of the Board, exceptional circumstances so require. Other meetings of Shareholders may be held at such place and period of notice as may be specified in the respective notices of meeting. Notices of general meetings are given in accordance with Luxembourg law and in accordance with applicable rules in the relevant countries where Shares are publicly offered for sale. Notices will specify the place and time of the meeting, the conditions of admission, the agenda, the quorum and voting requirements.

The accounting year of the SICAV terminates on March 31 in each year.

The annual report and audited financial statements and the unaudited interim report are available at the registered office of the SICAV and at the principal office of each paying agent and distributor. The combined accounts of the SICAV are expressed in U.S. Dollars.

The Net Asset Value and the offer and redemption prices of the shares of the SICAV are made public at the registered office of the SICAV.

This report does not constitute an offer or a solicitation of an offer to buy shares in the SICAV. Subscriptions are accepted on the basis of the Prospectus and of the latest available annual report containing the audited financial statements as at March 31 and of the latest available interim report as at September 30, if published thereafter.

Certain Portfolios and/or Share Classes contained within this report may not be authorised or offered for sale in every jurisdiction at this time.

Significant/Global Events

Significant local, regional or global events such as terrorism, civil conflicts and war, natural disasters, disease/virus outbreaks and epidemics or other public health issues, recessions, depressions or other events — or the potential for such events — could have a significant negative impact on the global economic and market conditions. These and other related events could have a negative impact on Portfolio performance and the value of an investment in the Portfolios

Information Document ("PRIIPs KID", formerly Key Investor Information Document) - Subscription requirements

The PRIIPs KID is a pre-contractual document and investors will have to confirm that they have read the latest PRIIPs KID before making a subscription. The Management Company has the right to reject a subscription if the investor does not confirm that they have read the latest PRIIPs KID at the time of application. The latest PRIIPs KID may be obtained from www.columbiathreadneedle.com.

Task force on Climate-related Disclosures ("TCFD")

TCFD information for the Portolios covered by this report has been made available on the relevant Portfolio details or document library pages of our website and can be found at www.columbiathreadneedle.com.

REMUNERATION DISCLOSURES

This disclosure is made in respect of the Group's Remuneration Policy as it applies to Threadneedle Management Luxembourg S.A. ("the Manager") in respect of the Undertakings for Collective Investment in Transferable Securities ("UCITS") Directive and other applicable rules and guidance.

The Remuneration Policy applies to all of the Company's subsidiary entities to which the UCITS Directives requirements apply, and was last approved by the Remuneration Committee in June 2023.

1. The Remuneration Committee

The Remuneration Committee of the UK HoldCo ("the Committee") is a sub-committee of the UK HoldCo Board with the responsibility to establish the philosophy and objectives that will govern the Group's compensation and benefit programmes; review and approve compensation and benefit plans, policies, and practices; and oversee and approve the Group's remuneration. It has been determined to be independent of the day-to-day executive management of the Group, its Members being Directors of the Group or senior members of the Executive Leadership Team of Ameriprise Financial, the Group's parent company, all of whom do not hold executive positions for the UK HoldCo.

Shareholders' Information (unaudited)

(continued)

Current Committee Members are Mr Walter Berman, Mr William Turner and Ms Kelli Hunter Petruzillo. Meetings are normally held in January, March, June, September and December. The Global Head of Compensation Consulting and Operations acts as Secretary to the Committee. The Committee may invite the attendance of any Group employee or functional expert from the parent company as deemed appropriate, to allow it to fulfil its responsibilities including ensuring remuneration is consistent with effective risk management and does not encourage excessive risk taking.

2. Determining Incentive Remuneration Pools

The Manager made its annual Total Incentive Award decisions from separate pools covering the Real Estate business, Distribution unit, Investments business and Support functions, ultimately aggregated for governance and oversight at the EMEA regional level. Those pools are determined at the Company's discretion, subject to final oversight and approval from the Remuneration Committee. The pools for Real Estate, Distribution and Investments Special Incentive Plans (the "SIPs") are determined with reference to four un-weighted factors being a 'Top-Down' assessment of market practice, legal and regulatory requirements and any other internal or external contextual factors; a 'Bottom-Up' calculation based on business performance against Plan and Target Incentive level for the firm (see 'Pay for Performance' below); the overall financial and strategic performance of the Group; and the financial and strategic performance of Ameriprise Financial as the Group's parent company and shareholder. The funding for support roles forms part of the global 'AIA' plan, with funding to each region and business determined by a comprehensive balanced Business Unit Assessment in context of the overall Ameriprise Financial group's performance. All pools are set in context of the risk and control environment maintained during the year and may be adjusted top-down to reflect any material issues in that regard. The Committee also receives ongoing reports through the year from the Risk function regarding risk assessments and any themes or areas of note related to risk control or risk-related behavioural concerns.

The Committee takes all of these factors into account in order to make a balanced decision on its oversight and approval of the Total Incentive pools for the year in question.

3. Determining Individual Total Incentive Awards

Individual reward decisions under all incentive plans are wholly discretionary, although strongly informed by the annual performance appraisal and by known market remuneration levels for equivalent jobs as well as by the pool funding available. Risk and Compliance provide a critical input to final performance rating setting, ensuring that any risk and relevant behavioural concerns are reflected in performance appraisals and subsequently in remuneration recommendations. The EMEA Heads of Risk and Compliance also report directly to the Remuneration Committee of the award process to ensure that the Committee receives a direct report on which to base its final risk adjustment decisions.

Base salaries are maintained at a market-competitive level in order to ensure that, if required, it is possible to award zero incentive.

Pay for Performance

The bottom-up element of the SIP pool determination process measures team and wider business performance against key business targets for each area of the Group, including longer-term investment performance for the Investments and Real Estate divisions and a mix of gross and net sales for Distribution. Investment performance is assessed against each fund's benchmarks and its risk profile. All such assessments' impacts on the bottom-up calculation are capped, and weighted more heavily to longer time periods, so as not to incentivise managers to take excessive risk in order to deliver higher incentive pools. While the Group and parent company financial and strategic results are important factors in pool determination, the model is set up to ensure that delivery of the business' core goals, including delivering investment performance to its customers, is an explicit and significant driver in pool determination for those divisions.

Individual discretionary awards from the available funding, in context of market-competitive reward levels for the job in question, are driven strongly by each individual's ratings against Goals (objectives) and the Group's behavioural Leadership expectations (our Values), each of which is separately rated on a 5-point scale to ensure the behavioural assessment is given due prominence. Goals focus on the key deliverables for the role that year, in particular on the delivery of investment performance for Investments employees and for the Property division: all employees are also managed against a mandatory Risk Management Goal. Investment performance, where relevant to the role, is assessed against each fund's benchmark and its risk profile.

Ratings are consistency-checked across the business with the input of the EMEA Heads of Risk and Compliance providing input as required to ensure balance and due reflection of risk management. For Sales, Real Estate and Investment incentives there is no pre-determined grid or formula driving awards, which are discretionary in order to be able to account for and reflect all relevant factors.

Delivery of Total Incentives

The Group believes that deferred awards for higher earners and risk takers are a matter of good practice and an important part of aligning key staff's interests with the long-term interests of customers and shareholders. To that end, Total Incentive awards for all employees in the Group may be delivered partly in deferred awards through the Ameriprise Financial Long-Term Incentive Award ("LTIA") programme and, for Code Staff/Identified Staff and those in the Investments division, through a fund deferral programme. Deferrals, and delivery of awards in instruments, will comply with relevant regulatory requirements in force from time to time.

Shareholders' Information (unaudited)

(continued)

Staff qualifying as Code Staff/Identified Staff and those of a comparable level of seniority are subject to a higher rate of deferral. 50% of the overall incentive award is delivered in fund-linked units subject to a holding period after delivery. The fund linked units are designed to reflect the performance of a cross section of products and asset classes within the region.

4. Identified Staff

Code Staff/Identified Staff are classified as Senior Management, individuals with a material impact on the risk profile of UCITS, individuals within control functions and other employees whose total remuneration takes them in to the same bracket as senior management and risk takers, whose professional activities have a material impact on the risk profiles of the Manager or of the funds it manages. In practice, this will include the named Fund Managers of the Manager's funds.

5. Remuneration Payment Disclosure

The performance period for remuneration operates on a calendar year basis.

Total remuneration paid by the Group to 28 UCITS V Remuneration Code Staff Senior Managers in respect of its UCITS activities in the 2023 performance year was £2.67m, of which £1.05m was fixed and £1.62m was variable. Total remuneration paid to other members of the UCITS Remuneration Code Staff whose actions had a material impact on the risk profile of the Manager was £7.49m, of which £3.33m was fixed and £4.16m was variable. Total Remuneration paid to delegated managers of UCITS regulated funds was £1.02m, of which £0.09m was fixed and £0.93m was variable.

Information for Investors in Switzerland (unaudited)

The annual report and audited financial statements, the unaudited interim report, the report on changes in the Portfolio holdings for the year, the articles of incorporation, the Prospectus (Swiss version) and the PRIIPs KID can be obtained upon simple request and free of charge at the offices of the Swiss Representative and paying agent of the SICAV, Caceis Investor Services Bank S.A., Esch-sur-Alzette, Zurich Branch, Bleicherweg 7, 8027 Zurich, Switzerland, or at the registered office of the SICAV.

Past performance is no indication of current or future performance, and the performance data do not take account of the commissions and costs incurred on the issue and redemption of shares.

Securities Financing Transaction Regulation (unaudited)

The Securities Financing Transaction Regulation ("SFTR") introduces reporting requirements for securities financing transactions ("SFTs") and total return swaps. A SFT is defined as per Article 3(11) of the SFTR as:

- · a repurchase/reverse repurchase agreement;
- · securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction; or
- a margin lending transaction.

As at March 31, 2024, the SICAV held total return swaps ("TRS") as type of instruments in scope of the SFTR.

Global data

| | Unrealised gain and loss in the Portfolio | | | | | |
|--------------------------------------|---|-------------------------------------|-----------------|--|--|--|
| Name of Portfolio | Type of asset | base currency and in absolute value | % of Net Assets | | | |
| CT (Lux) Pan European Absolute Alpha | TRS | 95,986 | 0.25 | | | |
| CT (Lux) American Extended Alpha | TRS | 125,699 | 0.23 | | | |
| CT (Lux) Global Extended Alpha | TRS | 479,895 | 0.51 | | | |
| CT (Lux) Enhanced Commodities | TRS | 444,833 | 0.28 | | | |

Data on collateral reuse

There was no collateral reuse during the year ended March 31, 2024.

Concentration data

All collateral received in respect of TRS as of March 31, 2024 is cash collateral. The ten largest issuers disclosure is therefore not applicable.

The following table provides details of the top ten counterparties (based on gross volume of outstanding transactions) in respect of TRS held per Portfolio as at March 31, 2024:

| Name of Portfolio | Type of asset | Counterparty | Unrealised gain and loss in the Portfolio base currency and in absolute value |
|--------------------------------------|---------------|-------------------------------|---|
| CT (Luu) Dan Furancan Abacluta Alaba | TRS | UBS | 90,481 |
| CT (Lux) Pan European Absolute Alpha | ins | Goldman Sachs | 5,505 |
| CT (Lux) American Extended Alpha | TRS | Bank of America Merrill Lynch | 86,198 |
| CT (Lux) American Extended Alpha | ins | UBS | 39,501 |
| CT (Lux) Global Extended Alpha | TRS | UBS | 479,895 |
| | | Goldman Sachs | 255,237 |
| CT (Lux) Enhanced Commodities | TRS | Macquarie | 143,336 |
| | | JPMorgan | 46,260 |

Safekeeping of collateral received

Cash collateral is received on each Portfolio's cash account at Citibank Europe plc, Luxembourg Branch.

The table below provides the term deposits amounts held by the SICAV as at March 31, 2024:

| Name of Portfolio | Type of collateral | Counterparty | Currency of collateral | Amount of collateral |
|--------------------------------|--------------------|--------------|------------------------|----------------------|
| CT (Lux) Global Extended Alpha | Cash | UBS | USD | 480,000 |
| | | Total | USD | 480,000 |

Securities Financing Transaction Regulation (unaudited)

(continued)

Aggregate transaction data

| Name of Portfolio | Type of collateral | Maturity tenor (collateral) | Currency of collateral | Maturity tenor (SFT/TRS) | Country of establishment (counterparty) | Settlement and clearing | Quality of collateral |
|--------------------------------------|--------------------|--------------------------------|------------------------|---|---|-------------------------|-----------------------|
| CT (Lux) Pan European Absolute Alpha | Cash | Open maturity | EUR | 3 months to 1 year / more than 1 year | UK | Bilateral | N/A - Cash |
| CT (Lux) American Extended Alpha | Cash | Open maturity | USD | 3 months to 1 year / more than 1 year | UK | Bilateral | N/A - Cash |
| CT (Lux) Global Extended Alpha | Cash | Open maturity | USD | 1 month to 3 months / 3 months to 1 year / more than 1 year | UK | Bilateral | N/A - Cash |
| CT (Lux) Enhanced Commodities | Cash | Open maturity | USD | 1 day to 1 month | UK | Bilateral | N/A - Cash |

Safekeeping of collateral granted

Cash and security collateral paid to the counterparties is delivered to segregated accounts at the counterparty.

The amount of collateral granted for TRS as at March 31, 2024 is as follows:

| Name of Portfolio | Type of collateral | Counterparty | Currency of collateral | Amount of collateral | % of collateral held at year-end by category |
|--------------------------------------|--------------------|-------------------------------|------------------------|----------------------|--|
| CT (Lux) Pan European Absolute Alpha | Cash | UBS | EUR | 650,000 | 1.71 |
| | | Total | EUR | 650,000 | 1.71 |
| CT (Lux) American Extended Alpha | Cash | UBS | USD | 180,000 | 0.33 |
| | | Bank of America Merrill Lynch | USD | 100,000 | 0.18 |
| | | Total | USD | 280,000 | 0.51 |
| CT (Lux) Enhanced Commodities | Cash | JPMorgan | USD | 1,190,000* | 0.75 |
| | | Goldman Sachs | USD | 490,000 | 0.31 |
| | | Macquarie | USD | 290,000 | 0.18 |
| | | Total | USD | 1,970,000 | 1.24 |

Return/Costs

Return and costs of TRS transactions as at March 31, 2024 are disclosed in the Statement of Operations and Changes in Net Assets of the relevant Portfolio under the headings "Interest expense on swaps", "Net realised gain/(loss) on swaps" and "Change in net unrealised gain/(loss) on swaps".

^{*}This collateral amount may be related to transactions other than TRS which are not covered by SFTR disclosure.

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: CT (Lux) Global Social Bond Legal entity identifier: 5493000LMR3JD1PAQT62

Sustainable investment objective

Did this financial product have a sustainable investment objective? × Yes It made sustainable It promoted Environmental/Social (E/S) investments with an characteristics and environmental objective: while it did not have as its objective a sustainable investment, it had a proportion of in economic activities that of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as economic activities that do not qualify as environmentally sustainable environmentally sustainable under the EU under the EU Taxonomy Taxonomy with a social objective It made sustainable It promoted E/S characteristics, but **did not** investments with a social make any sustainable investments **objective:** <u>96.79%</u>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Portfolio provided positive social outcomes by investing in bonds that supported or funded socially beneficial activities and development, as assessed by the Columbia Threadneedle Social Rating Methodology.

It achieved the social objective by:

(i) investing in bonds that positively contribute to one or more of the areas of social outcome below. These are based on the social hierarchy of needs approach, whereby "primary" social needs such as housing are foundational and supersede more general social needs. The social outcomes are also aligned to the UN Sustainable Development Goals (SDGs), as the core global set of priorities for social and sustainable development.

The Sub-Advisor uses a proprietary categorisation and rating model (the "Social Rating Methodology") to carry out a detailed assessment of the bond's contribution to the social objective pursued by the Portfolio. The Sub-Advisor only selects bonds that are rated as social investments for inclusion in the Portfolio.

| Social Outcome Category | Primary SDG | Areas of Social Outcome |
|-------------------------|---|--|
| Primary Social Needs | Sustainable Cities and Communities | Affordable Housing e.g. Social bonds (housing focus) |
| Basic Social Needs | Good Health and Well Being | Health and Welfare e.g. Health services |
| Social Enabling | Quality Education | Education and Training e.g. Printing and publishing |
| Social Empowerment | Decent Work and Economic Growth | Employment e.g. Retail |
| Social Enhancement | Sustainable Cities and Communities | Community e.g. Social bonds (community focus) |
| Social Facilitation | Reduced Inequalities | Access to Services e.g. Financial servies (socially focused) |
| Societal Developments | Industry, Innovation and Infrastructure | Economic Regeneration and Development e.g. Green bonds |

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- (ii) excluding bonds from issuers that:
 - a. derived revenue above specific thresholds from industries or activities that it considered to offer minimal social benefits or had a high risk of negative outcomes on society and/or the environment;
 - b. breached accepted international standards and principles of governance as determined by the SubAdvisor such as, but not limited to, the United Nations Global Compact, the International Labour Organization Labour Standards, and the United Nations Guiding Principles on Business and Human Rights.
- (iii) engaged with issuers to enhance the Portfolio's social focus and standards. As a bondholder, the Sub-Advisor actively seeked opportunities to engage with issuers to better understand and positively influence their social value.

How did the sustainability indicators perform?

The Sub-Advisor uses the following sustainability indicators to measure the attainment of the social objective of the Portfolio:

(i) The number of bonds that are categorised and rated as social investments (sustainable investments) under the Social Rating Methodology. In the reference period, the Fund had the following allocation to bonds rated as social investments (sustainable investments) under the Social Rating Methodology:

| Social Rating | Fund |
|------------------------|-------------------|
| Impact Investments | 54.33% (27 bonds) |
| Investment with Impact | 35.19% (31 bonds) |
| Development Finance | 7.26% (5 bonds) |

(ii) The number of bonds from issuers determined to be in breach of the Portfolio's exclusion criteria. In the reference period, there were no bonds that breached the exclusion criteria.

The number of bonds that are categorised and rated as social investments have been subject to an assurance review by a third party.

...and compared to previous periods?

This is the first disclosure and is therefore not compared to a previous period.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustainable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the principal adverse impacts (PAIs) on sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

The exclusions applied to the Fund related to fossil fuel exposure, non-renewable energy production, global norms, and controversial weapons. In the reference period, the Fund did not breach any of those exclusions. In addition, as per the minimum standards as set out in the Social Investment Guidelines document applied to the fund, no investments were made in Sovereigns or states listed as "Unfree" by NGO Freedom. We thus avoided those assessed by Freedom House as 'Unfree' States. Corruption for Sovereigns & supranationals are also assessed by considering the degree to which public sector corruption is perceived to exist, based on the Transparency International framework, and whether a country has a high prevalence of money laundering as identified by the Basel Institute on Governance's annual Basel Anti-Money Laundering (AML) Index.

The fund also considered PAIs as part of research into, and engagement with, investee companies on environmental sustainability indicators relating decarbonisation and biodiversity, and social factors. Further details of engagement activity are described in this report in the section titled "What actions have been taken to attain the sustainable investment objective during the reference period."

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024

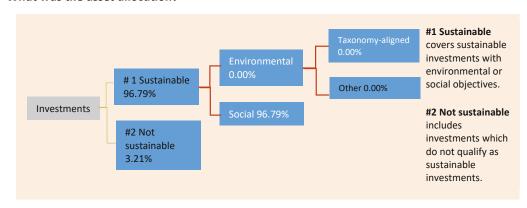

| Largest investments | Sector | % Assets | Country |
|--|------------------------|----------|---------|
| Japan International Cooperation Agency | Financials | 3.59% | JP |
| Pension Insurance Corporation | Financials | 2.46% | GB |
| Intesa Sanpaolo | Financials | 2.38% | IT |
| Motability | Consumer Discretionary | 2.35% | GB |
| Pearson | Financials | 2.31% | GB |
| Centene Corp | Health Care | 2.27% | US |
| Bupa | Health Care | 2.03% | GB |
| KBC Groep | Financials | 2.01% | BE |
| Orange | Communication Services | 2.01% | FR |
| Banque Federative Du Credit Mutual | Financials | 2.00% | FR |
| AIB Group | Financials | 1.99% | IE |
| Eli Lilly | Health Care | 1.97% | US |
| Chile | Sovereigns | 1.96% | CL |
| Korea Housing Finance Corporation | Financials | 1.96% | KR |
| NatWest | Financials | 1.96% | GB |

What was the proportion of sustainability-related investments?

96.79% of the Fund was invested in bonds that provided positive social outcomes by supporting or funding socially beneficial activities and development, as assessed by the Social Rating Methodology.

3.21% of the financial product was invested in cash and derivatives.

What was the asset allocation?

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Financials | 24.50% |
| Supranational | 18.15% |
| Health Care | 15.13% |
| Utilities | 12.00% |
| Consumer Discretionary | 6.15% |
| Sovereign | 5.52% |
| Real Estate | 5.27% |
| Communication Services | 5.26% |
| Sub-Sovereign | 4.81% |
| Cash and derivatives | 3.21% |

of investments in specific assets.

Asset allocation describes the share

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels

corresponding to the best performance.

Transitional activities

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy

Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when data |
|--|---|
| | quality improves |
| Climate change adaptation | This figure will be presented when data |
| | quality improves |
| Sustainable use and protection of water | This figure will be presented when data |
| and marine resources | quality improves |
| Transition to a circular economy | This figure will be presented when data |
| | quality improves |
| Pollution prevention and control | This figure will be presented when data |
| | quality improves |
| Protection and restoration of biodiversity | This figure will be presented when data |
| and ecosystems | quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

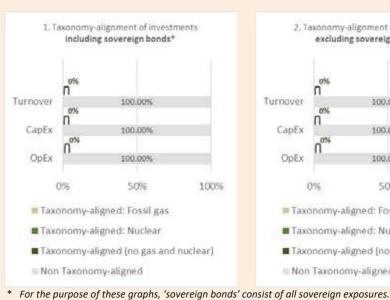

Taxonomy-aligned activities are expressed as a share of:

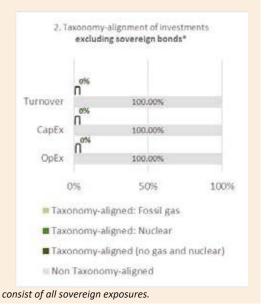

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy1?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities?
- The Fund had 0% in Enabling Activites and 0% in Transitional Activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

This is the first report therefore no comparison can be made.

 $^{^{1}}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

0% - The Fund does not have an environmental objective.

What was the share of socially sustainable investments?

96.79% of the portfolio was invested in sustainable investments which contribute to a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "non sustainable" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes.

These other investments are not used to meet the sustainable investment objective of the Portfolio. However, the Portfolio will apply minimum environmental or social safeguards to ensure that such investments will not affect the delivery of the Portfolio's overarching sustainable investment objective on a continuous basis. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to attain the sustainable investment objective during the reference period?

As a bondholder, we actively seek opportunities to engage with issuers to better understand and positively influence their social value. In addition, we engage with issuers to develop the market for specific use of proceeds issuance includes exhibiting best practice, bond structure and impact reporting.

We are keen to ensure that the negative social impacts of transition are minimised, and aim to confront these challenges by actively engaging with issuers on this topic to promote inclusive growth.

During the review period (since inception 5th December 2023 to 31st March 2024) there were 4 ESG specific engagements with companies held in the portfolio, which were led by the Repsonsible Investment team. These covered 4 companies across 3 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|---------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 1 |
| Environmental Stewardship | Biodiversity, Water, Waste | 0 |
| Business Conduct | Social and Employee | 1 |
| Human Rights | Matters | 0 |
| Labour Standards | | 2 |
| Public Health | | 1 |
| Corporate Governance | | 4 |

In addition to the Responsible Investment team's engagements, a number of engagements took place via the investment team and dedicated analysts. This engagement activity primarily contributes to the Fund's social objective to mobilise capital to support inclusion and address deprivation. The Fund is highly focused on supporting best practice for impact reporting, in particular educating on the importance of community voice in impact reporting within the ICMA (International Capital Markets Association) working groups and among market leading issuers. The aim is to increase the prevalence of target population voice within impact reports, hearing directly from people supported by the bonds to understand exactly what impact has been had, and where future projects need to improve. There has also been a significant drive to increase the prevalence of social considerations across the impact bond market through promoting social co-benefits reporting with green bond issuers. Notable successes have seen the UK and Australian Treasuries release of green bond frameworks which recognise the importance of measuring the social outcomes of green projects, further providing evidence of positive social outcomes regardless of the label attributed to the bond.

economic activity that contributes to

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the sub-advisor may assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Investing at least 5% of the Fund in sustainable investments, issuers that contribute to environmental or social outcomes.
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024 the fund rating was 2.40 and the benchmark rating was 2.52 (on a scale of 1-5, where lower is better).
- The fund maintained over 50% of its holdings in strongly rated ESG issuers over the period. On 31 March 2024, the fund held 76.00% in strongly rated ESG issuers.
- The fund invested more than 5% in sustainable investments over the period. On 31 March 2024, the fund held 38.73% in issuers deemed sustainable.
- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions

and was monitored on an ongoing basis. No breaches were identified during the period under review.

- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.
- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

...and compared to previous periods?

NA - this is the first year that the fund is reporting against its sustainability indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund is committed to investing a minimum proportion of 5% in Sustainable Investments. Sustainable Investments made have the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The issuer generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The dedicated use of proceeds of the bond contribute to an environmental or social objective e.g. green bonds, or
- 3. The issuer has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex spend. Issuers in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

1) The Fund screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.

- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustainable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - o Generate >30% of revenue from thermal coal extraction;
 - o Generate >30% revenue from thermal coal generation;
 - Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024

Asset allocation

describes the share of

investments in specific assets.

| Issuer name | Sector | Average weight | Country |
|--------------------------|------------------------|----------------|---------|
| United States of America | Sovereigns | 5.18% | US |
| Roche Inc | Health Care | 2.37% | US |
| Amgen Inc | Health Care | 2.34% | US |
| Bank of America Corp | Financials | 2.11% | US |
| Unitedhealth Group Inc | Health Care | 1.78% | US |
| JP Morgan Chase & Co | Financials | 1.62% | US |
| NBN Co Ltd | Consumer Discretionary | 1.56% | AU |
| Amprion GmbH | Utilities | 1.53% | DE |
| NiSoure Inc | Utilities | 1.51% | US |
| HSBC Plc | Financials | 1.48% | GB |
| DS Smith Plc | Materials | 1.44% | GB |
| Nestle Inc | Consumer Staples | 1.44% | US |
| Diageo Capital Plc | Consumer Staples | 1.36% | GB |
| Pfizer | Financials | 1.20% | SG |
| Eversource Energy | Utilities | 1.13% | US |

What was the proportion of sustainability-related investments?

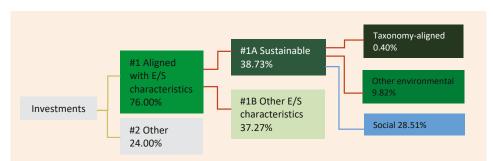

What was the asset allocation?

76.00% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

24.00% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Financials | 24.48% |
| Utilities | 18.47% |
| Health Care | 12.85% |
| Communication Services | 6.94% |
| Sovereign | 6.34% |
| Consumer Staples | 5.54% |
| Real Estate | 5.05% |
| Consumer Discretionary | 4.15% |
| Industrials | 3.83% |
| Energy | 2.61% |
| Information Technology | 2.18% |
| Materials | 2.09% |
| Sub-sovereign | 1.56% |
| Supranational | 0.16% |
| Cash and derivatives | 3.76% |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.40% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when data quality improves |
|--|--|
| Climate change adaptation | This figure will be presented when data quality improves |
| Sustainable use and protection of water and marine resources | This figure will be presented when data quality improves |
| Transition to a circular economy | This figure will be presented when data quality improves |
| Pollution prevention and control | This figure will be presented when data quality improves |
| Protection and restoration of | This figure will be presented when data |
| biodiversity and ecosystems | quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| X Yes: | | | |
|--------|---------------|------------------|----|
| | In fossil gas | In nuclear energ | gy |
| No | | | |

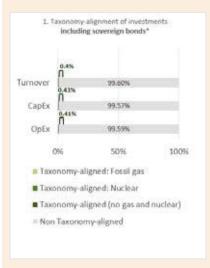

Taxonomy-aligned activities are expressed as a share of:

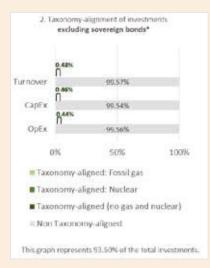

- reflecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

0.000% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.335% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable – this is the the first periodic disclosure for this Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

9.82% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

28.51% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 99 ESG specific engagements with companies held in the portfolio. These covered 44 companies across 8 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|------------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 50% |
| Environmental Stewardship | Biodiversity, Water, Waste | 23% |
| Business Conduct | Social and Employee | 8% |
| Human Rights | Social and Employee Matters | 19% |
| Labour Standards | | 41% |

| Public Health | 11% |
|----------------------|-----|
| Corporate Governance | 39% |

~

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?

Regulation (EU) 2020/852,

practices.

economic activity that contributes to

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the sub-advisor may assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Investing at least 5% of the Fund in sustainable investments, which are issuers that contribute to environmental or social outcomes.
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024, the fund rating was 2.24 and the benchmark rating was 2.33 (on a scale of 1-5, where lower is better).
- The fund maintained over 50% of its holdings in strongly rated ESG issuers over the period. On 31 March 2024, the fund held 73.51% in strongly rated ESG issuers.
- The fund invested more than 5% in sustainable investments over the period. On 31 March 2024, the fund held 43.24% in issuers deemed sustainable.
- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions

and was monitored on an ongoing basis. No breaches were identified during the period under review.

- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.
- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

...and compared to previous periods?

Not applicable - this is the first year that the fund is reporting against its sustainability indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund is committed to investing a minimum proportion of 5% in Sustainable Investments. Sustainable Investments made have the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The issuer generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The dedicated use of proceeds of the bond contribute to an environmental or social objective e.g. green bonds, or
- 3. The issuer has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex spend. Issuers in this category are reviewed and approved by our responsible investment team.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustainable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - o Generate >30% of revenue from thermal coal extraction;
 - o Generate >30% revenue from thermal coal generation;
 - Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?"

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024

| Issuer name | Sector | Average weight | Country |
|---------------------------------------|------------------------|----------------|---------|
| Bundesrepublik Deutschland | Sovereigns | 7.24% | DE |
| Elia Transmission | Utilities | | BE |
| | | 2.08% | |

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation

describes the share of investments in specific assets.

73.51% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

26.49% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

0/ of Not Access

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Financials | 30.70% |
| Utilities | 17.85% |
| Sovereign | 7.24% |
| Real Estate | 6.64% |
| Industrials | 6.37% |
| Consumer Discretionary | 6.31% |
| Communication Services | 5.95% |
| Sub-sovereign | 5.52% |
| Health Care | 3.79% |
| Consumer Staples | 2.87% |
| Materials | 2.78% |
| Energy | 1.38% |
| Supranational | 0.73% |
| Information Technology | 0.47% |
| Cash and derivatives | 1.40% |
| | |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

1.28% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when data quality improves |
|--|--|
| Climate change adaptation | This figure will be presented when data quality improves |
| Sustainable use and protection of water and marine resources | This figure will be presented when data quality improves |
| Transition to a circular economy | This figure will be presented when data quality improves |
| Pollution prevention and control | This figure will be presented when data quality improves |
| Protection and restoration of biodiversity and ecosystems | This figure will be presented when data quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| X Yes: | | |
|--------|---------------|-------------------|
| | In fossil gas | In nuclear energy |
| No | | |

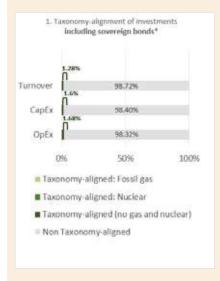

Taxonomy-aligned activities are expressed as a share of:

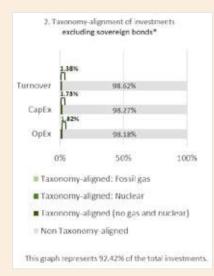

- reflecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- ${\color{blue}*} \quad \textit{For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.}$
- What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

1.17% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable - This is the first periodic disclosure for this Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

12.89% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

29.08% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 83 ESG specific engagements with companies held in the portfolio. These covered 36 companies across 9 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|------------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 45% |
| Environmental Stewardship | Biodiversity, Water, Waste | 15% |
| Business Conduct | Cooled and Francisco | 6% |
| Human Rights | Social and Employee Matters | 9% |
| Labour Standards | | 29% |

| Public Health | 11% |
|----------------------|-----|
| Corporate Governance | 36% |

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

practices.

economic activity that contributes to

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the subadvisor may assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Holding at least 5% in sustainable investments, which are companies that make a positive contribution to society and/or the environment
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- Engaging with companies that have poorer ESG Materiality Ratings to encourage improvement of their ESG practices over time on issues ranging from climate change to board independence and diversity.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024 the fund rating was 2.47 and the benchmark rating was 2.55 (on a scale of 1-5, where lower is better).
- The financial product maintained over 50% of its holdings in strongly rated ESG issuers over the reporting period. On 31 March 2024, the fund held 59.01% in strongly rated ESG issuers.
- The financial product held over 5% in sustainable investments over the reporting period. On 31 March 2024, the fund held 27.61% in sustainable investments.
- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. No breaches were identified during the period under review.

- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.
- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

...and compared to previous periods?

| Controversial Weapons exclusion | No Breaches | No Breaches |

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund is committed to investing a minimum proportion of 5% in Sustainable Investments. Sustainable Investments made have the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The issuer generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The dedicated use of proceeds of the bond contribute to an environmental or social objective e.g. green bonds, or

3. The issuer has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex spend. Issuers in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making
 positive contributions to the environment and/or society. These criteria are
 product- and conduct-based, covering topics such as fossil fuels and weapons,
 and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explictly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and issuer selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - o Generate >30% of revenue from thermal coal extraction;
 - Generate >30% revenue from thermal coal generation;
 - Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles

 Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024.

| Issuer name | Sector | Average | Country |
|---|------------------------|---------|---------|
| | | weight | |
| Telefonica Europe B.V. | Communication Services | 2.74% | NL |
| TELECOM ITALIA SPA | Communication Services | 2.62% | IT |
| FORVIA SE | Consumer Discretionary | 1.98% | FR |
| VODAFONE GROUP PUBLIC LIMITED COMPANY | Communication Services | 1.90% | GB |

What was the proportion of sustainability-related investments?

What was the asset allocation?

59.01% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

Asset allocation describes the share of investments in

specific assets.

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

40.99% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Financials | 12.10% |
| Communication Services | 25.60% |
| Consumer Discretionary | 14.30% |
| Health Care | 11.80% |
| Industrials | 9.60% |
| Utilities | 6.80% |
| Materials | 7.00% |
| Consumer Staples | 5.10% |
| Real Estate | 1.60% |

low-carbon

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

To comply with the

EU Taxonomy, the

on emissions and

switching to fully

renewable power or

low-carbon fuels by

the end of 2035. For

nuclear energy, the

criteria include

comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

criteria for fossil gas include limitations

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable

investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

1.54% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when data quality improves |
|--|--|
| Climate change adaptation | This figure will be presented when data quality improves |
| Sustainable use and protection of water and marine resources | This figure will be presented when data quality improves |
| Transition to a circular economy | This figure will be presented when data quality improves |
| Pollution prevention and control | This figure will be presented when data quality improves |
| Protection and restoration of biodiversity and ecosystems | This figure will be presented when data quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

| Did | the | financial | product | invest | in | fossil | gas | and/or | nuclear | energy | related |
|------|-------|------------|------------|----------|-----|--------|-----|--------|---------|--------|---------|
| acti | vitie | s complyir | ng with th | ne EU Ta | axo | nomy | ? | | | | |

| | Yes: | | | |
|---|------|---------------|-------------------|---|
| | | In fossil gas | In nuclear energy | У |
| × | No | | | |

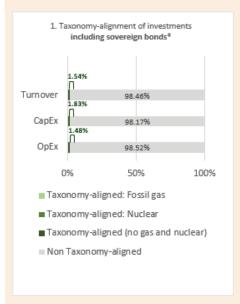

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

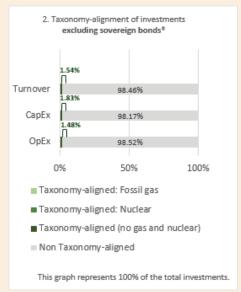

Taxonomy-aligned activities are expressed as a share of:

- reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

0.007% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.599% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| | 31/03/2024 | 31/03/2023 |
|-----------------------|------------|------------|
| EU Taxonomy Alignment | 1.54% | 0.00% |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.89% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

20.17% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 44 ESG specific engagements with companies held in the portfolio. These covered 22 companies across 8 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|----------------------|-----------------------------|---------------------------|
| Climate Change | GHG Emissions and Energy | 30.49% |
| | Performance | |
| Environmental | Biodiversity, Water, Waste | 8.54% |
| Stewardship | | |
| Business Conduct | Social and Employee Matters | 4.88% |
| Human Rights | Watters | 4.88% |
| Labour Standards | | 17.07% |
| Public Health | | 10.98% |
| Corporate Governance | | 23.17 |

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: CT (Lux) European Social Bond **Legal entity identifier: 549300071NVI9LFDKW96**

Sustainable investment objective

Did this financial product have a sustainable investment objective? × Yes It made sustainable It promoted Environmental/Social (E/S) investments with an characteristics and environmental objective: % while it did not have as its objective a sustainable investment, it had a proportion of of sustainable investments in economic activities that qualify as with an environmental objective in environmentally economic activities that qualify as sustainable under the EU environmentally sustainable under the Taxonomy **EU Taxonomy** in economic activities that with an environmental objective in do not qualify as economic activities that do not qualify environmentally as environmentally sustainable under sustainable under the EU the EU Taxonomy Taxonomy with a social objective It made **sustainable** It promoted E/S characteristics, but did not make investments with a social any sustainable investments **objective:** 96.34%

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The EU Taxonomy is

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Portfolio provided positive social outcomes by investing in bonds that supported or funded socially beneficial activities and development, as assessed by the Columbia Threadneedle Social Rating Methodology.

