What is this product?

TYPE

This Product is a sub-fund of DNCA Invest SICAV, an investment company with variable capital regulated by Luxembourg law and qualifying as UCITS pursuant to Directive 2009/65/CE.

TERM

The Product is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

OBJECTIVES

The Product seeks to achieve superior long term risk adjusted returns (i.e. returns adjusted for volatility) by investing primarily in equities and equity related securities of medium sized and smaller European companies over the recommended investment term (five years). Investors' attention is drawn to the fact that the management style is discretionary and integrates environmental, social / societal and governance (ESG) criteria. The portfolio composition will not attempt to replicate the composition of a benchmark index from a geographical or sectorial perspective. Even so, MSCI EUROPE MID CAP Net Return Euro Index may be used as an ex-post benchmark indicator.

The Product's investment strategy relies on active discretionary management and stock selection based upon fundamental financial analysis. The manager seeks to identify shares trading below the Management Company's estimate of intrinsic value and asymmetric risk reward opportunities whilst paying attention to portfolio volatility. Idea generation stems from a combination of various quantitative screening & qualitative factors. Management Company carefully evaluates industry dynamics, entry barriers, the company's competitive positioning within the industry, its competitive advantage (if any), management quality, incentives and alignment as well as growth and reinvestment prospects. The company's normalized, projected, historical profitability, cash conversion and return on capital are assessed. Attention is paid to the variations between reported earnings and cash generation, off balance sheet liabilities and asset values. The Product is also managed taking into consideration Responsible and Sustainable principles and promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. The investment process take into account internal scoring based on an extra-financial analysis through a proprietary rating model (ABA, Above & Beyond Analysis) developed internally by DNCA. The risk exists that the models used to make these investment decisions do not perform the tasks they were designed to. The use of the proprietary tool relies on the experience, relationships and expertise of DNCA with the "best in universe" method. There may be a sector bias. The Product will proceed to the extra-financial analysis on at least 90% of its securities, while excluding 20% of the worst issuers from its investment universe. Additional information on SRI strategy may be obtained in the prospectus of the Product. The Product benefits from the French SRI Label. The Product may at any time invest in:

- Equities issued, domiciled or listed in Europe (EEA plus Switzerland and UK) or equivalent financial instruments (such as ETF, futures, CFD and/or DPS, etc.): from 75% to 100% of its net assets;
- Equities issued, domiciled or listed out of EEA plus Switzerland and UK: up to 25% of its net assets;
- Equities with total market capitalisation below 100 million up to 10% of its net assets;
- Fixed income securities (such as Euro zone Government Bonds, corporate bonds, convertible bonds or equivalent): from 0% to 25% of its net assets;
- Money-market instruments or deposits: from 0 to 25% of its net assets;
- Other financial instruments up to 10% of its net assets.

The Product may invest up to 10% of its net assets in units and/or shares of UCITS and/or other UCIs.

Investment in "speculative grade" or non-rated debt securities (i.e. which have a Standard & Poor's rating below A-3 short term rating or BBB-long-term rating or equivalent) may not exceed 20% of its net assets.

The Product may use exchange traded or OTC derivatives up to 25% of the Product's net assets, including but not limited to, futures contracts and non complex options negotiated on regulated markets for the purpose of hedging or increasing equity exposure without seeking overexposure.

The Product can also operate on the foreign exchange markets to cover investments realised in other currency than European currencies and major internationally traded currency. The Product may be exposed to emerging markets for up to 10% of its net assets.

The Product is actively managed and uses the benchmark for the calculation of the performance fee and performance comparison purposes. This means the Management Company is taking investment decisions with the intention of achieving the Product's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant.

This is an accumulation share.

What are the risks and what could I get in return?

RISK INDICATOR

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Product lie in the possibility of depreciation of the securities in which the Product is invested.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances. What you get will depend on market trends and how long you keep the Product.

What happens if DNCA Finance is unable to pay out?

The Product is a co-ownership of financial instruments and deposits separate from DNCA Finance. In the event of the default of DNCA Finance, the assets of the Product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the Product is mitigated due to the legal segregation of the depositary's assets from those of the Product.

What are the costs?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product and how well the Product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

Investment of EUR 10 000**If you exit after 1 year** **If you exit after 5 years**

	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 331	EUR 1280
Annual cost impact (*)	3.3%	1.8% each year

* The annual cost impact illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 10.7% before costs and 8.9% after costs.

We may share part of costs with the person selling you the Product to cover the services they provide to you. These figures include the maximum distribution fee and which amount of 100% of costs. This person will inform you of the actual distribution fee.
