

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Fidelity Funds - Global Multi Asset Defensive Fund

### a sub-fund of Fidelity Funds

A-ACC-USD (ISIN: LU1295423658 / WKN: A14018)

This fund is managed by FIL Investment Management (Luxembourg) S.A.

### Objectives and Investment Policy

- The fund aims to provide stable long term capital growth whilst seeking to preserve capital.
- The fund will allocate to, and within, different asset classes and geographies based on their potential to generate growth or reduce risk within the overall portfolio.
- The fund will invest in a range of global asset classes, including investment grade bonds, high yield bonds, shares of companies, commodities, closed-ended real estate investment trusts (REITs), cash and Money Market instruments.
- The fund can invest in bonds issued by governments, companies and other bodies.
- As this fund may invest globally, it may invest in countries considered to be emerging markets.
- The fund may, under normal market conditions, invest less than 30% in global sub investment grade and/or high yield bonds.
- The fund's exposure to Distressed Securities is limited to 10% of its assets.
- The fund will invest less than 20% directly and/or indirectly in China A and B Shares and/or onshore China fixed income securities on an aggregated basis.
- The fund may use derivatives, including complex derivatives or strategies, to meet its investment objectives in line with the fund's risk profile. The types of derivatives used include but are not limited to index, basket or single name futures, options (including covered call options), contracts for difference credit default swaps and total return swaps. Derivatives are used to achieve indirect exposure to the main assets listed above, to generate additional capital or income in line with the fund's risk profile or with the aim of risk or cost reduction.
- The fund will invest less than 30% in hybrids and contingent convertible bonds, with less than 20% in contingent convertible bonds.
- The fund is actively managed and aims to achieve a better downside profile versus a composite of 20% MSCI All Country World Net Total Return EUR Index and 80% Barclays Global Aggregate EUR Hedged Index on a rolling 3-year basis. The fund does not use an Index against which the performance of the fund may be assessed.
- Income earned by the fund is accumulated in the share price.
- Shares can usually be bought and sold each business day of the fund.

### Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- The use of derivatives may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case.
- There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.
- Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses.

## Charges for this fund (ISIN: LU1295423658)

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge 5.25%

Exit charge N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

Ongoing charges 1.35%

### Charges taken from the fund under certain specific conditions

Performance fee N/A

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.

The ongoing charges figure shown here for this class is an estimate of the charges. This figure may vary from year to year. It excludes:

- performance fees;
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

## Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 19/01/2009. This class was launched on 05/10/2015. Past performance has been calculated in USD.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an '\*'; in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Objectives and Investment Policy section shall refer to a benchmark and information on previous benchmarks may be found in the annual report and accounts.
