Meaning of the risk and reward indicator

The risk indicator aims to provide you with a measure of the price movement of the shares. This category 6 means that the share price has a high price movement and therefore the risk of loss as well as the expected reward can be high. The lowest category does not mean a "risk free" investment.

Historical data may not be a reliable indication for the future. The risk indicator shown is not guaranteed and may change over time. There is no capital guarantee or protection on the value of the Sub-Fund.

Reason why the Sub-Fund is classified in this risk category

The risk level of this Sub-Fund mainly reflects the market risk arising from investments in European equities.

The following risks may not be fully captured by the risk indicator and may be materially relevant for this Sub-Fund:

Counterparty risk: The Sub-Fund could lose money if an entity with which it does business becomes unwilling or unable to honor its obligations to the fund.

Concentration risk: To the extent that the Sub-Fund invests heavily in a company, industry or country that is heavily affected by an adverse event, its share price could fall.

Management risk: Portfolio management techniques that have worked well in normal market conditions could prove ineffective or detrimental during unusual conditions.

Liquidity risk: Certain securities could become hard to value, or to sell at a desired time and price.

Derivative risk: Certain derivatives could behave unexpectedly or could expose the Sub-Fund to losses that are significantly greater than the cost of the derivative.

Further investment risks are set out in the risk section of the prospectus.
