Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 84.45 % of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 28.45 % of the fund was invested in sustainable investments and;
- iv) 27.52% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 78.61% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 24.53% of the fund was invested in sustainable investments and;
- iv) 22.34% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 28.45 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
DBS Group Holdings	Financials	8.94%	SG
Bank Central Asia	Financials	5.86%	ID

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 28.45 % in sustainable investments.

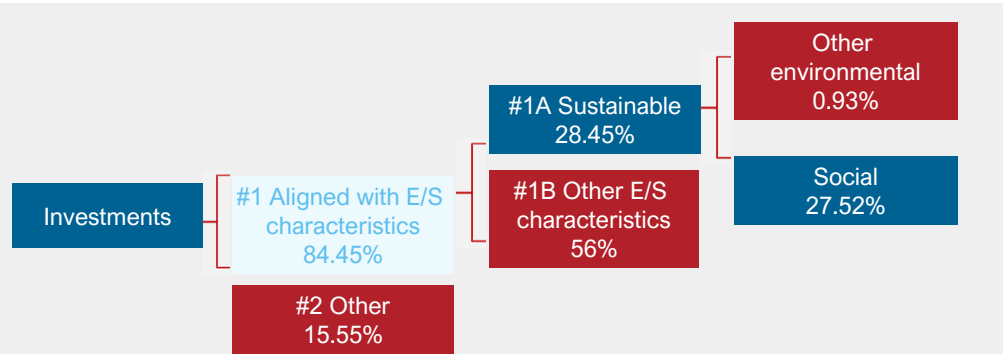

What was the asset allocation?

The fund invested in:

1. 84.45 % of its assets in securities of issuers with favourable ESG characteristics;
2. 28.45 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 0.93 % have an environmental objective (which is not aligned with the EU Taxonomy) and 27.52 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 78.61% of its assets in securities of issuers with favourable ESG characteristics;
2. 24.53% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 2.19% have an environmental objective (which is not aligned with the EU Taxonomy), and 22.34% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective

on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 0.93 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 27.52 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Asian Smaller Companies Fund

Legal entity identifier:
549300WPIOCV90YN3U76

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 30.2% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in August 11, 2023. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 74.35% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 30.2% of the fund invested in sustainable investments;
- iv) 5.8% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 24.4% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 30.2% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 11/08/2023-30/04/2024

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

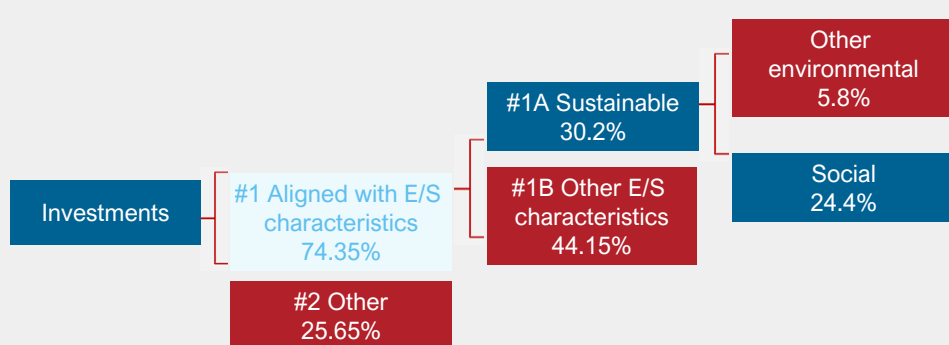

The fund invested 30.2 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 74.35 % of its assets in securities of issuers with favourable ESG characteristics;
- 30.2 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 5.8 % have an environmental objective (which is not aligned with the EU Taxonomy) and 24.4 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

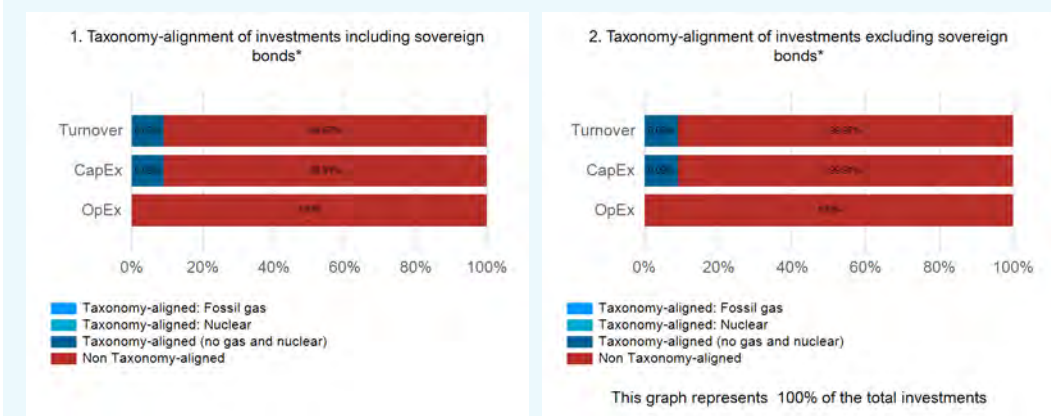

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.02%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 5.8 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 24.4 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Asian Special Situations Fund

Legal entity identifier:
5493001KQKB7F558TV86

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 48.81% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) the 89.99 % percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
 - ii) in respect of its direct investments in corporate issuers, 0% the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
 - iii) the 48.81 % percentage of the fund invested in sustainable investments;
 - iv) the 17.57 % percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
 - v) 31.24% the percentage of the fund invested in sustainable investments with a social objective.
- The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 91.48% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
 - ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
 - iii) 43.8% of the fund was invested in sustainable investments;
 - iv) 12.02% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
 - v) 31.78% of the fund invested in sustainable investments with a social objective.
- The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 48.81 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	9.6%	TW

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 48.81 % in sustainable investments.

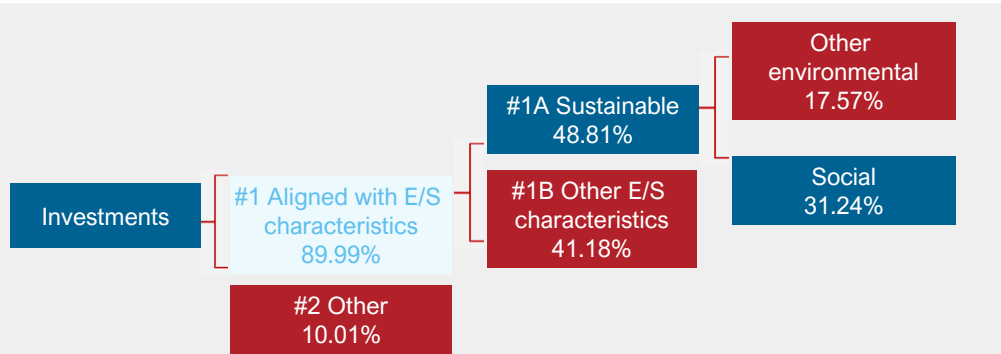

What was the asset allocation?

The fund invested in:

1. 89.99 % of its assets in securities of issuers with favourable ESG characteristics;
2. 48.81 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 17.57 % have an environmental objective (which is not aligned with the EU Taxonomy) and 31.24 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 91.48% of its assets in securities of issuers with favourable ESG characteristics;
2. 43.8% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 12.02% have an environmental objective (which is not aligned with the EU Taxonomy), and 31.78% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the

criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 17.57 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 31.24 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 30.58% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) the 82.29 % percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
 - ii) in respect of its direct investments in corporate issuers, 0% the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
 - iii) the 30.58 % percentage of the fund invested in sustainable investments;
 - iv) the 10.42 % percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
 - v) 20.16% the percentage of the fund invested in sustainable investments with a social objective.
- The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 82.8% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 21.26% of the fund was invested in sustainable investments;
- iv) 3.14% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 18.11% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 30.58 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Tencent Holdings	Information Technology	9.86%	CN
Alibaba Group Holding	Consumer Discretionary	8.56%	CN

Hong Kong Exchanges & Clearing	Financials	1.77%	HK

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 30.58 % in sustainable investments.

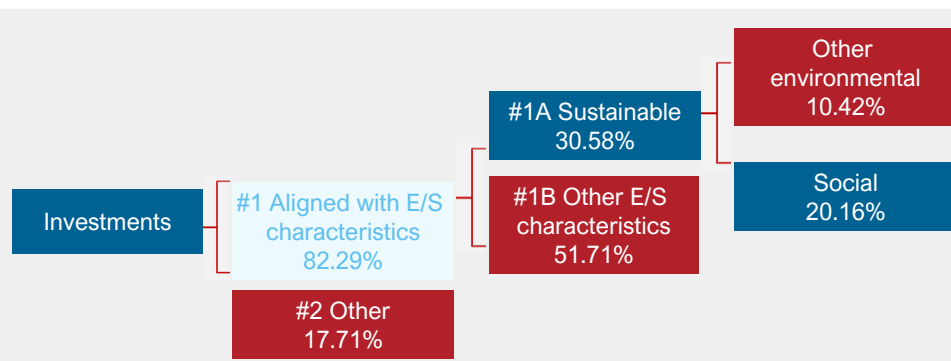

What was the asset allocation?

The fund invested in:

- 82.29 % of its assets in securities of issuers with favourable ESG characteristics;
- 30.58 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 10.42 % have an environmental objective (which is not aligned with the EU Taxonomy) and 20.16 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 82.8% of its assets in securities of issuers with favourable ESG characteristics;
- 21.26% % in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 3.14% have an environmental objective (which is not aligned with the EU Taxonomy), and 18.11% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV

Materials	Paper & Forest Products	0.79%
Real Estate	Equity - Common Stock - Real Est Mgt & Dev - Real	5.63%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

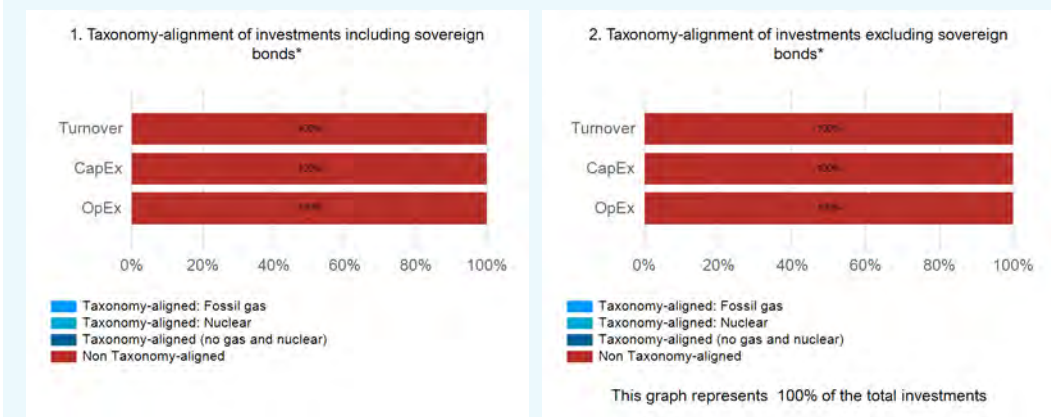

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 0%
 Opex - 0%
 Capex - 0 %
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 0%
 Opex - 0%
 Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 10.42 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 20.16 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - China Focus Fund

Legal entity identifier:
549300N4B16KH4R75H69

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 17.75% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in August 11, 2023. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 77.62% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 17.75% of the fund invested in sustainable investments;
- iv) 7.68% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 9.75% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 17.75% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 11/08/2023-30/04/2024

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 17.75 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 77.62 % of its assets in securities of issuers with favourable ESG characteristics;
2. 17.75 % in sustainable investments of which 0.32 % have an environmental objective (which is aligned with the EU Taxonomy), 7.68 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.75 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.32% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

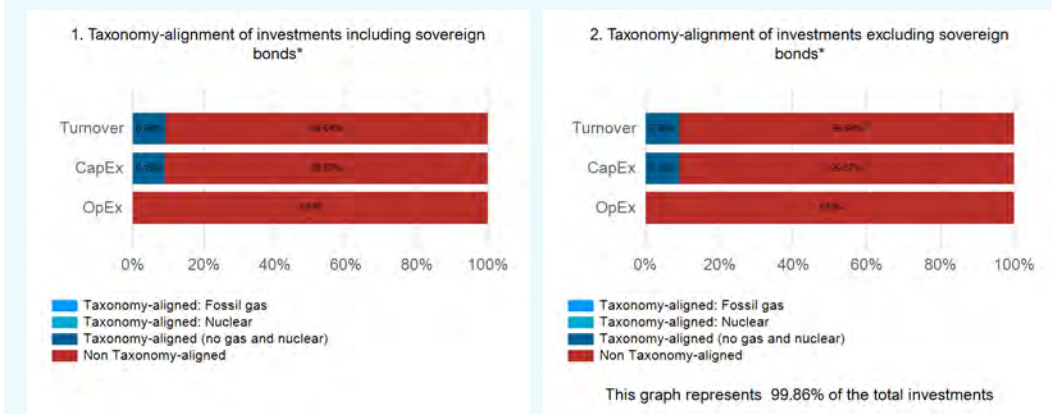

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.35%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 7.68 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.75 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - China Innovation Fund

Legal entity identifier:
549300IV1SMG8Q6CJU79

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 39.01% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 76.88 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 39.01 % of the fund invested in sustainable investments;
- iv) 26.26 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 12.47% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 85.55% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 34.24% of the fund was invested in sustainable investments;
- iv) 18.11% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 15.23% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 39.01 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Tencent Holdings	Information Technology	9.48%	CN
Taiwan Semiconductor Manufacturing	Information Technology	6.7%	TW

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 39.01 % in sustainable investments.

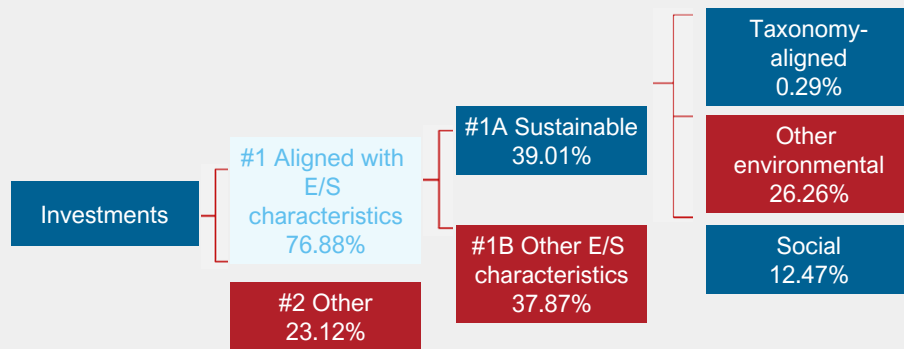

What was the asset allocation?

The fund invested in:

1. 76.88 % of its assets in securities of issuers with favourable ESG characteristics;
2. 39.01 % in sustainable investments of which 0.29 % have an environmental objective (which is aligned with the EU Taxonomy), 26.26 % have an environmental objective (which is not aligned with the EU Taxonomy) and 12.47 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 85.55% of its assets in securities of issuers with favourable ESG characteristics;
2. 34.24% in sustainable investments of which 0.91% have an environmental objective (which is aligned with the EU Taxonomy), 18.11% have an environmental objective (which is not aligned with the EU Taxonomy), and 15.23% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.29% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

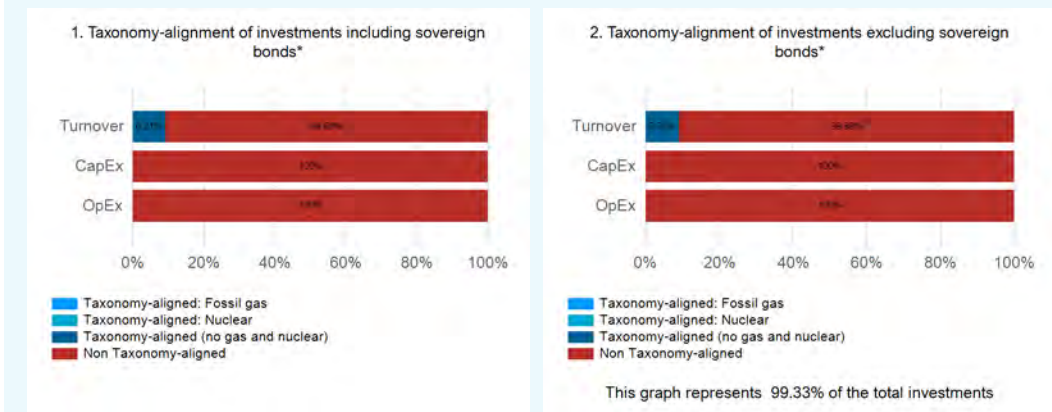

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.30%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.9%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.9%

Opex - 0%

Capex - 0%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 26.26 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 12.47 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 40.12% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 80.57 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 40.12 % of the fund invested in sustainable investments;
- iv) 16.53 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 23.58% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 81.81% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 34.21% of the fund was invested in sustainable investments;
- iv) 13.01% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 21.19% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 40.12 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	9.07%	TW
Tencent Holdings	Information Technology	5.6%	CN
Samsung Electronics	Information Technology	5.55%	KR
Alibaba Group Holding	Consumer Discretionary	3.94%	CN
ICICI Bank	Financials	3.1%	IN
HDFC Bank	Financials	2.76%	IN
SK Hynix	Information Technology	2.32%	KR
Axis Bank	Financials	2.3%	IN

PDD Holdings	Consumer Discretionary	1.67%	IE
Hygeia HealthHCare Holdings	Healthcare	1.54%	CN
Bank Mandiri Persero	Financials	1.5%	ID
China Overseas Land & Investment	Real Estate	1.47%	HK
Li Ning	Consumer Discretionary	1.36%	CN
Bank Negara Indonesia Persero	Financials	1.24%	ID

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 40.12 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 80.57 % of its assets in securities of issuers with favourable ESG characteristics;
2. 40.12 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 16.53 % have an environmental objective (which is not aligned with the EU Taxonomy) and 23.58 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 81.81% of its assets in securities of issuers with favourable ESG characteristics;
2. 34.21% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 13.01% have an environmental objective (which is not aligned with the EU Taxonomy), and 21.19% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and

subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.03%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 0%
 Opex - 0%
 Capex - 0 %
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 0%
 Opex - 0%
 Capex - 0%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 16.53 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 23.58 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Emerging Markets Fund

Legal entity identifier:
5493002DANCVJDN6B565

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52.9% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 94.28 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 52.9 % of the fund invested in sustainable investments;
- iv) 21.32 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 31.58% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 86.51% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 45.87% of the fund was invested in sustainable investments;
- iv) 15.27% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 30.58% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 52.9 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 52.9 % in sustainable investments.

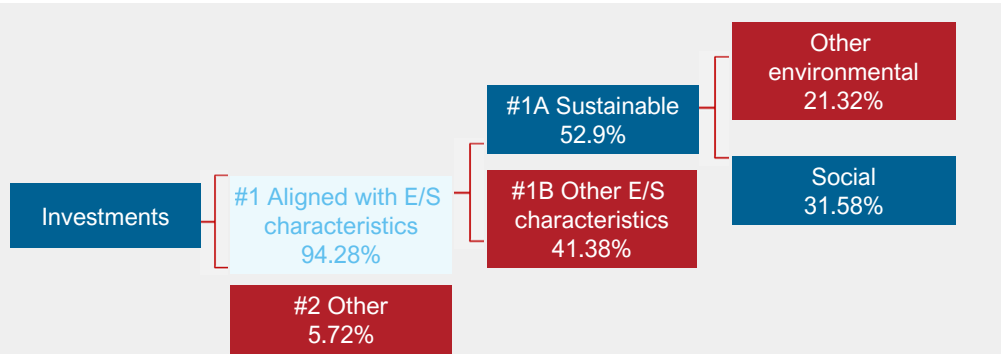

What was the asset allocation?

The fund invested in:

1. 94.28 % of its assets in securities of issuers with favourable ESG characteristics;
2. 52.9 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 21.32 % have an environmental objective (which is not aligned with the EU Taxonomy) and 31.58 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 86.51% of its assets in securities of issuers with favourable ESG characteristics;
2. 45.87% in sustainable investments of which 0.02% have an environmental objective (which is aligned with the EU Taxonomy), 15.27% have an environmental objective (which is not aligned with the EU Taxonomy), and 30.58% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end

of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

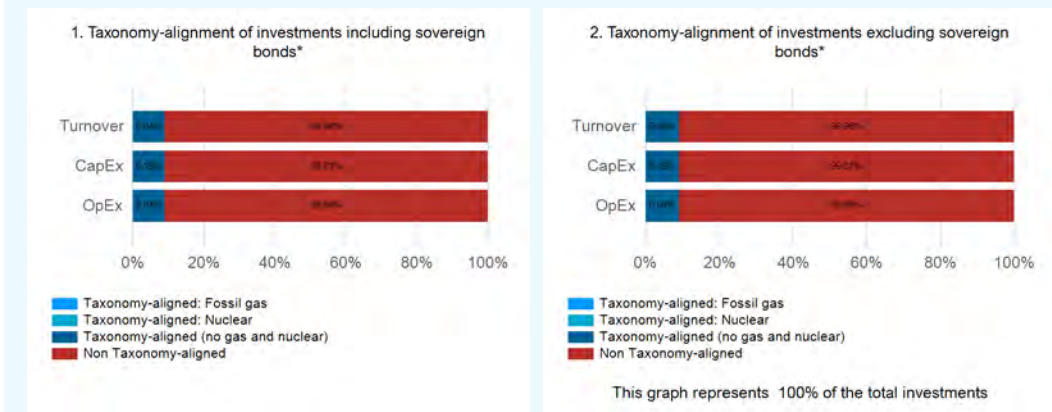

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.04%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.1%

Opex - 0%

Capex - 0.1%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.1%

Opex - 0%

Capex - 0.1%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 21.32 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 31.58 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - European Dynamic Growth Fund

Legal entity identifier:
549300YTXDJLT19R5058

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 78.58% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 96.28 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 78.58 % of the fund invested in sustainable investments;
- iv) 25.54 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 52.87% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 97.8% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 70.08% of the fund was invested in sustainable investments;
- iv) 20.78% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 49.27% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 78.58 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Novo Nordisk (B)	Healthcare	5.49%	DK

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 78.58 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 96.28 % of its assets in securities of issuers with favourable ESG characteristics;
2. 78.58 % in sustainable investments of which 0.16 % have an environmental objective (which is aligned with the EU Taxonomy), 25.54 % have an environmental objective (which is not aligned with the EU Taxonomy) and 52.87 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 97.8% of its assets in securities of issuers with favourable ESG characteristics;
2. 70.08% in sustainable investments of which 0.02% have an environmental objective (which is aligned with the EU Taxonomy), 20.78% have an environmental objective (which is not aligned with the EU Taxonomy), and 49.27% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Textiles & Apparel	2.78%
	Hotels Restaurants & Leisure	2.06%

	Semiconductor Equipment & Products	2.19%
	Software	11.33%
	It Services	1.44%
Materials	Chemicals	3.8%
Open Ended Fund	Closed Ended Cash Fund	3.66%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.16% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

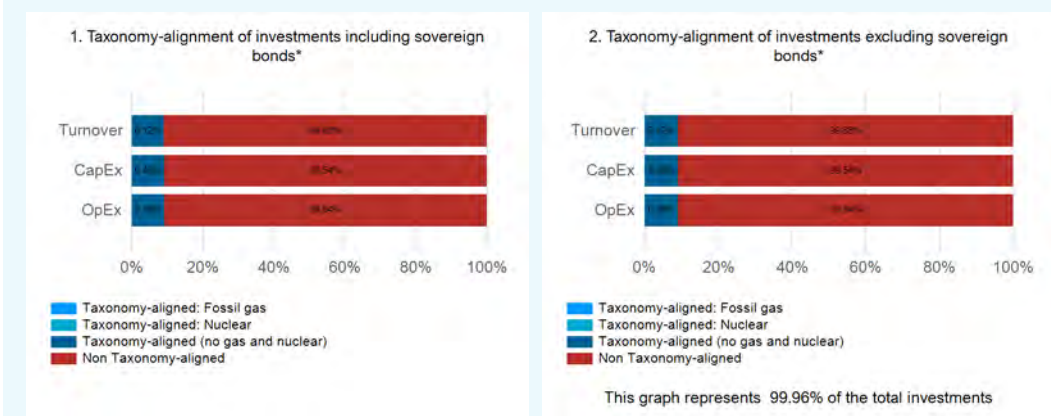

best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.05%; Transitional Activity: 0.05%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.2%

Opex - 0.9%

Capex - 0.2%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.2%

Opex - 0.9%

Capex - 0.2%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 25.54 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 52.87 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - European Growth Fund

Legal entity identifier:
549300G4OINSKM9K3661

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 73.76% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 95.6 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 73.76 % of the fund invested in sustainable investments;
- iv) 30.28 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 40.43% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 92.4% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 58.72% of the fund was invested in sustainable investments;
- iv) 23.40% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 35.01% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 73.76 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Unilever	Consumer Staples	2.42%	GB

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 73.76 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 95.6 % of its assets in securities of issuers with favourable ESG characteristics;
2. 73.76 % in sustainable investments of which 3.05 % have an environmental objective (which is aligned with the EU Taxonomy), 30.28 % have an environmental objective (which is not aligned with the EU Taxonomy) and 40.43 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 92.4% of its assets in securities of issuers with favourable ESG characteristics;
2. 58.72% in sustainable investments of which 0.31% have an environmental objective (which is aligned with the EU Taxonomy), 23.4% have an environmental objective (which is not aligned with the EU Taxonomy), and 35.01% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 3.05% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

Enabling activities

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

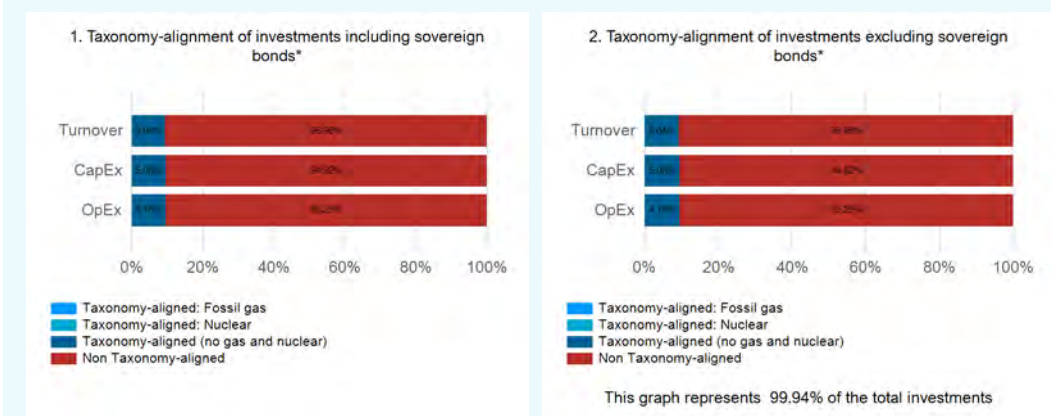

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.71%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 3%
 Opex - 3.8%
 Capex - 5.6%
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 3%
 Opex - 3.8%
 Capex - 5.6%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 30.28 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 40.43 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - European Larger Companies
Fund