It achieved the social objective by:

(i) investing in bonds that positively contributed to one or more of the areas of social outcome below. These are based on the social hierarchy of needs approach, whereby "primary" social needs such as housing are foundational and supersede more general social needs. The social outcomes are also aligned to the UN Sustainable Development Goals (SDGs), as the core global set of priorities for social and sustainable development.

The Sub-Advisor uses a proprietary categorisation and rating model (the "Social Rating Methodology") to carry out a detailed assessment of the bond's contribution to the social objective pursued by the Portfolio. The Sub-Advisor only selects bonds that are rated as social investments for inclusion in the Portfolio.

| Social Outcome Category | Primary SDG | Areas of Social Outcome |
|-------------------------|---|---|
| Primary Social Needs | Sustainable Cities and Communities | Affordable Housing e.g. Social bonds (housing focus) |
| Basic Social Needs | Good Health and Well Being | Health and Welfare e.g. Health services |
| Social Enabling | Quality Education | Education and Training e.g. Printing and publishing |
| Social Empowerment | Decent Work and Economic Growth | Employment e.g. Retail |
| Social Enhancement | Sustainable Cities and Communities | Community e.g. Social bonds (community focus) |
| Social Facilitation | Reduced Inequalities | Access to Services e.g. Financial services (socially focused) |
| Societal Developments | Industry, Innovation and Infrastructure | Economic Regeneration and Development e.g. Green bonds |

(ii) excluding bonds from issuers that:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- a. derived revenue above specific thresholds from industries or activities that
 it considered offer minimal social benefits or have a high risk of negative
 outcomes on society and/or the environment;
- b. breached accepted international standards and principles of governance as determined by the Sub-Advisor such as, but not limited to, the United Nations Global Compact, the International Labour Organization Labour Standards, and the United Nations Guiding Principles on Business and Human Rights.
- (iii) engaging with issuers to enhance the Portfolio's social focus and standards. As a bondholder, the Sub-Advisor actively seeked opportunities to engage with issuers to better understand and positively influence their social value.

How did the sustainability indicators perform?

The Sub-Advisor uses the following sustainability indicators to measure the attainment of the social objective of the Fund:

(i) The number of bonds that are categorised and rated as social investments (sustainable investments) under the Social Rating Methodology. In the reference period, the Fund had the following allocation to bonds rated as social investments (sustainable investments) under the Social Rating Methodology:

| Social Rating | Portfolio |
|------------------------|--------------------|
| Impact Investments | 42.64% (88 bonds) |
| Investment with Impact | 36.38% (101 bonds) |
| Development Finance | 17.32% (43 bonds) |

(ii) The number of bonds from issuers determined to be in breach of the Portfolio's exclusion criteria. In the reference period, there were no bonds that breached the Portfolio's exclusion criteria.

The number of bonds that are categorised and rated as social investments have been subject to an assurance review by a third party.

...and compared to previous periods?

The Fund was an Article 8 fund in the previous period. The following data was reported last year:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Social Rating Scores, % Portfolio

| | 1 - Strong | 2 - Good | 3 - Moderate | 4 - Minor |
|---|------------|----------|--------------|-----------|
| Α | 37.0% | 1.9% | _ | _ |
| В | 6.3% | 17.6% | 13.8% | 0.7% |
| С | 7.0% | 4.0% | 5.5% | 5.1% |

Data as at 31/03/2023.

(Note: 'A' indicates Impact Investments, 'B' indicates Investments with Impact and 'C' indicates Development Finance)

In comparison to this years data, the table below shows a like-for-like breakdown for the Social Impact Ratings.

| Social Rating | 31/03/2024 | 31/03/2023 |
|----------------------------|------------|------------|
| Impact Investments (A) | 42.64% | 38.86% |
| Investment with Impact (B) | 36.38% | 38.38% |
| Development Finance (C) | 17.32% | 21.60% |

In addition, the Fund was also consistent in not breaching any of the exclusion criteria compared to the last period.

The number of bonds that are categorised and rated as social investments have been subject to an assurance review by a third party.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability

objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustainable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered PAIs through a combination of exclusions, investment research and monitoring and engaging with investee companies. The exclusions applied to the Fund related to fossil fuel exposure, non-renewable energy production, global norms, and controversial weapons. In the reference period, the Fund did not breach any of those exclusions. In addition, as per the minimum standards as set out in the Social Investment Guidelines document applied to the fund, no investments were made in countries oppressing freedoms or taking action which would violate the principle of the UN Global Compact. We thus avoided those assessed by Freedom House as 'Unfree' States and those ranked lowest on Transparency International's Corruption Perceptions Index.

The fund also considered PAIs as part of research into, and engagement with, investee companies on environmental sustainability indicators relating decarbonisation and biodiversity, and social factors. Further details of engagement activity are described in this report in the section titled "What actions have been taken to attain the sustainable investment objective during the reference period."

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024

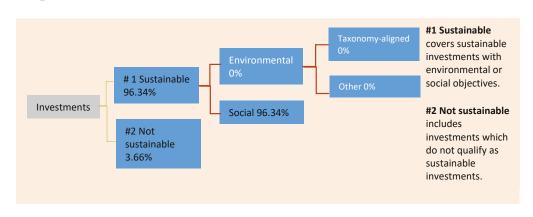

| Largest investments | Sector | % Assets | Country |
|-------------------------------------|------------------------|----------|---------|
| Bundesrepublik Deutschland | Sovereigns | 3.80% | DE |

| Materials | 0.57% |
| Consumer Staples | 0.21% |
| Cash and derivatives | 3.66% |

Enabling activities
directly enable other
activities to make a
substantial
contribution to an
environmental

objective

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when data quality improves |
|--|---|
| Climate change adaptation | This figure is not presented due to reliable data not being available |
| Sustainable use and protection of water and marine resources | This figure is not presented due to reliable data not being available |
| Transition to a circular economy | This figure is not presented due to reliable data not being available |

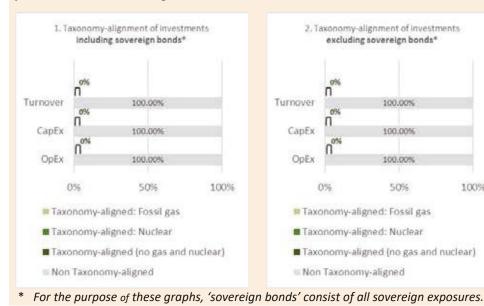

| Pollution prevention and control | This figure is not presented due to reliable | |
|----------------------------------|--|--|
| | data not being available | |
| Protection and restoration of | This figure is not presented due to reliable | |
| biodiversity and ecosystems | data not being available | |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

| Yes: | | |
|-------------|---------------|-------------------|
| | In fossil gas | In nuclear energy |
| ≭ No | | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

100%

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies
- expenditure
 (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of investments made in transitional and enabling activities?

The Fund had 0% in Enabling Activities and 0% in Transitional Activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

| | 31/03/2024 | 31/03/2023 |
|-----------------------|------------|------------|
| EU Taxonomy Alignment | 0.00% | 0.00% |

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

0% - The Fund does not have an environmental objective.

What was the share of socially sustainable investments?

96.34%% of the portfolio was invested in sustainable investments which contribute to a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "non sustainable" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes.

These other investments are not used to meet the sustainable investment objective of the Portfolio. However, the Portfolio will apply minimum environmental or social safeguards to ensure that such investments will not affect the delivery of the Portfolio's overarching sustainable investment objective on a continuous basis. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to attain the sustainable investment objective during the reference period?

As a bondholder, we actively seek opportunities to engage with issuers to better understand and positively influence their social value. In addition, we engage with issuers to develop the market for specific use of proceeds issuance includes exhibiting best practice, bond structure and impact reporting.

We are keen to ensure that the negative social impacts of transition are minimised and aim to confront these challenges by actively engaging with issuers on this topic to promote inclusive growth.

During the review period (31/03/2023 to 31/03/2024) there were 42 ESG specific engagements with companies held in the portfolio, which were led by the Responsible Investment team. These covered 22 companies across 9 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|---------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 19 |
| Environmental Stewardship | Biodiversity, Water, Waste | 11 |
| Business Conduct | Casial and Employee | 5 |
| Human Rights | Social and Employee Matters | 4 |
| Labour Standards | | 11 |
| Public Health | | 8 |
| Corporate Governance | | 15 |

In addition to the Responsible Investment team's engagements, a large number of engagements took place via the investment team and dedicated analysts. This engagement activity primarily contributes to the Fund's social objective to mobilise capital to support inclusion and address deprivation. The Fund is highly focused on supporting best practice for impact reporting, in particular educating on the importance of community voice in impact reporting within the ICMA (International Capital Markets Association) working groups and among market leading issuers. The aim is to increase the prevalence of target population voice within impact reports, hearing directly from people supported by the bonds to understand exactly what impact has been had, and where future projects need to improve. There has also been a significant drive to increase the prevalence of social considerations across the impact bond market through promoting social co-benefits reporting with green bond issuers. Notable successes have seen the UK and Australian Treasuries release of green bond frameworks which recognise the importance of measuring the social outcomes of green projects, further providing evidence of positive social outcomes regardless of the label attributed to the bond.

Product name: CT (Lux) Global Focus

Legal entity identifier: 549300N6B2IZVI8Z4Q40

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: sustainable investment, it had a proportion of 69.68% of sustainable investments in economic activities that qualify as environmentally with an environmental objective in sustainable under the EU economic activities that qualify as Taxonomy environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in sustainable under the EU economic activities that do not Taxonomy qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did It made sustainable investments not make any sustainable investments with a social objective:

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the subadvisor may assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Holding at least 5% of the Fund holdings in sustainable investments, which are companies that make a positive contribution to society and/or the environment.
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The positive ESG Materiality rating versus the benchmark was monitored daily by our compliance systems. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024, the fund rating was 2.15 and the benchmark rating was 2.46 (on a scale of 1-5, where lower is better).
- The Fund maintained over 50% of its holdings in strongly rated ESG issuers over the period. On 31 March 2024, the fund held 91.25% in strongly rated ESG issuers.
- The Fund held over 5% of its holdings in sustainable investments over the period. On 31 March 2024, 69.68% of the Fund was held in sustainable investments.
- We excluded companies that we determined were in breach of accepted

international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.

- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.
- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

...and compared to previous periods?

| | 2024 | 2023 |
|--|--------------|--------------|
| ESG Materiality Rating Fund vs Benchmark | 2.15 vs 2.46 | 2.41 vs 2.73 |
| (12 month rolling average) | | |
| At least 50% of the Fund in strongly rated | 91.25% | 76.95% |
| ESG companies | | |
| At least 5% of the Fund in sustainable | 69.68% | N/A |
| investments | | |
| Global Norms Exclusions | No Breaches | No Breaches |
| Thermal Coal, Civilian Weapons and | No Breaches | No Breaches |
| Tobacco exclusions | | |
| Controversial Weapons exclusion | No Breaches | No Breaches |

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund is committed to investing a minimum proportion of 5% in Sustainable Investments. Sustainable Investments made have the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The issuer generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The issuer has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex spend. Issuers in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making
 positive contributions to the environment and/or society. These criteria are
 product- and conduct-based, covering topics such as fossil fuels and weapons,
 and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - o Generate >30% of revenue from thermal coal extraction;
 - Generate >30% revenue from thermal coal generation;
 - o Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024.

| Issuer name | Sector | Average | Country |
|--|------------------------|---------|---------|
| | | weight | |
| MICROSOFT CORPORATION | Information Technology | 8.79% | US |
| MASTERCARD INCORPORATED. | Financials | 5.11% | US |
| AMAZON.COM, INC. | Consumer Discretionary | 4.21% | US |
| LINDE PUBLIC LIMITED COMPANY | Materials | 4.03% | GB |
| VISA INC. | Financials | 3.94% | US |
| NVIDIA CORPORATION | Information Technology | 3.58% | US |
| APPLIED MATERIALS, INC. | Information Technology | 3.12% | US |
| LAM RESEARCH CORPORATION | Information Technology | 2.98% | US |
| KEYENCE CORPORATION | Information Technology | 2.94% | JP |
| ALPHABET INC. | Communication Services | 2.90% | US |
| Taiwan Semiconductor Manufacturing Co., Ltd. | Information Technology | 2.76% | TW |
| ELI LILLY AND COMPANY | Health Care | 2.26% | US |
| HOWMET AEROSPACE INC. | Industrials | 2.22% | US |
| INTUIT INC. | Information Technology | 2.11% | US |
| INSULET CORPORATION | Health Care | 2.03% | US |

What was the proportion of sustainability-related investments?

What was the asset allocation?

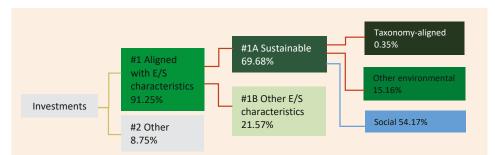

91.25% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

Asset allocation describes the share of investments in specific assets.

8.75% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Information Technology | 28.26% |
| Financials | 16.15% |
| Health Care | 14.43% |
| Industrials | 13.94% |
| Consumer Discretionary | 10.67% |
| Materials | 6.29% |
| Communication Services | 4.47% |
| Consumer Staples | 3.91% |
| Cash and Derivatives | 1.88% |

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

To comply with the

EU Taxonomy, the

include limitations

on emissions and

switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the

criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

criteria for fossil gas

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.35% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when | |
|--|------------------------------------|--|
| | data quality improves | |
| Climate change adaptation | This figure will be presented when | |
| | data quality improves | |
| Sustainable use and protection of water | This figure will be presented when | |
| and marine resources | data quality improves | |
| Transition to a circular economy | This figure will be presented when | |
| | data quality improves | |
| Pollution prevention and control | This figure will be presented when | |
| | data quality improves | |
| Protection and restoration of biodiversity | This figure will be presented when | |
| and ecosystems | data quality improves | |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

| Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? | | | |
|---|--|--|--|
| Yes: | | | |
| In fossil gas In nuclear energy | | | |
| ≭ No | | | |

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -

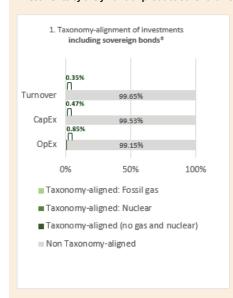

Taxonomy-aligned activities are expressed as a share of:

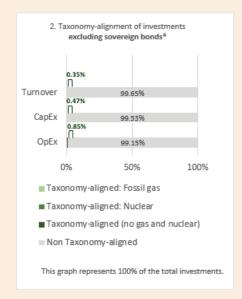

- reflecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.33% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| | 31/03/2024 | 31/03/2023 |
|-----------------------|------------|------------|
| EU Taxonomy Alignment | 0.35% | 0.00% |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

15.16% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

54.17% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 48 ESG specific engagements with companies held in the portfolio. These covered 26 companies across 10 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|-------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 26.67% |

| Environmental Stewardship | Biodiversity, Water, Waste | 18.10% |
|------------------------------|----------------------------|--------|
| Business Conduct | | 9.52% |
| Human Rights | Social and Employee | 7.62% |
| Labour Standards | Matters | 15.24% |
| Public Health | | 2.86% |
| Corporate Governance | | 20.00% |

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

economic activity that contributes to

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the sub-advisor may assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Holding at least 5% of the Fund holdings in sustainable investments, which are companies that make a positive contribution to society and/or the environment.
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024, the fund rating was 2.67 and the benchmark rating was 2.68 (on a scale of 1-5, where lower is better).
- The Fund maintained over 50% of its holdings in strongly rated ESG issuers over the period. On 31 March 2024, the fund held 72.71% in strongly rated ESG issuers.
- The Fund held over 5% of its holdings in sustainable investments over the period. On 31 March 2024, 37.31% of the Fund was held in sustainable investments.

- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.
- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.
- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the reporting period.

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

...and compared to previous periods?

Not applicable – we will provide a comparison of the sustainability indictors to a previous period in the next report

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund partially invests in sustainable investments, with the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The company generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The company has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex. Companies in this category are reviewed and approved by our responsible investment team.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - o Generate >30% of revenue from thermal coal extraction;
 - o Generate >30% revenue from thermal coal generation;
 - Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024.

| | | | , |

What was the proportion of sustainability-related investments?

What was the asset allocation?

