

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Fidelity Funds - Sustainable Global Dividend Plus Fund

a sub-fund of Fidelity Funds

A-GDIST-Euro (ISIN: LU2242646318 / WKN: A3CQWZ)

This fund is managed by FIL Investment Management (Luxembourg) S.A.

Objectives and Investment Policy

- The fund aims to achieve income with the potential for some capital growth.
- The fund will invest at least 70% in the shares of companies globally. The Investment Manager will target investments which it believes offer attractive dividend yields in addition to price appreciation.
- The fund adopts a Sustainable Focused strategy under which a minimum of 70% will be invested in securities that maintain sustainable characteristics. The fund promotes environmental and social characteristics pursuant to article 8 of the SFDR.
- On an ongoing basis, the fund will consider a wide range of environmental and social characteristics such as climate change mitigation and adaptation, water and waste management, biodiversity, product safety, supply chain, health and safety and human rights. The fund seeks to promote these characteristics by adhering to the Fidelity Sustainable Family Framework.
- The fund assesses the sustainable characteristics of at least 90% of its assets. The average ESG rating of the fund will exceed the average ESG rating of its investment universe after excluding at least 20% of assets with the lowest ESG ratings.
- The fund has the freedom to invest outside its principal geographies, market sectors, industries or asset classes.
- As this fund may invest globally, it may invest in countries considered to be emerging markets.
- The fund will invest less than 30% directly and/or indirectly in China A and B Shares on an aggregated basis.
- The fund may invest in assets directly or achieve exposure indirectly through other eligible means including derivatives. The fund can use derivatives with the aim of risk or cost reduction or to generate additional capital or income, (for example, by the writing of covered call options on securities, generating extra income in return for agreeing a strike price above which potential capital growth in a specified period is sold), including for investment purposes, in line with the fund's risk profile.
- The fund is actively managed and aims to provide potential for some capital growth. Income will typically be in excess of MSCI ACWI Index (Net) (the "Index"). The fund's performance can be assessed against its Index. The Index constituents are representative of the type of companies the fund invests in. The Investment Manager has a wide range of discretion relative to the Index. While the fund will hold assets that are components of the Index, it also is expected to invest in companies, sectors, countries and security types that have different weightings from, and may not be included in the Index in order to take advantage of investment opportunities.
- Income earned by the fund is paid to shareholders out of gross investment income.
- Shares can usually be bought and sold each business day of the fund.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- The use of derivatives may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case.
- Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses.

Charges for this fund (ISIN: LU2242646318)

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge 5.25%

Exit charge N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges 1.95%

Charges taken from the fund under certain specific conditions

Performance fee N/A

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.

The ongoing charges figure shown here for this new class is an estimate of the charges. This figure may vary from year to year. It excludes:

- performance fees;
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 01/09/1999. This class was launched on 26/05/2021. Past performance has been calculated in EUR.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an ^{**}; in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Objectives and Investment Policy section shall refer to a benchmark and information on previous benchmarks may be found in the annual report and accounts.

There is insufficient data to provide a useful indication of past performance to investors.