Legal entity identifier:
5493001IG3HUGK4JRN48

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 69.17% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 95.42 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 69.17 % of the fund invested in sustainable investments;
- iv) 30.85 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 35.57% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 92.66% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 55.51% of the fund was invested in sustainable investments; and
- iv) 23.02% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 32.21% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 69.17 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Roche Holding AG	Healthcare	4.49%	CH
SAP SE	Information Technology	4.17%	DE
Industria de Diseno Textil SA	Consumer Discretionary	3.86%	ES
Associated British Foods	Consumer Staples	3.77%	GB
Reckitt Benckiser Group	Consumer Staples	3.7%	GB
Sanofi	Healthcare	3.67%	FR

Vonovia SE	Real Estate	2.63%	DE
TotalEnergies SE	Energy	2.58%	FR
Coca-Cola HBC AG	Consumer Staples	2.53%	CH
SCOR SE	Financials	2.52%	FR

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 69.17 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 95.42 % of its assets in securities of issuers with favourable ESG characteristics;
2. 69.17 % in sustainable investments of which 2.75 % have an environmental objective (which is aligned with the EU Taxonomy), 30.85 % have an environmental objective (which is not aligned with the EU Taxonomy) and 35.57 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 92.66% of its assets in securities of issuers with favourable ESG characteristics;
2. 55.51% in sustainable investments of which 0.28% have an environmental objective (which is aligned with the EU Taxonomy), 23.02% have an environmental objective (which is not aligned with the EU Taxonomy), and 32.21% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

	Electric Utilities	1.29%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.75% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.42%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.4%

Opex - 1.8%

Capex - 2.7%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.4%

Opex - 1.8%

Capex - 2.7%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 30.85 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 35.57 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - FIRST All Country World Fund

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 54.53% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 91.31 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 54.53 % of the fund invested in sustainable investments;
- iv) 28.24 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 26.18% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 88.11 % of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 51.6 % of the fund was invested in sustainable investments;
- iv) 23.53% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 28.07% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 54.53 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Microsoft	Information Technology	4.84%	US
Alphabet (A)	Information Technology	2.87%	US
NVIDIA	Information Technology	2.85%	US
Boston Scientific	Healthcare	2.37%	US
Taiwan Semiconductor Manufacturing	Information Technology	2.12%	TW
JPMorgan Chase &	Financials	2.02%	US
Marathon Petroleum	Energy	2.01%	US
Applied Materials	Information Technology	2%	US
Linde	Materials	1.96%	US
Morgan Stanley	Financials	1.89%	US
Salesforce	Information Technology	1.87%	US
Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	1.8%	IE
TotalEnergies SE	Energy	1.77%	FR
NVR	Consumer Discretionary	1.74%	US
AXA SA (A)	Financials	1.74%	FR

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 54.53 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 91.31 % of its assets in securities of issuers with favourable ESG characteristics;
2. 54.53 % in sustainable investments of which 0.11 % have an environmental objective (which is aligned with the EU Taxonomy), 28.24 % have an environmental objective (which is not aligned with the EU Taxonomy) and 26.18 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 88.11% of its assets in securities of issuers with favourable ESG characteristics;
2. 51.6%% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 23.53% have an environmental objective (which is not aligned with the EU Taxonomy), and 28.07% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	1.76%
Consumer Discretionary	Multiline Retail	3.17%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

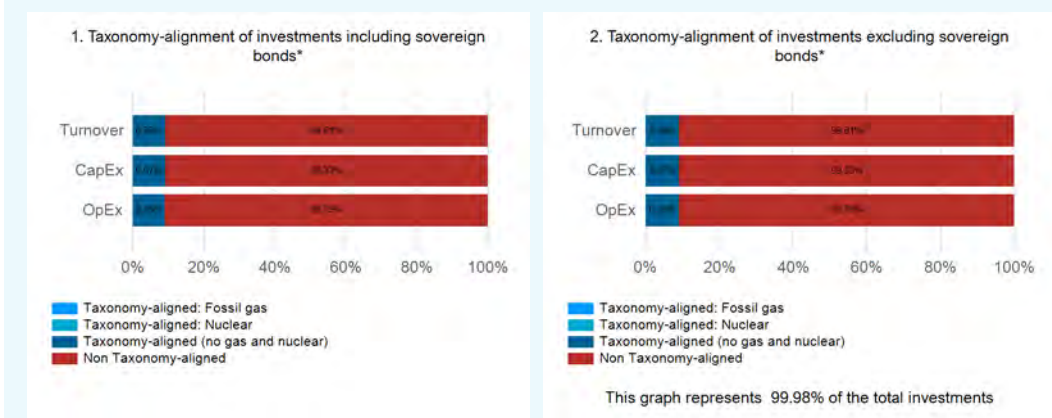

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.11% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.19%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.1%

Opex - 0%

Capex - 0.4%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.1%

Opex - 0%

Capex - 0.4%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 28.24 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 26.18 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Germany Fund

Legal entity identifier:
54930064HC13BC84WQ28

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 72.07% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in August 11, 2023. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 98.26% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 72.07% of the fund invested in sustainable investments;
- iv) 33.7% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 38.1% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 72.07% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 11/08/2023-30/04/2024

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

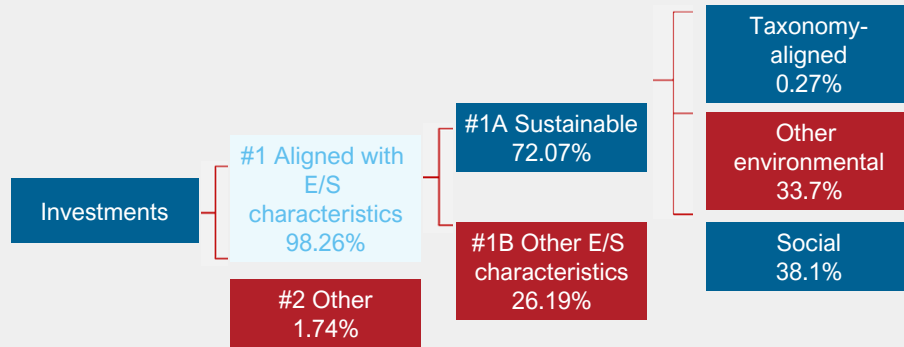

The fund invested 72.07 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 98.26 % of its assets in securities of issuers with favourable ESG characteristics;
- 72.07 % in sustainable investments of which 0.27 % have an environmental objective (which is aligned with the EU Taxonomy), 33.7 % have an environmental objective (which is not aligned with the EU Taxonomy) and 38.1 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.27% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

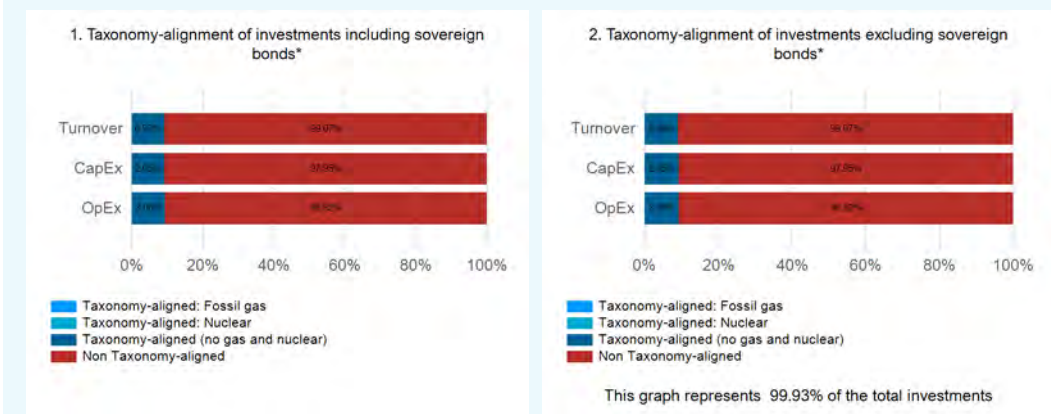

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.73%; Transitional Activity: 0.08%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 33.7 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 38.1 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Global Financial Services Fund

Legal entity identifier:
549300HO6N0F2KYZFZ92

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 33.19% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 79.34 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 33.19 % of the fund invested in sustainable investments and;
- iv) 25.68% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 77.83% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 29.94% of the fund was invested in sustainable investments; and
- iv) 24.7% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 33.19 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
JPMorgan Chase &	Financials	6.88%	US
Berkshire Hathaway (B)	Financials	5.93%	US
Visa	Financials	5.58%	US
Wells Fargo &	Financials	3.89%	US
Morgan Stanley	Financials	2.94%	US
Arthur J Gallagher &	Financials	2.86%	US
Mastercard (A)	Financials	2.61%	US
S&P Global	Financials	2.21%	US
Ares Management (A)	Financials	2.14%	US
Arch Capital Group	Financials	2.08%	BM
Axis Bank	Financials	1.98%	IN
Fidelity Institutional Liquidity Fund - A-ACC-EUR	Open Ended Fund	1.97%	IE
BNP Paribas SA	Financials	1.93%	FR
3i Group	Financials	1.9%	GB
Raymond James Financial	Financials	1.9%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 33.19 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 79.34 % of its assets in securities of issuers with favourable ESG characteristics;
- 33.19 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 7.52 % have an environmental objective (which is not aligned with the EU Taxonomy) and 25.68 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 77.83% of its assets in securities of issuers with favourable ESG characteristics;
- 29.94% in sustainable investments of which 0.06% have an environmental objective (which is aligned with the EU Taxonomy), 5.18% have an environmental objective (which is not aligned with the EU Taxonomy), and 24.7% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Financials	Diversified Financial Services	43.66%
	Commercial Banks	34.01%
	Insurance	19.1%
Industrials	Professional Services	1.09%
Information Technology	It Services	0.31%
Open Ended Fund	Closed Ended Cash Fund	2.27%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 0%
 Opex - 0%
 Capex - 0.1%
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 0%
 Opex - 0%
 Capex - 0.1%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 7.52 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 25.68 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Global Focus Fund

Legal entity identifier:
549300F4JJCOV7BCT788

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 64.29% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 86.65 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 64.29 % of the fund invested in sustainable investments;
- iv) 34.51 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 29.59% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 83.06% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 54.69% of the fund was invested in sustainable investments;
- iv) 30.61% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 23.97% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 64.29 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Berkshire Hathaway (B)	Financials	4.22%	US
Microsoft	Information Technology	4.03%	US
Amazon.com	Consumer Discretionary	3.59%	US
Arthur J Gallagher &	Financials	3.45%	US
Visa	Financials	3.33%	US
Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	3.31%	IE
Alphabet (A)	Information Technology	3%	US
S&P Global	Financials	2.8%	US
QUALCOMM	Information Technology	2.56%	US

Canadian Pacific Kansas City	Industrials	2.42%	CA
Taiwan Semiconductor Manufacturing	Information Technology	2.33%	TW
Canadian National Railway	Industrials	2.22%	CA
Meta Platforms (A)	Information Technology	2.08%	US
Norfolk Southern	Industrials	1.88%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 64.29 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 86.65 % of its assets in securities of issuers with favourable ESG characteristics;
2. 64.29 % in sustainable investments of which 0.19 % have an environmental objective (which is aligned with the EU Taxonomy), 34.51 % have an environmental objective (which is not aligned with the EU Taxonomy) and 29.59 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 83.06% of its assets in securities of issuers with favourable ESG characteristics;
2. 54.69% in sustainable investments of which 0.1% have an environmental objective (which is aligned with the EU Taxonomy), 30.61% have an environmental objective (which is not aligned with the EU Taxonomy), and 23.97% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Media	0.49%
Consumer Discretionary	Multiline Retail	5.44%
	Auto Components	1.11%
	Household Durables	1.07%
	Textiles & Apparel	0.98%

	It Services	1.46%
	Electronic Equipment Instruments & Components	0.29%
Materials	Chemicals	1.54%
Open Ended Fund	Closed Ended Cash Fund	0.56%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.19% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

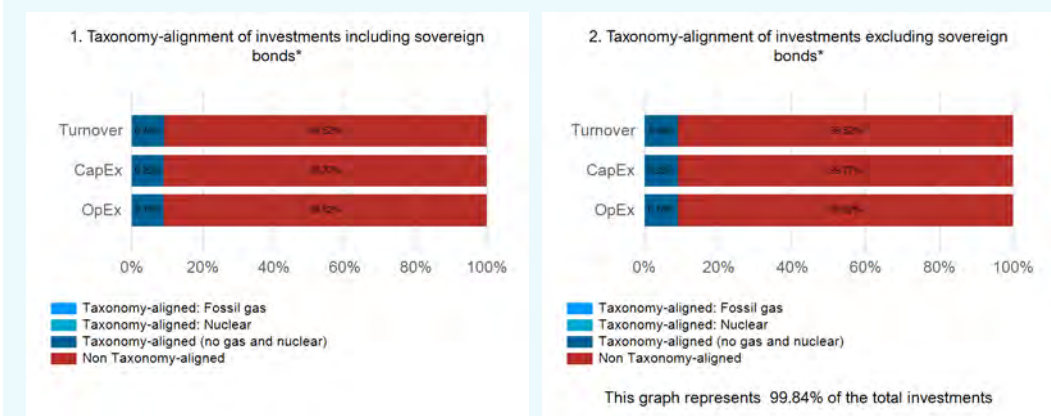

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.24%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.3%

Opex - 0.1%

Capex - 0.3%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.3%

Opex - 0.1%

Capex - 0.3%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 34.51 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 29.59 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Global Technology Fund

Legal entity identifier:
549300TVS03JI4WXGJ44

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 59.62% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 94.44 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 59.62 % of the fund invested in sustainable investments;
- iv) 46.28 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 13.25% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 91.02% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 54.4% of the fund was invested in sustainable investments;
- iv) 38.57% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 15.6% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 59.62 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Microsoft	Information Technology	5.2%	US
Apple	Information Technology	4.5%	US
Taiwan Semiconductor Manufacturing	Information Technology	4.46%	TW

Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	1.89%	IE
NXP Semiconductors	Information Technology	1.62%	NL

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 59.62 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 94.44 % of its assets in securities of issuers with favourable ESG characteristics;
2. 59.62 % in sustainable investments of which 0.08 % have an environmental objective (which is aligned with the EU Taxonomy), 46.28 % have an environmental objective (which is not aligned with the EU Taxonomy) and 13.25 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 91.02% of its assets in securities of issuers with favourable ESG characteristics;
2. 54.4% in sustainable investments of which 0.22% have an environmental objective (which is aligned with the EU Taxonomy), 38.57% have an environmental objective (which is not aligned with the EU Taxonomy), and 15.6% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Media	2.74%
	Wireless Telecommunication Services	0.6%
Consumer Discretionary	Multiline Retail	6.3%
	Hotels Restaurants & Leisure	3.17%

	Software	16.87%
Open Ended Fund	Closed Ended Cash Fund	1.76%
Real Estate	Equity - Common Stock - Real Estate - Specialized	1.33%
	Equity - American Drs - Real Est Mgt & Dev - Real	0.41%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.08% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

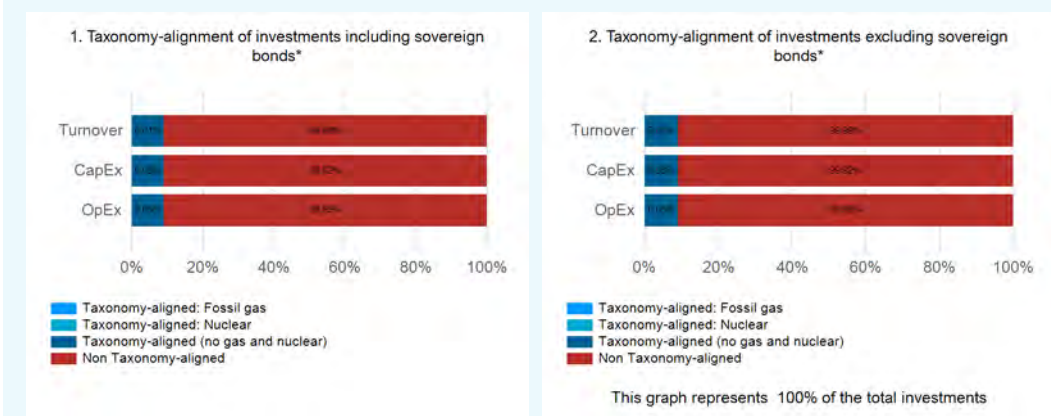

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 0.3%
 Opex - 0.4%
 Capex - 0.1%
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 0.3%
 Opex - 0.4%
 Capex - 0.1%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 46.28 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 13.25 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier:
5493007VVU2XBPB4GZ92

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 70.89% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 94.29 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 70.89 % of the fund invested in sustainable investments;
- iv) 39.67 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 28.95% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 81.36% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 59.89% of the fund was invested in sustainable investments;
- iv) 25.31% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 31.59% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 70.89 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Microsoft	Information Technology	4.98%	US
Alphabet (A)	Information Technology	2.44%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 70.89 % in sustainable investments.

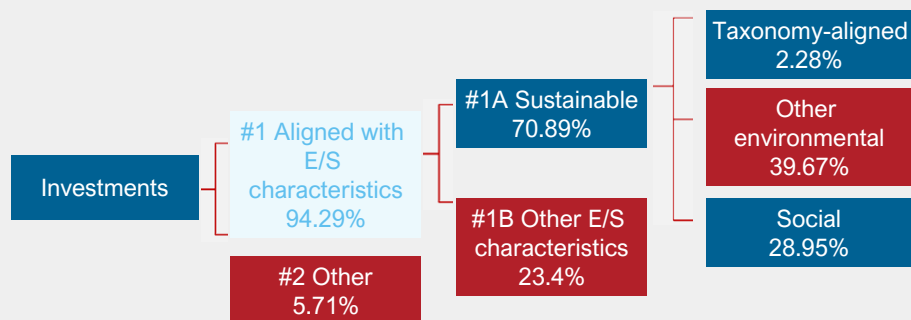

What was the asset allocation?

The fund invested in:

1. 94.29 % of its assets in securities of issuers with favourable ESG characteristics;
2. 70.89 % in sustainable investments of which 2.28 % have an environmental objective (which is aligned with the EU Taxonomy), 39.67 % have an environmental objective (which is not aligned with the EU Taxonomy) and 28.95 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 81.36% of its assets in securities of issuers with favourable ESG characteristics;
2. 59.89% in sustainable investments of which 2.99% have an environmental objective (which is aligned with the EU Taxonomy), 25.31% have an environmental objective (which is not aligned with the EU Taxonomy), and 31.59% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing,

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

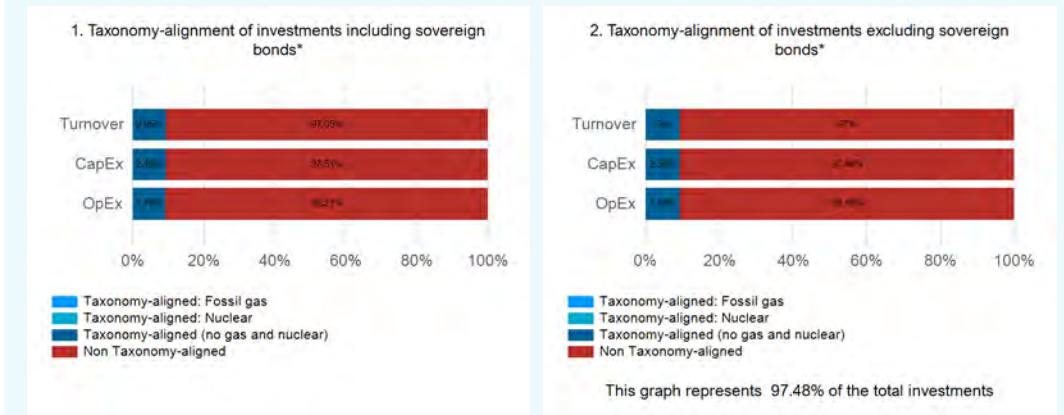

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.28% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 1.81%; Transitional Activity: 0.06%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 4.9%
 Opex - 1.6%
 Capex - 1.8%
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 5.1%
 Opex - 1.7%
 Capex - 1.8%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 39.67 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 28.95 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Greater China Fund II

Legal entity identifier:
549300ZKE6NT4EWYQU42

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 33.88% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 80.82 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 33.88 % of the fund invested in sustainable investments;
- iv) 20.66 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 13.22% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 85.45% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 35.51% of the fund was invested in sustainable investments;
- iv) 16.30% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 19.2% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 33.88 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	9.5%	TW
Tencent Holdings	Information Technology	8.56%	CN

MediaTek	Information Technology	1.56%	TW
ANTA Sports Products	Consumer Discretionary	1.51%	CN

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 33.88 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 80.82 % of its assets in securities of issuers with favourable ESG characteristics;
2. 33.88 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 20.66 % have an environmental objective (which is not aligned with the EU Taxonomy) and 13.22 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 85.45% of its assets in securities of issuers with favourable ESG characteristics;
2. 35.51% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 16.3% have an environmental objective (which is not aligned with the EU Taxonomy), and 19.2% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
- No

Enabling activities

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 0.3%
 Opex - 0%
 Capex - 0%
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 0.3%
 Opex - 0%
 Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 20.66 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 13.22 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Greater China Fund

Legal entity identifier:
5493005EHFIWJMR7DT21

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 33.97% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 81.3 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 33.97 % of the fund invested in sustainable investments;
- iv) 20.88 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 13.09% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 86% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 35.93% of the fund was invested in sustainable investments;
- iv) 16.33% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);and
- v) 19.59% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 33.97 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives;or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	9.55%	TW

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 33.97 % in sustainable investments.

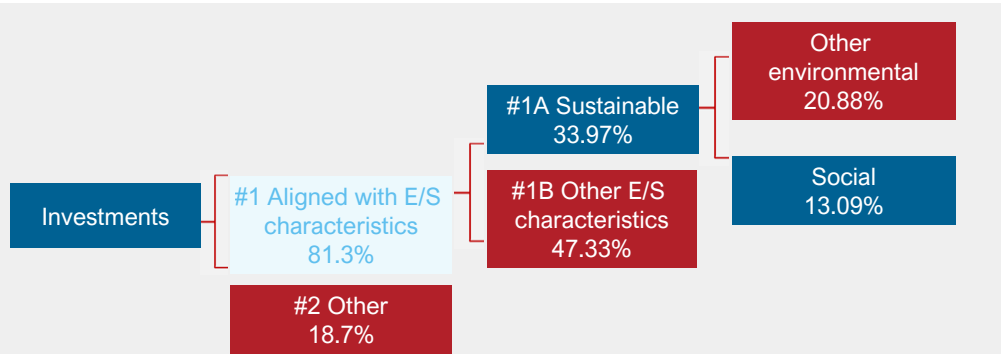

What was the asset allocation?

The fund invested in:

1. 81.3 % of its assets in securities of issuers with favourable ESG characteristics;
2. 33.97 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 20.88 % have an environmental objective (which is not aligned with the EU Taxonomy) and 13.09 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 86% of its assets in securities of issuers with favourable ESG characteristics;
2. 35.93% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 16.33% have an environmental objective (which is not aligned with the EU Taxonomy), and 19.59% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	0.89%
Consumer Discretionary	Hotels Restaurants & Leisure	7.51%

Open Ended Fund	Closed Ended Cash Fund	0.36%
Real Estate	Equity - American Drs - Real Est Mgt & Dev - Real	1.23%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.2%
Opex - 0%
Capex - 0%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.2%
Opex - 0%
Capex - 0%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 20.88 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 13.09 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Iberia Fund

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56.95% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 86.39 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 56.95 % of the fund invested in sustainable investments;
- iv) 41.92 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 11.95% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 88.83% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 55.6% of the fund was invested in sustainable investments;
- iv) 32.27% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 16.96% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 56.95 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Iberdrola SA (A)	Utilities	9.35%	ES

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 56.95 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 86.39 % of its assets in securities of issuers with favourable ESG characteristics;
2. 56.95 % in sustainable investments of which 3.08 % have an environmental objective (which is aligned with the EU Taxonomy), 41.92 % have an environmental objective (which is not aligned with the EU Taxonomy) and 11.95 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 88.83% of its assets in securities of issuers with favourable ESG characteristics;
2. 55.6% in sustainable investments of which 6.37% have an environmental objective (which is aligned with the EU Taxonomy), 32.27% have an environmental objective (which is not aligned with the EU Taxonomy), and 16.96% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	4.03%
Consumer Discretionary	Hotels Restaurants & Leisure	8.79%
	Speciality Retail	8%

Open Ended Fund	Closed Ended Cash Fund	1.56%
Real Estate	Equity - Common Stock - Real Estate - Office Reits	1.99%
Utilities	Electric Utilities	11.54%
	Independent Power Producers & Energy Traders	1.96%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 3.08% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

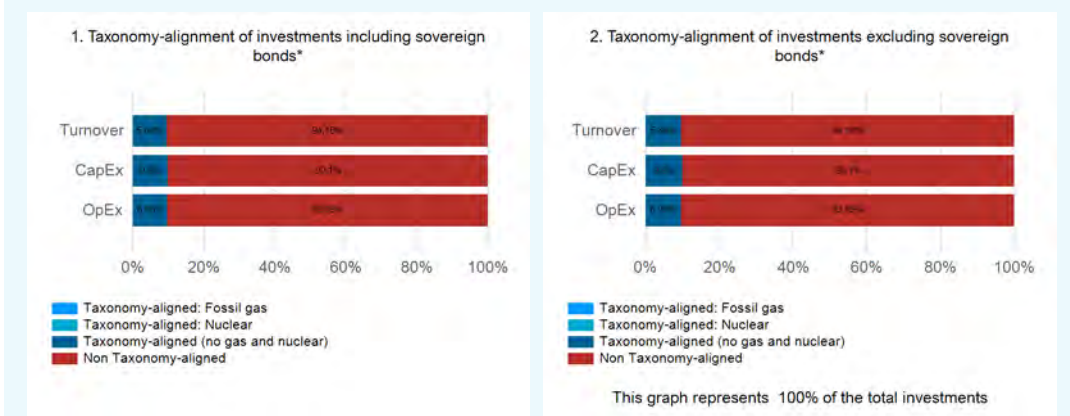

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 3.14%; Transitional Activity: 0.16%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 2%

Opex - 5.3%

Capex - 3.2%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 2%

Opex - 5.3%

Capex - 3.2%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 41.92 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 11.95 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - India Focus Fund

Legal entity identifier:
549300H5IORI7FHCNE34

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 47.84% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 86.59 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 47.84 % of the fund invested in sustainable investments;
- iv) 12.78 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 35.06% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 84.84% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 47% of the fund was invested in sustainable investments;
- iv) 6.73% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 40.26% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 47.84 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 47.84 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 86.59 % of its assets in securities of issuers with favourable ESG characteristics;
2. 47.84 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 12.78 % have an environmental objective (which is not aligned with the EU Taxonomy) and 35.06 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 84.84% of its assets in securities of issuers with favourable ESG characteristics;
2. 47% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 6.73% have an environmental objective (which is not aligned with the EU Taxonomy), and 40.26% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.01%; Transitional Activity: 0.25%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.3%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.3%

Opex - 0%

Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 12.78 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 35.06 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Italy Fund

Legal entity identifier:
549300KCMWWQDPOVF030

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 29.95% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 72.65 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 29.95 % of the fund invested in sustainable investments;
- iv) 15.81 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 9.79% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 78.26% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 28.74% of the fund was invested in sustainable investments;
- iv) 15.01% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 4.36% of the fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy); and
- vi) 9.37% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 29.95 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
UniCredit (A)	Financials	9.69%	IT
Enel (A)	Utilities	9.2%	IT

Banco BPM (A)	Financials	2.39%	IT

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 29.95 % in sustainable investments.

