

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Fidelity Funds - Sustainable Climate Bond Fund

a sub-fund of Fidelity Funds

A-ACC-USD (ISIN: LU2111945882 / WKN: A2PZK5)

This fund is managed by FIL Investment Management (Luxembourg) S.A.

Objectives and Investment Policy

- The fund aims to provide income and capital growth.
- The fund will invest at least 70% in global investment grade corporate bonds.
- The fund focuses on management of climate related risks favouring issuers with the lowest carbon profiles within their sectors, encouraging transition to a greener environment through the selection of issuers on an improving carbon transition path and investing in carefully selected green bond issuers.
- The fund complies with a principle-based exclusion framework which includes norm-based and negative screening of sectors, companies, practices based on specific ESG criteria to be determined by the Investment Manager from time to time.
- The fund will aim to have a lower carbon footprint compared to that of the broader market.
- The fund adopts a Sustainable Thematic strategy under which 70% will be invested in securities that maintain sustainable characteristics. The fund promotes environmental and social characteristics pursuant to article 8 of the SFDR.
- The fund assesses the sustainable characteristics of at least 90% of its assets. The average ESG rating of the fund will exceed the average ESG rating of its investment universe after excluding at least 20% of assets with the lowest ESG ratings.
- The fund will consider a wide range of environmental characteristics and will be proactive in dealing with climate change through continual engagement with global corporate bond issuers and by investing in carefully selected green bond issuers.
- When investing in green, social and sustainability bonds, the Investment Manager employs a selection process mainly based on the International Capital Market Association ("ICMA") Green and Social Bond Principles ("GSBP") guidelines. Bonds certified as being compliant with Climate Bonds Initiative ("CBI") or European Green Bond Standards ("EUGBS") will be prioritised but the Investment Manager may use other standards where appropriate.
- As this fund may invest globally, it may invest in countries considered to be emerging markets.
- The fund may invest up to 10% directly in onshore China bonds listed or traded on any eligible market in China (with aggregate exposure including direct and indirect investments being less than 30%).
- Less than 30% of the fund's assets will be invested in Hybrids or convertible bonds, with less than 20% of the total net assets to be invested in contingent convertible bonds.
- The fund is actively managed. The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, reference Bloomberg Global Aggregate Corporate Index (the "Index"). The fund's performance can be assessed against its Index. The Investment Manager has a wide range of discretion relative to the Index. While the fund will hold assets that are components of the Index, it may also invest in issuers, sectors, countries and security types that are not included in, and that have different weightings from, the Index in order to take advantage of investment opportunities.
- Income earned by the fund is accumulated in the share price.
- Shares can usually be bought and sold each business day of the fund.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- The use of derivatives may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case.
- There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.
- Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses.

Charges for this fund (ISIN: LU2111945882)

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge 3.50%

Exit charge N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges 1.08%

Charges taken from the fund under certain specific conditions

Performance fee N/A

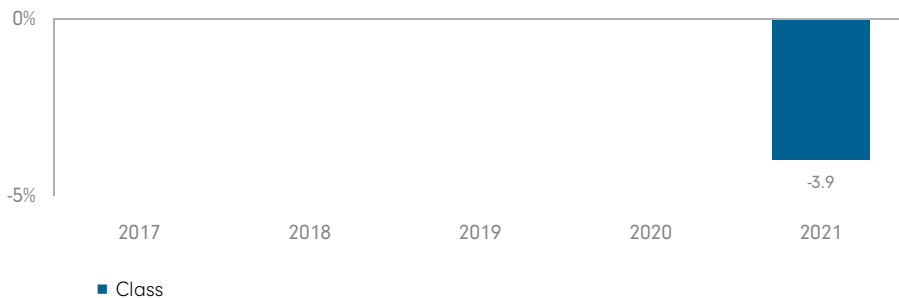

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.

The ongoing charges figure is based on expenses for the year ending 30/04/2021. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 29/07/2009. This class was launched on 05/02/2020. Past performance has been calculated in USD.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an '*'; in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Objectives and Investment Policy section shall refer to a benchmark and information on previous benchmarks may be found in the annual report and accounts.
