Objectives

Objective: The fund aims to achieve capital growth over the long term by investing in sustainable investments.

Investment Policy: The fund invests at least 70% of its assets, in equities of companies from anywhere in the world, including emerging markets. The fund aims to invest in sustainable investments that contribute to environmental or social objectives which are aligned with one or more United Nations Sustainable Development Goals ("SDGs"). The fund may (on an ancillary basis and up to 20% of its assets) hold cash, money market Instruments, or other investments used for hedging and efficient portfolio management purposes. The fund may invest in the following assets according to the percentages of assets indicated: China A and B shares (directly and/or indirectly): less than 30% (in aggregate); Equity-linked securities: up to 10%; Emerging markets: less than 30%; European equities: less than 50%; Eligible closed-ended REITs: up to 10%.

Investment Process: In actively managing the fund, the Investment Manager identifies investment ideas, relying on a combination of Fidelity's research, third-party research, inputs from quantitative screens and company meetings to help narrow the investment universe. Stock research and selection focuses on assessing ESG profile and SDG alignment fundamentals through rigorous bottom-up financial analysis and valuation to select stocks with strong investment return potential.

The Investment Manager selects issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs.

The Investment Manager aims to be an active owner and engage with companies held within the fund to influence positive change.

The fund assesses the ESG characteristics of at least 90% of its

assets. The fund's investment universe is reduced by at least 20% due to the exclusion of issuers on the basis of their ESG characteristics.