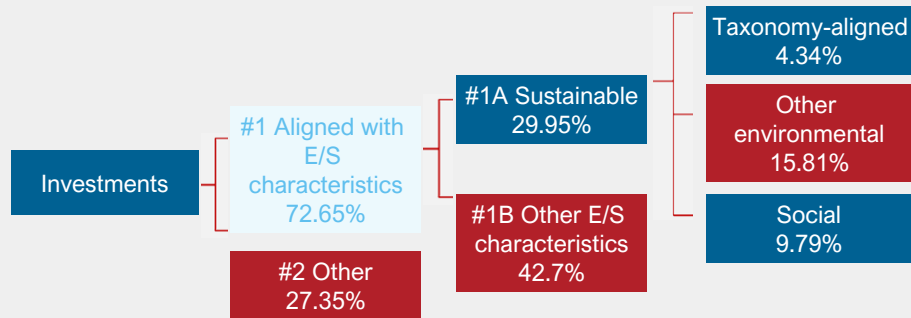

What was the asset allocation?

The fund invested in:

- 72.65 % of its assets in securities of issuers with favourable ESG characteristics;
- 29.95 % in sustainable investments of which 4.34 % have an environmental objective (which is aligned with the EU Taxonomy), 15.81 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.79 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 78.26% of its assets in securities of issuers with favourable ESG characteristics;
- 28.74% in sustainable investments of which 4.36% have an environmental objective (which is aligned with the EU Taxonomy), 15.01% have an environmental objective (which is not aligned with the EU Taxonomy), and 9.37% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 4.34% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

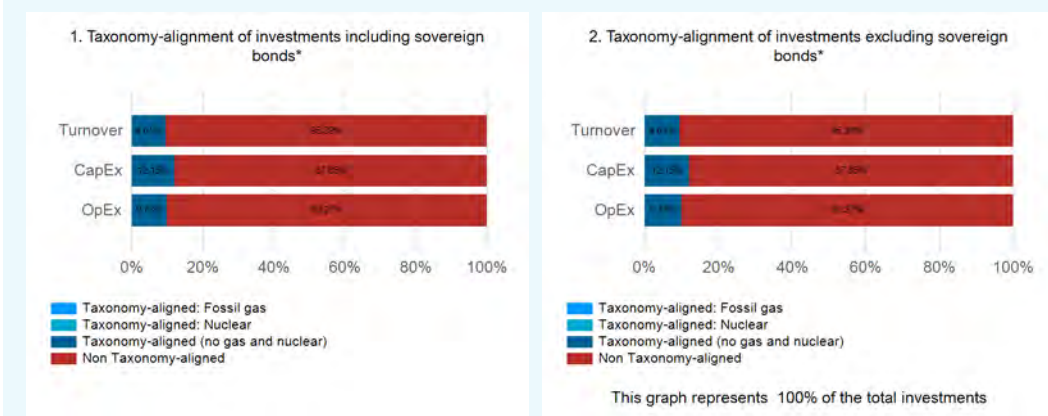

substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.78%; Transitional Activity: 0.04%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 4.5%

Opex - 7.2%

Capex - 10.1%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 4.5%

Opex - 7.2%

Capex - 10.1%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 15.81 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.79 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 23.85% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in August 11, 2023. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 56.6% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 23.85% of the fund invested in sustainable investments;
- iv) 17.87% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 5.98% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 23.85% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 11/08/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Osaka Soda	Materials	5.34%	JP
Mizuho Financial Group	Financials	3.95%	JP

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 23.85 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 56.6 % of its assets in securities of issuers with favourable ESG characteristics;
- 23.85 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 17.87 % have an environmental objective (which is not aligned with the EU Taxonomy) and 5.98 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Media	0.22%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.01%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 17.87 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 5.98 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Japan Value Fund

Legal entity identifier:
549300BQU6C0TTJ53P05

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37.18% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in August 11, 2023. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 80.58% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 37.18% of the fund invested in sustainable investments;
- iv) 28.7% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 8.23% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 37.18% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 11/08/2023-30/04/2024

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

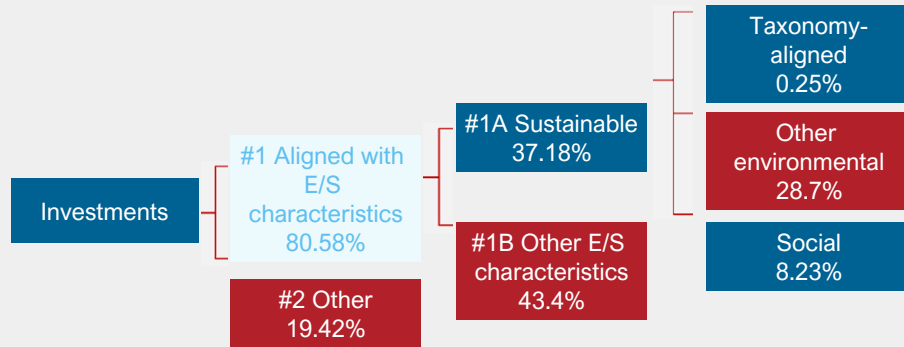

The fund invested 37.18 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 80.58 % of its assets in securities of issuers with favourable ESG characteristics;
- 37.18 % in sustainable investments of which 0.25 % have an environmental objective (which is aligned with the EU Taxonomy), 28.7 % have an environmental objective (which is not aligned with the EU Taxonomy) and 8.23 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.25% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.01%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 28.7 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 8.23 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Nordic Fund

Legal entity identifier:
549300WNSLR4RK6UO898

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 32.76% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 88.59 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 32.76 % of the fund invested in sustainable investments;
- iv) 23.24 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 9.28% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 81.89% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 32.35% of the fund was invested in sustainable investments;
- iv) 18.77% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 13.14% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 32.76 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Stolt-Nielsen	Industrials	5.34%	GB
TORM (A)	Energy	5.09%	GB
Swedbank	Financials	5.07%	SE
Telefonaktiebolaget LM Ericsson (B)	Information Technology	4.27%	SE
Sampo	Financials	3.91%	FI
SUBSea 7 SA (A)	Energy	3.9%	GB
Skandinaviska Enskilda Banken (A)	Financials	3.66%	SE
Okeanis Eco Tankers	Energy	3.52%	GR
Autoliv	Consumer Discretionary	3.04%	SE
BW Energy	Energy	2.76%	SG
Telenor (A)	Communication Services	2.72%	NO
Stora Enso	Materials	2.68%	FI
Securitas (B)	Industrials	2.6%	SE
Storebrand (A)	Financials	2.57%	NO
Norsk Hydro (A)	Materials	2.45%	NO

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 32.76 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 88.59 % of its assets in securities of issuers with favourable ESG characteristics;
2. 32.76 % in sustainable investments of which 0.24 % have an environmental objective (which is aligned with the EU Taxonomy), 23.24 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.28 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 81.89% of its assets in securities of issuers with favourable ESG characteristics;
2. 32.35% in sustainable investments of which 0.44% have an environmental objective (which is aligned with the EU Taxonomy), 18.77% have an environmental objective (which is not aligned with the EU Taxonomy), and 13.14% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	5.29%
	Diversified Telecommunication Services	3.15%
Consumer Discretionary	Auto Components	3.96%
	Speciality Retail	3.96%
	Household Durables	3.41%
	Multiline Retail	2.51%
	Media	1.62%
Consumer Staples	Diversified Consumer Services	0.9%
	Food Products	3.82%
Energy	Beverages	0.69%
	Energy Equipment & Services	6.65%
Financials	Oil, Gas & Consumable Fuels	13.41%
	Insurance	7.18%
	Commercial Banks	6.39%
Industrials	Diversified Financial Services	1.31%
	Marine	5.7%
	Machinery	4.35%
	Commercial Services & Supplies	3.18%
	Building Products	1.11%
	Construction & Engineering	1.02%
Information Technology	Trading Companies & Distributors	0.96%
	Communications Equipment	4.16%
Materials	It Services	1.19%
	Metals & Mining	4.33%
	Copper	2.7%
	Paper & Forest Products	2.7%
Utilities	Chemicals	2.63%
	Electric Utilities	1.58%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.24% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 1.34%; Transitional Activity: 0.61%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 1.8%
 Opex - 2%
 Capex - 3.8%
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 1.8%
 Opex - 2%
 Capex - 3.8%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 23.24 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.28 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Pacific Fund

Legal entity identifier:
549300VW1XD85M3GUB26

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 18.09% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 65.35 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 18.09 % of the fund invested in sustainable investments;
- iv) 8.52 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 9.45% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 61.08% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 20.15% of the fund was invested in sustainable investments;
- iv) 6.22% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 13.9% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 18.09 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
FPT	Information Technology	2.19%	VN
IperionX	Materials	1.48%	AU

PDD Holdings	Consumer Discretionary	1.03%	IE
Fast Food Indonesia	Consumer Discretionary	1.02%	ID
Immutep	Healthcare	0.98%	AU
SK Hynix	Information Technology	0.97%	KR

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 18.09 % in sustainable investments.

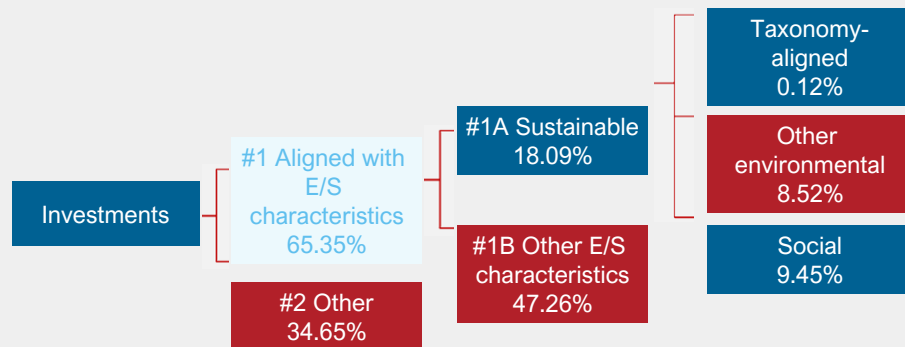

What was the asset allocation?

The fund invested in:

- 65.35 % of its assets in securities of issuers with favourable ESG characteristics;
- 18.09 % in sustainable investments of which 0.12 % have an environmental objective (which is aligned with the EU Taxonomy), 8.52 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.45 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 61.08% of its assets in securities of issuers with favourable ESG characteristics;
- 20.15% in sustainable investments of which 0.03% have an environmental objective (which is aligned with the EU Taxonomy), 6.22% have an environmental objective (which is not aligned with the EU Taxonomy), and 13.9% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.12% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 8.52 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.45 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable All China Equity
Fund

Legal entity identifier:
254900EMLMON5USOI521

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 28.07% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 79.12 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 28.07 % of the fund invested in sustainable investments;
- iv) 12.72 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 15.35% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 84.23% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 29.61% of the fund was invested in sustainable investments;
- iv) 6.34% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 22.75% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 28.07 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 28.07 % in sustainable investments.

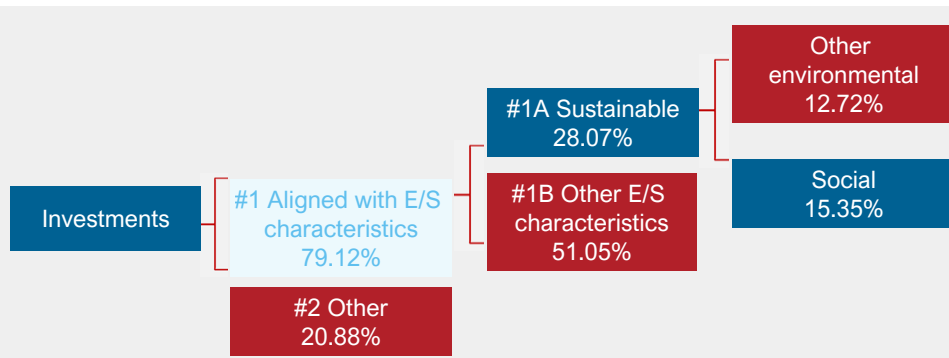

What was the asset allocation?

The fund invested in:

1. 79.12 % of its assets in securities of issuers with favourable ESG characteristics;
2. 28.07 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 12.72 % have an environmental objective (which is not aligned with the EU Taxonomy) and 15.35 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 84.23% of its assets in securities of issuers with favourable ESG characteristics;
2. 29.61% in sustainable investments of which 0.52% have an environmental objective (which is aligned with the EU Taxonomy), 6.34% have an environmental objective (which is not aligned with the EU Taxonomy), and 22.75% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.5%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.5%

Opex - 0%

Capex - 0%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 12.72 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 15.35 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Asia Equity Fund

Legal entity identifier:
549300XNOLBE172DCX03

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 49.77% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 91.92 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 49.77 % of the fund invested in sustainable investments;
- iv) 19.81 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 29.96% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 92.16% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 42.79% of the fund was invested in sustainable investments;
- iv) 12.11% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 30.68% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 49.77 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	9.47%	TW
Samsung Electronics	Information Technology	9.14%	KR
AIA Group	Financials	6.57%	HK
ICICI Bank	Financials	5.72%	IN
Tencent Holdings	Information Technology	4.66%	CN
Axis Bank	Financials	3.2%	IN
CP ALL	Consumer Staples	2.46%	TH
Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	2.38%	IE
Sands China	Consumer Discretionary	2.38%	CN
ANTA Sports Products	Consumer Discretionary	2.22%	CN
China Resources Land	Real Estate	2.04%	HK
Yageo	Information Technology	1.93%	TW
Alibaba Group Holding	Consumer Discretionary	1.89%	CN
Hong Kong Exchanges & Clearing	Financials	1.81%	HK
Thai Beverage	Consumer Staples	1.74%	TH

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 49.77 % in sustainable investments.

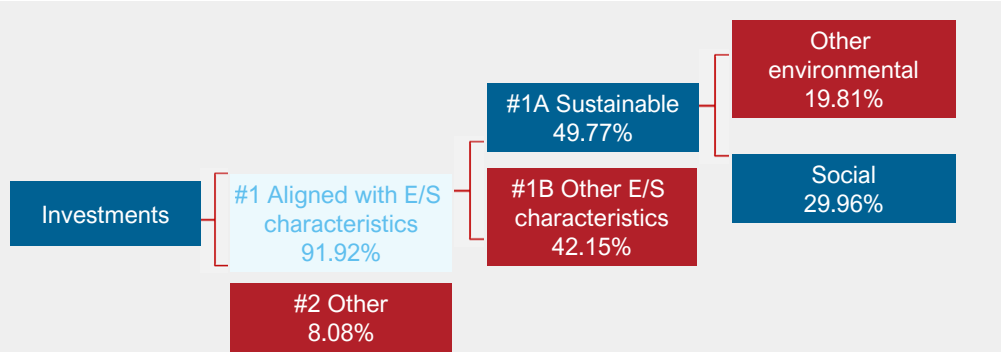

What was the asset allocation?

The fund invested in:

1. 91.92 % of its assets in securities of issuers with favourable ESG characteristics;
2. 49.77 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 19.81 % have an environmental objective (which is not aligned with the EU Taxonomy) and 29.96 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 92.16% of its assets in securities of issuers with favourable ESG characteristics;
2. 42.79% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 12.11% have an environmental objective (which is not aligned with the EU Taxonomy), and 30.68% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.3%
Opex - 0%
Capex - 0%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.3%
Opex - 0%
Capex - 0%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 19.81 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 29.96 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Product name:
Fidelity Funds - Sustainable Asia Equity II Fund

Legal entity identifier:
5493000YTYJ3T5Q1KB02

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 49.55% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 91.02 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 49.55 % of the fund invested in sustainable investments;
- iv) 19.67 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 29.88% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 91.49% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 42.48% of the fund was invested in sustainable investments;
- iv) 12.02% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 30.46% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 49.55 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	9.46%	TW
Samsung Electronics	Information Technology	9.02%	KR
AIA Group	Financials	6.66%	HK
ICICI Bank	Financials	5.74%	IN
Tencent Holdings	Information Technology	4.62%	CN
Axis Bank	Financials	3.2%	IN
Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	2.75%	IE
CP ALL	Consumer Staples	2.38%	TH
Sands China	Consumer Discretionary	2.33%	CN
ANTA Sports Products	Consumer Discretionary	2.23%	CN
China Resources Land	Real Estate	1.97%	HK
Yageo	Information Technology	1.89%	TW
Alibaba Group Holding	Consumer Discretionary	1.78%	CN
Hong Kong Exchanges & Clearing	Financials	1.74%	HK
Infosys	Information Technology	1.72%	IN

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 49.55 % in sustainable investments.

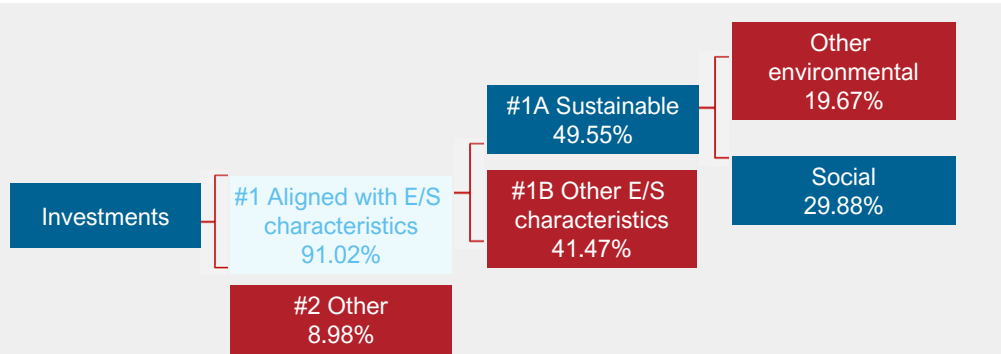

What was the asset allocation?

The fund invested in:

- 91.02 % of its assets in securities of issuers with favourable ESG characteristics;
- 49.55 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 19.67 % have an environmental objective (which is not aligned with the EU Taxonomy) and 29.88 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 91.49% of its assets in securities of issuers with favourable ESG characteristics;
- 42.48% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 12.02% have an environmental objective (which is not aligned with the EU Taxonomy), and 30.46% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	1.31%
Consumer Discretionary	Textiles & Apparel	4.13%

Utilities	Independent Power Producers & Energy Traders	0.2%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of: **-turnover** reflecting the share of revenue from green activities of investee companies. **- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. **- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.3%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.3%

Opex - 0%

Capex - 0%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 19.67 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 29.88 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Asian Focus Fund

Legal entity identifier:
254900ZH0Z8VWSBW0D79

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 31.37% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 66.92%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund aimed to achieve capital growth over the long term by investing in sustainable investments. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue contribute to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
- (c) issuers which have set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which would be considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs. The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet’s oceans and forests. For further details see the UN website . Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained above. The following data is a quarterly average of the month's end day throughout the fund's reporting reference period.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the sustainable investment objective during the period in review was:

- i) 98.29 % of the fund invested in sustainable investments;
- ii) 31.37 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- iii) 66.92 % of the fund invested in sustainable investments with a social objective.
- iv) 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);

The sustainability indicators of the sub-fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

During the prior reference period the performance of the sustainability indicators the fund used to measure the attainment of the sustainable investment was:

- i) 98.61% of the fund invested in sustainable investments;
- ii) 35.37% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- iii) 62.64% of the fund invested in sustainable investments with a social objective; and
- iv) 0% of the fund invested in securities of issuers with exposure to the Exclusions

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do not significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions

and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

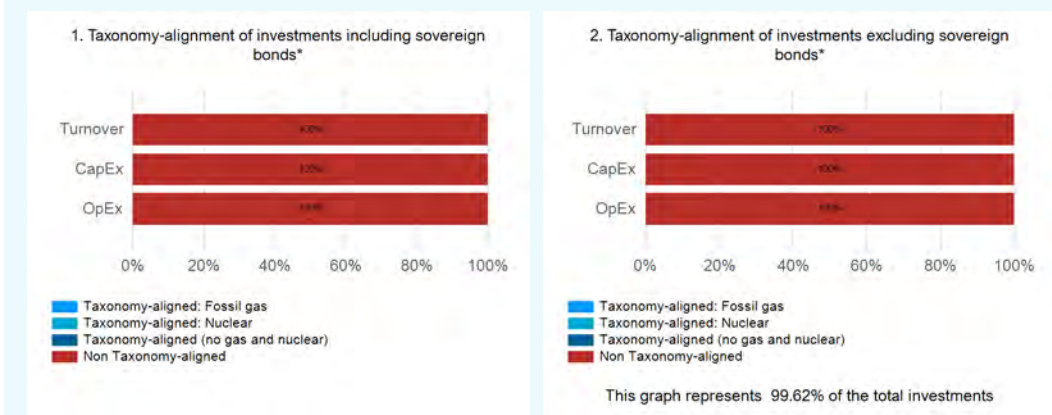

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period the share of the fund made in Enabling Activity was: 0.58%; Transitional Activity was: 0.00%, measured by Turnover.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The fund invested 31.37 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 66.92 % in sustainable investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:

1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

Sustainable investment objective

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 87.17% <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 10.87%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund was uplifted to an Article 9 in August 2023. The fund aimed to achieve capital growth over the long term by investing in sustainable investments. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contribute to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
- (c) issuers which have set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which would be considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs. The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet’s oceans and forests. For further details see the UN website . Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective. Where the fund invested in sustainable investments with environmental objectives, this contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objective. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained

above. The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 98.04 % of the fund invested in sustainable investments;
- ii) 3.02% of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
- iii) 84.15 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- iv) 10.87% of the fund invested in sustainable investments with a social objective.
- v) 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);

The sustainability indicators of the sub-fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The fund was uplifted to an Article 9 fund in August 2023. This question is not applicable as this is the fund's first reporting period.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do not significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 11/08/2023-30/04/2024

Largest investments	Sector	% Assets	Country
SSE	Utilities	4.56%	GB

	Water Utilities	3.1%
	Independent Power Producers & Energy Traders	2.34%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 3.02% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

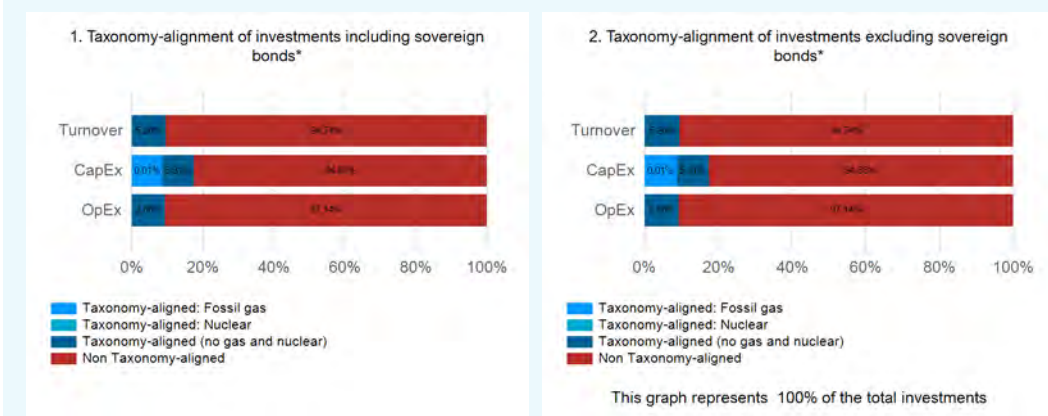

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.57%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund was uplifted to an Article 9 fund in August 2023. This question is not applicable as this is the fund's first reporting period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The fund invested 84.15 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 10.87 % in sustainable investments with a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:

1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial.

How did the reference benchmark differ from a broad market index?

Not Applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not Applicable

How did this financial product perform compared with the reference benchmark?

Not Applicable

How did this financial product perform compared with the broad market index?