72.71% of the Fund was invested in issuers with either:

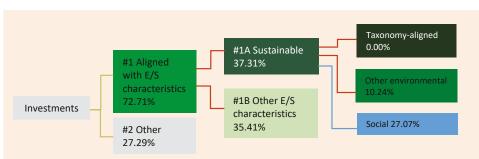

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

27.29% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not

Asset allocation describes the share of investments in specific assets.

aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Financials | 28.96% |
| Information Technology | 28.41% |
| Consumer Discretionary | 10.87% |

| and ecosystems | quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

| activities complying with the EU Taxonomy? |
|--|
| Yes: |
| In fossil gas In nuclear energy |
| ≭ No |

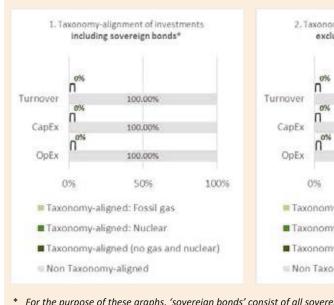

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

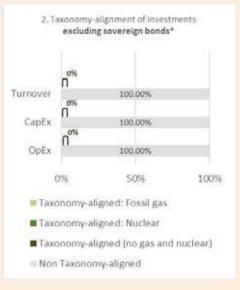

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 - What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.00% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. This is the first time we are reporting taxonomy alignment for this Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

10.24% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

27.07% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 65 ESG specific engagements with companies held in the portfolio. These covered 31 companies across 11 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|----------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 23.40% |
| Environmental | Biodiversity, Water, Waste | 14.89% |
| Stewardship | blodiversity, water, waste | 14.03/0 |
| Business Conduct | | 8.51% |
| Human Rights | Social and Employee Matters | 7.80% |
| Labour Standards | | 12.77% |
| Public Health | | 0.71% |
| Corporate Governance | | 31.91% |

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?
 Not applicable
- How did this financial product perform compared with the broad market index?`
 Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: CT (Lux) Global Equity Income Legal entity identifier: 549300WX6ZDL2WOHJS77

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: sustainable investment, it had a proportion of 61.25% of sustainable investments in economic activities that qualify as environmentally with an environmental objective in sustainable under the EU economic activities that qualify as Taxonomy environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in sustainable under the EU economic activities that do not Taxonomy qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did It made sustainable investments not make any sustainable investments with a social objective:

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable investment means

an investment in an

an environmental or social objective, provided that the

investment does not significantly harm

any environmental or

social objective and that the investee

companies follow

good governance

practices.

economic activity that contributes to

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

 Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the sub-advisor may assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Holding at least 5% of the Fund holdings in sustainable investments, which are companies that make a positive contribution to society and/or the environment.
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The positive ESG Materiality rating versus the benchmark was monitored daily by our compliance systems. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024 the fund rating was 2.32 and the benchmark rating was 2.45 (on a scale of 1-5, where lower is better).
- The Fund maintained over 50% of its holdings in strongly rated ESG companies over the period. On 31 March 2024, the fund held 97.07% in strongly rated ESG companies.
- The Fund held over 5% of its holdings in sustainable investments over the

period. On 31 March 2024, 61.25% of the Fund was held in sustainable investments.

- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.
- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.
- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

...and compared to previous periods?

| | 2024 | 2023 |
|--|--------------|--------------|
| ESG Materiality Rating Fund vs Benchmark | 2.32 vs 2.45 | 2.19 vs 2.73 |
| (12 month rolling average) | | |
| At least 50% of the Fund in strongly rated | 97.07% | 78.76% |
| ESG companies | | |

| investments | | |
| Global Norms Exclusions | No Breaches | No Breaches |
| Thermal Coal, Civilian Weapons and | No Breaches | No Breaches |
| Tobacco exclusions | | |
| Controversial Weapons exclusion | No Breaches | No Breaches |

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund is committed to investing a minimum proportion of 5% in Sustainable Investments. Sustainable Investments made have the objective of positively

contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The issuer generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The issuer has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex spend. Issuers in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - Generate >30% of revenue from thermal coal extraction;
 - Generate >30% revenue from thermal coal generation;

- o Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024.

| Issuer name | Sector | Average | Country |
|--|------------------------|---------|---------|
| | | weight | |
| MICROSOFT CORPORATION | Information Technology | 4.93% | US |
| Samsung Electronics Co., Ltd. | Information Technology | 3.18% | KR |
| Taiwan Semiconductor Manufacturing Co., Ltd. | Information Technology | 2.86% | TW |
| INTERCONTINENTAL EXCHANGE, INC. | Financials | 2.44% | US |

What was the proportion of sustainability-related investments?

What was the asset allocation?

97.07% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable

Asset allocation describes the share of investments in specific assets.

investments in line with our framework

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

2.93% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Information Technology | 21.82% |
| Health Care | 14.61% |
| Financials | 14.57% |
| Industrials | 13.02% |
| Materials | 7.90% |
| Consumer Staples | 7.20% |
| Consumer Discretionary | 5.53% |
| Energy | 5.10% |
| Utilities | 4.36% |
| Communication Services | 3.90% |
| Real Estate | 1.02% |
| Cash and Derivatives | 0.97% |

comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not

criteria for **fossil gas** include limitations

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.19% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when |
|--|------------------------------------|
| | data quality improves |
| Climate change adaptation | This figure will be presented when |
| | data quality improves |
| Sustainable use and protection of water and | This figure will be presented when |
| marine resources | data quality improves |
| Transition to a circular economy | This figure will be presented when |
| | data quality improves |
| Pollution prevention and control | This figure will be presented when |
| | data quality improves |
| Protection and restoration of biodiversity and | This figure will be presented when |
| ecosystems | data quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

| Did the financial product invest in fossil gas and/or nuclear energactivities complying with the EU Taxonomy? | |
|---|---------------------------------|
| | Yes: |
| | In fossil gas In nuclear energy |
| | ≭ No |

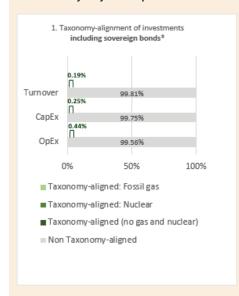

Taxonomy-aligned activities are expressed as a share of:

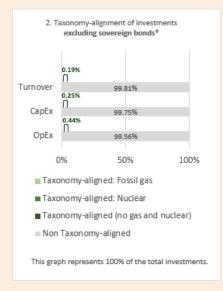

- reflecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

0.000% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.162% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| | 31/03/2024 | 31/03/2023 |
|-----------------------|------------|------------|
| EU Taxonomy Alignment | 0.19% | 0.00% |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

8.44% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

52.63% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 64 ESG specific engagements with companies held in the portfolio. These covered 34 companies across 9 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|------------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 21.19% |
| Environmental Stewardship | Biodiversity, Water, Waste | 14.41% |

| Business Conduct | | 5.08% |
|----------------------|--------------------------------|--------|
| Human Rights | Social and Employee | 11.02% |
| Labour Standards | Social and Employee Matters | 13.56% |
| Public Health | | 7.63% |
| Corporate Governance | | 27.12% |

practices.

economic activity that contributes to

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the subadvisor may assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Holding at least 5% of the Fund holdings in sustainable investments, which are companies that make a positive contribution to society and/or the environment.
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The positive ESG Materiality rating versus the benchmark was monitored daily by our compliance systems. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024, the fund rating was 2.18 and the benchmark rating was 2.45 (on a scale of 1-5, where lower is better).
- The Fund maintained over 50% of its holdings in strongly rated ESG issuers over the period. On 31 March 2024, the fund held 94.82% in strongly rated ESG issuers.
- The Fund held over 5% of its holdings in sustainable investments over the period. On 31 March 2024, 70.58% of the Fund was held in sustainable investments.
- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.

- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.
 - We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

| Tobacco exclusions | | |
| Controversial Weapons exclusion | No Breaches | No Breaches |

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund is committed to investing a minimum proportion of 5% in Sustainable Investments. Sustainable Investments made have the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The issuer generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The issuer has demonstrated it contributes to a sustainable outcome

through robust Key Performance Indicators such as Opex or Capex spend. Issuers in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making
 positive contributions to the environment and/or society. These criteria are
 product- and conduct-based, covering topics such as fossil fuels and weapons,
 and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - Generate >30% of revenue from thermal coal extraction;
 - Generate >30% revenue from thermal coal generation;
 - Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 31/03/2023 to 31/03/2024.

| Issuer name | Sector | Average | Country |
|--|------------------------|---------|---------|
| | | weight | |

What was the proportion of sustainability-related investments?

What was the asset allocation?

94.82% of the Fund was invested in issuers with either:

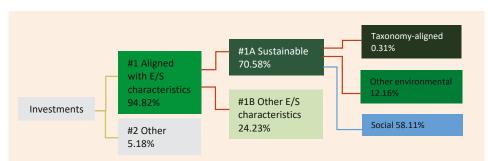

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

5.18% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with

Asset allocation describes the share of investments in specific assets.

E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Information Technology | 27.73% |
| Health Care | 16.16% |
| Financials | 12.23% |
| Industrials | 10.32% |
| Consumer Discretionary | 9.48% |
| Materials | 7.38% |
| Communication Services | 6.85% |
| Energy | 3.90% |
| Consumer Staples | 3.42% |
| Utilities | 1.24% |
| Real Estate | 0.92% |
| Cash and Derivatives | 0.39% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.31% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when data quality improves |
|--|--|
| Climate change adaptation | This figure will be presented when data quality improves |
| Sustainable use and protection of water and marine resources | This figure will be presented when data quality improves |
| Transition to a circular economy | This figure will be presented when data quality improves |
| Pollution prevention and control | This figure will be presented when data quality improves |
| Protection and restoration of biodiversity and ecosystems | This figure will be presented when data quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

| Did | the | financial | product | invest | in | fossil | gas | and/or | nuclear | energy | related |
|-------|--------|-----------|------------|----------|-----|--------|-----|--------|---------|--------|---------|
| activ | vities | complyi | ng with th | ne EU Ta | axo | nomy | ? | | | | |
| | | | | | | | | | | | |

| Yes: | | |
|------|---------------|-------------------|
| | In fossil gas | In nuclear energy |
| × No | | |

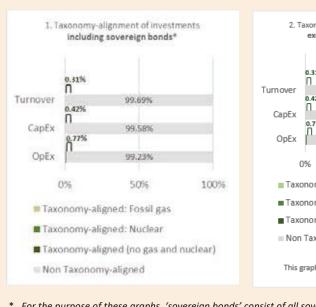

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

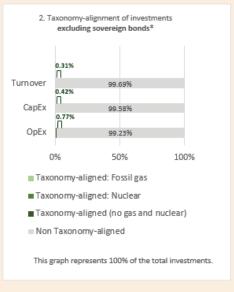

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 - What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.31% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| | 31/03/2024 | 31/03/2023 |
|-----------------------|------------|------------|
| EU Taxonomy Alignment | 0.31% | 0.00% |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

12.16% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

58.11% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 57 ESG specific engagements with companies held in the portfolio. These covered 33 companies across 13 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|------------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 23.08% |
| Environmental Stewardship | Biodiversity, Water, Waste | 14.53% |
| Business Conduct | Cooled and Employee | 8.55% |
| Human Rights | Social and Employee Matters | 8.55% |
| Labour Standards | | 19.66% |

| Public Health | 3.42% |
|----------------------|--------|
| Corporate Governance | 22.22% |

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?
 Not applicable
- How did this financial product perform compared with the broad market index?`
 Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: CT (Lux) Global Smaller Companies Legal entity identifier: 549300U3LV1YG52NP397

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: sustainable investment, it had a proportion of 38.78% of sustainable investments in economic activities that qualify as environmentally with an environmental objective in sustainable under the EU economic activities that qualify as Taxonomy environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in sustainable under the EU economic activities that do not Taxonomy qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did It made sustainable investments not make any sustainable investments with a social objective:

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the subadvisor may assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Holding at least 5% of the Fund holdings in sustainable investments, which are companies that make a positive contribution to society and/or the environment.
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The positive ESG Materiality rating versus the benchmark was monitored daily by our compliance systems. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024, the Fund rating was 2.56 and the benchmark rating was 2.74 (on a scale of 1-5, where lower is better).
- The financial product maintained over 50% of its holdings in strong rated companies over the period. On 31 March 2024, the Fund held 82.34% in strongly rated companies.
- The Fund held over 5% of its holdings in sustainable investments over the period. On 31 March 2024, 38.78% of the Fund was held in sustainable investments.
- We excluded companies that we determined were in breach of accepted

international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.

- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.
- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

...and compared to previous periods?

| | 2024 | 2023 |
|--|--------------|--------------|
| ESG Materiality Rating Fund vs Benchmark | 2.56 vs 2.74 | 2.61 vs 3.02 |
| (12 month rolling average) | | |
| At least 50% of the Fund in strongly rated | 82.34% | 60.56% |

| At least 5% of the Fund in sustainable | 38.78% | N/A |
| investments | | |
| Global Norms Exclusions | No Breaches | No Breaches |
| Thermal Coal, Civilian Weapons and | No Breaches | No Breaches |
| Tobacco exclusions | | |
| Controversial Weapons exclusion | No Breaches | No Breaches |

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund is committed to investing a minimum proportion of 5% in Sustainable Investments. Sustainable Investments made have the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The issuer generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 3. The issuer has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex spend. Issuers in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - o Generate >30% of revenue from thermal coal extraction;
 - o Generate >30% revenue from thermal coal generation;
 - Are developing new thermal coal mining or power generation facilities.

- Actively breach the UN Global Compact Principles
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process. In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024.

| Issuer name | Sector | Average | Country |
|--|------------------------|---------|---------|
| | | weight | |
| CTS Eventim AG & Co. KGaA | Communication Services | 2.38% | DE |
| SPX TECHNOLOGIES, INC. | Industrials | 2.29% | US |
| CLEAN HARBORS, INC. | Industrials | 2.19% | US |
| ALTAIR ENGINEERING INC. | Information Technology | 2.14% | US |
| JAPAN ELEVATOR SERVICE HOLDINGS CO.,LTD. | Industrials | 2.10% | JP |
| RYMAN HOSPITALITY PROPERTIES, INC. | Real Estate | 2.07% | US |
| INTAPP, INC. | Information Technology | 2.02% | US |
| WILLSCOT MOBILE MINI HOLDINGS CORP. | Industrials | 1.98% | US |
| Tecan Group AG | Health Care | 1.96% | СН |
| WORKIVA INC. | Information Technology | 1.93% | US |
| SPS COMMERCE, INC. | Information Technology | 1.91% | US |
| QUAKER CHEMICAL CORPORATION | Materials | 1.89% | US |
| Games Workshop Group PLC | Consumer Discretionary | 1.88% | GB |
| FRESHPET, INC. | Consumer Staples | 1.88% | US |
| LATTICE SEMICONDUCTOR CORPORATION | Information Technology | 1.84% | US |

What was the proportion of sustainability-related investments?

What was the asset allocation?

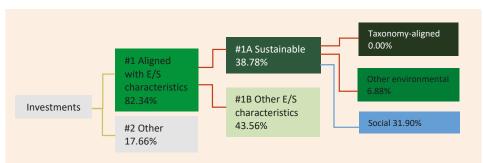

82.34% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

Asset allocation describes the share of investments in specific assets.

17.66% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Industrials | 34.37% |
| Information Technology | 21.35% |
| Health Care | 10.75% |
| Consumer Discretionary | 8.82% |
| Financials | 8.60% |
| Consumer Staples | 5.03% |
| Materials | 4.01% |
| Communication Services | 3.97% |
| Real Estate | 2.07% |
| Cash and Derivatives | 1.04% |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.00% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when data |
|-----------------------------------|---|
| | quality improves |
| Climate change adaptation | This figure will be presented when data |
| | quality improves |
| Sustainable use and protection of | This figure will be presented when data |
| water and marine resources | quality improves |
| Transition to a circular economy | This figure will be presented when data |
| | quality improves |
| Pollution prevention and control | This figure will be presented when data |
| | quality improves |
| Protection and restoration of | This figure will be presented when data |
| biodiversity and ecosystems | quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

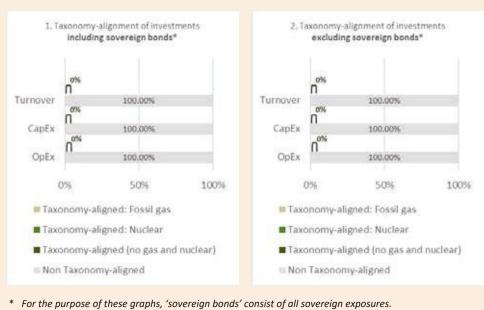

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? Taxonomy-aligned activities are expressed as a share of:

- reflecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.00% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| | 31/03/2024 | 31/03/2023 |
|-----------------------|------------|------------|
| EU Taxonomy Alignment | 0.00% | 0.00% |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

6.88% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments? 31.90% of the sustainable investments had a social objective.

sustainable

investments with an environmental

account the criteria

objective that do

not take into

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 18 ESG specific engagements with companies held in the portfolio. These covered 13 companies across 6 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|------------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 9.38% |
| Environmental Stewardship | Biodiversity, Water, Waste | 6.25% |
| Business Conduct | | 0% |
| Human Rights | Casial and Francisco | 3.13% |
| Labour Standards | Social and Employee Matters | 28.13% |
| Public Health | | 6.25% |
| Corporate Governance | | 46.88% |

Product name: CT (Lux) American

Legal entity identifier: 549300DPU5Y0HRX49161

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes It promoted Environmental/Social (E/S) It made **sustainable** characteristics and investments with an while it did not have as its objective a environmental objective: sustainable investment, it had a proportion of 45.64% of sustainable investments in economic activities that qualify as environmentally with an environmental objective in sustainable under the EU economic activities that qualify as Taxonomy environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in sustainable under the EU economic activities that do not Taxonomy qualify as environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: _

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product promoted environmental and/or social characteristics by integrating responsible investment measures in the following ways:

- Possessing a more favourable ESG Materiality score than the benchmark, the S&P 500, over rolling 12-month periods, using the Columbia Threadneedle ESG Materiality Rating Model.
- Investing at least 50% of the portfolio in companies that have a strong ESG Materiality Rating. Where necessary, the Sub-Advisor may assess companies that are not covered by its

that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification

Sustainable investment means

an investment in an

economic activity

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

Inat Regulation
does not include a
list of socially
sustainable
economic activities.
Sustainable
investments with an
environmental
objective might be
aligned with the
Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

ESG Materiality Rating Model as having a strong rating using its own research, engage with companies that have low ESG Materiality Ratings for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.

- Holding at least 5% of the Fund holdings in sustainable investments, which are companies that make a positive contribution to society and/or the environment.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding companies in breach of accepted international standards and principles, such as the United Nations Global Compact, the International Labour Organization Labour Standards and the United Nations Guiding Principles on Business and Human Rights.
- Excluding companies with involvement in controversial weapons, in line with the Columbia Threadneedle Controversial Weapons Policy, and companies with direct involvement in nuclear weapons.
- Engaging with companies with poor ESG Materiality Rating to encourage improvement of their ESG practices over time on issues ranging from climate change to board independence and diversity.

How did the sustainability indicators perform?

Specific sustainability indicators are used to measure the attainment of the environmental or social characteristics promoted by the Portfolio:

- The Portfolio maintained a positive ESG Materiality rating compared to the S&P 500 Index, assessed over rolling 12-month periods, using the ESG Materiality Rating Model. Throughout the reporting period, the Portfolio maintained a better ESG Materiality rating than the benchmark. On 31 March 2024, the Portfolio's rating was 2.19 against a benchmark rating of 2.50 (on a scale of 1-5, where lower is better).
- The Sub-Advisor invested at least 50% of the portfolio in strongly rated ESG companies. On 31 March 2024, the portfolio held 89.51% in strongly rated ESG companies.
- The Fund held over 5% of its holdings in sustainable investments over the period. On 31 March 2024, 45.64% of the Fund was held in sustainable investments.
- The Sub-Advisor excluded companies that it determined to be in breach of accepted international standards, for example the UN Global Compact Principles

and that derive revenue above particular thresholds from certain industries and activities that are harmful to the environment and/or society. This exclusion policy was adhered to by the Portfolio

- The Sub-Advisor adhered to its Controversial Weapons Policy and excluded companies with direct involvement in nuclear weapons.

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

...and compared to previous periods?

Not applicable – we will provide a comparison of the sustainability indictors to a previous period in the next report

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Advisor uses one or more of the criteria below to identify sustainable investments that contribute to an environmental or social objective:

- The contribution of a company to one or more of the 17 Sustainable Development Goals (SDGs) that have a social or environmental objective. This is measured using the proportion of a company's revenue streams that contribute positively to the targets of the SDGs. Where a company's revenues are at least 50% positively aligned, this indicates it generates the majority of its revenue from sustainable solutions.
- A qualitative assessment that a company offers sustainable solutions, where the Sub-Advisor's due diligence concludes and evidences that the contribution of a company's revenues aligned to the SDGs will increase over the medium term.
- A qualitative assessment and documented evidence that sustainability is a material business driver within a company's operations or business approach, which contributes to positive environmental or social outcomes.

The Portfolio's relatively high percentage of sustainable investments (45.64%) have been invested in accordance with and helped to contribute to the objectives mentioned above over the prior 12 months. This level of sustainable investments is well in excess of the minimum required level for this product (5%).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making
 positive contributions to the environment and/or society. These criteria are
 product- and conduct-based, covering topics such as fossil fuels and weapons,
 and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - o Generate >30% of revenue from thermal coal extraction;
 - Generate >30% revenue from thermal coal generation;
 - Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024.

| Issuer name | Sector | Average | Country |
|------------------------------|------------------------|---------|---------|
| | | weight | |
| MICROSOFT CORPORATION | Information Technology | 7.33% | US |
| NVIDIA CORPORATION | Information Technology | 5.82% | US |
| AMAZON.COM, INC. | Consumer Discretionary | 4.34% | US |
| ALPHABET INC. | Communication Services | 3.75% | US |
| LAM RESEARCH CORPORATION | Information Technology | 3.44% | US |
| ELI LILLY AND COMPANY | Health Care | 3.14% | US |
| META PLATFORMS, INC. | Communication Services | 2.95% | US |
| THE SHERWIN-WILLIAMS COMPANY | Materials | 2.89% | US |
| BROADCOM INC. | Information Technology | 2.79% | US |
| THE WALT DISNEY COMPANY | Communication Services | 2.60% | US |
| INTUITIVE SURGICAL, INC. | Health Care | 2.51% | US |
| VOYA FINANCIAL, INC. | Financials | 2.47% | US |
| THE PROCTER & GAMBLE COMPANY | Consumer Staples | 2.28% | US |
| BRISTOL-MYERS SQUIBB COMPANY | Health Care | 2.22% | US |
| PROLOGIS, INC. | Real Estate | 2.14% | US |

What was the proportion of sustainability-related investments?

What was the asset allocation?

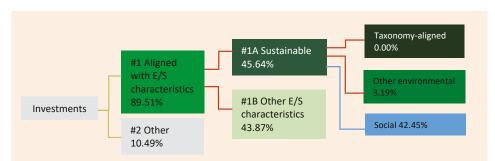

89.51% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

10.49% of the Fund was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Information Technology | 31.34% |
| Health Care | 14.38% |
| Communication Services | 12.30% |
| Financials | 10.05% |
| Consumer Discretionary | 7.91% |
| Consumer Staples | 7.18% |
| Industrials | 6.73% |
| Materials | 3.46% |
| Energy | 3.33% |
| Real Estate | 2.91% |
| Cash and Derivatives | 0.39% |

nuclear energy, the criteria include comprehensive safety and waste

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations

on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For

performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.00% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made

available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when |
|---|------------------------------------|
| | data quality improves |
| Climate change adaptation | This figure will be presented when |
| | data quality improves |
| Sustainable use and protection of water and | This figure will be presented when |
| marine resources | data quality improves |
| Transition to a circular economy | This figure will be presented when |
| | data quality improves |
| Pollution prevention and control | This figure will be presented when |
| | data quality improves |
| Protection and restoration of biodiversity | This figure will be presented when |
| and ecosystems | data quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

| Did | the | financial | product | invest | in | fossil | gas | and/or | nuclear | energy | related |
|-------|--------|-----------|------------|----------|-----|--------|-----|--------|---------|--------|---------|
| activ | vities | complyir | ng with th | ne EU Ta | ахо | nomy | ? | | | | |

| | Yes: | | |
|---|------|---------------|-------------------|
| | | In fossil gas | In nuclear energy |
| × | No | | |

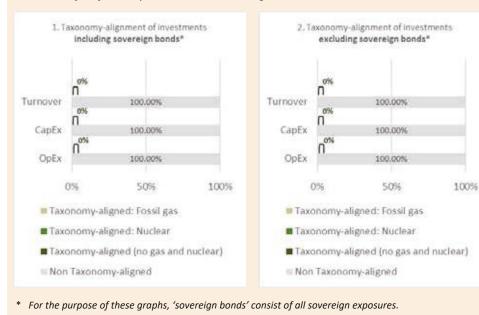

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.00% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable – this is the first reporting period for the fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

3.19% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

42.45% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 39 ESG specific engagements with companies held in the portfolio. These covered 21 companies across 1 country across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|----------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 15.4% |
| Environmental | Biodiversity, Water, Waste | 12.8% |
| Stewardship | | |
| Business Conduct | Social and Employee Matters | 6.4% |
| Human Rights | Matters | 19.2% |
| Labour Standards | | 16.7% |
| Public Health | | 3.8% |
| Corporate Governance | | 25.6% |

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

economic activity that contributes to

promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product promoted environmental and/or social characteristics by integrating responsible investment measures in the following ways:

- Possessing a more favourable ESG Materiality score than the benchmark, the S&P 500, over rolling 12-month periods, using the Columbia Threadneedle ESG Materiality Rating Model.
- Investing at least 50% of the portfolio in companies that have a strong ESG Materiality

Rating. Where necessary, the Sub-Advisor may assess companies that are not covered by its ESG Materiality Rating Model as having a strong rating using its own research, engage with companies that have low ESG Materiality Ratings for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.

- Investing at least 5% of the Portfolio's assets in sustainable investments, which are companies that make a positive contribution to society and/or the environment.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding companies in breach of accepted international standards and principles, such as the United Nations Global Compact, the International Labour Organization Labour Standards and the United Nations Guiding Principles on Business and Human Rights.
- Excluding companies with involvement in controversial weapons, in line with the Columbia Threadneedle Controversial Weapons Policy, and companies with direct involvement in nuclear weapons.
- Engaging with companies with poor ESG Materiality Ratings to encourage improvement of their ESG practices over time on issues ranging from climate change to board independence and diversity.

How did the sustainability indicators perform?

Specific sustainability indicators are used to measure the attainment of the environmental or social characteristics promoted by the Portfolio:

- The Portfolio maintained a positive ESG Materiality rating compared to the S&P 500 Index, assessed over rolling 12-month periods, using the ESG Materiality Rating Model. Throughout the reporting period, the Portfolio maintained a better ESG Materiality rating than the benchmark. On 31 March 2024, the Portfolio's rating was 2.21 against a benchmark rating of 2.50 (on a scale of 1-5, where lower is better).
- The Sub-Advisor invested at least 50% of the portfolio in companies with a strong ESG rating. On 31 March 2024, the portfolio held 89.35% in strongly rated ESG companies.
- The Fund held over 5% of its holdings in sustainable investments over the period. On 31 March 2024, 37.42% of the Fund was held in sustainable investments.
- The Sub-Advisor excluded companies that it determined to be in breach of

accepted international standards, for example the UN Global Compact Principles and that derive revenue above particular thresholds from certain industries and activities that are harmful to the environment and/or society. This exclusion policy was adhered to by the Portfolio

- The Sub-Advisor adhered to its Controversial Weapons Policy and excluded companies with direct involvement in nuclear weapons.

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

... and compared to previous periods?

Not applicable – we will provide a comparison of the sustainability indictors to a previous period in the next report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund is committed to investing a minimum proportion of 5% in Sustainable Investments. Sustainable Investments made have the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The issuer generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The issuer has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex spend. Issuers in this category are reviewed and approved by our responsible investment team.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- The Fund screens out investments that are contrary to the goals of making
 positive contributions to the environment and/or society. These criteria are
 product- and conduct-based, covering topics such as fossil fuels and weapons,
 and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - Generate >30% of revenue from thermal coal extraction;
 - Generate >30% revenue from thermal coal generation;
 - o Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?"

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024.

| Issuer name | Sector | Average | Country |
|-------------------------------------|------------------------|---------|---------|
| | | weight | |
| MICROSOFT CORPORATION | Information Technology | 7.89% | US |
| AMAZON.COM, INC. | Consumer Discretionary | 4.97% | US |
| VERTEX PHARMACEUTICALS INCORPORATED | Health Care | 4.10% | US |
| LAM RESEARCH CORPORATION | Information Technology | 3.89% | US |
| QUALCOMM INCORPORATED | Information Technology | 3.82% | US |
| THE CHARLES SCHWAB CORPORATION | Financials | 3.41% | US |
| THE COCA-COLA COMPANY | Consumer Staples | 3.40% | US |
| THE WALT DISNEY COMPANY | Communication Services | 3.09% | US |
| INTUITIVE SURGICAL, INC. | Health Care | 3.08% | US |
| NVIDIA CORPORATION | Information Technology | 3.03% | US |
| META PLATFORMS, INC. | Communication Services | 2.98% | US |
| THE PROCTER & GAMBLE COMPANY | Consumer Staples | 2.82% | US |
| AGILENT TECHNOLOGIES, INC. | Health Care | 2.72% | US |
| GLOBAL PAYMENTS INC. | Financials | 2.71% | US |
| ENDEAVOR GROUP HOLDINGS, INC. | Communication Services | 2.62% | US |

What was the proportion of sustainability-related investments?

What was the asset allocation?

89.35% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

10.65% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Information Technology | 27.74% |
| Health Care | 14.76% |
| Financials | 13.83% |
| Communication Services | 10.97% |
| Consumer Staples | 8.43% |
| Consumer Discretionary | 8.37% |
| Industrials | 6.62% |
| Materials | 3.13% |
| Real Estate | 2.61% |
| Energy | 2.35% |
| Cash and Derivatives | 1.18% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

To comply with the EU Taxonomy, the criteria for fossil gas

include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.00% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made

available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when data quality improves |
|--|--|
| Climate change adaptation | This figure will be presented when data quality improves |
| Sustainable use and protection of water and marine resources | This figure will be presented when data quality improves |
| Transition to a circular economy | This figure will be presented when data quality improves |
| Pollution prevention and control | This figure will be presented when data quality improves |
| Protection and restoration of biodiversity and ecosystems | This figure will be presented when data quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

| Did | the | financial | product | invest | in | fossil | gas | and/or | nuclear | energy | related |
|--|-----|-----------|---------|--------|----|--------|-----|--------|---------|--------|---------|
| activities complying with the EU Taxonomy? | | | | | | | | | | | |

| Yes: | | |
|------|---------------|-------------------|
| | In fossil gas | In nuclear energy |
| × No | | |

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

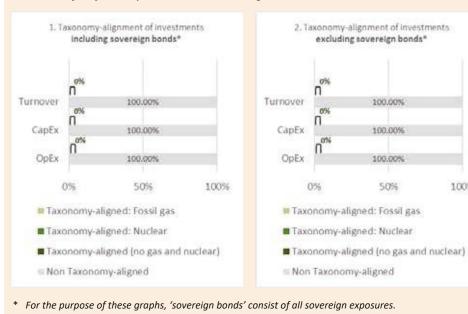

100%

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.00% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable – this is the first time we are reporting taxonomy alignment for this Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.08% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

35.34% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 29 ESG specific engagements with companies held in the portfolio. These covered 16 companies across 1 country across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|------------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 20.3% |
| Environmental Stewardship | Biodiversity, Water, Waste | 15.3% |
| Business Conduct | Social and Employee Matters | 6.8% |
| Human Rights | Watters | 15.3% |
| Labour Standards | | 16.9% |
| Public Health | | 1.7% |
| Corporate Governance | | 23.7% |

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Regulation (EU) 2020/852,

practices.

economic activity that contributes to

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product promoted environmental and/or social characteristics by integrating responsible investment measures in the following ways:

- Possessing a more favourable ESG Materiality score than the benchmark, the Russell 2500, over rolling 12-month periods, using the Columbia Threadneedle ESG Materiality Rating Model.
- Investing at least 50% of the portfolio in companies that have a strong ESG Materiality

Rating. Where necessary, the Sub-Advisor may assess companies that are not covered by its ESG Materiality Rating Model as having a strong rating using its own research, engage with companies that have low ESG Materiality Ratings for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.

- Investing at least 5% of the Portfolio's assets in sustainable investments in companies that make a positive contribution to society and/or the environment.
- Excluding companies that derive revenue over a particular threshold from certain industries and activities that do not promote environmental or social characteristics.
- Excluding companies in breach of accepted international standards and principles, such as the United Nations Global Compact, the International Labour Organization Labour Standards and the United Nations Guiding Principles on Business and Human Rights.
- Excluding companies with involvement in controversial weapons, in line with the Columbia Threadneedle Controversial Weapons Policy, and companies with direct involvement in nuclear weapons.
- Engaging with companies with poor ratings or which are unrated by the ESG Materiality Rating Model, with a view to influence management teams to improve their ESG practices or generate better disclosures.

How did the sustainability indicators perform?

Specific sustainability indicators are used to measure the attainment of the environmental or social characteristics promoted by the Portfolio:

- The Portfolio is maintained a positive ESG Materiality rating compared to the Russell 2500 Index, assessed over rolling 12-month periods, using the ESG Materiality Rating Model. Throughout the reporting period, the Portfolio maintained a better ESG Materiality rating than the benchmark. On 31 March 2024, the Portfolio's rating was 2.53 against a benchmark rating of 2.79 (on a scale of 1-5, where lower is better).
- The Sub-Advisor invested at least 50% of the portfolio in companies that have a strongly rated ESG companies. On 31 March 2024, the portfolio held 83.01% in strongly rated ESG companies.
- The Portfolio invested at least 5% of assets in sustainable investments. On 31 March 2024, 25.52% of the Portfolio was in sustainable investments.
- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade

restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.

- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.
- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

...and compared to previous periods?

| | 2024 | 2023 |
|--|--------------|--------------|
| ESG Materiality Rating Fund vs Benchmark | 2.53 vs 2.79 | 2.41 vs 2.97 |
| At least 50% of the Fund in strongly rated ESG companies | 83.01% | 76.1% |
| At least 5% of the Fund in sustainable investments | 25.52% | N/A |
| Global Norms Exclusions | No Breaches | No Breaches |
| Thermal Coal, Civilian Weapons and Tobacco exclusions | No Breaches | No Breaches |
| Controversial Weapons exclusion | No Breaches | No Breaches |

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund is committed to investing a minimum proportion of 5% in Sustainable Investments. Sustainable Investments made have the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

1. The issuer generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or

2. The issuer has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex spend. Issuers in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making
 positive contributions to the environment and/or society. These criteria are
 product- and conduct-based, covering topics such as fossil fuels and weapons,
 and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - Generate >30% of revenue from thermal coal extraction;
 - Generate >30% revenue from thermal coal generation;
 - Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?"

The list includes the

greatest proportion of investments of the

financial product during the reference

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

What was the asset allocation?

83.01% of the financial product was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

and so were aligned with Environmental and/or Social characteristics. For the purposes of reporting these are incorporated in #1 below.

