## What is this product?

### Type

This product is a Class of Unit of the sub-fund Money Market EUR T1 (the "Fund") which is part of Eurizon Fund, an open-ended common fund in transferable securities ("FCP") qualifying as a UCITS.

### Term

There is no maturity date for this product. The product could be unilaterally closed or merged following notice to investors in the conditions led down in the Prospectus.

### Objectives

**Investment objective** To preserve your investment while achieving a return in line with that of the euro money market rate (as measured by the benchmark).

Note that money invested in this fund may gain or lose value. The fund may not protect you from investment losses and does not guarantee any particular level of return. It is not equivalent to a bank deposit and does not have any external support that guarantees its liquidity or stabilises its NAV. Any investor in the fund must be prepared to bear any losses.

**Benchmark(s)** European Short Term Rate (€STR) + 0.085%. For measuring performance only.

**Investment policies** The fund mainly invests in higher quality investment grade short-term bonds. These investments are mainly denominated in euro. The fund generally favours direct investment but may at times invest through derivatives.

Specifically, the fund normally invests at least 80% of total net assets in investment grade debt and debt-related instruments, including money market instruments, denominated in EUR and deposits, and a least 7.5% and 15% in assets maturing within one day and 5 days (including deposits), respectively.

Portfolio weighted average maturity 6 months or less.

Weighted average life 12 months or less.

The fund may invest in the following asset classes up to the percentages of total net assets indicated:

- investment grade debt instruments with rating less than A/A2: 49%
- investment grade corporate debt instruments: 10%

The fund does not invest in asset-backed and mortgage-backed securities.

Non-EUR investments are hedged to EUR.

**Derivatives and techniques** The fund may use derivatives for reducing risks (hedging) and costs.

**Strategy** In actively managing the fund, the investment manager uses interest rate and duration analysis and independently evaluates issuer credit quality to seek high current yields (top-down and bottom-up approach). The fund is designed without reference to the benchmark, therefore the similarity of its performance to that of the benchmark may vary.

**Distribution Policy** This Unit Class is not distributing dividends. Income from investments is reinvested.

**Other information** The fund has (E) environmental and (S) social characteristics and promotes investment into assets which follow good governance (G) practices in accordance with article 8 of the Sustainable Finance Disclosure Regulation ("SFDR"). For more information, see "Sustainable Investing Policy and ESG Integration" in the Prospectus available on our internet website at <https://www.eurizoncapital.com/pages/sustainability.aspx> or at distributors' premises.

### Intended retail investor

The fund is not available to retail investors.

### Practical information

**Depository** The fund depository is State Street Bank International GmbH, Luxembourg Branch.

**Further information** For further information about this Class of Unit, other Class of Unit of this fund or other funds of the FCP, you may refer to the Prospectus (in the same language as the KID), to the Management Regulations or to the last available annual or semi-annual financial report (in English). **Price Publication** The net asset value of this Class of Unit is published daily on the Management Company's website at [www.eurizoncapital.com](http://www.eurizoncapital.com).

## What are the risks and what could I get in return?

### Risks

will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of Eurizon Capital S.A. to pay you.

This fund does not offer any form of capital protection against future negative market conditions and, as a consequence, you may lose part of or the entire amount originally invested.

If the fund is not able to pay you out what is due, you may lose your entire investment.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## What happens if Eurizon Capital S.A. is unable to pay out?

If the fund is not able to pay you out what is due, you may lose your entire investment. No investor guarantee nor compensation scheme is foreseen in that eventuality. The fund is treated as a separate entity having its own assets which are distinct in all aspects from the assets of the Management company and the assets of each of the other investors in the fund, as well as from the assets of any other products managed by the Management Company. For obligations contracted on behalf of a specific product, the Management Company shall be liable exclusively for the assets of the concerned product. On the fund's assets, no actions of creditors of the Management Company or creditors acting on its interest, nor actions of creditors of the depositary or sub-depositary or creditors acting in the depositary or sub-depositary's interest, should be allowed. Actions of creditors of an investor in the fund are limited to the positions held in the fund by the concerned investor. The Management Company cannot, in any circumstances, use the assets of the fund for its own interests or those of third parties.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year (recommended holding period)
<b>Total Costs</b>	<b>28 EUR</b>
<b>Annual cost impact*</b>	<b>0.3%</b>

(\* ) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.30% before costs and -0.57% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