Not Applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable China A Shares
Fund

Legal entity identifier:
254900CHVS0V7YXD7E55

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31.85% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 78.39 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 31.85 % of the fund invested in sustainable investments;
- iv) 14.01 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 17.85% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 74.8% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 38.23% of the fund was invested in sustainable investments;
- iv) 11.58% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 0.58% of the fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy); and
- vi) 26.07% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 31.85 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 31.85 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 78.39 % of its assets in securities of issuers with favourable ESG characteristics;
2. 31.85 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 14.01 % have an environmental objective (which is not aligned with the EU Taxonomy) and 17.85 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 74.8% of its assets in securities of issuers with favourable ESG characteristics;
2. 38.23% in sustainable investments of which 0.58% have an environmental objective (which is aligned with the EU Taxonomy), 11.58% have an environmental objective (which is not aligned with the EU Taxonomy), and 26.07% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.4%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.4%

Opex - 0%

Capex - 0%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 14.01 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 17.85 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 68.57% <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 27.28%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund was uplifted to an Article 9 in August 2023. The fund aimed to achieve capital growth over the long term by investing in sustainable investments. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contribute to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
- (c) issuers which have set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which would be considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs. The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet’s oceans and forests. For further details see the UN website . Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective. Where the fund invested in sustainable investments with environmental objectives, this contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objective. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained

above. The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 95.85 % of the fund invested in sustainable investments;
- ii) 3.26% of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
- iii) 65.31 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- iv) 27.28% of the fund invested in sustainable investments with a social objective.
- v) 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);

The sustainability indicators of the sub-fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The fund was uplifted to an Article 9 fund in August 2023. This question is not applicable as this is the fund's first reporting period.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do not significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 11/08/2023-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 3.26% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

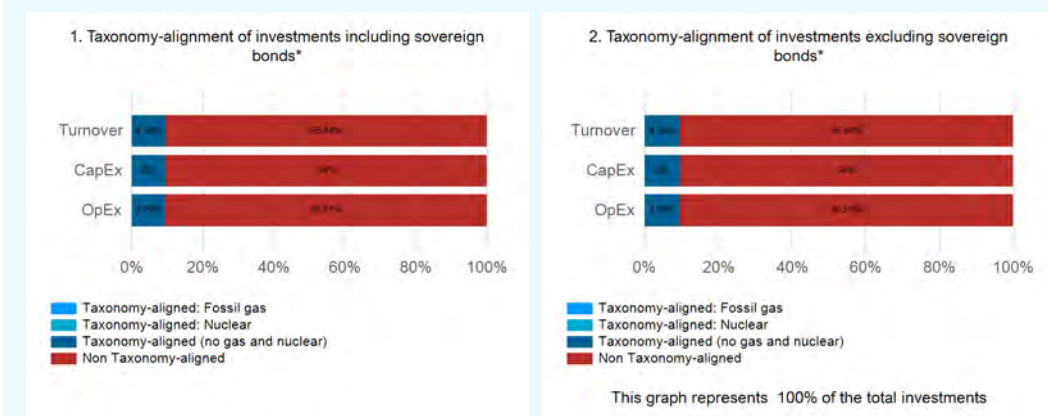

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 3.83%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund was uplifted to an Article 9 fund in August 2023. This question is not applicable as this is the fund's first reporting period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The fund invested 65.31 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 27.28 % in sustainable investments with a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:

1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Consumer Brands
Fund

Legal entity identifier:
549300213EH7YILB9X45

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 69.46% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 91.07 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 69.46 % of the fund invested in sustainable investments;
- iv) 49.34 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 20.12% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 89.48% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 61.72% of the fund was invested in sustainable investment;
- iv) 46.91% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 14.81% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 69.46 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 69.46 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 91.07 % of its assets in securities of issuers with favourable ESG characteristics;
- 69.46 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 49.34 % have an environmental objective (which is not aligned with the EU Taxonomy) and 20.12 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 89.48% of its assets in securities of issuers with favourable ESG characteristics;
- 61.72% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 46.91% have an environmental objective (which is not aligned with the EU Taxonomy), and 14.81% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

emission levels corresponding to the best performance.

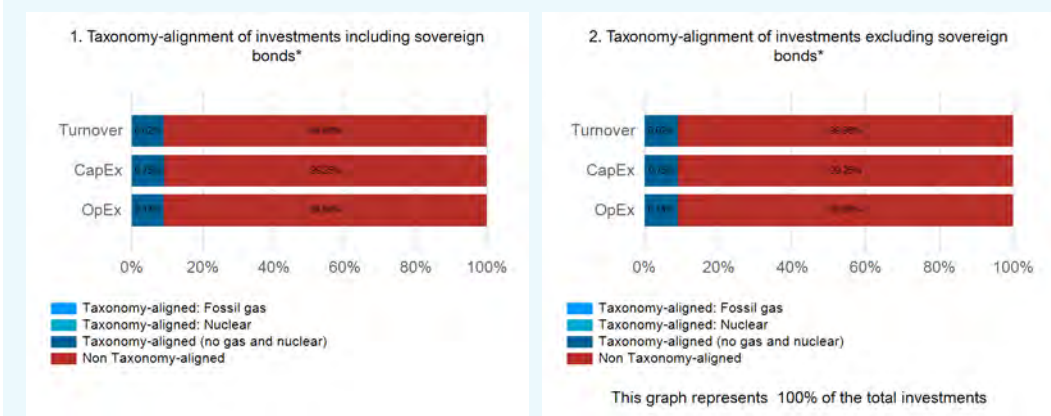

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.02%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0.2%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0.2%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 49.34 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 20.12 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Demographics Fund

Legal entity identifier:
549300RRAN0KBNO4IG54

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 84.32% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 97.03 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 84.32 % of the fund invested in sustainable investments;
- iv) 40.03 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 44.03% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 90.99% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 72.29% of the fund was invested in sustainable investments;
- iv) 30.57% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 40.27% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 84.32 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Microsoft	Information Technology	8.21%	US
Amazon.com	Consumer Discretionary	5.02%	US
LVMH Moet Hennessy Louis Vuitton SE	Consumer Discretionary	3.93%	FR

UnitedHealth Group	Healthcare	2.73%	US
Boston Scientific	Healthcare	2.56%	US
Apple	Information Technology	2.51%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 84.32 % in sustainable investments.

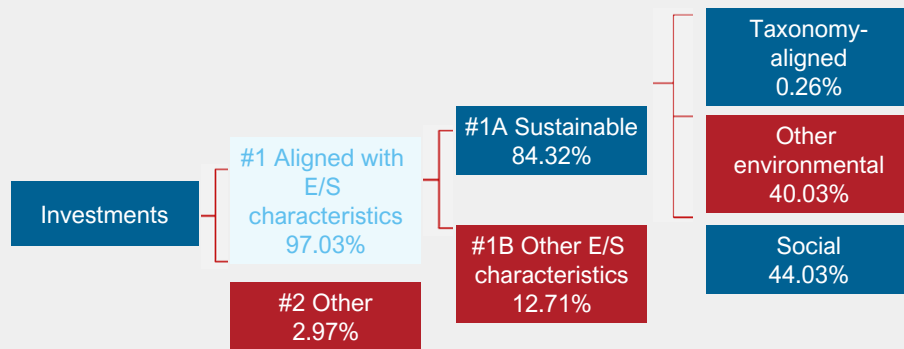

What was the asset allocation?

The fund invested in:

1. 97.03 % of its assets in securities of issuers with favourable ESG characteristics;
2. 84.32 % in sustainable investments of which 0.26 % have an environmental objective (which is aligned with the EU Taxonomy), 40.03 % have an environmental objective (which is not aligned with the EU Taxonomy) and 44.03 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 90.99% of its assets in securities of issuers with favourable ESG characteristics;
2. 72.29% in sustainable investments of which 1.46% have an environmental objective (which is aligned with the EU Taxonomy), 30.57% have an environmental objective (which is not aligned with the EU Taxonomy), and 40.27% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Media	0.68%
Consumer Discretionary	Multiline Retail	5.87%
	Textiles & Apparel	5.79%
	Hotels Restaurants & Leisure	1.46%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.26% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.01%; Transitional Activity: 0.11%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.5%

Opex - 0.6%

Capex - 0.1%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.5%

Opex - 0.6%

Capex - 0.1%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 40.03 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 44.03 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Emerging Markets
Equity Fund

Legal entity identifier:
222100CGA9DFT3O9JH40

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 57.92% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 94.1 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 57.92 % of the fund invested in sustainable investments;
- iv) 27.13 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 30.79% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 90.95% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 47.51% of the fund was invested in sustainable investments;
- iv) 19.19% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 28.32% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 57.92 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	8.4%	TW
HDFC Bank	Financials	4.97%	IN
Samsung Electronics	Information Technology	4.67%	KR
Naspers	Consumer Discretionary	3.96%	ZA
China Mengniu Dairy	Consumer Staples	3.9%	HK
AIA Group	Financials	3.18%	HK
Bank Central Asia	Financials	3.16%	ID
Li Ning	Consumer Discretionary	3.16%	CN
Axis Bank	Financials	3.07%	IN
B3 SA - Brasil Bolsa Balcao (B)	Financials	2.94%	BR
BOC Aviation	Industrials	2.42%	SG
Localiza Rent a Car SA	Industrials	2.42%	BR
Eicher Motors	Consumer Discretionary	2.34%	IN
SK Hynix	Information Technology	2.32%	KR
ICICI Bank ADR	Financials	2.31%	IN

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 57.92 % in sustainable investments.

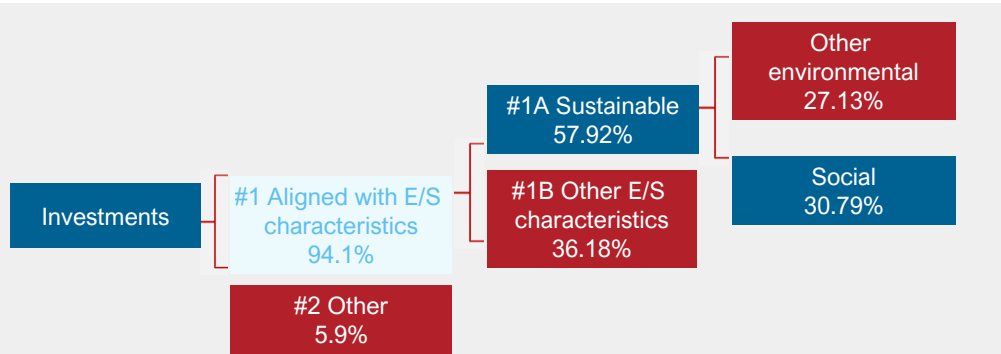

What was the asset allocation?

The fund invested in:

1. 94.1 % of its assets in securities of issuers with favourable ESG characteristics;
2. 57.92 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 27.13 % have an environmental objective (which is not aligned with the EU Taxonomy) and 30.79 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 90.95% of its assets in securities of issuers with favourable ESG characteristics;
2. 47.51% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 19.19% have an environmental objective (which is not aligned with the EU Taxonomy), and 28.32% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Textiles & Apparel	8.83%
	Multiline Retail	6.93%
	Automobiles	4.2%
	Speciality Retail	2.11%
	Media	0.12%
Consumer Staples	Food & Staples Retailing	4.72%
	Food Products	3.65%
Equity Linked Notes	Equity Linked Notes	3.7%
Financials	Diversified Financial Services	5.14%
	Insurance	3.97%

	Semiconductor Equipment & Products	11.18%
	Electronic Equipment Instruments & Components	1.15%
Materials	Metals & Mining	2.99%
	Chemicals	1.86%
	Copper	0.73%
	Construction Materials	0.18%
Open Ended Fund	Closed Ended Cash Fund	0.95%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure**

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure**

(OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.4%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.4%

Opex - 0%

Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 27.13 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 30.79 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Emerging Markets
Ex China Fund

Legal entity identifier:
2549006CNXYVDUHGWH71

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52.94% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 92.82 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 52.94 % of the fund invested in sustainable investments;
- iv) 22.93 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 30.02% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 85.58% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 41.19% of the fund was invested in sustainable investments;
- iv) 19.25% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 21.33% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 52.94 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	8.9%	TW
Samsung Electronics	Information Technology	7.76%	KR

Petroleo Brasileiro SA Perpetual (Pref'd)	Energy	1.83%	BR

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 52.94 % in sustainable investments.

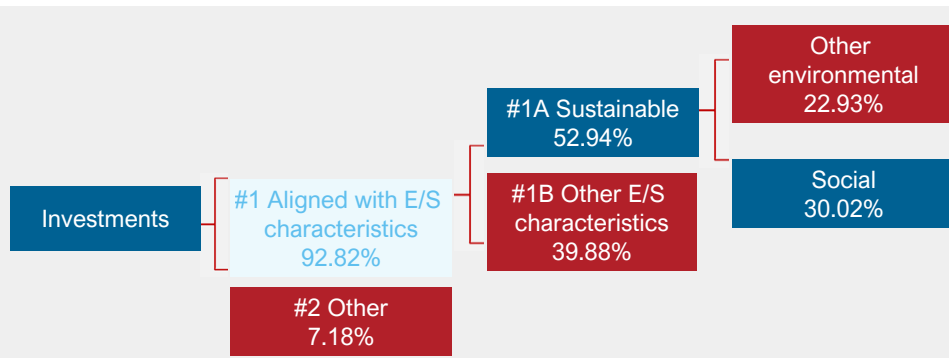

What was the asset allocation?

The fund invested in:

1. 92.82 % of its assets in securities of issuers with favourable ESG characteristics;
2. 52.94 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 22.93 % have an environmental objective (which is not aligned with the EU Taxonomy) and 30.02 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 85.58% of its assets in securities of issuers with favourable ESG characteristics;
2. 41.19% in sustainable investments of which 0.6% have an environmental objective (which is aligned with the EU Taxonomy), 19.25% have an environmental objective (which is not aligned with the EU Taxonomy), and 21.33% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Multiline Retail	1.79%
	Hotels Restaurants & Leisure	1.06%
	Textiles & Apparel	1%
Consumer Staples	Food Products	3.85%
	Food & Staples Retailing	1.58%

	Pharmaceuticals	1.03%
Industrials	Transportation Infrastructure	2.94%
	Road & Rail	2.63%
	Trading Companies & Distributors	1.08%
	Industrial Conglomerates	1.03%
	Airlines	0.7%
Information Technology	Computers & Peripherals	7.3%
	It Services	5.08%
	Semiconductor Equipment & Products	12.44%
	Internet Software & Services	1.38%
Materials	Metals & Mining	3.71%
	Copper	1.59%
	Construction Materials	0.99%
Open Ended Fund	Closed Ended Cash Fund	6.31%
Utilities	Water Utilities	1.75%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
 No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

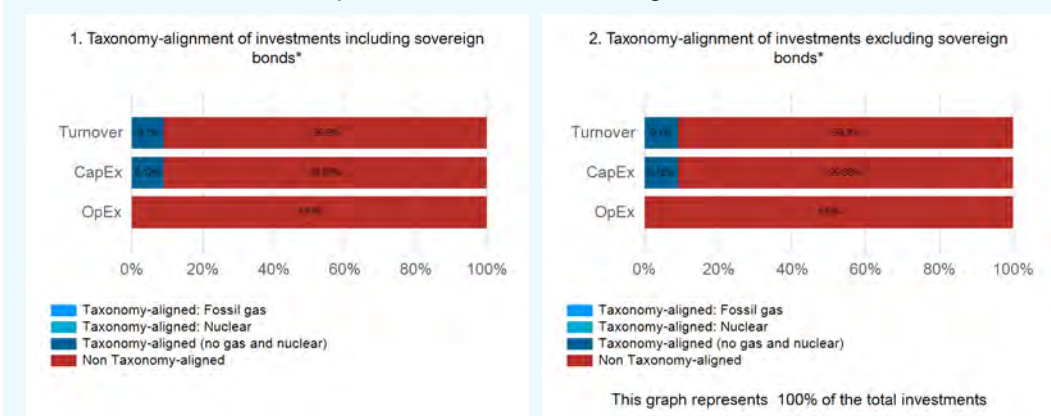

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.6%

Opex - 0%

Capex - 0.1%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.6%

Opex - 0%

Capex - 0.1%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 22.93 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 30.02 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Europe Equity Fund

Legal entity identifier:
549300NM9ZITQTY7GU39

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.15% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 98.98 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 76.15 % of the fund invested in sustainable investments;
- iv) 36.86 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- v) 1.29 % of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
- vi) 38% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 99.92% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 66.77% of the fund was invested in sustainable investments;
- iv) 30.72% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- v) 1.35% of the fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy); and
- vi) 34.70% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 76.15 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Nestle SA	Consumer Staples	5.35%	CH
Roche Holding AG	Healthcare	4.64%	CH
Unilever	Consumer Staples	4.5%	GB
ASML Holding	Information Technology	4.33%	NL
Danone SA	Consumer Staples	4.25%	FR
AstraZeneca	Healthcare	4%	GB
RELX	Industrials	3.9%	GB
AXA SA (A)	Financials	3.62%	FR
BNP Paribas SA	Financials	3.4%	FR
LVMH Moet Hennessy Louis Vuitton SE	Consumer Discretionary	3.25%	FR
ING Groep	Financials	3.09%	NL
SAP SE	Information Technology	3.04%	DE
Cie de Saint-Gobain	Industrials	2.88%	FR
Air Liquide SA (A)	Materials	2.74%	FR
AIB Group	Financials	2.5%	IE

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 76.15 % in sustainable investments.

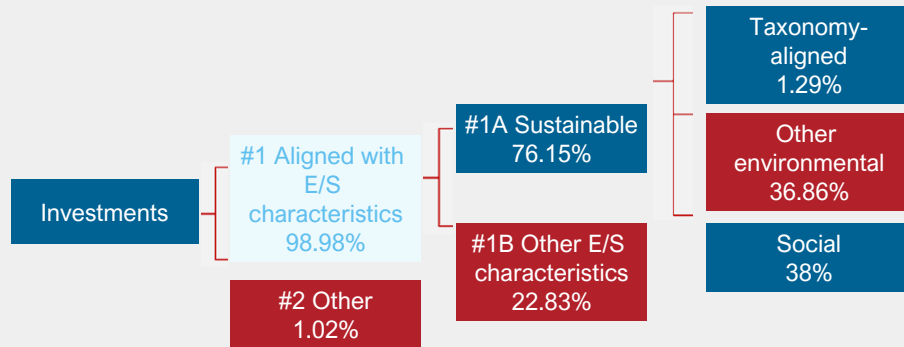

What was the asset allocation?

The fund invested in:

1. 98.98 % of its assets in securities of issuers with favourable ESG characteristics;
2. 76.15 % in sustainable investments of which 1.29 % have an environmental objective (which is aligned with the EU Taxonomy), 36.86 % have an environmental objective (which is not aligned with the EU Taxonomy) and 38 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 99.92% of its assets in securities of issuers with favourable ESG characteristics;
2. 66.77% in sustainable investments of which 1.35% have an environmental objective (which is aligned with the EU Taxonomy), 30.72% have an environmental objective (which is not aligned with the EU Taxonomy), and 34.7% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	1.65%
Consumer Discretionary	Textiles & Apparel	4.01%
	Speciality Retail	1.47%
	Hotels Restaurants & Leisure	0.96%
Consumer Staples	Food Products	6.9%
	Personal Products	4.48%
Energy	Oil, Gas & Consumable Fuels	4.18%
Financials	Commercial Banks	9.84%
	Insurance	5.98%
	Diversified Financial Services	1.53%

	Paper & Forest Products	1.88%
Open Ended Fund	Closed Ended Cash Fund	2.82%
Real Estate	Equity - Common Stock - Real Est Mgt & Dev - Real	0.79%
Utilities	Electric Utilities	4.22%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.29% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.81%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.1%

Opex - 1.7%

Capex - 2.7%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.1%

Opex - 1.7%

Capex - 2.7%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 36.86 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 38 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable European Smaller
Companies Fund

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 39.16% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 89.01 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 39.16 % of the fund invested in sustainable investments;
- iv) 21.69 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 15.98% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 85.87% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 36.92% of the fund was invested in sustainable investments;
- iv) 17.24% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 17.66% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 39.16 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Fidelity Institutional Liquidity Fund - A-ACC-EUR	Open Ended Fund	3.64%	IE
Oakley Capital Investments	Closed Ended Fund	2.01%	BM
VZ Holding AG	Financials	1.92%	CH
Premier Foods	Consumer Staples	1.67%	GB
ASR Nederland	Financials	1.57%	NL
Cs Group	Consumer Discretionary	1.55%	GB
IPSOS	Consumer Discretionary	1.51%	FR
GN Store Nord AS	Consumer Discretionary	1.5%	DK
Balfour Beatty	Industrials	1.5%	GB
Bankinter SA (A)	Financials	1.5%	ES
Intermediate Capital Group	Financials	1.41%	GB
Elopak (A)	Materials	1.37%	NO
JTC	Financials	1.35%	GB
IG Group Holdings	Financials	1.34%	GB
Rexel SA (A)	Industrials	1.34%	FR

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 39.16 % in sustainable investments.

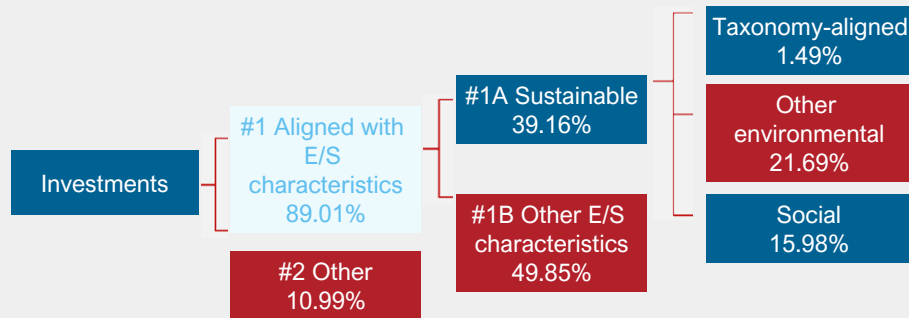

What was the asset allocation?

The fund invested in:

1. 89.01 % of its assets in securities of issuers with favourable ESG characteristics;
2. 39.16 % in sustainable investments of which 1.49 % have an environmental objective (which is aligned with the EU Taxonomy), 21.69 % have an environmental objective (which is not aligned with the EU Taxonomy) and 15.98 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 85.87% of its assets in securities of issuers with favourable ESG characteristics;
2. 36.92% in sustainable investments of which 2.02% have an environmental objective (which is aligned with the EU Taxonomy), 17.24% have an environmental objective (which is not aligned with the EU Taxonomy), and 17.66% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

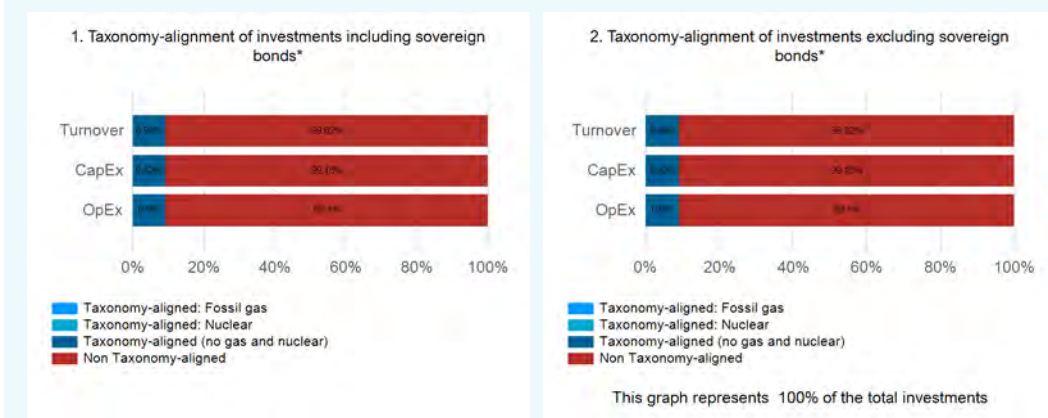

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.49% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.97%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.6%

Opex - 1%

Capex - 0.7%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.6%

Opex - 1%

Capex - 0.7%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 21.69 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 15.98 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Eurozone Equity Fund

Legal entity identifier:
549300BAPCX6D0E0Z219

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 57.82% <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 41.05%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund was uplifted to an Article 9 in August 2023. The fund aimed to achieve capital growth over the long term by investing in sustainable investments. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contribute to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
- (c) issuers which have set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which would be considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs. The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet’s oceans and forests. For further details see the UN website . Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective. Where the fund invested in sustainable investments with environmental objectives, this contributed towards the climate change mitigation environmental EU Taxonomy objective. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained above. The following data

is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 98.87 % of the fund invested in sustainable investments;
- ii) 4.26% of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
- iii) 53.56 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- iv) 41.05% of the fund invested in sustainable investments with a social objective.
- v) 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);

The sustainability indicators of the sub-fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The fund was uplifted to an Article 9 fund in August 2023. This question is not applicable as this is the fund's first reporting period.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do not significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNG), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 11/08/2023-30/04/2024

Largest investments	Sector	% Assets	Country
ASML Holding	Information Technology	7.97%	NL

	Electric Utilities	1.47%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 4.26% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

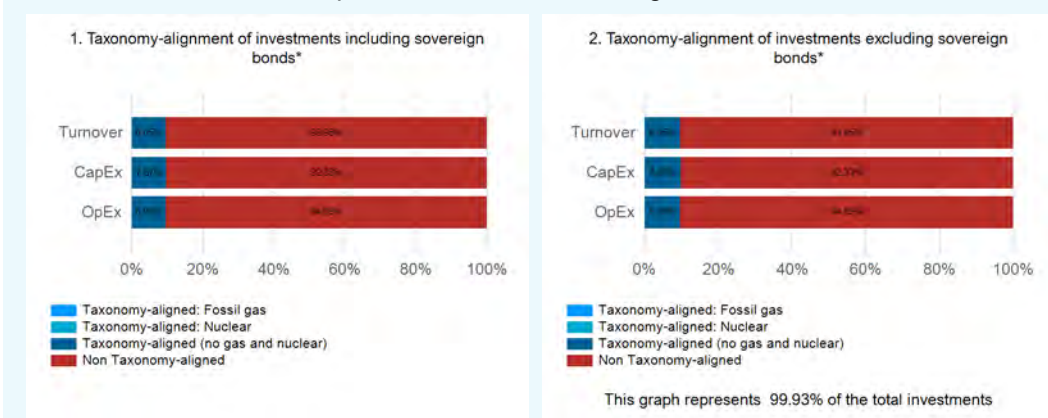

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 4.08%; Transitional Activity: 0.11%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund was uplifted to an Article 9 fund in August 2023. This question is not applicable as this is the fund's first reporting period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The fund invested 53.56 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 41.05 % in sustainable investments with a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:

1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62.49% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 94.04 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 62.49 % of the fund invested in sustainable investments;
- iv) 50.62 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 11.22% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 92.65% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 46.55% of the fund was invested in sustainable investments;
- iv) 31.4% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 14.95% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 62.49 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Salesforce	Information Technology	3.09%	US
Alphabet	Information Technology	3.08%	US
Electronic Arts	Consumer Discretionary	3.06%	US
T-Mobile US	Communication Services	3.04%	US
SAP SE	Information Technology	3%	DE
Autodesk	Information Technology	2.98%	US
Amazon.com	Consumer Discretionary	2.89%	US
Accenture (A)	Information Technology	2.88%	IE
NXP Semiconductors	Information Technology	2.86%	NL
Amadeus IT Group SA (A)	Consumer Discretionary	2.75%	ES
Sony Group	Consumer Discretionary	2.73%	JP
Motorola Solutions	Information Technology	2.68%	US
Samsung Electronics	Information Technology	2.58%	KR
PTC	Information Technology	2.55%	US
QUALCOMM	Information Technology	2.37%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 62.49 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 94.04 % of its assets in securities of issuers with favourable ESG characteristics;
2. 62.49 % in sustainable investments of which 0.65 % have an environmental objective (which is aligned with the EU Taxonomy), 50.62 % have an environmental objective (which is not aligned with the EU Taxonomy) and 11.22 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 92.65% of its assets in securities of issuers with favourable ESG characteristics;
2. 46.55% in sustainable investments of which 0.2% have an environmental objective (which is aligned with the EU Taxonomy), 31.4% have an environmental objective (which is not aligned with the EU Taxonomy), and 14.95% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	3.63%
	Media	1.53%
Consumer Discretionary	Multiline Retail	7.14%
	Media	5.38%
	Hotels Restaurants & Leisure	2.95%
	Household Durables	1.1%
Financials	Diversified Financial Services	1.73%
Healthcare	Health Care Technology	1.43%
Industrials	Professional Services	5.19%
Information Technology	Communications Equipment	7.31%
	Internet Software & Services	5.88%
	Computers & Peripherals	5.08%
	It Services	3.16%
	Software	26.7%
	Semiconductor Equipment & Products	20.98%
	Electronic Equipment Instruments & Components	0.61%
Open Ended Fund	Closed Ended Cash Fund	0.39%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.65% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

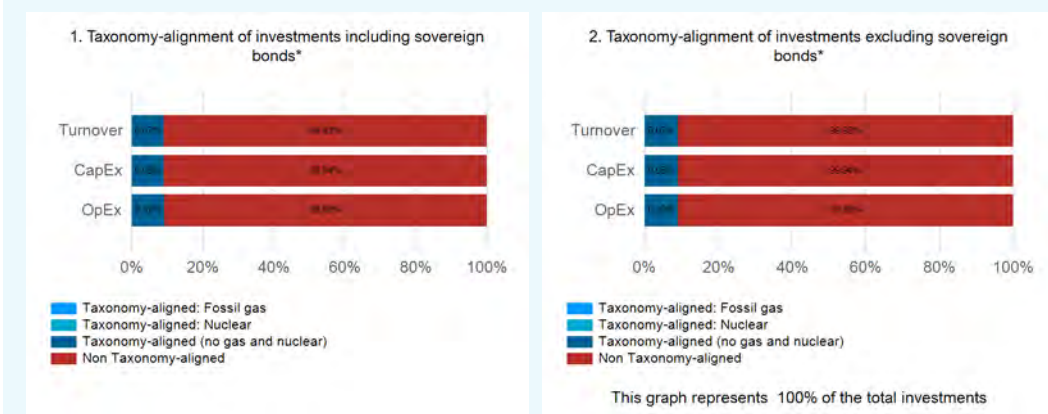

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.07%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 0.4%
 Opex - 1.1%
 Capex - 0.3%
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 0.4%
 Opex - 1.1%
 Capex - 0.3%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 50.62 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 11.22 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Global Equity Fund

Legal entity identifier:
254900R7XPBV37D85Z68

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 41.07% <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 55.85%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund aimed to achieve capital growth over the long term by investing in sustainable investments. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contribute to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
- (c) issuers which have set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which would be considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs. The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet’s oceans and forests. For further details see the UN website . Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective. Where the fund invested in sustainable investments with environmental objectives, this contributed towards the climate change mitigation environmental EU Taxonomy objective. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained above. The following data is a quarterly average of the month's end day throughout the fund's reporting reference period.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 96.92 % the percentage of the fund invested in sustainable investments;
- ii) 39.48 % the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy;
- iii) 55.85% the percentage of the fund invested in sustainable investments with a social objective; and
- iv) 0% the percentage of the fund with exposure to investments that undertake activities that are excluded in accordance with the Exclusions.