16.99% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Industrials | 20.26% |
| Consumer Discretionary | 14.87% |
| Information Technology | 14.07% |
| Health Care | 13.35% |

| Financials | 13.03% |
|------------------------|--------|
| Materials | 5.66% |
| Real Estate | 5.28% |
| Energy | 3.69% |
| Utilities | 3.54% |
| Consumer Staples | 2.62% |
| Communication Services | 2.32% |
| Cash and Derivatives | 1.31% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.00% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| | • |
|--|------------------------------------|
| Climate change mitigation | This figure will be presented when |
| | data quality improves |
| Climate change adaptation | This figure will be presented when |
| | data quality improves |
| Sustainable use and protection of water and | This figure will be presented when |
| marine resources | data quality improves |
| Transition to a circular economy | This figure will be presented when |
| | data quality improves |
| Pollution prevention and control | This figure will be presented when |
| | data quality improves |
| Protection and restoration of biodiversity and | This figure will be presented when |
| ecosystems | data quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

Taxonomy-aligned activities are expressed as a share of:

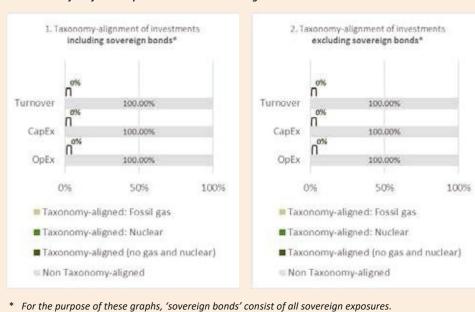

- reflecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| Yes: | | |
|-------------|---------------|-------------------|
| | In fossil gas | In nuclear energy |
| ≭ No | | |

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.00% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| | 31/03/2024 | 31/03/2023 |
|-----------------------|------------|------------|
| EU Taxonomy Alignment | 0.00% | 0.00% |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.80% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

22.72% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

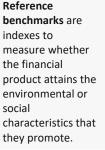

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 9 ESG specific engagements with companies held in the portfolio. These covered 9 companies across 1 country across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|------------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 15.8% |
| Environmental Stewardship | Biodiversity, Water, Waste | 15.8% |
| Business Conduct | Social and Employee Matters | 5.3% |
| Human Rights | iviatters | 10.5% |
| Labour Standards | | 15.8% |
| Public Health | | 5.3% |
| Corporate Governance | | 31.6% |

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

 Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: CT (Lux) Asia Equities

Legal entity identifier: 549300NJZIZV56FVQ648

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: sustainable investment, it had a proportion of 36.84% of sustainable investments in economic activities that qualify as environmentally with an environmental objective in sustainable under the EU economic activities that qualify as Taxonomy environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in sustainable under the EU economic activities that do not Taxonomy qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did It made sustainable investments not make any sustainable investments with a social objective:

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the Sub-Advisor may assess companies that are not covered by its ESG Materiality Rating Model as having a strong rating using its own research, engage with companies that have low ESG Materiality Ratings for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The positive ESG Materiality rating versus the benchmark was monitored daily by our compliance systems. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024 the fund rating was 2.43 and the benchmark rating was 2.57 (on a scale of 1-5, where lower is better).
- The financial product maintained over 50% of its holdings in strong rated ESG issuers over the period. This was 81.16% as at 31 March 2024.
- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.
- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under

review.

- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

...and compared to previous periods?

| | 2024 | 2023 |
|--|--------------|--------------|
| ESG Materiality Rating Fund vs Benchmark | 2.43 vs 2.57 | 2.08 vs 2.48 |
| At least 50% of the Fund in companies that are strongly rated ESG issuers. | 81.16% | 88.80% |
| Global Norms Exclusions | No Breaches | No Breaches |
| Thermal Coal, Civilian Weapons and Tobacco exclusions | No Breaches | No Breaches |
| Controversial Weapons exclusion | No Breaches | No Breaches |

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund does not have a commitment to invest a minimum proportion of its holdings in sustainable investments. However, the Fund did invest partially in sustainable investments, with the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The company generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The company has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex. Companies in this category are reviewed and approved by our responsible investment team.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - Generate >30% of revenue from thermal coal extraction;
 - Generate >30% revenue from thermal coal generation;
 - o Are developing new thermal coal mining or power generation facilities.

- Actively breach the UN Global Compact Principles
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?"

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/23 - 31/03/24

| Issuer name | Sector | Average | Country |
|--|------------------------|---------|---------|

What was the proportion of sustainability-related investments?

What was the asset allocation?

81.16% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

investments in line with our framework and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

18.84% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Information Technology | 28.50% |
| Financials | 24.41% |
| Consumer Discretionary | 10.29% |
| Communication Services | 8.47% |
| Industrials | 7.16% |
| Real Estate | 4.56% |
| Energy | 4.49% |
| Materials | 4.36% |
| Health Care | 4.14% |
| Cash and Derivatives | 1.66% |
| Utilities | 0.99% |
| Consumer Staples | 0.96% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.00% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when |
|--|------------------------------------|
| | data quality improves |
| Climate change adaptation | This figure will be presented when |
| | data quality improves |
| Sustainable use and protection of water and | This figure will be presented when |
| marine resources | data quality improves |
| Transition to a circular economy | This figure will be presented when |
| | data quality improves |
| Pollution prevention and control | This figure will be presented when |
| | data quality improves |
| Protection and restoration of biodiversity and | This figure will be presented when |
| ecosystems | data quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

| activities complying with the EU Taxonomy? |
|--|
| Yes: |
| In fossil gas In nuclear energy |
| ★ No |

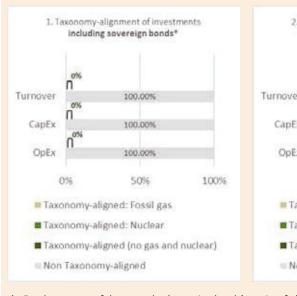

Taxonomy-aligned activities are expressed as a share of:

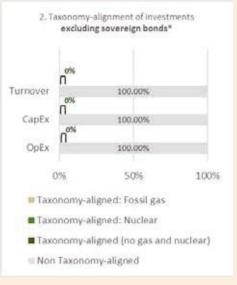

- reflecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 - What was the share of investments made in transitional and enabling activities?i

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.00% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| | 31/03/2024 | 31/03/2023 |
|-----------------------|------------|------------|
| EU Taxonomy Alignment | 0.00% | 0.00% |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

10.00% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

26.84% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 64 ESG specific engagements with companies held in the portfolio. These covered 27 companies across 8 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|-------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 22.07% |

| Environmental Stewardship | Biodiversity, Water, Waste | 12.41% |
|------------------------------|--------------------------------|--------|
| Business Conduct | Social and Employee Matters | 6.90% |
| Human Rights | Matters | 8.87% |
| Labour Standards | | 18.62% |
| Public Health | | 0.69% |
| Corporate Governance | | 30.24% |

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?
 Not applicable
- How did this financial product perform compared with the broad market index?`
 Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: CT (Lux) US Contrarian Core Equities **Legal entity identifier: 5493001802H517KS6C10**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: sustainable investment, it had a proportion of 47.13% of sustainable investments in economic activities that qualify as environmentally with an environmental objective in sustainable under the EU economic activities that qualify as Taxonomy environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in sustainable under the EU economic activities that do not Taxonomy qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did It made sustainable investments not make any sustainable investments with a social objective:

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Compared favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.
- Maintained at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the sub-advisor may

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a

Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.

- Excluded issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluded issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluded issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- Engaged with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024, the fund rating was 2.48 and the benchmark rating was 2.54 (on a scale of 1-5, where lower is better).
- The financial product maintained over 50% of its holdings in strongly rated ESG companied over the period. On 31 March 2024, the fund held 97.11% in strongly rated ESG companies.
- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.
- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.
- We also adhered to our Controversial Weapons Policy and excluded issuers with

direct involvement in nuclear weapons. No breaches were identified during the period under review.

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

...and compared to previous periods?

Not applicable – we will provide a comparison of the sustainability indictors to a previous period in the next report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund does not have a commitment to invest a minimum proportion of its holdings in sustainable investments. However, the Fund did invest partially in sustainable investments, with the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The company generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The company has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex. Companies in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - o Generate >30% of revenue from thermal coal extraction;
 - Generate >30% revenue from thermal coal generation;
 - Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles.
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?"

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024

| Issuer name | Sector | Average weight | Country |
|-------------------------------|------------------------|----------------|---------|
| MICROSOFT CORPORATION | Information Technology | 6.92% | US |
| APPLE INC. | Information Technology | 6.38% | US |

What was the proportion of sustainability-related investments?

What was the asset allocation?

97.11% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but are considered to be sustainable investments in line with our framework

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

2.89% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Information Technology | 31.69% |
| Financials | 12.17% |
| Health Care | 11.53% |
| Communication Services | 10.16% |
| Consumer Discretionary | 9.19% |
| Industrials | 8.38% |
| Consumer Staples | 5.52% |
| Energy | 3.76% |
| Cash and Derivatives | 2.89% |
| Materials | 1.98% |
| Utilities | 1.73% |
| Real Estate | 1.00% |

Enabling activities directly enable

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations

on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.00% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy

alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when data quality improves |
|--|--|
| Climate change adaptation | This figure will be presented when data quality improves |
| Sustainable use and protection of water and marine resources | This figure will be presented when data quality improves |
| Transition to a circular economy | This figure will be presented when data quality improves |
| Pollution prevention and control | This figure will be presented when data quality improves |
| Protection and restoration of biodiversity and ecosystems | This figure will be presented when data quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

| Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? |
|---|
| Yes: |
| In fossil gas In nuclear energy |
| ≭ No |

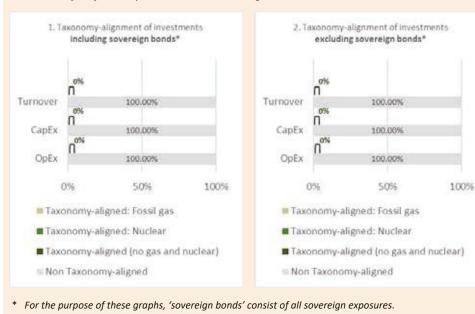

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.00% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable – this is the first time we are reporting for this Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.14% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

42.99% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 65 ESG specific engagements with companies held in the portfolio. These covered 38 companies across 2 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|----------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 16.67% |
| Environmental | Biodiversity, Water, Waste | 10.32% |
| Stewardship | | |
| Business Conduct | | 6.35% |
| Human Rights | Social and Employee | 14.29% |
| Labour Standards | Social and Employee Matters | 19.05% |
| Public Health | | 7.14% |
| Corporate Governance | | 26.19% |

How did this financial product perform compared to the reference benchmark?

economic activity that contributes to

social objective, provided that the investment does not significantly harm

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

- ESG characteristics, measured by a combination of the ESG Materiality rating and fundamental research of portfolio companies. The Portfolio will tend to favour companies which score strongly on the Columbia Threadneedle ESG Materiality Rating, therefore giving the Portfolio a positive tilt in favour of ESG characteristics when compared with those of the MSCI Europe Index on a rolling 12-month basis. All strongly rated companies are considered as aligned with the E/S characteristics promoted by the Portfolio. However, the Portfolio may invest in companies with a poorer rating and these companies are also considered as aligned with the E/S characteristics promoted by the Portfolio on the basis that these securities, notwithstanding such rating, are (i) determined through our fundamental research to already demonstrate strong ESG practices or (ii) have scope for improvement in their ESG practices. We seek to encourage such improvements through the implementation of our engagement policy.
- Excluding issuers that we determine are in breach of accepted international standards and principles of governance such as, but not limited to, the United Nations Global Compact, the International Labour Organization Labour Standards, and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers that derive revenue above a particular threshold from certain industries and activities that do not promote environmental or social characteristics.
- Investing at least 5% of the Portfolio's assets in sustainable investments
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The Fund maintained a better ESG Materiality Score than the benchmark, assessed over rolling 12 months periods. On 31 March 2024, the fund rating was 1.98 and the benchmark rating was 2.21 (on a scale of 1-5, where lower is better).

We invested at least 80% of the portfolio in companies with strong or improving ESG characteristics. As at 31 March 2024, the portfolio invested 98.12% in companies with strong or improving ESG characteristics

We excluded companies that we determined were in breach of accepted international standards and principles of governance. The exclusion policy was adhered to with the application of strict pre-trade restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.

We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation,

and tobacco production. No breaches were identified during the period under review.

We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

We invested at least 5% of the Portfolio's assets in sustainable investments. As at 31 March 2024, the portfolio invested 61.28% in sustainable investments.

...and compared to previous periods?

| | 2024 | 2023 |
|--|--------------|--------------|
| ESG Materiality Rating Fund vs Benchmark | 1.98 vs 2.21 | 2.70 vs 2.79 |
| At least 80% of the Fund in issuers with strong or improving ESG characteristics | 98.12% | 98.60% |
| Investing at least 5% of the Portfolio's assets in sustainable investments | 61.28% | N/A |
| Exclusion of issuers that breach of accepted international standards. | No Breaches | No Breaches |
| Exclusion of issuers that derive revenue above particular thresholds from certain industries and activities that are harmful to the environment and/or society | No Breaches | No Breaches |
| Controversial Weapons exclusion | No Breaches | No Breaches |

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund is committed to investing a minimum proportion of 5% in Sustainable Investments. Sustainable Investments made have the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The issuer generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The issuer has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex spend. Issuers in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - o Generate >5% of revenue from thermal coal extraction;
 - o Generate >25% revenue from thermal coal generation;
 - o Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?"

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/23 - 31/03/24

| Issuer name | Sector | Average | Country |
|--|------------------------|---------|---------|
| | | weight | |
| NOVO NORDISK A/S | Health Care | 6.67% | DK |
| ASML Holding N.V. | Information Technology | 4.90% | NL |
| LVMH MOET HENNESSY LOUIS VUITTON SE | Consumer Discretionary | 4.25% | FR |
| TotalEnergies SE | Energy | 3.76% | FR |
| 3I GROUP PLC | Financials | 3.43% | GB |

| Deutsche Telekom AG | Communication Services | 2.41% | DE |
| Novartis AG | Health Care | 2.41% | CH |

What was the proportion of sustainability-related investments?

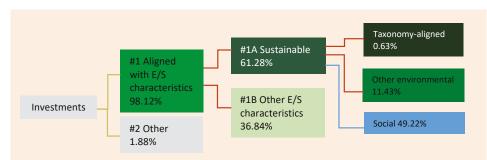

What was the asset allocation?

The ESG Materiality Rating Model is one of the measures used to meet the environmental or social characteristics promoted by the Portfolio. The Portfolio will tend to favour companies which score strongly on the Columbia Threadneedle ESG Materiality Rating, therefore giving the Portfolio a positive tilt in favour of ESG characteristics when compared with those of the MSCI Europe Index on a rolling 12-month basis. All strongly rated companies (rating 1 to 3) are considered as aligned with the environmental or social characteristics promoted by the Portfolio. However, the Portfolio may invest in companies with a lower rating, or companies not assessed by the ESG Materiality Rating Model, and these companies are also considered as aligned with the environmental or social characteristics promoted by the Portfolio on the basis that these securities, notwithstanding such rating (or in the absence of a rating), are (i) determined by the Sub-Advisor through fundamental research to already demonstrate strong ESG practices or (ii) have scope for improvement in their ESG practices. The Sub-

Asset allocation describes the share of investments in specific assets.

Advisor seeks to encourage such improvements through the implementation of its engagement policy. 98.12% of the financial product was invested in issuers that are aligned with E/S characteristics.

1.88% of the financial product was invested in: (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; and (iii) derivatives for hedging purposes.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Industrials | 18.77% |
| Financials | 17.49% |
| Consumer Discretionary | 13.76% |
| Health Care | 12.40% |
| Information Technology | 11.99% |
| Materials | 8.55% |
| Communication Services | 6.15% |
| Energy | 3.76% |
| Consumer Staples | 3.63% |
| Cash and Derivatives | 1.88% |
| Utilities | 1.63% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy

Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.63% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when |
|--|------------------------------------|
| | data quality improves |
| Climate change adaptation | This figure will be presented when |
| | data quality improves |
| Sustainable use and protection of water and | This figure will be presented when |
| marine resources | data quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| Yes: | | |
|------|---------------|-------------------|
| | In fossil gas | In nuclear energy |
| × No | | |

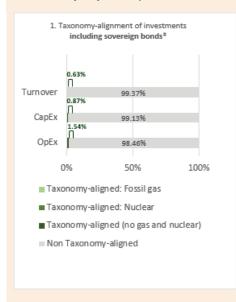

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

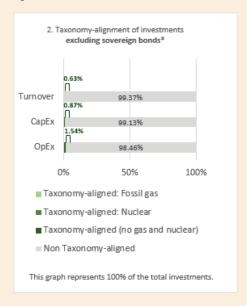

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.59% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| | 31/03/2024 | 31/03/2023 |
|-----------------------|------------|------------|
| EU Taxonomy Alignment | 0.63% | 0.00% |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

11.43% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

49.22% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other investments include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; and (iii) derivatives for hedging purposes.

For ancillary liquid assets, bank deposits and derivatives, ESG considerations were integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 44 ESG specific engagements with companies held in the portfolio. These covered 23 companies across 4 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|------------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 24.10% |
| Environmental Stewardship | Biodiversity, Water, Waste | 19.28% |
| Business Conduct | Social and Employee Matters | 3.61% |
| Human Rights | Watters | 8.43% |
| Labour Standards | | 22.89% |
| Public Health | | 6.02% |
| Corporate Governance | | 15.66% |

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the sub-advisor may assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Holding at least 5% of the Fund holdings in sustainable investments, which are companies that make a positive contribution to society and/or the environment.
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The positive ESG Materiality rating versus the benchmark was monitored daily by our compliance systems. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024 the fund rating was 2.16 and the benchmark rating was 2.22 (on a scale of 1-5, where lower is better).
- The Fund maintained over 50% of its holdings in strongly rated ESG issuers over the period. On 31 March 2024, 77.61% of the Fund was held in strongly rated ESG issuers.
- The Fund held over 5% of its holdings in sustainable investments over the period. On 31 March 2024, 20.35% of the Fund was held in sustainable investments.

- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.
- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.
- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

...and compared to previous periods?

We will provide a comparison of the sustainability indictors to a previous period in the next report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund is committed to investing a minimum proportion of 5% in Sustainable Investments. Sustainable Investments made have the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The issuer generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The issuer has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex spend. Issuers in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making
 positive contributions to the environment and/or society. These criteria are
 product- and conduct-based, covering topics such as fossil fuels and weapons,
 and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - o Generate >30% of revenue from thermal coal extraction;
 - o Generate >30% revenue from thermal coal generation;
 - o Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024.

| Issuer name | Sector | Average weight | Country |
|---------------------------|------------------------|----------------|---------|
| Munters Group AB | Industrials | 2.74% | SE |
| HOWDEN JOINERY GROUP PLC | Industrials | 2.73% | GB |
| CTS Eventim AG & Co. KGaA | Communication Services | 2.61% | DE |
| FLUIDRA S.A. | Industrials | 2.51% | ES |
| Karnov Group AB (publ) | Communication Services | 2.34% | SE |
| VERALLIA SA | Materials | 2.29% | FR |
| JOHNSON SERVICE GROUP PLC | Industrials | 2.17% | GB |
| CAREL INDUSTRIES S.P.A. | Industrials | 2.16% | IT |
| Belimo Holding AG | Industrials | 2.15% | CH |
| SIG Group AG | Materials | 1.96% | СН |
| GLOBALDATA PLC | Industrials | 1.92% | GB |
| LECTRA SA | Information Technology | 1.90% | FR |
| VZ Holding AG | Financials | 1.90% | СН |
| RIGHTMOVE PLC | Communication Services | 1.88% | GB |
| NEMETSCHEK SE | Information Technology | 1.80% | DE |

What was the proportion of sustainability-related investments?

