## What is this product?

### TYPE

This Product is a sub-fund of DNCA Invest SICAV, an investment company with variable capital regulated by Luxembourg law and qualifying as UCITS pursuant to Directive 2009/65/CE.

### TERM

The Product is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

### OBJECTIVES

The investment objective of the Product is to seek performance by taking advantage of developments in the equity markets without geographical constraint (including emerging markets) which benefit from the digital transformation of industries and society, over the recommended investment term of 5 years. In this context, the Product implements active conviction management by selecting companies eligible to the investment theme. These companies are chosen for their quality of global or local leaders on their respective markets analyzed through the systematic integration of environmental, social / societal and governance (ESG) criteria (such as energy consumption, CO2 emission), or even ethical practices of society.

The Product meets the criteria for Responsible management. Thus, the process and selection of all the securities in the portfolio take into account an internal evaluation of Corporate Responsibility (shareholder, social, societal, and environmental responsibilities) based on a proprietary financial analysis model. There is a limitation in the rating process due to the reliability of the published data, which depends on the credibility and auditing of companies' extra-financial reports. The Management Company implements a "best in universe" approach aimed at selecting the highest-rated issuers from an extra-financial perspective within their investment universe, regardless of their sector of activity, resulting in a reduction of the initial universe by at least 20%. The extra-financial analysis is conducted on at least 90% of the assets in the portfolio. The Product is managed taking into consideration the requirements of the French SRI label. The Product invests at least 75% of its net assets in shares of companies occupying a position of global or local leader in their markets and operating in the technology sectors, in sectors benefiting from growing digitalization and technological innovations. Additional information on SRI strategy may be obtained in the prospectus of the Product.

The Product may at any time invest in: equities without geographical constraint (including emerging markets) and of all sizes of capitalization (including small and mid-capitalization): from 75% to 105% of its net assets (directly or through UCITS and/or other UCIs); fixed income securities and money market instruments from issuers of the public or private sector having their registered office in Euro zone countries, depending on market opportunities, and having at the time of the purchase a Standard & Poor's rating of at least A3 short term rating or A- long-term rating, or being considered as equivalent by the Management Company using similar criteria, or through bonds and money market funds: up to 15% of its net assets; deposits: up to 25% of its net assets; other financial instruments (within the meaning of Article 41(2)a) of the Law) up to 10% of its net assets.

Up to 20% of its net assets, the Product may also invest in equities called "A-Shares" issued by companies having their registered office in the People's Republic of China, listed in local currency (Renminbi) and available through the Shanghai-Hong Kong Stock Connect Program or through the Shenzhen-Hong Kong Stock Connect Program or through the RQFII/QFII.

The Product can be exposed to all currencies other than the Euro, bringing the exchange risk to 105% maximum of its net assets.

The Product may invest up to 10% of its net assets in units and/or shares of UCITS and/or other UCIs and/or regulated AIFs open to non-professional investors and/or ETFs. In order to achieve the investment objective, the Product may also invest in equities or related financial derivative instruments as well as in convertible bonds, warrants and rights which may embed derivatives, for the purpose of hedging or increasing equity and currency exchange risk without seeking overexposure. The Product is actively managed and uses the benchmark, MSCI All Countries World Net Return Index, as a universe from which securities may be selected (it being noted that the investment universe is not constrained by the components of the benchmark), for the calculation of the performance fee and performance comparison purposes. This means the Management Company is taking investment decisions with the intention of achieving the Product's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant. The reference benchmark does not intend to be consistent with the environmental or social characteristics promoted by the Product.

This is an accumulation share.

### INTENDED RETAIL INVESTORS

The Product is intended for retail investors who have no financial knowledge or experience of the financial sector. The Product is intended for investors who can withstand capital losses and who do not require a capital guarantee.

## What are the risks and what could I get in return?

### RISK INDICATOR

**Lower risk**

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Product lie in the possibility of depreciation of the securities in which the Product is invested.

### PERFORMANCE SCENARIOS

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances. The stress scenario shows what you might get back in extreme market circumstances. What you get will depend on market trends and how long you keep the Product.

## What happens if DNCA Finance is unable to pay out?

The Product is a co-ownership of financial instruments and deposits separate from DNCA Finance. In the event of the default of DNCA Finance, the assets of the Product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the Product is mitigated due to the legal segregation of the depositary's assets from those of the Product.

## What are the costs?

**The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.**

### COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product and how well the Product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

Investment of EUR 10 000	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	EUR 425	EUR 2 514
<b>Annual cost impact (*)</b>	4.3%	2.7% each year

\* The annual cost impact illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 17.9% before costs and 15.2% after costs.

We may share part of costs with the person selling you the Product to cover the services they provide to you. These figures include the maximum distribution fee and which amount of 100% of costs. This person will inform you of the actual distribution fee.

## COMPOSITION OF COSTS

One-off costs upon entry or exit		If you exit after 1 year

Exit costs	We do not charge an exit fee for this Product.	None
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.04% of the value of your investment per year. This is an estimate based on actual costs over the last year.	EUR 104
Transaction costs	0.09% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the Product. The actual amount will vary depending on how much we buy and sell.	EUR 9
Incidental costs taken under specific conditions		
Performance fees	20.00% of the positive performance net of any fees above the MSCI ACWI IMI Digital Economy Net USD with High Water Mark. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	EUR 112

## How long should I hold it and can I take my money out early?

### Recommended holding period: 5 years.

Shareholders may redeem shares on demand and executed on each NAV calculation and publication day before 12.00 noon (Luxembourg time).

The recommended holding period was chosen depending on the asset class, investment strategy and risk profile of the Product, to enable it to achieve its investment objective while minimizing the risk of loss.

You can redeem all or part of your investment at any time before the end of the recommended holding period, or hold it longer. There are no penalties for early divestment. However, if you request redemption before the end of the recommended holding period, you may receive less than expected.

The Product has a redemption capping system known as « Gates » described in the prospectus.