The sustainability indicators of the sub-fund were not subject to an assurance by auditors or a review by third parties

... and compared to previous periods?

During the prior reference period the performance of the sustainability indicators the fund used to measure the attainment of the sustainable investment was:

- i) 97.87% of the fund invested in sustainable investments;
- ii) 38.75% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- iii) 54.5% of the fund invested in sustainable investments with a social objective; and
- iv) 0% of the fund invested in securities of issuers with exposure to the Exclusions

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do not significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.59% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

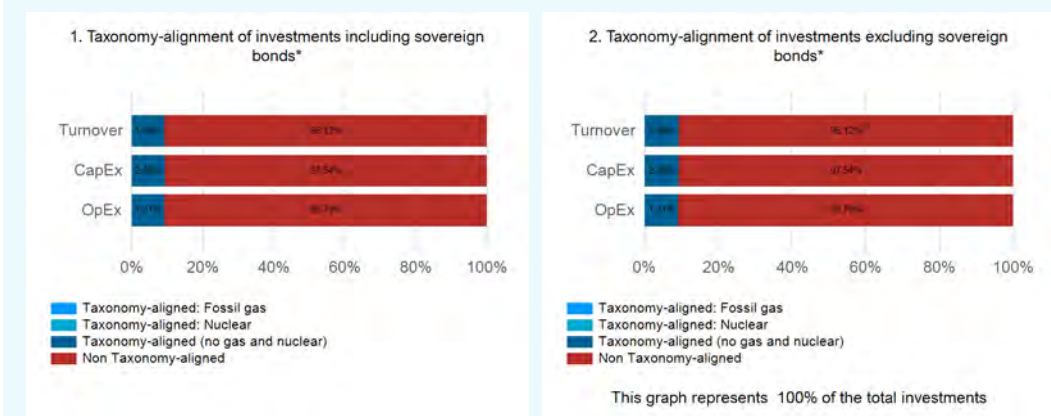

- Yes
 In fossil gas
 In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.81%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period the share of the fund made in Enabling Activity was: 2.05%; Transitional Activity was: 0.01%, measured by Turnover.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The fund invested 39.48 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 55.85 % in sustainable investments with a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:

1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

An Index has not been designated as a reference benchmark to determine whether this financial.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Healthcare Fund

Legal entity identifier:
549300Z8HWYC400QA29

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 95.26% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 97.58 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 95.26 % of the fund invested in sustainable investments;
- iv) 94.7% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 95.26 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
UnitedHealth Group	Healthcare	9.04%	US
Thermo Fisher Scientific	Healthcare	5.7%	US
Novo Nordisk (B)	Healthcare	5.57%	DK
Roche Holding AG	Healthcare	5.55%	CH
Stryker	Healthcare	4.61%	US
AstraZeneca	Healthcare	4.36%	GB
Eli Lilly &	Healthcare	4.25%	US
Boston Scientific	Healthcare	4.06%	US
ICON	Healthcare	3.96%	IE
Elevance Health	Healthcare	3.8%	US
AbbVie	Healthcare	3.46%	US
HCA HealthCARE	Healthcare	3.23%	US
Sonova Holding AG	Healthcare	2.55%	CH
Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	2.53%	IE
Regeneron Pharmaceuticals	Healthcare	2.45%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 95.26 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 97.58 % of its assets in securities of issuers with favourable ESG characteristics;
- 95.26 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 0.56 % have an environmental objective (which is not aligned with the EU Taxonomy) and 94.7 % have a social objective.

The Asset allocation for the prior reference period was not applicable as this is the first reporting period for the Fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Household Durables	0.83%
Consumer Staples	Personal Products	1.52%
Healthcare	Biotechnology	6.86%
	Pharmaceuticals	28.07%
	Health Care Equipment & Supplies	26.04%
	Health Care Providers & Services	20.96%
	Life Sciences Tools & Services	14.99%
Open Ended Fund	Closed Ended Cash Fund	1.22%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 0.56 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 94.7 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Japan Equity Fund

Legal entity identifier:
549300CGT4V2XYYG0Y90

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56.44% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 92.79 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 56.44 % of the fund invested in sustainable investments;
- iv) 33.21 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 22.82% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 89.13% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 54.97% of the fund was invested in sustainable investments;
- iv) 27.60% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 27.26% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 56.44 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 56.44 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 92.79 % of its assets in securities of issuers with favourable ESG characteristics;
2. 56.44 % in sustainable investments of which 0.41 % have an environmental objective (which is aligned with the EU Taxonomy), 33.21 % have an environmental objective (which is not aligned with the EU Taxonomy) and 22.82 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 89.13% of its assets in securities of issuers with favourable ESG characteristics;
2. 54.97% in sustainable investments of which 0.12% have an environmental objective (which is aligned with the EU Taxonomy), 27.6% have an environmental objective (which is not aligned with the EU Taxonomy), and 27.26% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	1.72%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.41% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure**

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.09%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.1%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.1%

Opex - 0%

Capex - 0%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 33.21 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 22.82 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable US Equity Fund

Legal entity identifier:
549300J1XTC50ZY0Z742

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 31.39% <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 65.91%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund was uplifted to an Article 9 in August 2023. The fund aimed to achieve capital growth over the long term by investing in sustainable investments. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contribute to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
- (c) issuers which have set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which would be considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs. The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet’s oceans and forests. For further details see the UN website . Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective. Where the fund invested in sustainable investments with environmental objectives, this contributed towards the climate change mitigation environmental EU Taxonomy objective. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained above. The following data

is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 97.3 % the percentage of the fund invested in sustainable investments;
- ii) 30.58 % the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy;
- iii) 65.91% the percentage of the fund invested in sustainable investments with a social objective; and
- iv) 0% the percentage of the fund with exposure to investments that undertake activities that are excluded in accordance with the Exclusions.

The sustainability indicators of the sub-fund were not subject to an assurance by auditors or a review by third parties

... and compared to previous periods?

The fund was uplifted to an Article 9 fund in August 2023. This question is not applicable as this is the fund's first reporting period.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do not significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNG), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 11/08/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Microsoft	Information Technology	8.33%	US

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.81% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

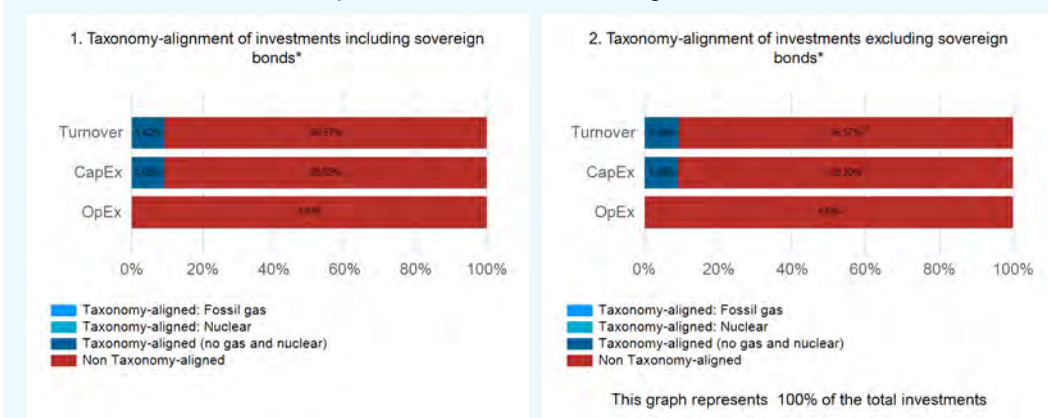

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.91%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund was uplifted to an Article 9 fund in August 2023. This question is not applicable as this is the fund's first reporting period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The fund invested 30.58 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 65.91 % in sustainable investments with a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:

1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

An Index has not been designated as a reference benchmark to determine whether this financial.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Water & Waste Fund

Legal entity identifier:
254900IZ985QWGMGJH651

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 63.93% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 94.16 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 63.93 % of the fund invested in sustainable investments;
- iv) 39.65 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- v) 4.68 % of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
- vi) 19.6% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 88.67% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 57.24% of the fund was invested in sustainable investments;
- iv) 32.05% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- v) 4.65% of the fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy); and
- vi) 20.54% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 63.93 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Service Corp International/US	Consumer Discretionary	5.09%	US
STERIS	Healthcare	4.88%	US
Tetra Tech	Industrials	4.49%	US
Xylem NY	Industrials	4.16%	US
Arcadis	Industrials	4.15%	NL
Severn Trent	Utilities	3.89%	GB
Veolia Environnement SA	Utilities	3.74%	FR
Waste Management	Industrials	3.74%	US
American Water Works	Utilities	3.52%	US
Cia de Saneamento Basico do Estado de Sao Paulo SABESP	Utilities	3.32%	BR
Ebara	Industrials	3.21%	JP
Entegris	Information Technology	3.08%	US
Crown Holdings	Materials	3.05%	US
Horiba	Information Technology	2.88%	JP
Kurita Water Industries	Industrials	2.68%	JP

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 63.93 % in sustainable investments.

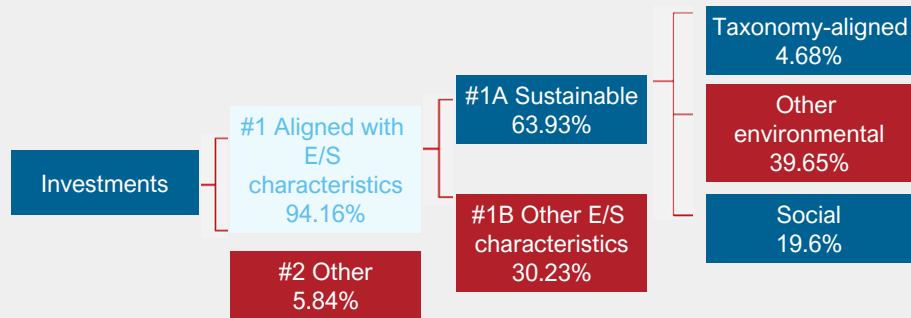

What was the asset allocation?

The fund invested in:

1. 94.16 % of its assets in securities of issuers with favourable ESG characteristics;
2. 63.93 % in sustainable investments of which 4.68 % have an environmental objective (which is aligned with the EU Taxonomy), 39.65 % have an environmental objective (which is not aligned with the EU Taxonomy) and 19.6 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 88.67% of its assets in securities of issuers with favourable ESG characteristics;
2. 57.24% in sustainable investments of which 4.65% have an environmental objective (which is aligned with the EU Taxonomy), 32.05% have an environmental objective (which is not aligned with the EU Taxonomy), and 20.54% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Diversified Consumer Services	5.73%
	Household Durables	0.72%
	Distributors	0.56%
	Multiline Retail	0.52%
	Hotels Restaurants & Leisure	0.16%
Healthcare	Health Care Equipment & Supplies	3.92%
Industrials	Building Products	5.06%
	Professional Services	4.66%
	Machinery	22.02%
	Trading Companies & Distributors	2.64%
	Commercial Services & Supplies	14.16%
	Industrial Conglomerates	1.46%
Information Technology	Electronic Equipment Instruments & Components	5.05%
	Semiconductor Equipment & Products	3.67%
	Software	1.73%
Materials	Containers & Packaging	7.98%
	Chemicals	1.91%
	Metals & Mining	0.38%
Open Ended Fund	Closed Ended Cash Fund	1.99%
Utilities	Multi-Utilities	3.48%
	Water Utilities	11.8%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 4.68% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.70%; Transitional Activity: 0.20%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 4.1%

Opex - 0.6%

Capex - 0.4%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 4.1%

Opex - 0.6%

Capex - 0.4%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 39.65 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 19.6 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics: 1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Switzerland Fund

Legal entity identifier:
5493001N8Q97TPZUYT12

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 63.94% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 94.41 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 63.94 % of the fund invested in sustainable investments;
- iv) 23.68 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 40.14% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 92.27% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 66.47% of the fund was invested in sustainable investments;
- iv) 21.98% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 43.61% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 63.94 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Nestle SA	Consumer Staples	9.29%	CH
Novartis AG	Healthcare	6.35%	CH
Roche Holding AG	Healthcare	6.12%	CH
Partners Group Holding AG	Financials	5.72%	CH
Zurich Insurance Group AG	Financials	5.36%	CH
Givaudan SA	Materials	4.7%	CH
Sika AG	Materials	4.53%	CH
Swiss Re AG	Financials	4.05%	CH

Alcon	Healthcare	3.43%	CH
Aryzta AG	Consumer Staples	3.43%	CH
ABB	Industrials	3.28%	CH
DKSH Holding AG	Industrials	3.26%	CH
Tecan Group AG	Healthcare	3.03%	CH

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 63.94 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 94.41 % of its assets in securities of issuers with favourable ESG characteristics;
2. 63.94 % in sustainable investments of which 0.12 % have an environmental objective (which is aligned with the EU Taxonomy), 23.68 % have an environmental objective (which is not aligned with the EU Taxonomy) and 40.14 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 92,27% of its assets in securities of issuers with favourable ESG characteristics;
2. 66.47% in sustainable investments of which 0.87% have an environmental objective (which is aligned with the EU Taxonomy), 21.98% have an environmental objective (which is not aligned with the EU Taxonomy), and 43.61% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Textiles & Apparel	3.01%
	Speciality Retail	1.69%
Consumer Staples	Food Products	12.3%
Financials	Diversified Financial Services	8.38%
	Capital Markets	4.13%
	Insurance	10.05%
Healthcare	Life Sciences Tools & Services	6.02%
	Health Care Equipment & Supplies	5.4%
	Pharmaceuticals	15.12%
	Health Care Technology	0.72%
Industrials	Machinery	4.66%
	Trading Companies & Distributors	4.18%
	Electrical Equipment	3.95%
	Building Products	2.29%
Information Technology	Electronic Equipment Instruments & Components	1.29%
	Semiconductor Equipment & Products	0.76%
Materials	Containers & Packaging	3.61%
	Chemicals	10.87%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.12% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

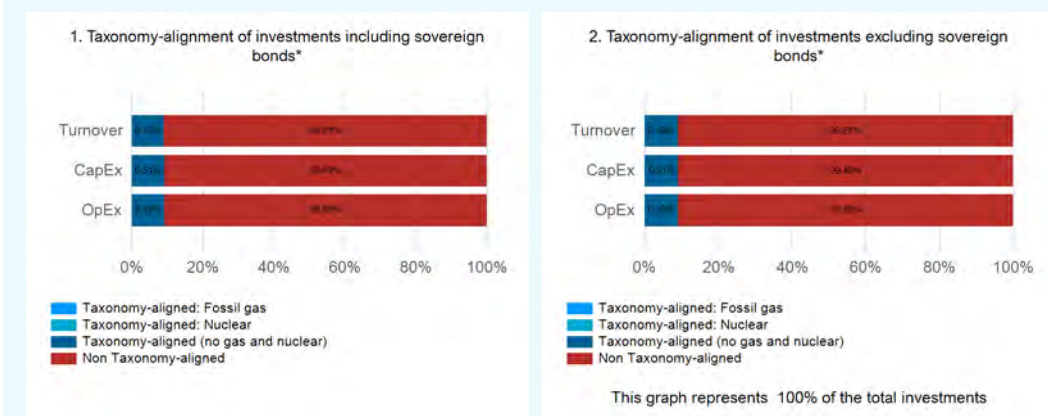

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.19%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 0.1%
 Opex - 0.3%
 Capex - 0.6%
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 0.1%
 Opex - 0.3%
 Capex - 0.6%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 23.68 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 40.14 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 19.94% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in August 11, 2023. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 83.99% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 19.94% of the fund invested in sustainable investments;
- iv) 1.09% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 18.85% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 19.94% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 11/08/2023-30/04/2024

Largest investments	Sector	% Assets	Country
CP ALL (F)	Consumer Staples	8.52%	TH
PTT (F)	Energy	6.59%	TH
Airports of Thailand (F)	Industrials	6.01%	TH
Bangkok Bank (F)	Financials	5.66%	TH
Advanced Info Service (F)	Communication Services	5.02%	TH
Kasikornbank (F)	Financials	4.76%	TH
Bangkok Dusit Medical Services (F)	Healthcare	4.74%	TH
PTT Exploration & Production (F)	Energy	4.45%	TH

Minor International (F)	Consumer Discretionary	1.88%	TH

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

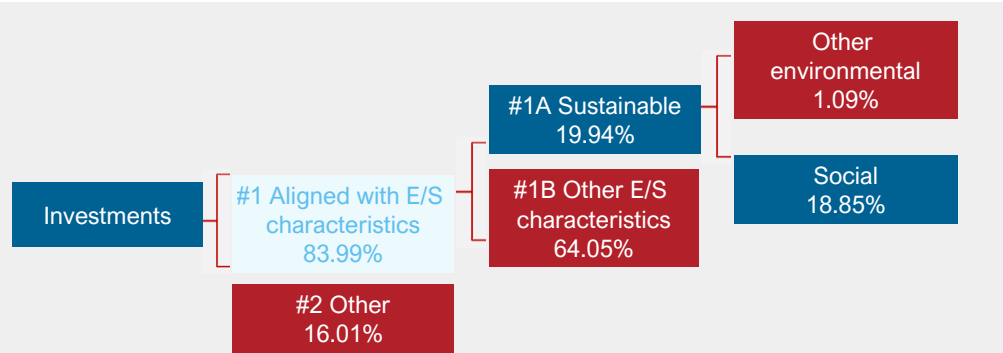

The fund invested 19.94 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 83.99 % of its assets in securities of issuers with favourable ESG characteristics;
2. 19.94 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 1.09 % have an environmental objective (which is not aligned with the EU Taxonomy) and 18.85 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	3.18%
	Diversified Telecommunication Services	2.48%
Consumer Discretionary	Hotels Restaurants & Leisure	4.29%
	Speciality Retail	2.39%
	Textiles & Apparel	1.91%
	Auto Components	1.53%
	Media	0.5%
Consumer Staples	Food & Staples Retailing	9.16%
	Beverages	3.34%
	Food Products	1.69%

Real Estate	Equity - Common Stock - Real Est Mgt & Dev - Real	4.9%
	Equity - Common Stock - Real Estate - Hotel & Reso	0.65%
Utilities	Independent Power Producers & Energy Traders	4.01%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

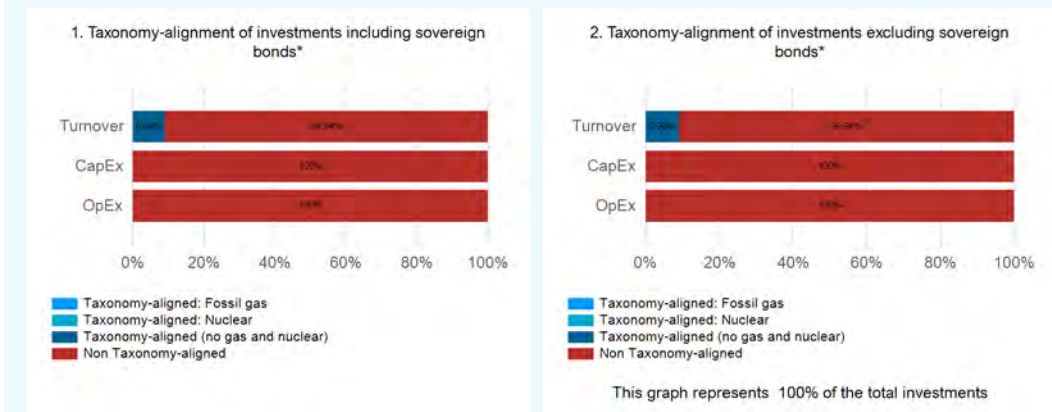

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 1.09 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 18.85 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - World Fund

Legal entity identifier:
5493001CZJQXQY9N2O82

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 67.32% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 92.59 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 67.32 % of the fund invested in sustainable investments;
- iv) 33.79 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 32.35% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 92.74% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 60.97% of the fund was invested in sustainable investments;
- iv) 28.22% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 31.7% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 67.32 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Microsoft	Information Technology	5.98%	US
Alphabet (A)	Information Technology	3.53%	US
Amazon.com	Consumer Discretionary	3.04%	US
JPMorgan Chase &	Financials	2.32%	US
UnitedHealth Group	Healthcare	2.24%	US

Baker Hughes	Energy	1.58%	US
Cigna Group	Healthcare	1.57%	US
Canadian Pacific Kansas City	Industrials	1.54%	CA
Quanta Services	Industrials	1.49%	US
Oracle	Information Technology	1.43%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 67.32 % in sustainable investments.

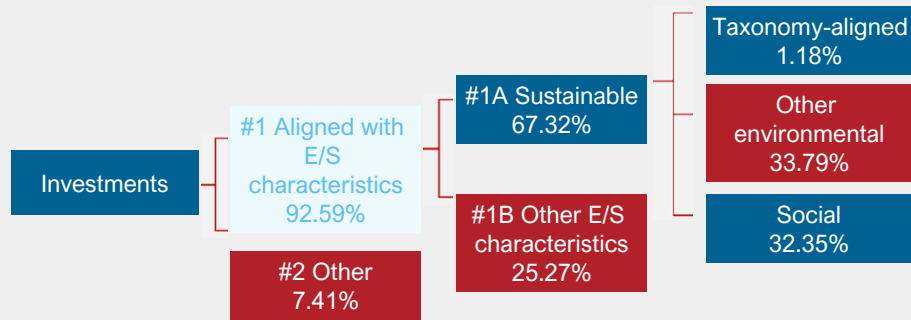

What was the asset allocation?

The fund invested in:

1. 92.59 % of its assets in securities of issuers with favourable ESG characteristics;
2. 67.32 % in sustainable investments of which 1.18 % have an environmental objective (which is aligned with the EU Taxonomy), 33.79 % have an environmental objective (which is not aligned with the EU Taxonomy) and 32.35 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 92.74% of its assets in securities of issuers with favourable ESG characteristics;
2. 60.97% in sustainable investments of which 1.06% have an environmental objective (which is aligned with the EU Taxonomy), 28.22% have an environmental objective (which is not aligned with the EU Taxonomy), and 31.7% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The fund invested 1.18% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.45%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.3%

Opex - 2.1%

Capex - 3%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.3%

Opex - 2.1%

Capex - 3%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 33.79 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 32.35 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Asia Pacific Dividend Fund

Legal entity identifier:
5493007QY2WD5KHRUI41

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 40.08% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) the 92.62 % percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
 - ii) in respect of its direct investments in corporate issuers, 0% the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
 - iii) the 40.08 % percentage of the fund invested in sustainable investments;
 - iv) the 23.49 % percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
 - v) 16.59% the percentage of the fund invested in sustainable investments with a social objective.
- The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 90.33% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 34.78% of the fund was invested in sustainable investments;
- iv) 20.87% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 13.91% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 40.08 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	6.07%	TW

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 40.08 % in sustainable investments.

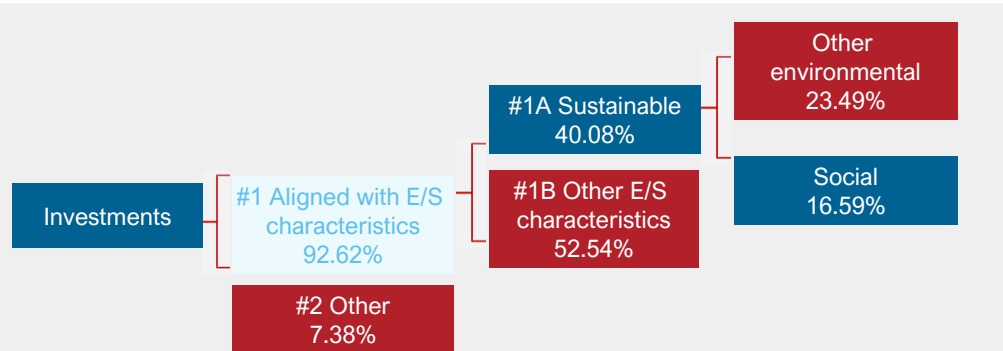

What was the asset allocation?

