

## Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

# EMF Microfinance Fund AGmV K Class Reinvested (I/T EUR) (ISIN LI0542527242)

## Objectives and Investment Policy

The AIF is a product pursuant to Article 9 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (Sustainable Finance Disclosure Regulation). So-called ESG criteria are non-financial considerations that are incorporated into the investment process of the fund on an ongoing basis, with a particular focus on social aspects.

The fund aims to achieve a sustainable, long-term real appreciation of its assets and at the same time to contribute to the creation of wealth among the underprivileged population groups in developing and emerging countries by indirectly financing entrepreneurial activities in these countries.

The fund pursues its purpose by investing its assets in local financial service providers - so-called microfinance institutions (MFIs). The fund is based on a structured investment process, which is based both on a quantitative and qualitative selection of successful or sustainably active MFIs and on broad country diversification. The fund invests in fixed or variable-interest investment instruments. The investment instruments have short (six to eighteen months) to medium (three to five years) maturities. The fund's investments have an average term of two to three years and are primarily denominated in US dollars. The fund seeks to invest in a sustainable manner.

## Risk and Reward Profile

← Lower risk

← Typically lower rewards

Higher risk →

Typically higher rewards →

This risk indicator is based on historical data; it is therefore not possible to predict future performance. The Fund's risk classification may change at a later date and may not be considered a guaranteed. Please note that even a Fund with a Category 1 classification does not constitute a completely risk-free investment.

A **risk level 1** fund is composed of risky assets, which do however typically only have very modest changes in their value, thus minimizing the possibility of step losses. It does not include a capital guarantee.

Due to the algorithm, not all possible risks can be considered when the Synthetic-Risk-and-Reward Indicator is calculated. You can find more detailed information regarding the risks in the constituent documents. The following risks don't have a direct impact on the indicator, but could still have an influence on the Fund:

- **Liquidity risks:** The Fund may invest a portion of its assets in securities that are not traded on an exchange or similar market. It may be difficult to find a buyer for these securities on short notice. This may increase the risk of a suspension of unit redemptions.

- **Counterparty risks:** The Fund may enter into various transactions with other contracting parties. If a contracting party becomes insolvent, it may no longer be able, or may be only partly able, to settle the Funds open payment claims.

- **Credit risks:** The Fund may invest a substantial portion of its assets in sovereign and corporate bonds. The issuers of these bonds may become insolvent, so that the bonds may lose their value, either in whole or in part.

- **Risks from the use of derivatives:** The Fund is permitted to enter into transactions involving derivatives. The greater opportunities that this affords are accompanied by greater risks. Using derivatives to hedge against losses may reduce the Fund's profit opportunities.

- **Custodial risks:** The custodial safe-keeping of assets, particularly abroad, may be associated with a risk of loss that can result from the Custodian, or sub-custodian, becoming insolvent, breaching its duties of care and diligence, or acting in an unlawful manner.

- **Operational risks:** The Fund may become a victim of fraud or criminal activity. It may suffer losses as a result of misunderstandings or errors on the part of employees of the Management Company or outside third parties or may be damaged due to external events, such as natural catastrophes.

- **Currency risk:** Eurozone investors are exposed to a currency risk. This generally results in a loss if investors hold a security denominated in a foreign currency and the underlying exchange rate drops. This risk likewise exists if the securities are traded on an exchange in Euros. A comprehensive presentation is available in the constituent documents.

## Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest
