Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Dimensional World Equity Fund Share Class: EUR Accumulation Shares (ISIN: IE00B4MJ5D07) a sub fund of Dimensional Funds Plc.

Objectives & Investment Policy

The aim is to increase the value of your investment over the long term and to earn income within the Fund.

The Fund is actively managed which means that the investment manager is actively making investment decisions for the Fund. The Fund is not managed in reference to a benchmark.

The Fund primarily invests in shares of companies traded in developed and/or emerging markets.

The Fund generally has a greater allocation to shares of smaller sized companies and value companies as compared to their representation in the general equity market universe. Value companies are those where, at the time of purchase, the price is low compared to the accounting value of the company. The Fund may invest up to 20% of its net assets in emerging markets countries.

The composition of the Fund may be adjusted based on considerations such as the number of outstanding shares of public companies that are freely available to the investing public, the tendency of the price of a security/share to continue movement in a single direction, how readily available the shares are to buy and sell, and profitability.

The Fund may use futures and foreign currency contracts for efficient portfolio management purposes.

Income is not distributed and is rolled up (accumulated) into the value of your investment.

You may sell your investment in the Fund on demand on a daily basis.

Risk and Reward Profile

Lower risk							ner risk 🕨
Ту	pically lo	wer rewards	5		Т	ypically hig	her rewards
	1	2	3	4	5	6	7

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 6 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund may invest up to 10% of its assets in other underlying funds. The Fund's performance, costs and risks will be affected by the underlying funds. There can be no assurance that an underlying fund will achieve its investment objective.

The Fund's investments are subject to issuer-specific risks, market risks, economic or political risks that may cause security prices to fluctuate over time. This can affect the value of your investment in the Fund.

The assets in which the Fund invests may be denominated in or have exposure to a currency other than the currency of the shares in the Fund or of the country in which you live. Additionally, the currency of the shares you hold may be denominated in a currency different to the base currency of the Fund. The Fund does not actively manage movements in the value of currencies and currency fluctuations may affect the value of the Fund's assets. The Fund may invest in smaller companies. This carries a higher risk as shares of small companies are often more difficult to sell than those of large companies, and as a result their share price can fluctuate more. In general, smaller companies are also more vulnerable than larger companies to adverse market conditions.

The Fund may seek to identify and invest in value shares, which are (in the Investment Manager's view) shares, the prices of which are low compared to the accounting values of the companies issuing them. Value shares may perform differently from the market as a whole and following a value oriented investment strategy may cause the Fund, at times, to underperform funds that use other investment strategies.

Where the Fund uses futures or forward foreign currency contracts (derivatives), it may become exposed to certain investment risks including leverage, market, mismatching of exposure and/or counterparty risk, liquidity, interest rate, credit and management risks and the risk of improper valuation. While the Fund is not expected to have exposure to leverage to a material degree, any movement in the price of these investments can have a significant impact on the value of the Fund and the Fund could lose more than the amount invested.

The Fund may invest in less economically or politically developed (known as emerging) markets which can involve greater risks than well developed economies. Amongst other issues, decreased liquidity, political unrest and economic downturn may be more likely and could affect the value of your investment. Investment in emerging markets can be more expensive and challenging to buy, sell and withdraw investments. Investment in emerging markets also increases the risk of settlement default.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken bef	ore or after you invest	The entry and exit charges shown are maximum figures. In some cases you might pay less, you can find this out from your financial adviser or distributor. The ongoing charges figure shown here is an annualised estimate of the charges as there has been a reasonably significant difference to the last reported ongoing charges figure. The Fund's annual report for each financial year will			
Entry charge	None				
Exit charge	None				
	ght be taken out of your money arge) and before the proceeds of (exit charge).				
Charges taken from the F	und over a year	include detail on the exact charges made. It excludes portfoli transaction costs and performance fees, if any.			
Ongoing charges	0.43%	More detailed charges information may be found in the "Fees			
Charges taken from the Fi conditions	und under certain specific	and Expenses" section of the prospectus. No conversion fee will be charged by the Fund or the investment manager.			
Performance fee	None				

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2011 and the share class was launched in 2012.

Past performance has been calculated in EUR.