The fund invested in:

1. 92.62 % of its assets in securities of issuers with favourable ESG characteristics;
2. 40.08 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 23.49 % have an environmental objective (which is not aligned with the EU Taxonomy) and 16.59 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 90.33% of its assets in securities of issuers with favourable ESG characteristics;
2. 34.78% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 20.87% have an environmental objective (which is not aligned with the EU Taxonomy), and 13.91% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.11%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 23.49 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 16.59 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 78.36% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 95.04 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 78.36 % of the fund invested in sustainable investments;
- iv) 41.12 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 34.99% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 96.43% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 72.26% of the fund was invested in sustainable investments;
- iv) 29.39% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 40.65% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 78.36 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Ferrovial SE	Industrials	4.94%	NL
Allianz	Financials	4.58%	DE
3i Group	Financials	4.44%	GB
Hannover Rueck SE	Financials	3.18%	DE
RELX	Industrials	3.13%	GB
Industria de Diseno Textil SA	Consumer Discretionary	3.1%	ES
Deutsche Boerse AG	Financials	3.05%	DE
Sanofi	Healthcare	2.94%	FR

Admiral Group	Financials	2.63%	GB
Roche Holding AG (B)	Healthcare	2.5%	CH
Unilever	Consumer Staples	2.47%	GB
Autoliv	Consumer Discretionary	2.47%	SE

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 78.36 % in sustainable investments.

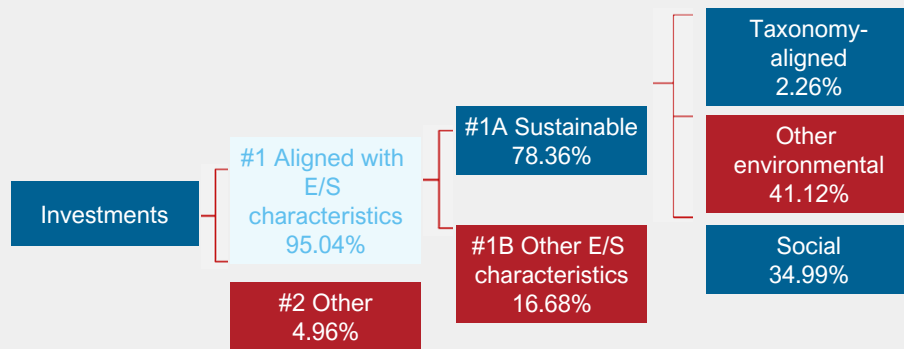

What was the asset allocation?

The fund invested in:

1. 95.04 % of its assets in securities of issuers with favourable ESG characteristics;
2. 78.36 % in sustainable investments of which 2.26 % have an environmental objective (which is aligned with the EU Taxonomy), 41.12 % have an environmental objective (which is not aligned with the EU Taxonomy) and 34.99 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 96.43% of its assets in securities of issuers with favourable ESG characteristics;
2. 72.26% in sustainable investments of which 2.22% have an environmental objective (which is aligned with the EU Taxonomy), 29.39% have an environmental objective (which is not aligned with the EU Taxonomy), and 40.65% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	5.96%
Consumer Discretionary	Speciality Retail	3.59%
	Auto Components	2.21%
	Media	2.05%
	Household Durables	1.09%
Consumer Staples	Food & Staples Retailing	3.92%
	Personal Products	2.73%
	Household Products	2.2%
	Food Products	1.58%
Energy	Oil, Gas & Consumable Fuels	3.86%

	Containers & Packaging	1.91%
Open Ended Fund	Closed Ended Cash Fund	2.19%
Utilities	Electric Utilities	4.45%
	Multi-Utilities	1.02%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.26% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.63%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 2.2%

Opex - 3.1%

Capex - 4.3%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 2.2%

Opex - 3.1%

Capex - 4.3%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 41.12 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 34.99 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Global Dividend Fund

Legal entity identifier:
549300TOZX7F2KZW XK25

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 74.13% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 96.94 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 74.13 % of the fund invested in sustainable investments;
- iv) 38.02 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 33.54% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 94.28% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 63.49 % of the fund was invested in sustainable investments;
- iv) 22.93% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 36.26% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 74.13 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
RELX	Industrials	4.65%	GB

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 74.13 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 96.94 % of its assets in securities of issuers with favourable ESG characteristics;
2. 74.13 % in sustainable investments of which 2.57 % have an environmental objective (which is aligned with the EU Taxonomy), 38.02 % have an environmental objective (which is not aligned with the EU Taxonomy) and 33.54 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 94.28% of its assets in securities of issuers with favourable ESG characteristics;
2. 63.49% in sustainable investments of which 4.29% have an environmental objective (which is aligned with the EU Taxonomy), 22.93% have an environmental objective (which is not aligned with the EU Taxonomy), and 36.26% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	1.04%
Consumer Discretionary	Media	3.37%

Open Ended Fund	Closed Ended Cash Fund	2.3%
Utilities	Electric Utilities	3.02%
	Multi-Utilities	2.98%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.57% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.84%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 2.6%

Opex - 2.8%

Capex - 3.3%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 2.6%

Opex - 2.8%

Capex - 3.3%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 38.02 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 33.54 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Global Equity Income Fund

Legal entity identifier:
549300NJ0LHMXL00MG36

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62.6% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 96.03 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 62.6 % of the fund invested in sustainable investments;
- iv) 31.86 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 29.38% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 95.17% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 56.16% of the fund was invested in sustainable investments;
- iv) 18.01% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 35.66% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 62.6 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Progressive	Financials	6.03%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 62.6 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 96.03 % of its assets in securities of issuers with favourable ESG characteristics;
2. 62.6 % in sustainable investments of which 1.37 % have an environmental objective (which is aligned with the EU Taxonomy), 31.86 % have an environmental objective (which is not aligned with the EU Taxonomy) and 29.38 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 95.17% of its assets in securities of issuers with favourable ESG characteristics;
2. 56.16% in sustainable investments of which 2.49% have an environmental objective (which is aligned with the EU Taxonomy), 18.01% have an environmental objective (which is not aligned with the EU Taxonomy), and 35.66% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	2.02%
Consumer Discretionary	Media	3.43%
	Speciality Retail	2.44%
	Auto Components	2.17%
Consumer Staples	Personal Products	3.86%

	It Services	0.9%
Materials	Chemicals	5.16%
Open Ended Fund	Closed Ended Cash Fund	2.84%
Utilities	Electric Utilities	4.34%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.37% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

among others have greenhouse gas emission levels corresponding to the best performance.

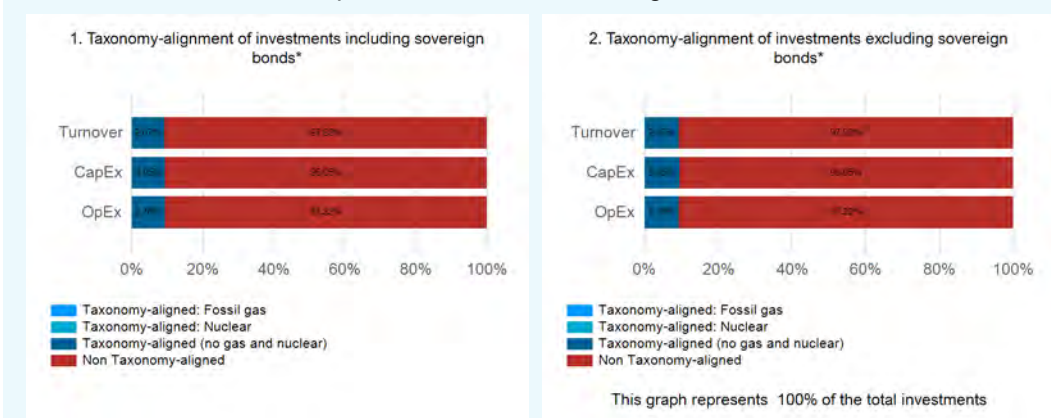

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 1.59%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 0.9%
 Opex - 0.5%
 Capex - 0.9%
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 0.9%
 Opex - 0.5%
 Capex - 0.9%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 31.86 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 29.38 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable European Dividend Plus Fund

Legal entity identifier:
254900G129G6M801BZ71

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 77.86% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 81.36 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 77.86 % of the fund invested in sustainable investments;
- iv) 39.94 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 35.51% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 85.55% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 72.83% of the fund was invested in sustainable investments;
- iv) 29.73% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 40.85% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 77.86 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
3i Group	Financials	5.08%	GB
Allianz	Financials	5.02%	DE
Ferrovial SE	Industrials	4.58%	NL

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 77.86 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 81.36 % of its assets in securities of issuers with favourable ESG characteristics;
2. 77.86 % in sustainable investments of which 2.41 % have an environmental objective (which is aligned with the EU Taxonomy), 39.94 % have an environmental objective (which is not aligned with the EU Taxonomy) and 35.51 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 85.55% of its assets in securities of issuers with favourable ESG characteristics;
2. 72.83% in sustainable investments of which 2.26% have an environmental objective (which is aligned with the EU Taxonomy), 29.73% have an environmental objective (which is not aligned with the EU Taxonomy), and 40.85% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	5.59%

Open Ended Fund	Closed Ended Cash Fund	4.89%
Utilities	Electric Utilities	6.78%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.41% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.37%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 2.2%

Opex - 3.3%

Capex - 4.9%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 2.2%

Opex - 3.3%

Capex - 4.9%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 39.94 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 35.51 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Global Dividend Plus
Fund

Legal entity identifier:
549300OZL7XSDZJCL571

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 73.43% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 82.32 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 73.43 % of the fund invested in sustainable investments;
- iv) 42 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 29.7% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 85.1% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 65.31% of the fund was invested in sustainable investments; and
- iv) 27.33% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 35.91% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 73.43 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
3i Group	Financials	3.82%	GB
Taiwan Semiconductor Manufacturing	Information Technology	3.33%	TW

UPM-Kymmene	Materials	2.49%	FI
Autoliv	Consumer Discretionary	2.4%	SE

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 73.43 % in sustainable investments.

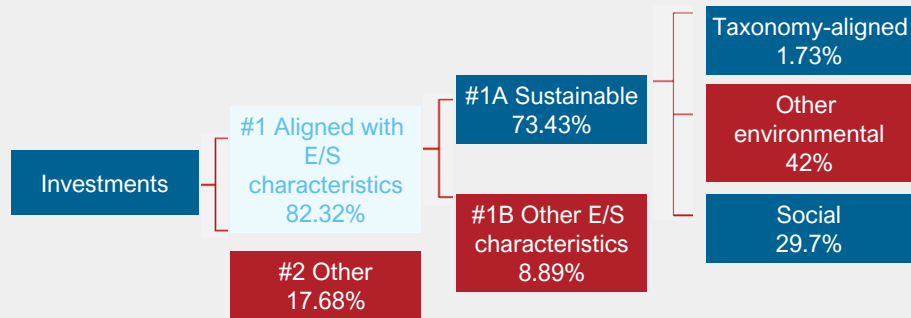

What was the asset allocation?

The fund invested in:

1. 82.32 % of its assets in securities of issuers with favourable ESG characteristics;
2. 73.43 % in sustainable investments of which 1.73 % have an environmental objective (which is aligned with the EU Taxonomy), 42 % have an environmental objective (which is not aligned with the EU Taxonomy) and 29.7 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 85.1% of its assets in securities of issuers with favourable ESG characteristics;
2. 65.31% in sustainable investments of which 2.08% have an environmental objective (which is aligned with the EU Taxonomy), 27.33% have an environmental objective (which is not aligned with the EU Taxonomy), and 35.91% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	5.62%

	Containers & Packaging	1.86%
Open Ended Fund	Closed Ended Cash Fund	2.04%
Utilities	Electric Utilities	5.16%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.73% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 1.78%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.6%

Opex - 2.4%

Capex - 3.5%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.6%

Opex - 2.4%

Capex - 3.5%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 42 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 29.7 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Global Equity
Income Fund

Legal entity identifier:
549300ZTEIN9RSGX1S04

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 66.59% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the sub-fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 96.78 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 66.59 % of the fund invested in sustainable investments;
- iv) 32 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 34.07% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 93.93% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 57.25% of the fund was invested in sustainable investments;
- iv) 18.54% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 36.54% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 66.59 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Progressive	Financials	6.42%	US
RELX	Industrials	5.15%	GB

Sanofi	Healthcare	3.2%	FR
Taiwan Semiconductor Manufacturing ADR	Information Technology	3.02%	TW

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 66.59 % in sustainable investments.

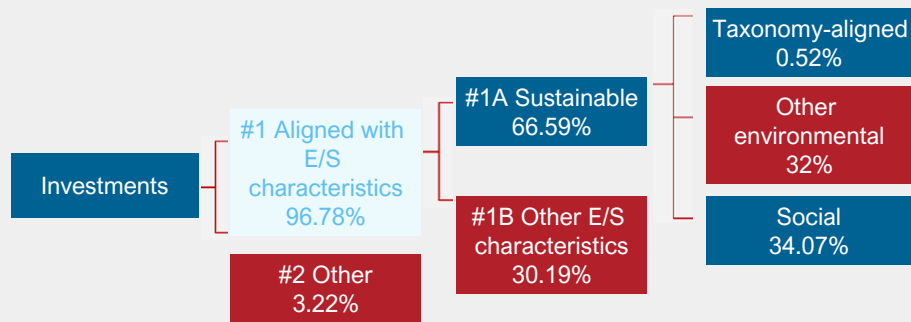

What was the asset allocation?

The fund invested in:

1. 96.78 % of its assets in securities of issuers with favourable ESG characteristics;
2. 66.59 % in sustainable investments of which 0.52 % have an environmental objective (which is aligned with the EU Taxonomy), 32 % have an environmental objective (which is not aligned with the EU Taxonomy) and 34.07 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 93.93% of its assets in securities of issuers with favourable ESG characteristics;
2. 57.25% in sustainable investments of which 2.17% have an environmental objective (which is aligned with the EU Taxonomy), 18.54% have an environmental objective (which is not aligned with the EU Taxonomy), and 36.54% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	2.2%
Consumer Discretionary	Media	2.52%
	Speciality Retail	2.43%
	Auto Components	2.34%
Consumer Staples	Personal Products	4.57%

Industrials	Professional Services	9.45%
	Trading Companies & Distributors	4.93%
	Electrical Equipment	3.18%
	Construction & Engineering	2.2%
	Machinery	1.26%
Information Technology	Semiconductor Equipment & Products	5.67%
	Communications Equipment	2.84%
	It Services	0.89%
Materials	Chemicals	5.67%
Open Ended Fund	Closed Ended Cash Fund	2.39%
Utilities	Electric Utilities	3.52%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.52% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

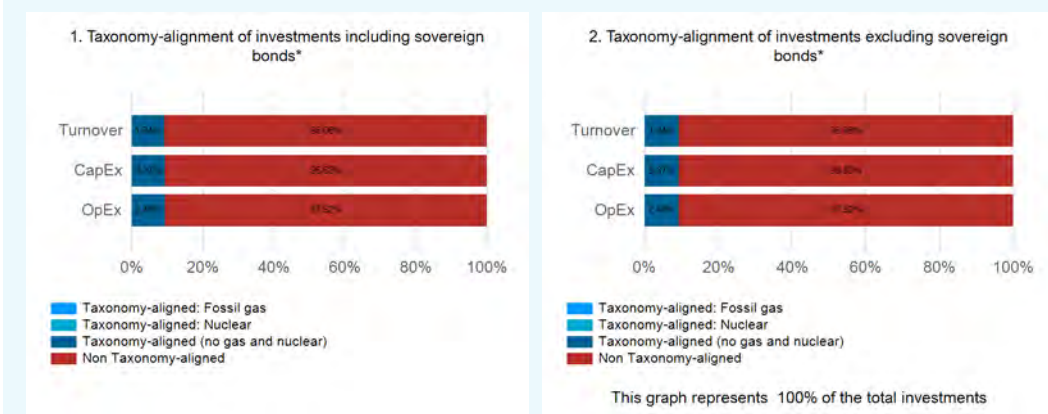

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 1.47%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.1%

Opex - 0.2%

Capex - 0.4%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.1%

Opex - 0.2%

Capex - 0.4%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 32 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 34.07 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - European Multi Asset Income Fund

Legal entity identifier:
549300P3VQEECSQRUQ90

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 27.7% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 78.13 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 27.7 % of the fund invested in sustainable investments;
- iv) 15.24 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 9.94% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 71.75% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 18.9 % of the fund was invested in sustainable investments;
- iv) 9.19% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 8.78% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 27.7 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country

PIMCO GIS Capital Securities Fund	Open Ended Fund	0.55%	IE

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 27.7 % in sustainable investments.

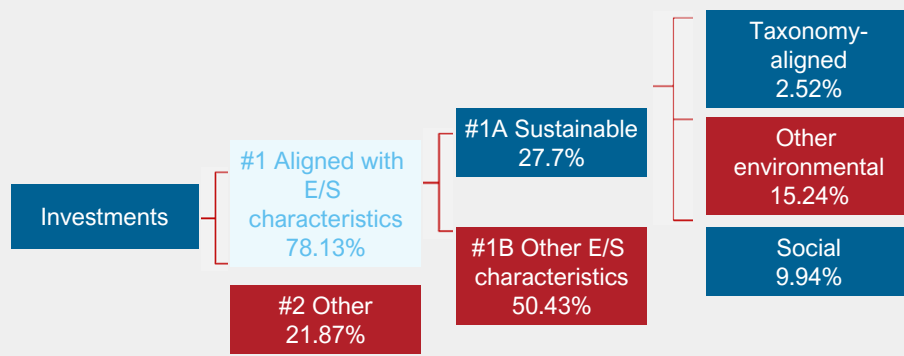

What was the asset allocation?

The fund invested in:

1. 78.13 % of its assets in securities of issuers with favourable ESG characteristics;
2. 27.7 % in sustainable investments of which 2.52 % have an environmental objective (which is aligned with the EU Taxonomy), 15.24 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.94 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 71.75% of its assets in securities of issuers with favourable ESG characteristics;
2. 18.9% in sustainable investments of which 0.92% have an environmental objective (which is aligned with the EU Taxonomy), 9.19% have an environmental objective (which is not aligned with the EU Taxonomy), and 8.78% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data

limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.52% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

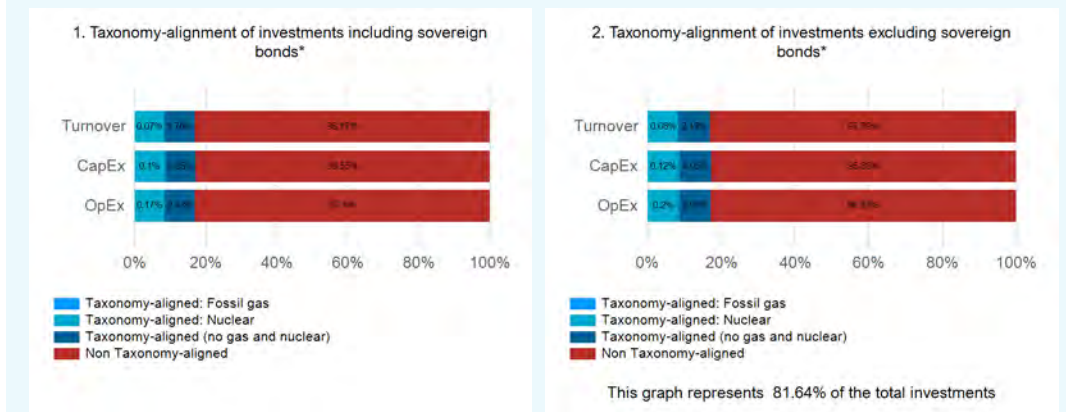

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 1.24%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 3.9%
 Opex - 4.6%
 Capex - 6.3%
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 4.5%
 Opex - 5.4%
 Capex - 7.4%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 15.24 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.94 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Global Multi Asset Income Fund

Legal entity identifier:
549300ISMCTFO21OMK36

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 22.42% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 78.23 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 22.42 % of the fund invested in sustainable investments;
- iv) 11.42 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 8.95% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 74.76% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 17.35% of the fund was invested in sustainable investments;
- iv) 7.26% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 9.3% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 22.42 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 22.42 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 78.23 % of its assets in securities of issuers with favourable ESG characteristics;
- 22.42 % in sustainable investments of which 2.05 % have an environmental objective (which is aligned with the EU Taxonomy), 11.42 % have an environmental objective (which is not aligned with the EU Taxonomy) and 8.95 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 74.76% of its assets in securities of issuers with favourable ESG characteristics;
- 17.35% in sustainable investments of which 1.48% have an environmental objective (which is aligned with the EU Taxonomy), 7.26% have an environmental objective (which is not aligned with the EU Taxonomy), and 9.3% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.05% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 11.42 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 8.95 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Multi Asset Dynamic Inflation Fund

Legal entity identifier:
549300U9M1GS5XNJ0154

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 11.25% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in September 9, 2023. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 67.08% the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework; and
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 11.25% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or

(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or

(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet’s oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity’s existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a ‘Very Severe’ controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be ‘sustainable investments’ unless Fidelity’s fundamental research determined that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity’s voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund’s quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 06/09/2023-30/04/2024

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund invested 11.25 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 67.08 % of its assets in securities of issuers with favourable ESG characteristics;
- 11.25 % in sustainable investments of which 2.11 % have an environmental objective (which is aligned with the EU Taxonomy), 5.18 % have an environmental objective (which is not aligned with the EU Taxonomy) and 3.96 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.11% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.

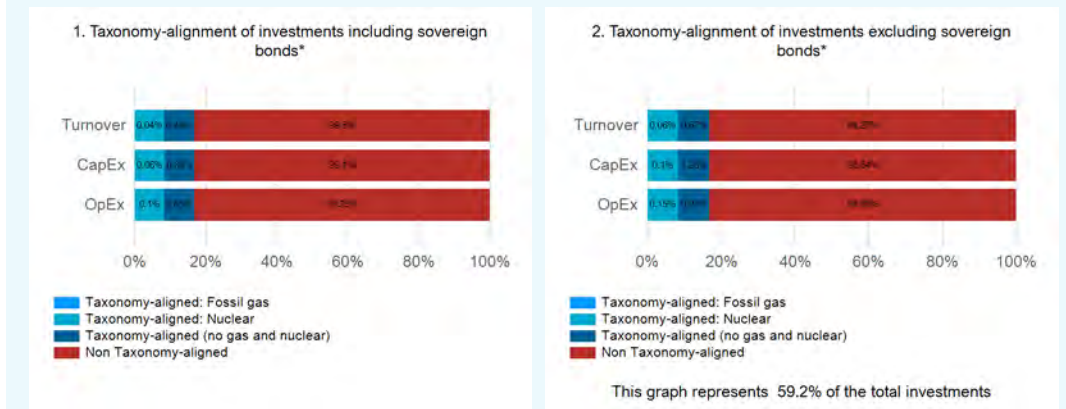

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.30%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 5.18 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 3.96 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Multi Asset Income
Fund

Legal entity identifier:
549300GG6X1NDTLYIF66

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 29.39% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 81.78 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 29.39 % of the fund invested in sustainable investments;
- iv) 15.53 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 11.7% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 81.17% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 23.71% of the fund was invested in sustainable investments;
- iv) 11.55% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 10.68% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 29.39 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 29.39 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 81.78 % of its assets in securities of issuers with favourable ESG characteristics;
- 29.39 % in sustainable investments of which 2.16 % have an environmental objective (which is aligned with the EU Taxonomy), 15.53 % have an environmental objective (which is not aligned with the EU Taxonomy) and 11.7 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 81.17% of its assets in securities of issuers with favourable ESG characteristics;
- 23.71% in sustainable investments of which 0.79% have an environmental objective (which is aligned with the EU Taxonomy), 11.55% have an environmental objective (which is not aligned with the EU Taxonomy), and 10.68% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.16% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

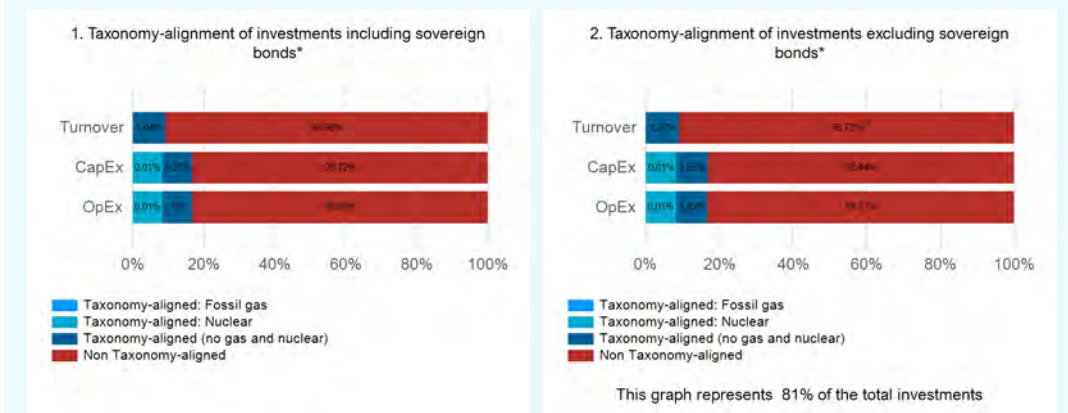

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.56%; Transitional Activity: 0.09%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.8%

Opex - 1.3%

Capex - 1.8%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 2.1%

Opex - 1.5%

Capex - 2.1%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 15.53 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 11.7 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Asian Bond Fund

Legal entity identifier:
25490016JMCH6V907111

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 22.17% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 88.56 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 22.17 % of the fund invested in sustainable investments;
- iv) 12.48 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 9.68% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 90.23% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 26.98% of the fund was invested in sustainable investments;
- iv) 12.51% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- iv) 14.47% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 22.17 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 1.1%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.1%

Opex - 0%

Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 12.48 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.68 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - China RMB Bond Fund

Legal entity identifier:
5493005X6HEWY2HZVZ41

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 5.35% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 76.4 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 5.35 % of the fund invested in sustainable investments;
- iv) 4.12 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 1.23% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 77.54% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 10.55% of the fund was invested in sustainable investments;
- iv) 5.09% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 5.47% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 5.35 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 5.35 % in sustainable investments.

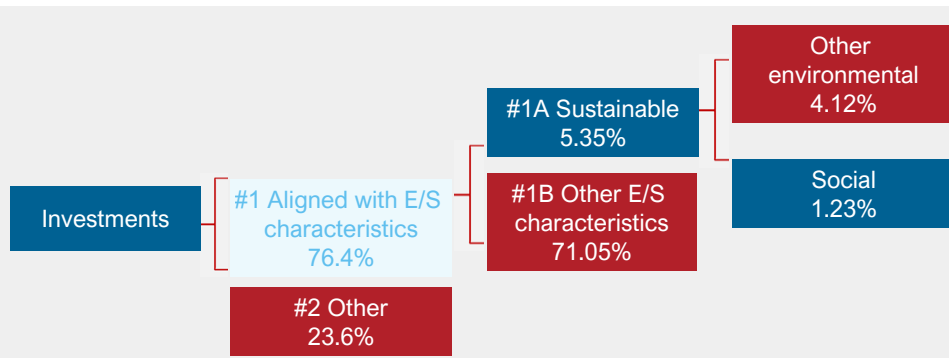

What was the asset allocation?

