What is this product?

Type

Shares of a sub-fund of Fidelity Funds SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS).

SFDR product category: Article 9 (has sustainable investment objectives).

Term

This fund is open-ended.

Objectives

Objective: The fund aims to achieve capital growth over the long term by investing in sustainable investments.

Investment Policy: The fund invests at least 70% of its assets, in equities of companies from anywhere in the world including emerging markets.

The fund aims to invest in sustainable investments that contribute to environmental or social objectives which are aligned with one or more United Nations Sustainable Development Goals ("SDGs"). The fund may (on an ancillary basis and up to 20% of its assets) hold cash, money market instruments, or other investments used for hedging and efficient portfolio management purposes.

The fund seeks to select companies which aim to enable the stabilisation or mitigation of biodiversity loss through technologies and solutions that (amongst other things) reduce the impact of climate change, pollution and over exploitation of natural resources.

Examples of technologies and solutions to biodiversity loss provided by such companies include electric vehicles, biodegradable materials, agricultural efficiency, waste-water treatment, sustainable fish feeding, reduced land use and sustainable practices in mining and energy production.

The fund will also seek to select companies which adopt good practices contributing towards the stabilisation or mitigation of biodiversity loss either through the products or services they offer, or the policies they have in place. Investments will be focused on the companies that demonstrate leading biodiversity practices in their space as identified by FIL Group research analysts.

The fund may invest less than 30% of its assets (directly and/or indirectly) in China A or B shares (in aggregate) through share access products, including, but not limited to, equity linked notes, participation notes, or funds investing in China A or B shares.

Investment Process: In actively managing the fund, the Investment Manager identifies investment ideas, relying on a combination of Fidelity's research, third-party research, inputs from quantitative screens and company meetings to help narrow the investment universe. Stock research and selection focuses on assessing ESG profile and SDG alignment fundamentals through rigorous

bottom-up financial analysis and valuation to select stocks with strong investment return potential.

The Investment Manager selects issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs.

The Investment Manager aims to be an active owner and engage with companies held within the fund to influence positive change.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund's investment universe will be reduced by at least 20% due to the exclusion of issuers on the basis of their ESG characteristics.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

Derivatives and Techniques: The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

Benchmark: MSCI ACWI Index, a broad market index that does not take into account ESG characteristics. Used for: investment selection, risk monitoring and performance comparison.

Base Currency: USD

Risk Management Method: Commitment.

Additional Information: You may sell (redeem) some or all of your Shares on any Valuation Day. As this is a non-distributing share class, dividends are re-invested.

This key information document describes a sub-fund of Fidelity Funds. A separate pool of assets is invested and maintained for each sub-fund of Fidelity Funds.

The assets and liabilities of the fund are segregated from those of other sub-funds and there is no cross-liability among the sub-funds. For more information, please consult the prospectus and latest reports and accounts which can be obtained free of charge in English and other main languages from FIL Investment Management (Luxembourg) S.A.

Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds; who plan to hold their investment for a recommended holding period of at least 5 years; who seek capital growth over the recommended holding period; and who understand the risk of losing some or all of the capital invested.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.
The actual risk can vary significantly if you cash in at the early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

Additional risks: emerging markets.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If FIL Investment Management (Luxembourg) S.A. is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 years Example investment : EUR 10,000		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	1,560 EUR	1,670 EUR
	Average return each year	-84.4%	-30.1%
Unfavourable	What you might get back after costs	8,600 EUR	9,550 EUR
	Average return each year	-14.0%	-0.9%
Moderate	What you might get back after costs	10,690 EUR	15,520 EUR
	Average return each year	6.9%	9.2%
Favourable	What you might get back after costs	14,450 EUR	18,680 EUR
	Average return each year	44.5%	13.3%

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 12/2021 and 05/2024.

The moderate scenario occurred for an investment between 09/2015 and 09/2020.

The favourable scenario occurred for an investment between 10/2016 and 10/2021.

This product does not participate in an investor compensation scheme.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	146 EUR	956 EUR
Annual cost impact (*)	1.5%	1.6% each year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.8% before costs and 9.2% after costs.