What was the asset allocation?

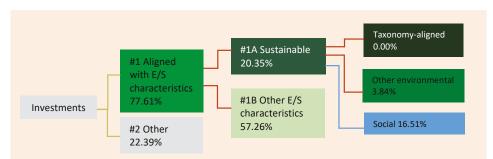

77.61% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

22.39% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Industrials | 36.69% |
| Information Technology | 13.27% |
| Health Care | 11.09% |
| Communication Services | 10.90% |
| Financials | 9.56% |
| Materials | 7.53% |
| Consumer Discretionary | 5.87% |
| Consumer Staples | 1.66% |
| Energy | 1.46% |
| Real Estate | 1.00% |
| Cash and Derivatives | 0.97% |

Enabling activities directly enable other activities to make a substantial contribution to an environmental

To comply with the EU Taxonomy, the criteria for fossil gas

include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.00% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when data |
|---|---|
| | quality improves |
| Climate change adaptation | This figure will be presented when data |
| | quality improves |
| Sustainable use and protection of water | This figure will be presented when data |
| and marine resources | quality improves |
| Transition to a circular economy | This figure will be presented when data |
| | quality improves |
| Pollution prevention and control | This figure will be presented when data |
| | quality improves |
| Protection and restoration of | This figure will be presented when data |
| biodiversity and ecosystems | quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

| Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? |
|---|
| Yes: |
| In fossil gas In nuclear energy |
| ≭ No |

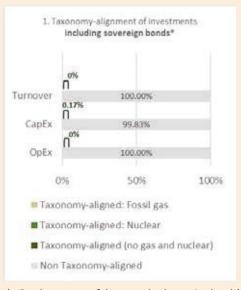

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

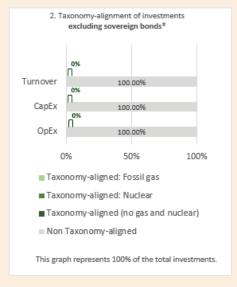

Taxonomy-aligned activities are expressed as a share of:

- reflecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 - What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.00% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

N/A – This is the first time that EU Taxonomy data has been reported for the Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

3.84% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

16.51% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 20 ESG specific engagements with companies held in the portfolio. These covered 17 companies across 5 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|------------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 19.44% |
| Environmental Stewardship | Biodiversity, Water, Waste | 8.33% |
| Business Conduct | | 0.00% |
| Human Rights | 1 | 8.33% |
| Labour Standards | Social and Employee Matters | 27.78% |
| Public Health | 1 | 2.78% |
| Corporate Governance | | 33.33% |

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

social objective and

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the sub-advisor may assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Holding at least 5% of the Fund holdings in sustainable investments, which are companies that make a positive contribution to society and/or the environment.
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The positive ESG Materiality rating versus the benchmark was monitored daily by our compliance systems. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024, the fund rating was 2.29 and the benchmark rating was 2.32 (on a scale of 1-5, where lower is better).
- The financial product maintained over 50% of its holdings in strong rated ESG companies over the period. On 31 March 2024, the Fund held 86.32% in strongly rated ESG companies.
- The Fund held over 5% of its holdings in sustainable investments over the period. On 31 March 2024, 33.72% of the Fund was held in sustainable investments.

- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.
- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.
- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

...and compared to previous periods?

| | 2024 | 2023 |
|---|--------------|--------------|
| ESG Materiality Rating Fund vs Benchmark | 2.29 vs 2.32 | 2.76 vs 2.97 |
| At least 50% of the Fund in strongly rated ESG companies | 86.32% | 57.9% |
| At least 5% of the Fund holdings in sustainable investments | 33.72% | N/A |
| Global Norms Exclusions | No Breaches | No Breaches |
| Thermal Coal, Civilian Weapons and Tobacco exclusions | No Breaches | No Breaches |
| Controversial Weapons exclusion | No Breaches | No Breaches |

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund is committed to investing a minimum proportion of 5% in Sustainable Investments. Sustainable Investments made have the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The issuer generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The issuer has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex spend. Issuers in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making
 positive contributions to the environment and/or society. These criteria are
 product- and conduct-based, covering topics such as fossil fuels and weapons,
 and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - Generate >30% of revenue from thermal coal extraction;
 - Generate >30% revenue from thermal coal generation;
 - o Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles

• Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024.

| Issuer name | Sector | Average | Country |
|----------------------------------|------------------------|---------|---------|
| | | weight | |
| CTS Eventim AG & Co. KGaA | Communication Services | 2.91% | DE |
| HOWDEN JOINERY GROUP PLC | Industrials | 2.72% | GB |
| FLUIDRA S.A. | Industrials | 2.64% | ES |

| ASM International N.V. | Information Technology | 2.29% | NL |
| VERALLIA SA | Materials | 2.23% | FR |
| SIG Group AG | Materials | 2.21% | CH |
| Belimo Holding AG | Industrials | 2.19% | CH |
| VAT Group AG | Industrials | 2.17% | CH |
| ELIS SA | Industrials | 2.03% | FR |
| RIGHTMOVE PLC | Communication Services | 1.92% | GB |
| ASCENTIAL PLC | Communication Services | 1.88% | GB |
| BE Semiconductor Industries N.V. | Information Technology | 1.84% | NL |
| ROTORK P.L.C. | Industrials | 1.82% | GB |
| Gerresheimer AG | Health Care | 1.81% | DE |

What was the proportion of sustainability-related investments?

What was the asset allocation?

86.32% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

and so were aligned with E/S characteristics. For the purposes of reporting these

share of investments in specific assets.

Asset allocation

describes the

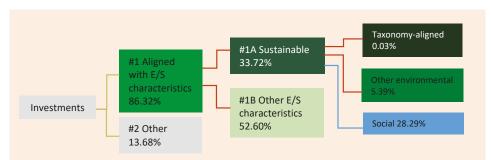

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are incorporated in #1 below.

13.68% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1** Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|-------------|-----------------|
| Industrials | 31.28% |

| Health Care | 12.89% |
|------------------------|--------|
| Information Technology | 12.54% |
| Financials | 12.29% |
| Consumer Discretionary | 8.83% |
| Communication Services | 8.49% |
| Materials | 7.82% |
| Consumer Staples | 2.61% |
| Energy | 1.46% |
| Real Estate | 0.99% |
| Cash and Derivatives | 0.80% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.03% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when data |
|---|---|
| | quality improves |
| Climate change adaptation | This figure will be presented when data |
| | quality improves |
| Sustainable use and protection of water | This figure will be presented when data |
| and marine resources | quality improves |
| Transition to a circular economy | This figure will be presented when data |
| | quality improves |
| Pollution prevention and control | This figure will be presented when data |
| | quality improves |
| Protection and restoration of | This figure will be presented when data |
| biodiversity and ecosystems | quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes:

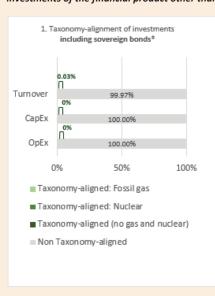

In fossil gas

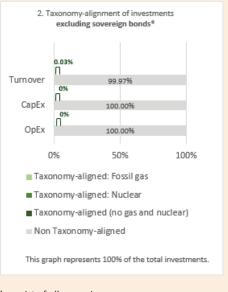

In nuclear energy

No

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.03% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| | 31/03/2024 | 31/03/2023 |
|-----------------------|------------|------------|
| EU Taxonomy Alignment | 0.03% | 0.00% |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.39% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

28.29% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 21 ESG specific engagements with companies held in the portfolio. These covered 18 companies across 7 countries across a range of themes.

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation

(EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or

characteristics that

they promote.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|------------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 20.00% |
| Environmental Stewardship | Biodiversity, Water, Waste | 7.50% |
| Business Conduct | | 2.50% |
| Human Rights | Cocial and Employee | 7.50% |
| Labour Standards | Social and Employee Matters | 27.50% |
| Public Health | | 5.00% |
| Corporate Governance | | 30.00% |

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: CT (Lux) European Select

Legal entity identifier: 549300MKHX2X26Q8CM51

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: sustainable investment, it had a proportion of 56.24% of sustainable investments in economic activities that qualify as environmentally with an environmental objective in sustainable under the EU economic activities that qualify as Taxonomy environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in sustainable under the EU economic activities that do not Taxonomy qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did It made sustainable investments not make any sustainable investments with a social objective:

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable investment means

an investment in an

an environmental or social objective, provided that the

practices.

economic activity that contributes to

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the sub-advisor may assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Holding at least 5% of the Fund holdings in sustainable investments, which are companies that make a positive contribution to society and/or the environment.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The positive ESG Materiality rating versus the benchmark was monitored daily by our compliance systems. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024 the fund rating was 1.87 and the benchmark rating was 2.17 (on a scale of 1-5, where lower is better).
- The financial product maintained over 50% of its holdings in strongly rated ESG issuers over the period. On 31 March 2024, the fund held 94.97% in strongly rated ESG companies.
- The financial product maintained over 5% of its holdings in sustainable investments. On 31 March 2024, the fund held 56.24% in sustainable investments.

- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.
- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.
- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

...and compared to previous periods?

| | 2024 | 2023 |
|--|--------------|--------------|
| ESG Materiality Rating Fund vs Benchmark | 1.87 vs 2.17 | 2.34 vs 2.73 |
| At least 50% of the Fund in strongly rated ESG companies | 95.0% | 79.50% |
| At least 5% of the Fund in sustainable investments | 56.24% | N/A |
| Global Norms Exclusions | No Breaches | No Breaches |
| Thermal Coal, Civilian Weapons and Tobacco exclusions | No Breaches | No Breaches |
| Controversial Weapons exclusion | No Breaches | No Breaches |

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund is committed to investing a minimum proportion of 5% in Sustainable Investments. Sustainable Investments made have the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass

environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The issuer generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The issuer has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex spend. Issuers in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - o Generate >30% of revenue from thermal coal extraction;
 - Generate >30% revenue from thermal coal generation;
 - o Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles

Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?"

What were the top investments of this financial product?

| Issuer name | Sector | Average | Country |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/23 - 31/03/24

What was the proportion of sustainability-related investments?

What was the asset allocation?

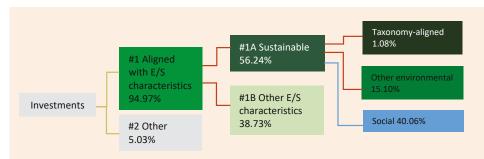

94.97% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

Asset allocation describes the share of investments in specific assets.

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

5.03% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Industrials | 26.73% |
| Consumer Discretionary | 19.52% |
| Financials | 16.41% |
| Information Technology | 16.37% |
| Health Care | 8.72% |
| Materials | 5.51% |
| Consumer Staples | 2.93% |
| Communication Services | 2.26% |
| Cash and Derivatives | 1.54% |

make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

1.08% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when |
|--|------------------------------------|
| | data quality improves |
| Climate change adaptation | This figure will be presented when |
| | data quality improves |
| Sustainable use and protection of water | This figure will be presented when |
| and marine resources | data quality improves |
| Transition to a circular economy | This figure will be presented when |
| | data quality improves |
| Pollution prevention and control | This figure will be presented when |
| | data quality improves |
| Protection and restoration of biodiversity | This figure will be presented when |
| and ecosystems | data quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

| Did | the | financial | product | invest | in | fossil | gas | and/or | nuclear | energy | related |
|-------|--------|------------|------------|----------|-----|--------|-----|--------|---------|--------|---------|
| activ | /ities | s complyir | ng with th | ne EU Ta | axo | nomy | ? | | | | |

| | Yes: | | |
|---|------|---------------|-------------------|
| | | In fossil gas | In nuclear energy |
| × | No | | |

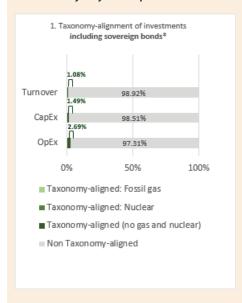

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

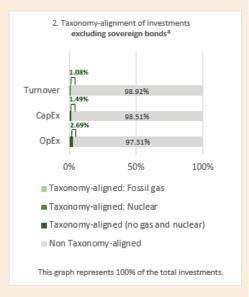

Taxonomy-aligned activities are expressed as a share of:

- reflecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- st For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

1.06% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| | 31/03/2024 | 31/03/2023 |
|-----------------------|------------|------------|
| EU Taxonomy Alignment | 1.08% | 0.00% |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

15.10% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

40.06% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 26 ESG specific engagements with companies held in the portfolio. These covered 14 companies across 5 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|------------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 23.53% |
| Environmental Stewardship | Biodiversity, Water, Waste | 15.69% |
| Business Conduct | Social and Employee | 3.92% |
| Human Rights | Social and Employee Matters | 3.92% |
| Labour Standards | | 25.49% |

| Public Health | 3.92% |
|----------------------|--------|
| Corporate Governance | 23.53% |

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the sub-advisor may assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Holding at least 5% of the Fund holdings in sustainable investments, which are companies that make a positive contribution to society and/or the environment.
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The positive ESG Materiality rating versus the benchmark was monitored daily by our compliance systems. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024, the fund rating was 2.23 and the benchmark rating was 2.26 (on a scale of 1-5, where lower is better).
- The financial product maintained over 50% of its holdings in strongly rated ESG companies over the period. On 31 March 2024, the fund held 84.32% in strongly rated ESG companies.
- The Fund held over 5% of its holdings in sustainable investments over the period. On 31 March 2024, 39.62% of the Fund was held in sustainable investments.

- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.
- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.
- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

...and compared to previous periods?

| | 2024 | 2023 |
|--|--------------|--------------|
| ESG Materiality Rating Fund vs Benchmark | 2.23 vs 2.26 | 2.79 vs 2.99 |
| At least 50% of the Fund in strongly rated ESG companies | 84.32% | 51.4% |
| At least 5% of the Fund in sustainable investments | 39.62% | N/A |
| Global Norms Exclusions | No Breaches | No Breaches |
| Thermal Coal, Civilian Weapons and Tobacco exclusions | No Breaches | No Breaches |
| Controversial Weapons exclusion | No Breaches | No Breaches |

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund is committed to investing a minimum proportion of 5% in Sustainable Investments. Sustainable Investments made have the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such

objectives we assess that the investment can demonstrate that:

- 1. The issuer generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The issuer has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex spend. Issuers in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making
 positive contributions to the environment and/or society. These criteria are
 product- and conduct-based, covering topics such as fossil fuels and weapons,
 and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - o Generate >30% of revenue from thermal coal extraction;
 - o Generate >30% revenue from thermal coal generation;
 - Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles

 Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process. In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" .

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024.

| Issuer name | Sector | Average weight | Country |
|---|------------------------|----------------|---------|
| CTS Eventim AG & Co. KGaA | Communication Services | 2.83% | DE |
| ASM International N.V. | Information Technology | 2.77% | NL |
| Belimo Holding AG | Industrials | 2.54% | CH |
| NEMETSCHEK SE | Information Technology | 2.51% | DE |
| FLUIDRA S.A. | Industrials | 2.48% | ES |

| BE Semiconductor Industries N.V. | Information Technology | 1.93% | NL |
| Huhtamaki Oyj | Materials | 1.90% | FI |
| INFRASTRUTTURE WIRELESS ITALIANE S.P.A. | Communication Services | 1.88% | IT |

What was the proportion of sustainability-related investments?

What was the asset allocation?

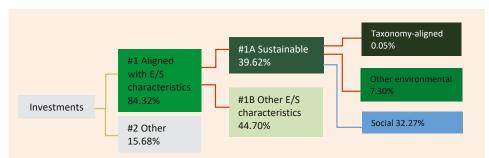

84.32% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

Asset allocation describes the share of investments in specific assets.

15.68% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Industrials | 32.32% |
| Information Technology | 16.21% |
| Financials | 10.16% |
| Health Care | 10.06% |
| Materials | 9.01% |
| Communication Services | 5.94% |
| Consumer Discretionary | 5.54% |
| Cash and Derivatives | 5.05% |
| Consumer Staples | 4.26% |
| Energy | 1.46% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental

objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

0.05% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when data quality improves |
|--|--|
| Climate change adaptation | This figure will be presented when data quality improves |
| Sustainable use and protection of water and marine resources | This figure will be presented when data quality improves |
| Transition to a circular economy | This figure will be presented when data quality improves |
| Pollution prevention and control | This figure will be presented when data quality improves |
| Protection and restoration of biodiversity and ecosystems | This figure will be presented when data quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

| Did | the | financial | product | invest | in | fossil | gas | and/or | nuclear | energy | related |
|-------|--------|------------|------------|----------|-----|--------|-----|--------|---------|--------|---------|
| activ | vities | s complyir | ng with th | ne EU Ta | axo | nomy | ? | | | | |

| Yes: | | |
|------|---------------|-------------------|
| | In fossil gas | In nuclear energy |
| × No | | |

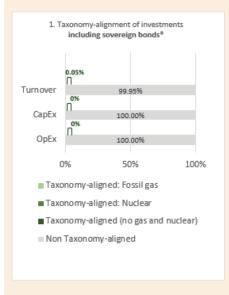

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

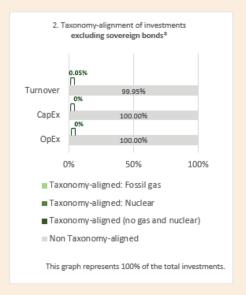

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

0.000% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.056% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| | 31/03/2024 | 31/03/2023 |
|-----------------------|------------|------------|
| EU Taxonomy Alignment | 0.05% | 0.00% |

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

7.30% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

32.27% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 17 ESG specific engagements with companies held in the portfolio. These covered 16 companies across 6 countries across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|------------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 15.79% |
| Environmental Stewardship | Biodiversity, Water, Waste | 7.89% |
| Business Conduct | Casial and Francisco | 2.63% |
| Human Rights | Social and Employee Matters | 2.63% |
| Labour Standards | | 34.21% |

| Public Health | 2.63% |
|----------------------|--------|
| Corporate Governance | 34.21% |

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

practices.

economic activity that contributes to

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the sub-advisor may assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024, the fund rating was 2.08 and the benchmark rating was 2.48 (on a scale of 1-5, where lower is better).
- The financial product maintained over 50% of its holdings in strongly rated ESG issuers over the period. On 31 March 2024, the fund held 93.18% in strongly rated ESG issuers.
- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.
- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under review.

- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

... and compared to previous periods?

Not applicable – we will provide a comparison of the sustainability indictors to a previous period in the next report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund does not have a commitment to invest a minimum proportion of its holdings in sustainable investments. However, the Fund did invest partially in sustainable investments, with the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The company generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The company has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex. Companies in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

- The Fund screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.
- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a sustinable investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - Generate >30% of revenue from thermal coal extraction;
 - Generate >30% revenue from thermal coal generation;
 - o Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles.
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/03/2023 to 31/03/2024.

| Issuer name | Sector | Average weight | Country |
|--------------------------------|------------------------|----------------|---------|
| SHELL PLC | Energy | 6.13% | GB |
| ASTRAZENECA PLC | Health Care | 6.00% | GB |
| RELX PLC | Industrials | 4.29% | GB |
| UNILEVER PLC | Consumer Staples | 3.85% | GB |
| GSK PLC | Health Care | 3.66% | GB |
| EXPERIAN PLC | Industrials | 3.15% | IE |
| INTERMEDIATE CAPITAL GROUP PLC | Financials | 3.06% | GB |
| ASHTEAD GROUP PUBLIC LIMITED | Industrials | 2.85% | GB |
| COMPANY | | | |
| CRH PUBLIC LIMITED COMPANY | Materials | 2.80% | IE |
| COMPASS GROUP PLC | Consumer Discretionary | 2.73% | GB |

| INFORMA PLC | Communication | 2.67% | GB |
|-----------------------------|------------------------|-------|----|
| | Services | | |
| THE SAGE GROUP PLC. | Information Technology | 2.44% | GB |
| LONDON STOCK EXCHANGE GROUP | Financials | 2.44% | GB |
| PLC | | | |
| LLOYDS BANKING GROUP PLC | Financials | 2.25% | GB |
| CONVATEC GROUP PLC | Health Care | 2.17% | GB |

What was the proportion of sustainability-related investments?

What was the asset allocation?

93.18% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

6.82% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1** Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.
- In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

| Sector | % of Net Assets |
|------------------------|-----------------|
| Industrials | 20.07% |
| Financials | 13.36% |
| Health Care | 12.56% |
| Materials | 11.50% |
| Consumer Staples | 11.12% |
| Consumer Discretionary | 10.67% |
| Energy | 6.13% |
| Information Technology | 3.86% |
| Real Estate | 3.80% |
| Communication Services | 3.58% |
| Cash and Derivatives | 1.69% |
| Utilities | 1.65% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.00% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented |
|--|-------------------------------|
| | when data quality improves |
| Climate change adaptation | This figure will be presented |
| | when data quality improves |
| Sustainable use and protection of water and | This figure will be presented |
| marine resources | when data quality improves |
| Transition to a circular economy | This figure will be presented |
| | when data quality improves |
| Pollution prevention and control | This figure will be presented |
| | when data quality improves |
| Protection and restoration of biodiversity and | This figure will be presented |
| ecosystems | when data quality improves |

Taxonomy-aligned activities are expressed as a share of:

- reflecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

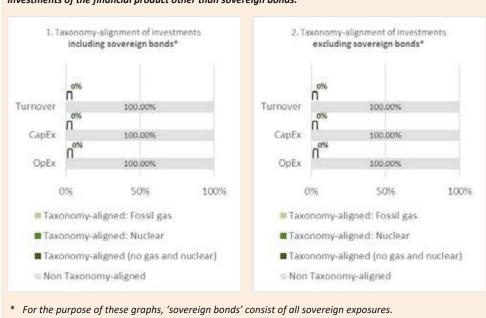

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| Yes: | | |
|-------------|---------------|-------------------|
| | In fossil gas | In nuclear energy |
| ≭ No | | |

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.00% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. This is the first time we are reporting for this Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.65% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments? 40.81% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 34 ESG specific engagements with companies held in the portfolio. These covered 15 companies in the UK across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|------------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 25.86% |
| Environmental Stewardship | Biodiversity, Water, Waste | 17.24% |
| Business Conduct | | 0.00% |
| Human Rights | Social and Employee Matters | 5.17% |
| Labour Standards | | 20.69% |
| Public Health | | 13.79% |
| Corporate Governance | | 17.24% |

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?
 Not applicable
- How did this financial product perform compared with the broad market index?`
 Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: CT (Lux) Japan Equities

Legal entity identifier: 5493000LMPLEZ8VQSU41

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: sustainable investment, it had a proportion of 23.90% of sustainable investments in economic activities that qualify as environmentally with an environmental objective in sustainable under the EU economic activities that qualify as Taxonomy environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in sustainable under the EU economic activities that do not Taxonomy qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did It made sustainable investments not make any sustainable investments with a social objective:

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

economic activity that contributes to

The financial product promoted environmental and social characteristics by integrating the following responsible investment measures into the investment decision-making process:

- Comparing favourably with the benchmark on material ESG criteria, measured by the Columbia Threadneedle Investment's ESG Materiality Rating model, over 12 month rolling periods.

- Maintaining at least 50% of the Fund holdings in companies rated 1-3 on the Columbia Threadneedle Investment's ESG Materiality Rating. Where necessary, the sub-advisor may assess companies that are not covered by the ESG Materiality Rating Model using fundamental research, engage with companies that have a low ESG Materiality rating for improvement, or include companies that have either a low ESG Materiality ratings, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, in order to achieve this 50% minimum commitment.
- Excluding issuers in breach of accepted international standards and principles, such as the United Nations Global Compact and the United Nations Guiding Principles on Business and Human Rights.
- Excluding issuers (based on individual revenue threshold limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production.
- Excluding issuers with involvement in controversial weapons, in line with the Columbia Threadneedle Investment's Controversial Weapons Policy, and issuers with direct involvement in nuclear weapons.
- To support the promotion of environmental and social characteristics, engaging with companies with a view to influence management teams to improve their practices, for example on issues relating to carbon emissions.

How did the sustainability indicators perform?

The financial product has the following sustainability indicators:

- The primary indicator is the positive weighted average ESG Materiality rating of the Fund versus the Benchmark, assessed over rolling 12-month periods. The fund maintained a better ESG Materiality rating than the benchmark throughout the period. On 31 March 2024 the fund rating was 1.90 and the benchmark rating was 1.97 (on a scale of 1-5, where lower is better).
- The financial product maintained over 50% of its holdings in strongly rated ESG issuers over the period. On 31 March 2024, the fund held 81.44% in strongly rated ESG issuers.
- We excluded companies that we determined were in breach of accepted international standards, for example the UN Global Compact Principals. The exclusion policy was adhered to with the application of strict pre-trade restrictions and was monitored on an ongoing basis. No breaches were identified during the period under review.
- We excluded issuers (based on individual threshold revenue limits) with involvement in conventional weapons, thermal coal extraction and generation, and tobacco production. No breaches were identified during the period under

review.

- We also adhered to our Controversial Weapons Policy and excluded issuers with direct involvement in nuclear weapons. No breaches were identified during the period under review.

The sustainability indicators have not been subject to an assurance review by an auditor or a third party.

...and compared to previous periods?

Not applicable – we will provide a comparison of the sustainability indictors to a previous period in the next report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund does not have a commitment to invest a minimum proportion of its holdings in sustainable investments. However, the Fund did invest partially in sustainable investments, with the objective of positively contributing to the Sustainable Development Goals (SDGs) which encompass environmental and social objectives.

To demonstrate that sustainable investments made contribute to such objectives we assess that the investment can demonstrate that:

- 1. The company generates greater than 50% of revenue in activities which are net positively aligned with the SDGs, or
- 2. The company has demonstrated it contributes to a sustainable outcome through robust Key Performance Indicators such as Opex or Capex. Companies in this category are reviewed and approved by our responsible investment team.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's investment approach assesses that the sustainable investments made by the Fund do not significantly harm other sustainable investment objectives in several ways:

 The Fund screens out investments that are contrary to the goals of making positive contributions to the environment and/or society. These criteria are product- and conduct-based, covering topics such as fossil fuels and weapons, and United Nations Global Compact breaches.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Through the Investment Manager's investment research, ESG factors are considered throughout the investment cycle, which serves to mitigate the risks of significant harm.
- 3) When assessing a Sustainable Investment we explicitly check for significant harm using a framework as described below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Investments which are reported as sustainable investments have been assessed to ensure they do not significantly harm (DNSH) sustainability objectives using an in-house data driven model and investment team due diligence.

The Investment Manager identifies harm when assessing a Sustinable Investment by using quantitative thresholds against a selection of principal adverse impact indicators, including mandatory indicators from Table 1 and certain indicators from Tables 2 and 3 of Annex I of the Regulatory Technical Standards (RTS). Issuers which fall below these thresholds are flagged as potentially harmful and a review is then undertaken to determine whether significant harm is being caused by the issuer. Where quantitative data is not available, the investment teams endeavour to satisfy that no significant harm has taken place through desk-based qualitative research in conjunction with the firm's Responsible Investment team.

Depending on the type and materiality of the principal adverse impact indicator, the investment manager will either engage with the issuer to address the harmful practices by taking appropriate action, or limit exposure to such issuers in the portfolio.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund explicitly prohibits investment in companies which breach UN Global Compact (UNGC) principles. In addition, the sustainable investments are assessed under the DNSH due diligence against factors which align with UNGC and OECD guidelines, to identify any significant harmful practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund proactively considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

As part of portfolio construction and stock selection, the Fund has in place exclusions that correspond to PAI sustainability indicators and cannot be held in the Portfolio. The Fund adhered to its exclusions policy during the reference period and did not invest in companies that:

- Are active in the fossil fuel sector and:
 - o Generate >30% of revenue from thermal coal extraction;
 - o Generate >30% revenue from thermal coal generation;
 - o Are developing new thermal coal mining or power generation facilities.
- Actively breach the UN Global Compact Principles.
- Are involved in the production, sale, or distribution of controversial weapons.

The manager undertook research on ESG topics that align with the PAI sustainability indicators and incorporated this into its investment process.

In addition, the engagement activities undertaken by the Fund aligned with certain PAI sustainability indicators. Further details of such activities are described in the section below entitled "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 31/03/2023 to 31/03/2024.

| Issuer name | Sector | Average | Country |
|--------------------------------------|------------------------|---------|---------|
| | | weight | |
| TOYOTA MOTOR CORPORATION | Consumer Discretionary | 6.09% | JP |
| Mitsubishi UFJ Financial Group, Inc. | Financials | 5.52% | JP |
| Tokyo Electron Limited | Information Technology | 5.15% | JP |
| Recruit Holdings Co.,Ltd. | Industrials | 4.40% | JP |
| ITOCHU Corporation | Industrials | 4.17% | JP |
| KEYENCE CORPORATION | Information Technology | 4.06% | JP |
| Hitachi, Ltd. | Industrials | 3.91% | JP |
| Shin-Etsu Chemical Co., Ltd. | Materials | 3.27% | JP |
| KOMATSU LTD. | Industrials | 3.16% | JP |
| Sony Group Corporation | Consumer Discretionary | 3.10% | JP |
| ORIX CORPORATION | Financials | 3.08% | JP |
| Daiwabo Holdings Co.,Ltd. | Information Technology | 2.73% | JP |
| Sanwa Holdings Corporation | Industrials | 2.70% | JP |
| Sangetsu Corporation | Consumer Discretionary | 2.62% | JP |
| USS Co., Ltd. | Consumer Discretionary | 2.52% | JP |

What was the proportion of sustainability-related investments?

What was the asset allocation?

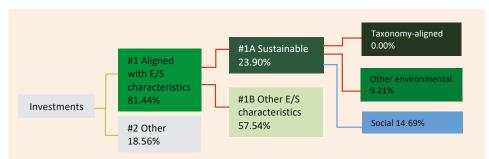

81.44% of the Fund was invested in issuers with either:

- an ESG Materiality rating of 1-3; or
- an ESG Materiality rating of 4 or 5, but that are considered to be sustainable investments in line with our framework

and so were aligned with E/S characteristics. For the purposes of reporting these are incorporated in #1 below.

18.56% of the financial product was invested in: (1) issuers with an ESG Materiality rating of 4 or 5 (and that are not deemed sustainable) so were not aligned with E/S characteristics, (2) issuers not covered by the ESG Materiality model, and (3) cash and derivatives.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | % of Net Assets |
|------------------------|-----------------|
| Industrials | 27.87% |
| Information Technology | 20.21% |
| Consumer Discretionary | 19.86% |
| Financials | 15.09% |
| Health Care | 5.83% |
| Materials | 3.27% |
| Consumer Staples | 2.49% |
| Communication Services | 2.37% |
| Cash and Derivatives | 1.69% |
| Energy | 1.34% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to holding a minimum proportion in sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation. It does, however, have a discretion to invest in these type of securities as part of delivering its investment objective.

0.00% of the investments made by the Fund are in economic activities that qualify as environmentally sustainable under the EU Taxonomy Regulation. This taxonomy alignment figure is based on reliable data that has been made available to date and is measured by the proportion of turnover associated with economic activities that qualify as environmentally sustainable.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an

contribution to an environmental objective.

Transitional

activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

the best performance.

corresponding to

An economic activity qualifies as environmentally sustainable under the EU Taxonomy Regulation where it substantially contributes to one of six environmental objectives. The proportion of the Fund's investments that contributed towards these environmental objectives is broken down as follows:

| Climate change mitigation | This figure will be presented when |
|--|------------------------------------|
| | data quality improves |
| Climate change adaptation | This figure will be presented when |
| | data quality improves |
| Sustainable use and protection of water and | This figure will be presented when |
| marine resources | data quality improves |
| Transition to a circular economy | This figure will be presented when |
| | data quality improves |
| Pollution prevention and control | This figure will be presented when |
| | data quality improves |
| Protection and restoration of biodiversity and | This figure will be presented when |
| ecosystems | data quality improves |

The mentioned percentage figures have not been subject to an assurance review by an auditor or a third party.

| Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? |
|---|
| Yes: |
| In fossil gas In nuclear energy |
| ≭ No |

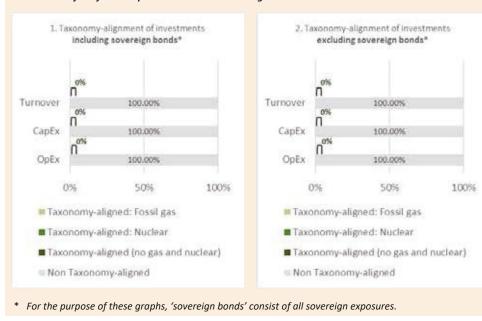

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

0.00% of the investments made by the fund are in transitional activities as defined by the EU Taxonomy Regulation.

0.00% of the investments made by the fund are in enabling activities as defined by the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. This is the first time we are reporting for this Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

9.21% of the sustainable investments had an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

14.69% of the sustainable investments had a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Holdings classified as "other" include (i) ancillary liquid assets (i.e. bank deposit at sight) which are held for the purposes of liquidity management; (ii) bank deposits, money market instruments or money market funds held for treasury purposes; (iii) derivatives for hedging purposes; (iv) companies with an ESG Materiality rating of 4 or 5 (that were not sustainable investments); or (v) companies not covered by the ESG Materiality model.

These investments are not used to meet the environmental and social characteristics of the Fund. The purpose of these securities is to provide a diversified fund that can achieve the financial objective.

Minimum environmental or social safeguards are ensured by applying the exclusion screening to all holdings in investee companies. For cash positions and derivatives, ESG considerations are integrated into the counterparty risk assessment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the year there were 19 ESG specific engagements with companies held in the portfolio. These covered 12 companies across Japan across a range of themes.

Engagements are structured in line with the firm's engagement themes, which align with the PAIs. Below is provided a breakdown of the engagements undertaken:

| Engagements theme | Alignment with PAIs | Proportion of engagements |
|------------------------------|---|---------------------------|
| Climate Change | GHG Emissions and Energy Performance | 24.44% |
| Environmental Stewardship | Biodiversity, Water, Waste | 6.67% |
| Business Conduct | | 0.00% |
| Human Rights | Social and Employee Matters | 13.33% |
| Labour Standards | | 20.00% |
| Public Health | | 0.00% |
| Corporate Governance | | 36.56% |

How did this financial product perform compared to the reference benchmark?

Not applicable – the fund does not have a designated reference benchmark that is used to measure whether it attains the environmental and/or social characteristics that the Portfolio promotes.

- How does the reference benchmark differ from a broad market index?
 Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?
 Not applicable
- How did this financial product perform compared with the broad market index?`
 Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

EU Taxonomy Regulation Disclosures (unaudited)

Regulation (EU) 2020/852 is a framework to facilitate sustainable investment which establishes criteria for determining whether an economic activity qualifies as environmentally sustainable across six environmental objectives (the "EU Taxonomy Regulation"). The EU Taxonomy Regulation requires that certain disclosure be made in this Report.

Article 6 Financial Products

The investments underlying the financial products listed below do not take into account the EU criteria for environmentally sustainable economic activities under the EU Taxonomy Regulation. The Article 6 Financial Products include:

- CT (Lux) American Extended Alpha
- CT (Lux) Asia Contrarian Equity
- CT (Lux) Asian Equity Income
- CT (Lux) Credit Opportunities
- CT (Lux) Emerging Market Corporate Bonds
- CT (Lux) Emerging Market Debt
- CT (Lux) Enhanced Commodities
- CT (Lux) European Short-Term High Yield Bond
- CT (Lux) European Strategic Bond
- CT (Lux) Flexible Asian Bond
- CT (Lux) Global Dynamic Real Return
- CT (Lux) Global Emerging Market Short-Term Bonds
- CT (Lux) Global Extended Alpha
- CT (Lux) Global Investment Grade Credit Opportunities
- CT (Lux) Global Multi Asset Income
- CT (Lux) Global Technology
- CT (Lux) Pan European Absolute Alpha
- CT (Lux) Pan European Equity Dividend
- CT (Lux) UK Equity Income
- CT (Lux) US Disciplined Core Equities
- CT (Lux) US High Yield Bond

Article 8 and Article 9 Financial Products

The EU Taxonomy Regulation disclosures for the Article 8 and Article 9 Financial Products are included the Sustainable Finance Disclosure Regulation (SFDR) Periodic Disclosures that are included in this Report.