The fund invested in:

- 76.4 % of its assets in securities of issuers with favourable ESG characteristics;
- 5.35 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 4.12 % have an environmental objective (which is not aligned with the EU Taxonomy) and 1.23 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 77.54% of its assets in securities of issuers with favourable ESG characteristics;
- 10.55% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 5.09% have an environmental objective (which is not aligned with the EU Taxonomy), and 5.47% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV

Utilities	Gas Utilities	2.04%
	Electric Utilities	0.64%
	Independent Power Producers & Energy Traders	0.63%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0 %

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.1%

Opex - 0%

Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 4.12 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 1.23 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 16.69% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 68.2 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 16.69 % of the fund invested in sustainable investments;
- iv) 8.6 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 8.09% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 68.15% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 17.89% of the fund was invested in sustainable investments;
- iv) 7.44% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 10.45% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 16.69 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 16.69 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 68.2 % of its assets in securities of issuers with favourable ESG characteristics;
- 16.69 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 8.6 % have an environmental objective (which is not aligned with the EU Taxonomy) and 8.09 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 68.15% of its assets in securities of issuers with favourable ESG characteristics;
- 17.89% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 7.44% have an environmental objective (which is not aligned with the EU Taxonomy), and 10.45% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

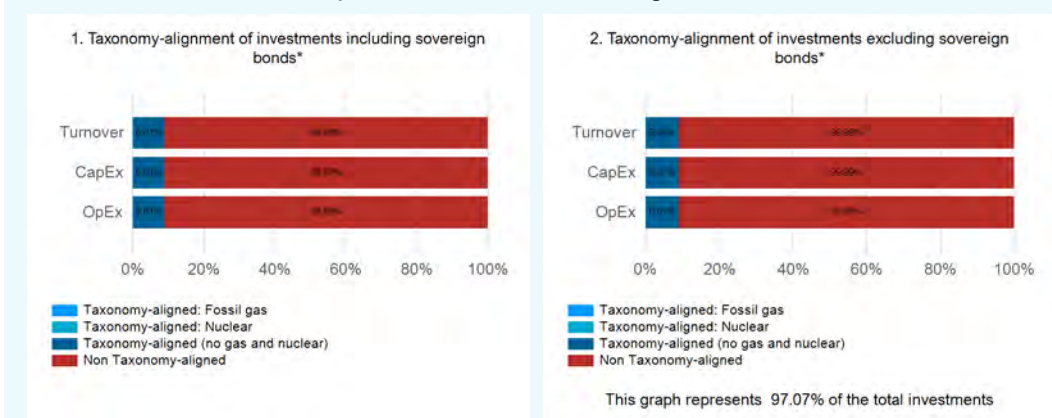

- Yes
 In fossil gas In nuclear energy
 No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.2%
Opex - 0%
Capex - 0 %
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.2%
Opex - 0%
Capex - 0%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 8.6 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 8.09 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Emerging Market Debt Fund

Legal entity identifier:
549300JD9HLR74D69D63

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 64.09 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below).

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 60.98% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below).

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The question is not applicable since the fund did not have any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The question is not applicable since the fund did not have any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The question is not applicable since the fund did not have any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The question is not applicable since the fund did not have any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 95.37 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below).

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 93.29% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below).

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The question is not applicable since the fund did not have any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The question is not applicable since the fund did not have any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The question is not applicable since the fund did not have any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The question is not applicable since the fund did not have any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 0 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 95.37 % of its assets in securities of issuers with favourable ESG characteristics;
- The Asset allocation for the prior reference period was as follows. The fund invested in:
- 93.29% of its assets in securities of issuers with favourable ESG characteristics

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Energy	Government	0.02%
Financials	Diversified Financial Services	2.99%
	Commercial Banks	0.94%
Government	Government	89.06%
	Corporate Bonds	0.1%
Open Ended Fund	Closed Ended Cash Fund	2.94%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy - alignment of investments including sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0 %
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 0 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 0 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 24.97% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 94.32 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 24.97 % of the fund invested in sustainable investments;
- iv) 12.9 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 9.33% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 83.53% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 13.94% of the fund was invested in sustainable investments;
- iv) 5.22% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 7.22% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 24.97 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 24.97 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 94.32 % of its assets in securities of issuers with favourable ESG characteristics;
- 24.97 % in sustainable investments of which 2.75 % have an environmental objective (which is aligned with the EU Taxonomy), 12.9 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.33 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 83.53% of its assets in securities of issuers with favourable ESG characteristics;
- 13.94% in sustainable investments of which 1.51% have an environmental objective (which is aligned with the EU Taxonomy), 5.22% have an environmental objective (which is not aligned with the EU Taxonomy), and 7.22% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	0.99%

Real Estate	Fixed Income - Corp Bonds - Real Estate - Industri	3.5%
Utilities	Electric Utilities	6.21%
	Multi-Utilities	3.42%
	Water Utilities	1.86%
	Independent Power Producers & Energy Traders	1.55%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.75% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.24%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 2.7%

Opex - 2.9%

Capex - 3.8%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 3.9%

Opex - 4.3%

Capex - 5.6%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 12.9 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.33 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Euro Corporate Bond Fund

Legal entity identifier:
549300HVFD74DI2L1428

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 36.34% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 94.51 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 36.34 % of the fund invested in sustainable investments;
- iv) 20.29 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 12.09% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 81.58% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 22.56% of the fund was invested in sustainable investments;
- iv) 10.04% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 9.31% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 36.34 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 36.34 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 94.51 % of its assets in securities of issuers with favourable ESG characteristics;
- 36.34 % in sustainable investments of which 3.96 % have an environmental objective (which is aligned with the EU Taxonomy), 20.29 % have an environmental objective (which is not aligned with the EU Taxonomy) and 12.09 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 81.58% of its assets in securities of issuers with favourable ESG characteristics;
- 22.56% in sustainable investments of which 3.2% have an environmental objective (which is aligned with the EU Taxonomy), 10.04% have an environmental objective (which is not aligned with the EU Taxonomy), and 9.31% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 3.96% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
 No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 3.12%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 4.5%

Opex - 5.5%

Capex - 7.5%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 4.8%

Opex - 5.8%

Capex - 7.8%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 20.29 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 12.09 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Euro Short Term Bond Fund

Legal entity identifier:
3NMLOFBNMWJ7JPIH6S89

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 24.53% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 92.37 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 24.53 % of the fund invested in sustainable investments;
- iv) 18.46 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 4.78% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 92.57% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 14.59 % of the fund was invested in sustainable investments;
- iv) 8.68% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 4.37% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 24.53 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 24.53 % in sustainable investments.

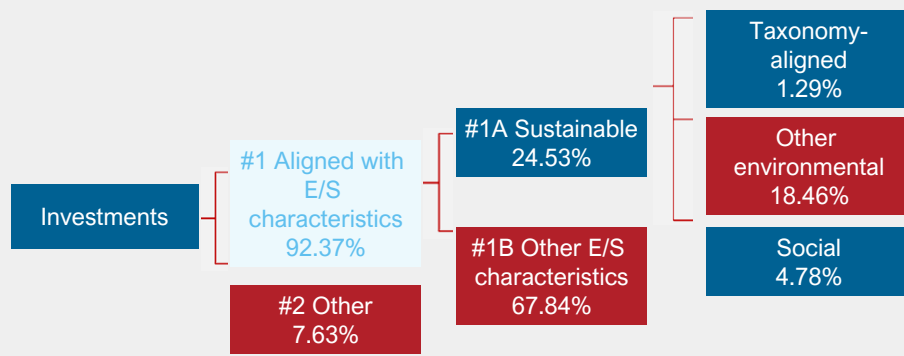

What was the asset allocation?

The fund invested in:

- 92.37 % of its assets in securities of issuers with favourable ESG characteristics;
- 24.53 % in sustainable investments of which 1.29 % have an environmental objective (which is aligned with the EU Taxonomy), 18.46 % have an environmental objective (which is not aligned with the EU Taxonomy) and 4.78 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 92.57% of its assets in securities of issuers with favourable ESG characteristics;
- 14.59% in sustainable investments of which 1.54% have an environmental objective (which is aligned with the EU Taxonomy), 8.68% have an environmental objective (which is not aligned with the EU Taxonomy), and 4.37% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	2.56%
Consumer Discretionary	Automobiles	3.18%
	Hotels Restaurants & Leisure	1.21%
Consumer Staples	Food & Staples Retailing	1.21%
Energy	Energy Equipment & Services	2.8%
	Oil, Gas & Consumable Fuels	2.33%

Real Estate	Fixed Income - Corp Bds - Real Est Mgt & Dev - Re	3.62%
Utilities	Electric Utilities	5.41%
	Water Utilities	2.18%
	Multi-Utilities	0.68%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

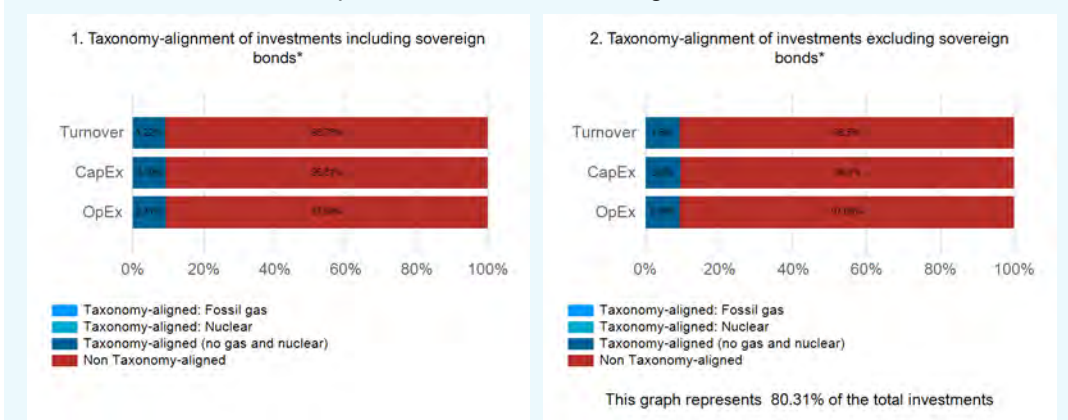

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.29% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.83%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 1.2%
Opex - 1%
Capex - 1.5%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 1.4%
Opex - 1.2%
Capex - 1.7%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 18.46 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 4.78 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 15.64% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 71.82 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 15.64 % of the fund invested in sustainable investments;
- iv) 10.97 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 2.76% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 65.21% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 10.86% of the fund was invested in sustainable investments;
- iv) 6.4% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 3.83% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 15.64 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 15.64 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 71.82 % of its assets in securities of issuers with favourable ESG characteristics;
- 15.64 % in sustainable investments of which 1.91 % have an environmental objective (which is aligned with the EU Taxonomy), 10.97 % have an environmental objective (which is not aligned with the EU Taxonomy) and 2.76 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 65.21% of its assets in securities of issuers with favourable ESG characteristics;
- 10.86% in sustainable investments of which 0.63% have an environmental objective (which is aligned with the EU Taxonomy), 6.4% have an environmental objective (which is not aligned with the EU Taxonomy), and 3.83% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	9.11%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.91% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.89%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 1.3%
 Opex - 1.3%
 Capex - 1.9%
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 1.3%
 Opex - 1.3%
 Capex - 1.9%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 10.97 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 2.76 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Flexible Bond Fund

Legal entity identifier:
Y5GJXJ4DKJON310L3I87

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 17.19% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 88.12 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 17.19 % of the fund invested in sustainable investments;
- iv) 9.47 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 6.09% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 85.03% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 11.92% of the fund was invested in sustainable investments;
- iv) 6.14% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 4.56% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 17.19 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 17.19 % in sustainable investments.

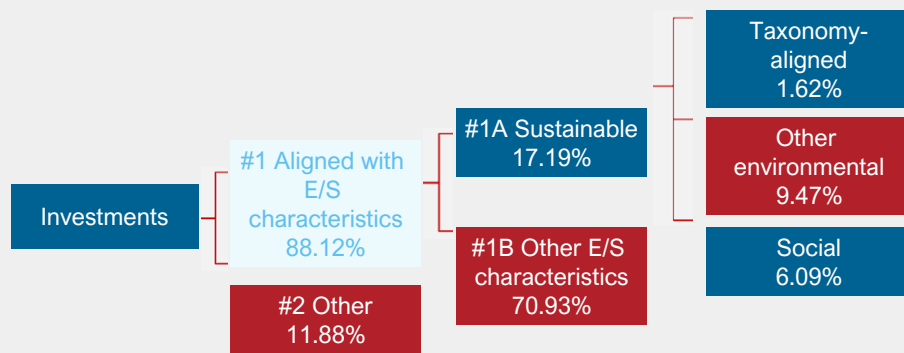

What was the asset allocation?

The fund invested in:

- 88.12 % of its assets in securities of issuers with favourable ESG characteristics;
- 17.19 % in sustainable investments of which 1.62 % have an environmental objective (which is aligned with the EU Taxonomy), 9.47 % have an environmental objective (which is not aligned with the EU Taxonomy) and 6.09 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 85.03% of its assets in securities of issuers with favourable ESG characteristics;
- 11.92% in sustainable investments of which 1.23% have an environmental objective (which is aligned with the EU Taxonomy), 6.14% have an environmental objective (which is not aligned with the EU Taxonomy), and 4.56% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.62% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.64%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 2.1%
 Opex - 2.2%
 Capex - 3.3%
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 2.8%
 Opex - 2.9%
 Capex - 4.3%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 9.47 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 6.09 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Global Bond Fund

Legal entity identifier:
GQ0BF6O9W3C24RB7AC25

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 7.79% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 88.54 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 7.79 % of the fund invested in sustainable investments;
- iv) 4.69 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 2.86% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 88.71% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 7.69% of the fund was invested in sustainable investments;
- iv) 3.72% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 3.25% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 7.79 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 7.79 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 88.54 % of its assets in securities of issuers with favourable ESG characteristics;
2. 7.79 % in sustainable investments of which 0.24 % have an environmental objective (which is aligned with the EU Taxonomy), 4.69 % have an environmental objective (which is not aligned with the EU Taxonomy) and 2.86 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 88.71% of its assets in securities of issuers with favourable ESG characteristics;
2. 7.69% in sustainable investments of which 0.71% have an environmental objective (which is aligned with the EU Taxonomy), 3.72% have an environmental objective (which is not aligned with the EU Taxonomy), and 3.25% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.24% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For

nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

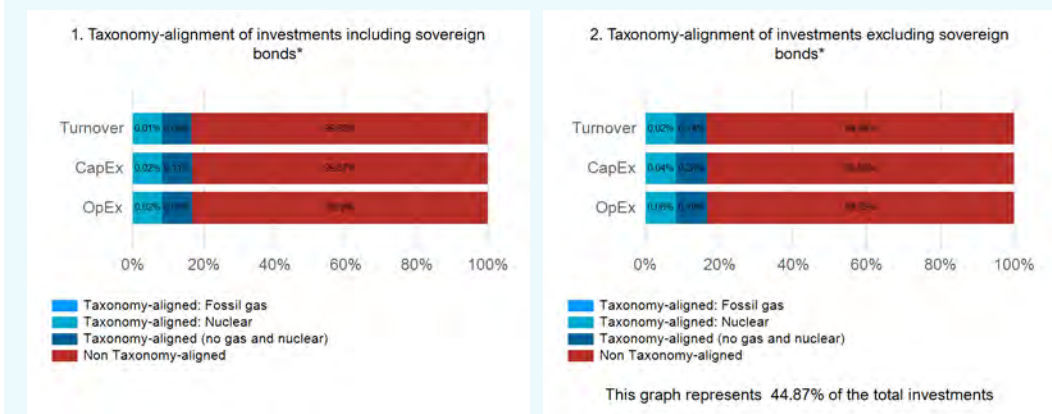

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.04%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.5%

Opex - 0.5%

Capex - 0.7%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 1.1%

Opex - 1%

Capex - 1.5%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 4.69 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 2.86 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Global Corporate Bond Fund

Legal entity identifier:
E1PSUJKP1HSFQL89GJ11

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 34.73% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 88.29 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 34.73 % of the fund invested in sustainable investments;
- iv) 20.71 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- v) 2.03% of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
- vi) 12% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 82.87% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 25.25% of the fund was invested in sustainable investments;
- iv) 15.63% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- v) 1.97% of the fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy); and
- vi) 7.64% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 34.73 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 34.73 % in sustainable investments.

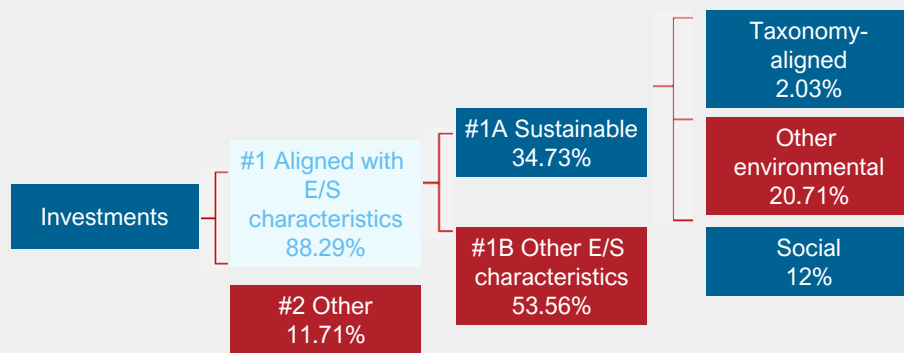

What was the asset allocation?

The fund invested in:

- 88.29 % of its assets in securities of issuers with favourable ESG characteristics;
- 34.73 % in sustainable investments of which 2.03 % have an environmental objective (which is aligned with the EU Taxonomy), 20.71 % have an environmental objective (which is not aligned with the EU Taxonomy) and 12 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 82.87% of its assets in securities of issuers with favourable ESG characteristics;
- 25.25% in sustainable investments of which 1.97% have an environmental objective (which is aligned with the EU Taxonomy), 15.63% have an environmental objective (which is not aligned with the EU Taxonomy), and 7.64% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.03% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

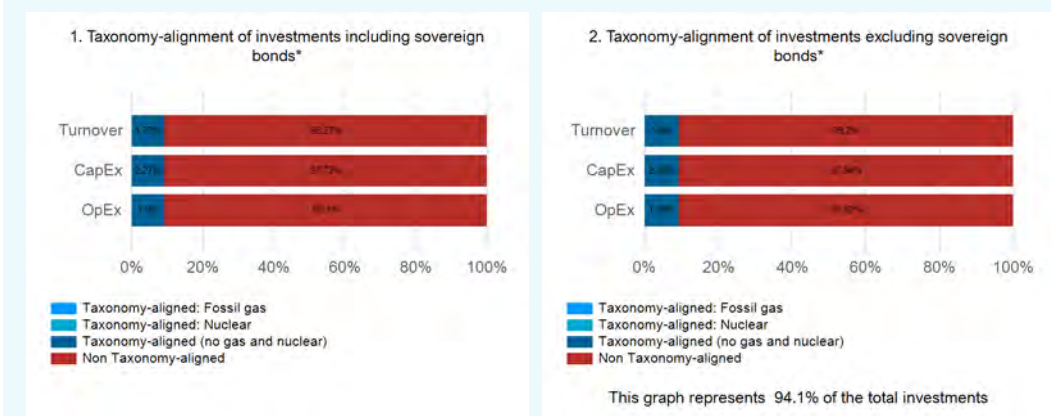

to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.56%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 2.5%

Opex - 2.5%

Capex - 3.2%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 2.6%

Opex - 2.6%

Capex - 3.3%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 20.71 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 12 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Global High Yield Fund

Legal entity identifier:
549300HLL9VXER4ESF55

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 11.41% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 70.83 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 11.41 % of the fund invested in sustainable investments;
- iv) 5.35 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 6% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 66.58% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 10.76% of the fund was invested in sustainable investments;
- iv) 3.82% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 6.94% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 11.41 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 11.41 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 70.83 % of its assets in securities of issuers with favourable ESG characteristics;
- 11.41 % in sustainable investments of which 0.06 % have an environmental objective (which is aligned with the EU Taxonomy), 5.35 % have an environmental objective (which is not aligned with the EU Taxonomy) and 6 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 66.58% of its assets in securities of issuers with favourable ESG characteristics;
- 10.76% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 3.82% have an environmental objective (which is not aligned with the EU Taxonomy), and 6.94% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

The fund invested 0.06% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

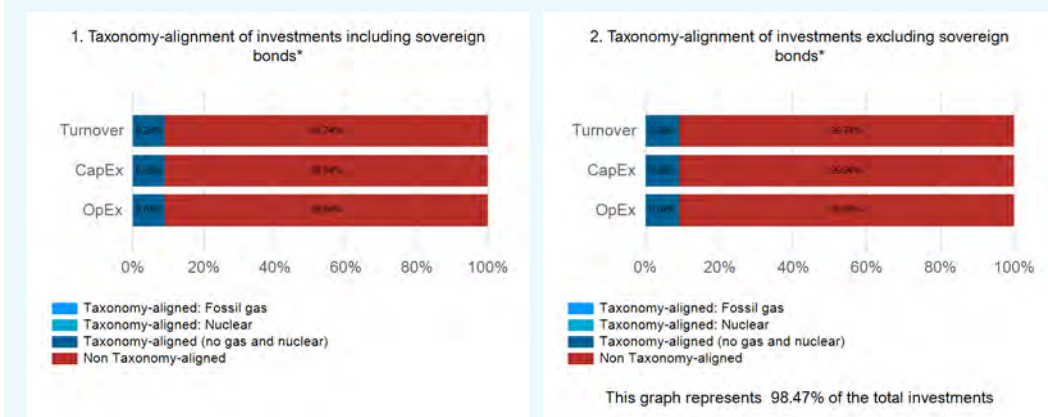

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.01%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.6%

Opex - 0.1%

Capex - 0.1%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.6%

Opex - 0.1%

Capex - 0.1%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 5.35 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 6 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Global Hybrids Bond Fund

Legal entity identifier:
549300BKJXZO8Z8K9S85

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 20.3% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 85.51 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 20.3 % of the fund invested in sustainable investments;
- iv) 9.77 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- v) 1.18% of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
- vi) 9.35% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 85.8% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 14.05% of the fund was invested in sustainable investments;
- iv) 5.2% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- v) 1.48% of the fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy); and
- vi) 7.38% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 20.3 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 20.3 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 85.51 % of its assets in securities of issuers with favourable ESG characteristics;
- 20.3 % in sustainable investments of which 1.18 % have an environmental objective (which is aligned with the EU Taxonomy), 9.77 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.35 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 85.8% of its assets in securities of issuers with favourable ESG characteristics;
- 14.05% in sustainable investments of which 1.48% have an environmental objective (which is aligned with the EU Taxonomy), 5.2% have an environmental objective (which is not aligned with the EU Taxonomy), and 7.38% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	1.3%
Consumer Discretionary	Automobiles	2.9%
Energy	Oil, Gas & Consumable Fuels	3.62%
Financials	Commercial Banks	71.48%
	Capital Markets	6.01%
	Insurance	3.26%
	Diversified Financial Services	1.52%
Healthcare	Pharmaceuticals	2.43%
Real Estate	Fixed Income - Corp Bds - Real Est Mgt & Dev - Re	0.01%
Utilities	Electric Utilities	5.35%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.18% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the

criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

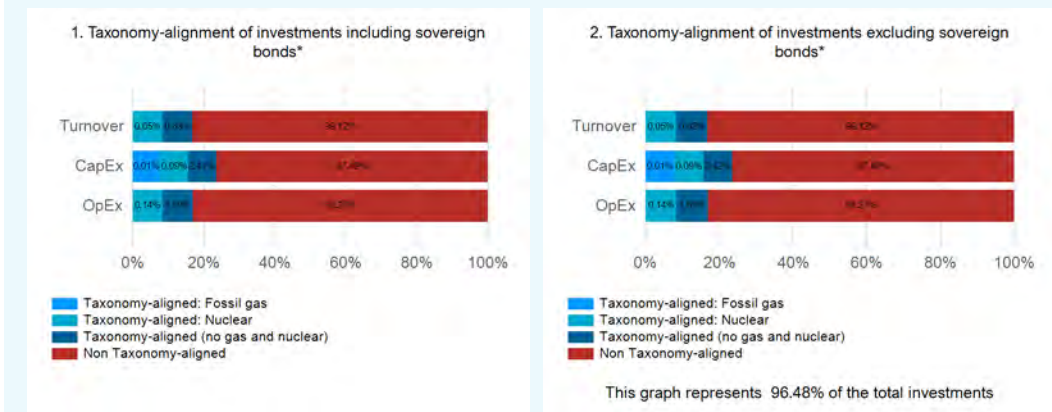

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.49%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

- Previous Reference Period
- Taxonomy - alignment of investments including sovereign bonds
 - Turnover - 1.9%
 - Opex - 2.3%
 - Capex - 3.3%
- Taxonomy - alignment of investments excluding sovereign bonds
 - Turnover - 1.9%
 - Opex - 2.3%
 - Capex - 3.3%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 9.77 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.35 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Global Income Fund

Legal entity identifier:
549300Y91PT1E5IZKI34

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 16.47% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 78.2% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 16.47% of the fund was invested in sustainable investments and;
- iv) 5.48% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 73.16% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 13.26% of the fund was invested in sustainable investments and;
- iv) 7.45% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 16.47% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 16.47 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 78.2 % of its assets in securities of issuers with favourable ESG characteristics;
- 16.47 % in sustainable investments of which 0.97 % have an environmental objective (which is aligned with the EU Taxonomy), 10.01 % have an environmental objective (which is not aligned with the EU Taxonomy) and 5.48 % have a social objective.

The Asset allocation for the prior reference period was as follows.

The fund invested in:

- 73.16% of its assets in securities of issuers with favourable ESG characteristics;
- 13.26% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 5.52% have an environmental objective (which is not aligned with the EU Taxonomy), and 7.45% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.97% in sustainable investments with an environmental objective

on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.3%; Transitional Activity: 0%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.1%

Opex - 0.3%

Capex - 0.2%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.2%

Opex - 0.3%

Capex - 0.2%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 10.01 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 5.48 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Global Inflation-linked Bond Fund

Legal entity identifier:
78VTRQN40UWE9NYCJW22

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 97.91 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity’s Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below). The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 99.05% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below).

