The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Fidelity Funds - Global Multi Asset Defensive Fund

a sub-fund of Fidelity Funds

Fidelity Funds - Global Multi Asset Defensive Fund Y-ACC-GBP (GBP/EUR hedged)
(ISIN:LU1261431842)

This fund is managed by FIL Investment Management (Luxembourg) S.A.

Objectives and Investment Policy

Objective: The fund aims to achieve capital growth while seeking to preserve capital over the long term.

Investment Policy: The fund invests, in a range of asset classes, including equities, corporate and government investment grade and below investment grade bonds, money market instruments, eligible REITs and eligible commodity exposure, from anywhere in the world, including emerging markets.

The fund may invest in the following assets according to the percentages indicated:

below investment grade bonds: less than 30%

China A and B shares and listed onshore (directly and/or indirectly): less than 20% (in aggregate)

hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos.

The fund may also invest in other subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

Investment Process: In actively managing the fund, the Investment Manager will allocate investments across asset classes and geographic areas based on their potential to generate growth or reduce overall risk. The fund adopts a multi asset approach which affords significant potential for diversification. The Investment Manager takes into account Sustainability Risks in its investment process.

For more information, see "Sustainable Investing and ESG Integration".

Derivatives and Techniques: The fund may use derivatives for hedging, efficient portfolio management and investment purposes (including derivatives which focus on credit, interest rates and currency). The fund may use long or short positions.

Benchmark: A composite of 80% Bloomberg Global Aggregate Index (EUR Hedged) Index + 20% MSCI ACWI (Net) EUR Index. Used for: risk monitoring only (the fund aims to achieve a better downside profile than that of the benchmark on a 3-year rolling basis). The fund does not use a benchmark against which the performance of the fund may be assessed.

Risk Management Method: Absolute VaR, limited to 8%. Expected gross leverage: 400% (may be higher or lower but not expected to exceed 750%).

Base Currency: GBP.

Distribution: As this is a non-distributing share class, dividends are re-invested.

The reference currency of the fund is hedged to the reference currency of the share class. This hedging has the effect of translating (or "replicating") the returns expressed in the fund's reference currency into returns expressed in the reference currency of the share class.

The long and short active currency positions may not be correlated with the underlying securities positions held by the fund.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

This Fund is categorised in risk class 4 because, in accordance with the investment policy, the value of the investments may fluctuate moderately. Consequently, both the expected return and the potential risk of loss may be average.

Additional risks: credit, leverage, emerging markets. The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment. Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
