

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DWS Internationale Renten Typ O

Security code: 976970 ISIN: DE0009769703

Management Company: DWS Investment GmbH, a member of the Deutsche Bank Group.

Objectives and investment policy

The objective of the investment policy is to achieve sustained capital appreciation that exceeds the benchmark (JPM Global Government Bond Index ex cost). The fund invests worldwide in government and corporate bonds spread across a wide range of currencies and markets. Derivative financial instruments may be used for both investment and hedging purposes. The selection of individual investments is at the discretion of the fund management. The fund is oriented to the benchmark. It does not track it exactly but attempts to exceed its performance and can therefore deviate substantially - both positively and negatively - from the benchmark. The fund is subject to various risks. A more detailed description of risks can be found under 'Risks' in the sales prospectus. The currency of DWS Internationale Renten Typ O is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 4 because its share price fluctuates and the likelihood of both losses and gains may therefore be relatively high. The following are key risks for the fund and are not covered adequately by the risk and reward profile:

The fund invests a substantial portion in bonds, the value of which depends on whether the issuer is able to afford its payments. The risk of default is continuously present and can cause your investment to suffer a loss. The fund concludes derivative transactions with various contractual partners to a significant extent. If the contractual partner cannot afford any payments (e.g. due to insolvency), this can cause your investment to suffer a loss.

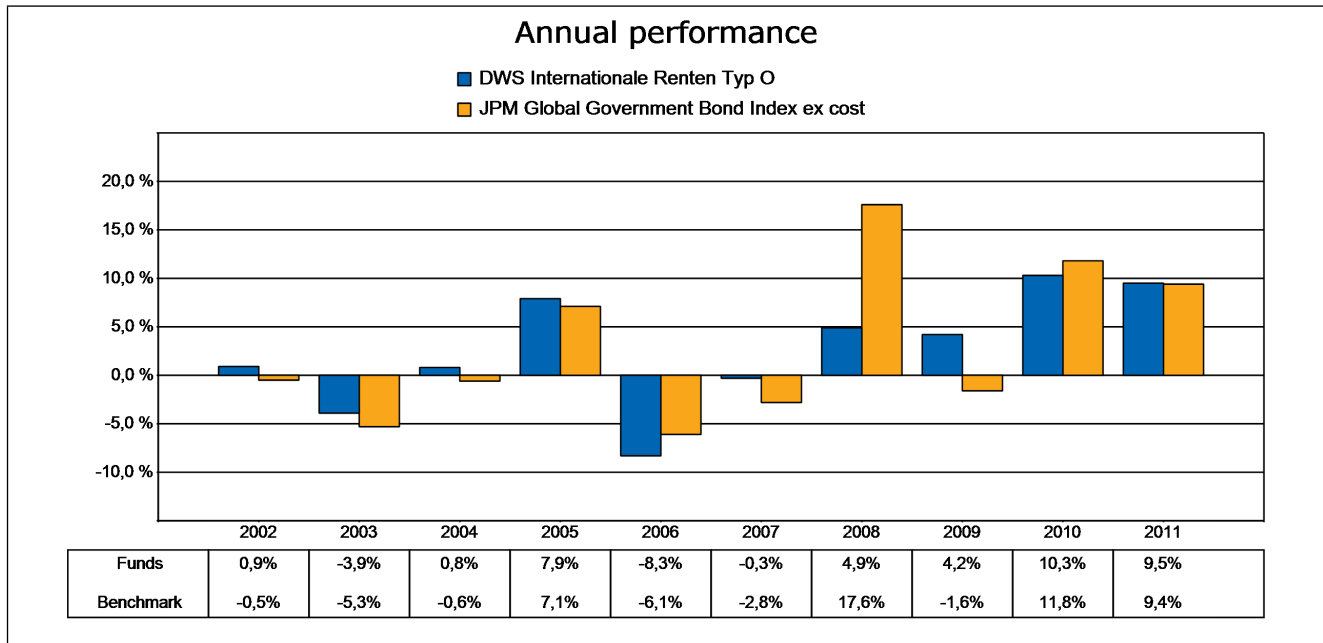

Charges

The costs and fees borne by you are used for the management, administration and custody of the fund, as well as for its distribution and marketing. These costs restrict the potential growth of your investment.