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The question is not applicable since the fund did not have any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The question is not applicable since the fund did not have any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The question is not applicable since the fund did not have any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The question is not applicable since the fund did not have any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
US Treasury Inflation Indexed Bonds 2.375% 15/10/2028	Government	7.51%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 0 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 97.91 % of its assets in securities of issuers with favourable ESG characteristics;

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 99.05% of its assets in securities of issuers with favourable ESG characteristics;

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Government	Government	100.22%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure**

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 0 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 0 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Global Short Duration Income Fund

Legal entity identifier:
549300DE58GK4SNQH841

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 16.44% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 74.31 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 16.44 % of the fund invested in sustainable investments;
- iv) 12.65 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 3.18% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 71.83% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 13.3% of the fund was invested in sustainable investments;
- iv) 8.75% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 4.21% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 16.44 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 16.44 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 74.31 % of its assets in securities of issuers with favourable ESG characteristics;
- 16.44 % in sustainable investments of which 0.62 % have an environmental objective (which is aligned with the EU Taxonomy), 12.65 % have an environmental objective (which is not aligned with the EU Taxonomy) and 3.18 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 71.83% of its assets in securities of issuers with favourable ESG characteristics;
- 13.3% in sustainable investments of which 0.34% have an environmental objective (which is aligned with the EU Taxonomy), 8.75% have an environmental objective (which is not aligned with the EU Taxonomy), and 4.21% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.62% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management

rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure**

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

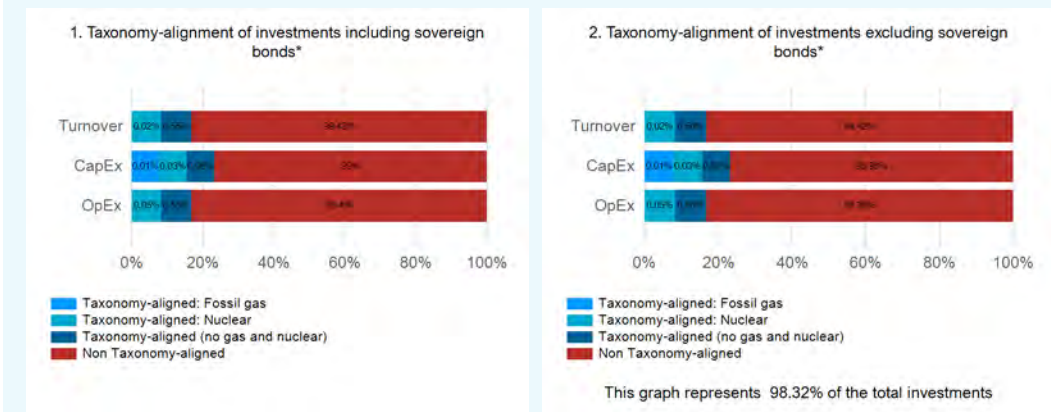

Yes

In fossil gas

In nuclear energy

No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.47%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.3%

Opex - 0.3%

Capex - 0.5%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.3%

Opex - 0.3%

Capex - 0.5%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 12.65 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 3.18 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 56.86 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below). The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 56.62% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 0% of the fund was invested in sustainable investments; and
- iv) 0% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The question is not applicable since the fund did not have any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The question is not applicable since the fund did not have any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The question is not applicable since the fund did not have any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The question is not applicable since the fund did not have any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 0 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 56.86 % of its assets in securities of issuers with favourable ESG characteristics;

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 56.62% of its assets in securities of issuers with favourable ESG characteristics;

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Textiles & Apparel	0.48%
Financials	Diversified Financial Services	93.54%
	Thriffs & Mortgage Finance	2.34%
	Consumer Finance	1.99%
	Commercial Banks	0.24%
Real Estate	Real Estate Investment Trusts (Reits)	0.69%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 0 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 0 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Climate Bond Fund

Legal entity identifier:
549300L1AKMJ4PE06T04

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 47.5% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 92.54 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 47.5 % of the fund invested in sustainable investments;
- iv) 30.11 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 14.7% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 89.85% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 38.74% of the fund was invested in sustainable investments;
- iv) 22.06% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 12.09% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 47.5 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 47.5 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 92.54 % of its assets in securities of issuers with favourable ESG characteristics;
- 47.5 % in sustainable investments of which 2.69 % have an environmental objective (which is aligned with the EU Taxonomy), 30.11 % have an environmental objective (which is not aligned with the EU Taxonomy) and 14.7 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 89.85% of its assets in securities of issuers with favourable ESG characteristics;
- 38.74% in sustainable investments of which 4.6% have an environmental objective (which is aligned with the EU Taxonomy), 22.06% have an environmental objective (which is not aligned with the EU Taxonomy), and 12.09% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.69% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas
 In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

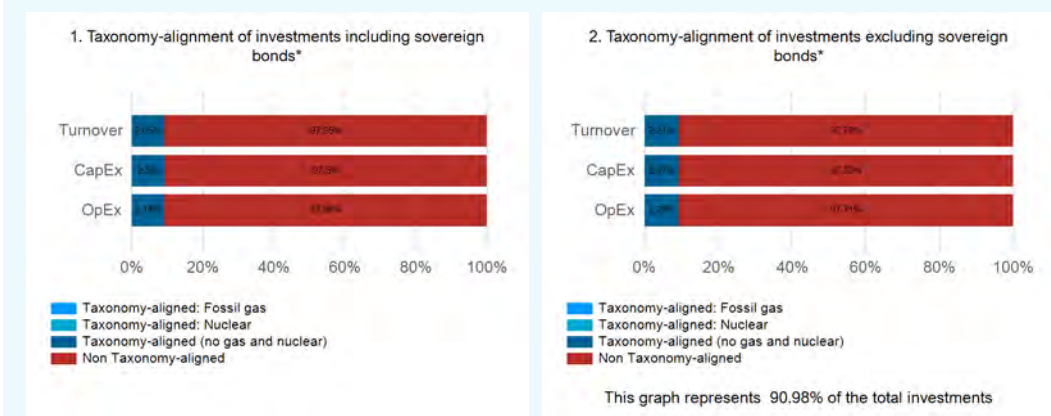

activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.99%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 4.4%

Opex - 3%

Capex - 3.8%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 4.6%

Opex - 3.1%

Capex - 4%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 30.11 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 14.7 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Strategic Bond Fund

Legal entity identifier:
RL7DB442ZD11XPI58I79

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 16.4% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 91.43 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 16.4 % of the fund invested in sustainable investments;
- iv) 8.81 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 6.1% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 89.26% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 11.75% of the fund was invested in sustainable investments;
- iv) 5.82% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 4.83% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 16.4 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 16.4 % in sustainable investments.

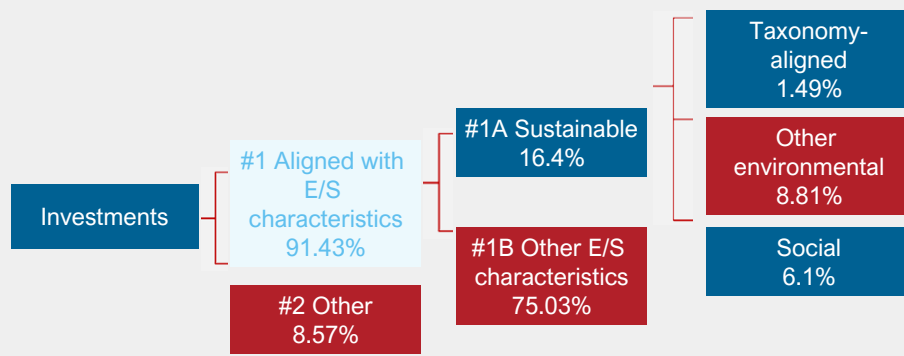

What was the asset allocation?

The fund invested in:

- 91.43 % of its assets in securities of issuers with favourable ESG characteristics;
- 16.4 % in sustainable investments of which 1.49 % have an environmental objective (which is aligned with the EU Taxonomy), 8.81 % have an environmental objective (which is not aligned with the EU Taxonomy) and 6.1 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 89.26% of its assets in securities of issuers with favourable ESG characteristics;
- 11.75% in sustainable investments of which 1.1% have an environmental objective (which is aligned with the EU Taxonomy), 5.82% have an environmental objective (which is not aligned with the EU Taxonomy), and 4.82% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.49% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

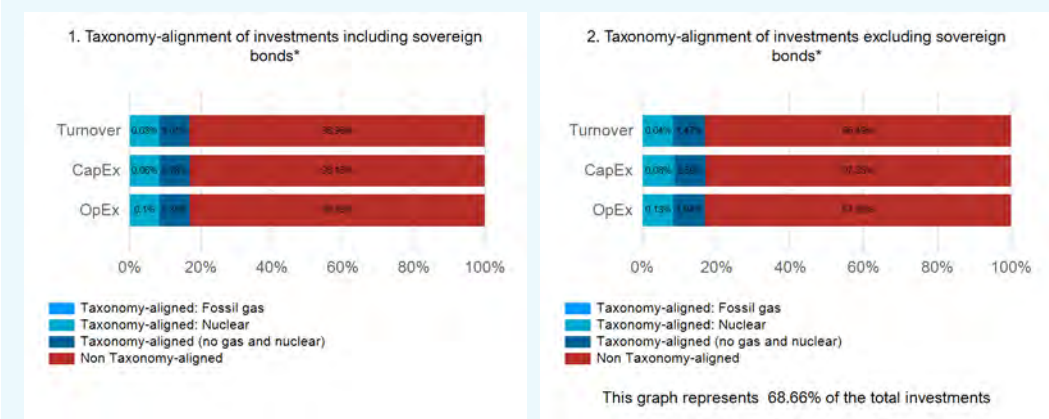

objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.58%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 2%

Opex - 1.9%

Capex - 2.9%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 2.7%

Opex - 2.6%

Capex - 3.9%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 8.81 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 6.1 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 11.11% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 91.74 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 11.11 % of the fund invested in sustainable investments;
- iv) 5.94 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 4.71% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 89.13% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 8.81% of the fund was invested in sustainable investments;
- iv) 3.96% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 4.44% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 11.11 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
US Treasury 4.00% 15/02/2034	Government	12.35%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 11.11 % in sustainable investments.

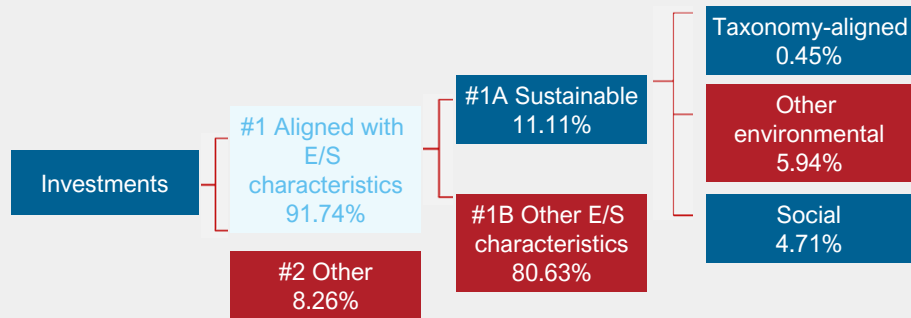

What was the asset allocation?

The fund invested in:

- 91.74 % of its assets in securities of issuers with favourable ESG characteristics;
- 11.11 % in sustainable investments of which 0.45 % have an environmental objective (which is aligned with the EU Taxonomy), 5.94 % have an environmental objective (which is not aligned with the EU Taxonomy) and 4.71 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 89.13% of its assets in securities of issuers with favourable ESG characteristics;
- 8.81% in sustainable investments of which 0.41% have an environmental objective (which is aligned with the EU Taxonomy), 3.96% have an environmental objective (which is not aligned with the EU Taxonomy), and 4.44% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.45% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
 In fossil gas In nuclear energy
 No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.14%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.3%
Opex - 0.3%
Capex - 0.5%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.8%
Opex - 0.7%
Capex - 1%

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 5.94 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 4.71 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - US High Yield Fund

Legal entity identifier:
5493009BXYOCIRTXRS63

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 12.44% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 63.05% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 12.44% of the fund invested in sustainable investments;
- iv) 7.3% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 4.98% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 12.44% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 23/01/2024-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 12.44 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 63.05 % of its assets in securities of issuers with favourable ESG characteristics;
- 12.44 % in sustainable investments of which 0.16 % have an environmental objective (which is aligned with the EU Taxonomy), 7.3 % have an environmental objective (which is not aligned with the EU Taxonomy) and 4.98 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	4.04%
	Wireless Telecommunication Services	0.88%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.16% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

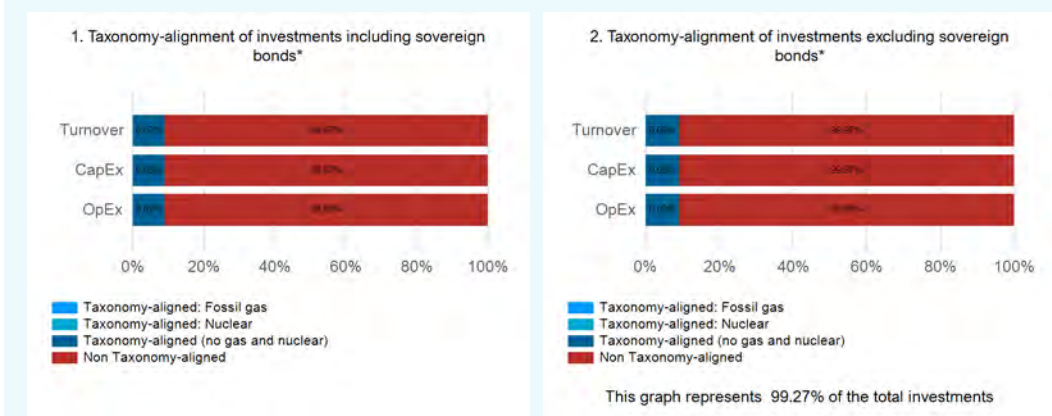

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 7.3 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 4.98 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Euro Cash Fund

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 80.66 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below).

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 80.59% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below).

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The question is not applicable since the fund did not have any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The question is not applicable since the fund did not have any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The question is not applicable since the fund did not have any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The question is not applicable since the fund did not have any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 0 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 81.21 % of its assets in securities of issuers with favourable ESG characteristics;
- 0 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 0 % have an environmental objective (which is not aligned with the EU Taxonomy) and 0 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

- 84.13% of its assets in securities of issuers with favourable ESG characteristics;
- 0% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 0% have an environmental objective (which is not aligned with the EU Taxonomy), and 0% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Automobiles	0.52%
Financials	Commercial Banks	75.12%
	Capital Markets	4.64%
	Diversified Financial Services	19.07%
	Insurance	0.65%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0%

Opex - 0%

Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 0 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 0 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Fidelity Target TM 2025 Fund

Legal entity identifier:
549300JQL1HZ76MV0M05

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 12.83% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 92.65% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 12.83% of the fund invested in sustainable investments;
- iv) 7.63% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 3.7% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 12.83% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 23/01/2024-30/04/2024

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 12.83 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 92.65 % of its assets in securities of issuers with favourable ESG characteristics;
- 12.83 % in sustainable investments of which 1.5 % have an environmental objective (which is aligned with the EU Taxonomy), 7.63 % have an environmental objective (which is not aligned with the EU Taxonomy) and 3.7 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.5% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.

The compliance of the investments of the fund with the EU Taxonomy was not subject

power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.16%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 7.63 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 3.7 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 34.41% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 80.56% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 34.41% of the fund invested in sustainable investments;
- iv) 19.58% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 13.05% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 34.41% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 23/01/2024-30/04/2024

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

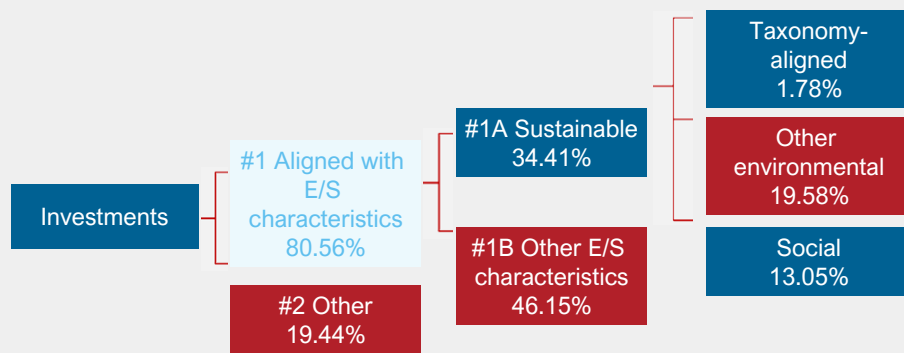

The fund invested 34.41 % in sustainable investments.

What was the asset allocation?

The fund invested in:

1. 80.56 % of its assets in securities of issuers with favourable ESG characteristics;
2. 34.41 % in sustainable investments of which 1.78 % have an environmental objective (which is aligned with the EU Taxonomy), 19.58 % have an environmental objective (which is not aligned with the EU Taxonomy) and 13.05 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.78% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

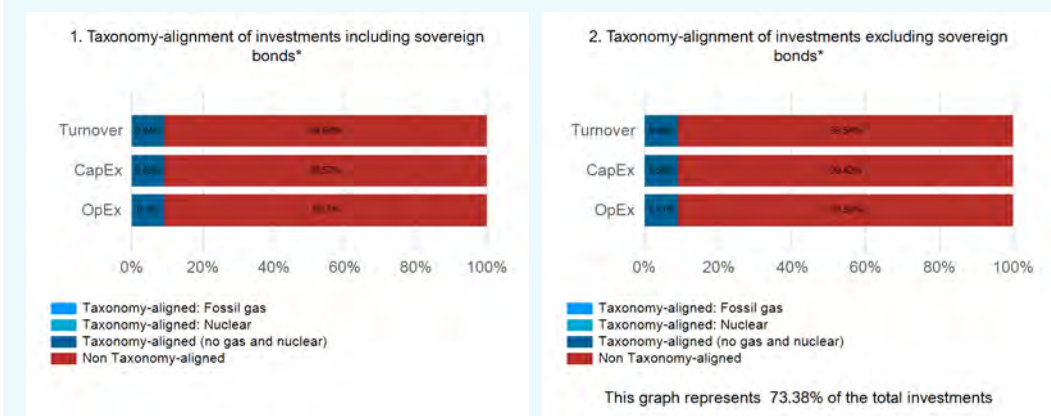

- **capital expenditure**

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)

reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.23%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 19.58 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 13.05 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Fidelity Target TM 2035 Fund

Legal entity identifier:
549300XULTNPDTV56Y50

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.12% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 82.38% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 51.12% of the fund invested in sustainable investments;
- iv) 29.94% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 20.75% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.12% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 23/01/2024-30/04/2024

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

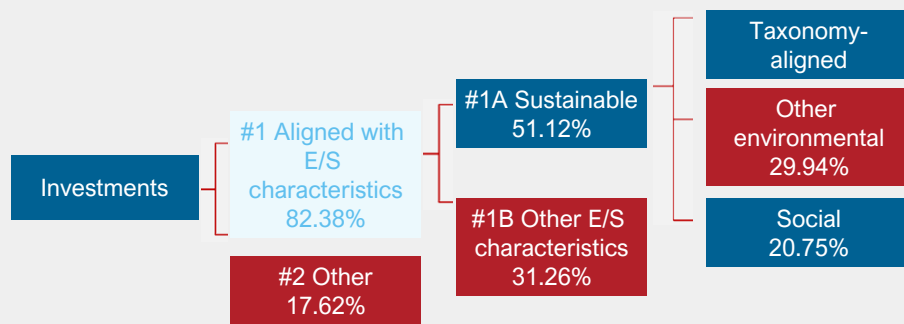

The fund invested 51.12 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 82.38 % of its assets in securities of issuers with favourable ESG characteristics;
- 51.12 % in sustainable investments of which 0.43 % have an environmental objective (which is aligned with the EU Taxonomy), 29.94 % have an environmental objective (which is not aligned with the EU Taxonomy) and 20.75 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.43% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

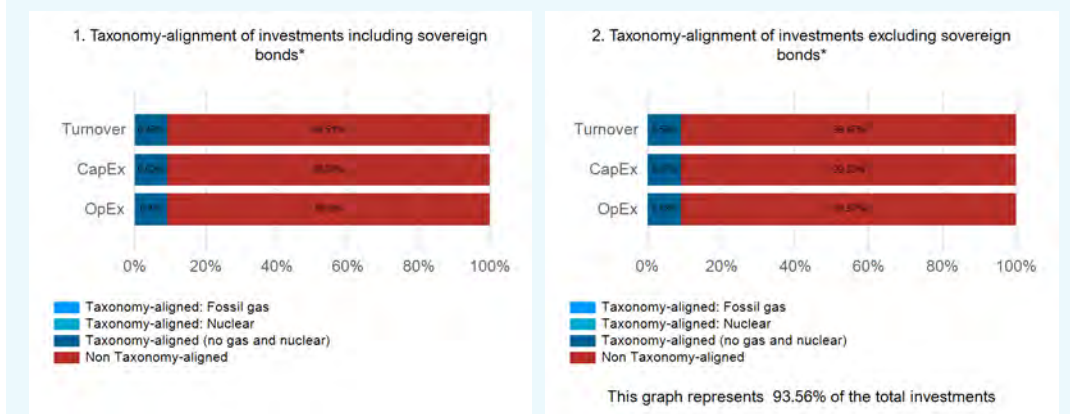

Yes

In fossil gas

In nuclear energy

No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reflecting green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

The share of the fund made in Enabling Activity: 0.31%; Transitional Activity: 0.03%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 29.94 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 20.75 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Fidelity Target TM 2040 Fund

Legal entity identifier:
549300CNQ4TMHDTV47

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.12% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 82.37% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 51.12% of the fund invested in sustainable investments;
- iv) 29.94% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 20.75% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.12% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 23/01/2024-30/04/2024

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

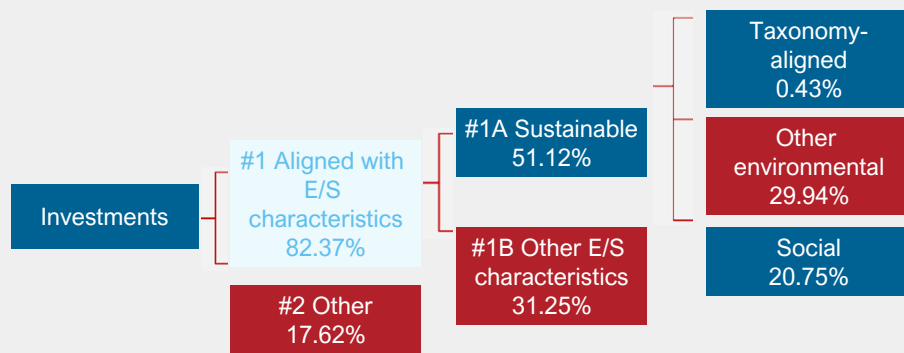

The fund invested 51.12 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 82.37 % of its assets in securities of issuers with favourable ESG characteristics;
- 51.12 % in sustainable investments of which 0.43 % have an environmental objective (which is aligned with the EU Taxonomy), 29.94 % have an environmental objective (which is not aligned with the EU Taxonomy) and 20.75 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.1% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 82.33% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 51.1% of the fund invested in sustainable investments;
- iv) 29.92% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 20.75% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.1% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 23/01/2024-30/04/2024

Largest investments	Sector	% Assets	Country
Microsoft	Information Technology	3.71%	US
Apple	Information Technology	3.62%	US

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

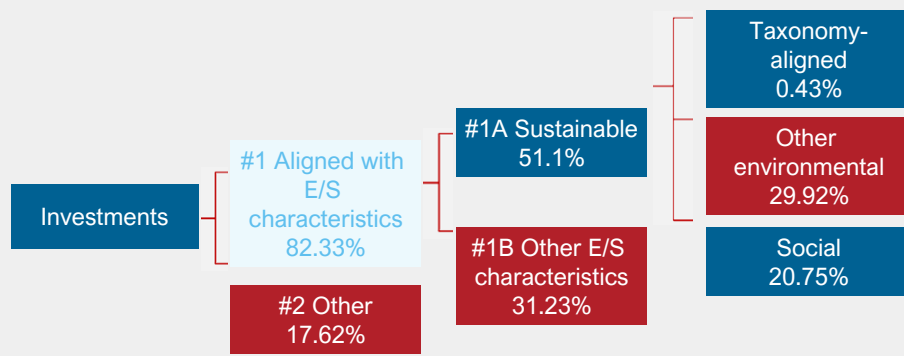

The fund invested 51.1 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 82.33 % of its assets in securities of issuers with favourable ESG characteristics;
- 51.1 % in sustainable investments of which 0.43 % have an environmental objective (which is aligned with the EU Taxonomy), 29.92 % have an environmental objective (which is not aligned with the EU Taxonomy) and 20.75 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.43% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

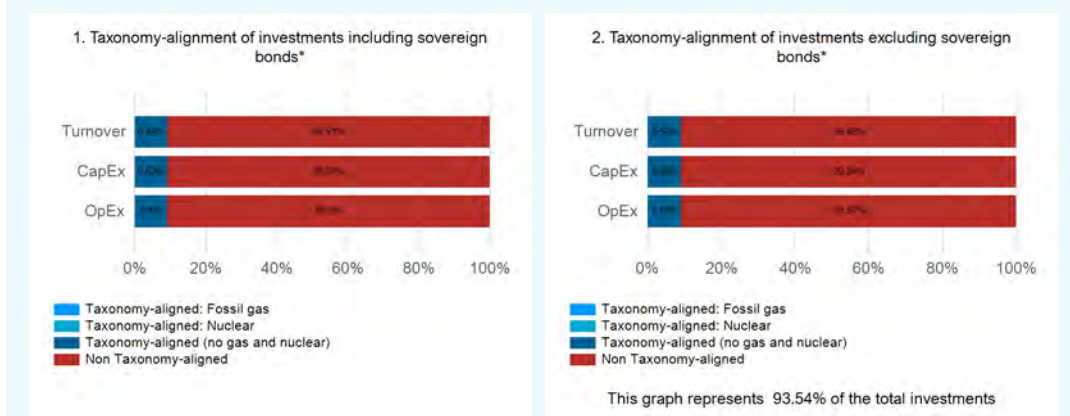

Yes

In fossil gas

In nuclear energy

No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reflecting green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

The share of the fund made in Enabling Activity: 0.33%; Transitional Activity: 0.03%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 29.92 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 20.75 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Fidelity Target TM 2050 Fund

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.11% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 82.34% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 51.11% of the fund invested in sustainable investments;
- iv) 29.93% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 20.75% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.11% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 23/01/2024-30/04/2024

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 51.11 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 82.34 % of its assets in securities of issuers with favourable ESG characteristics;
- 51.11 % in sustainable investments of which 0.43 % have an environmental objective (which is aligned with the EU Taxonomy), 29.93 % have an environmental objective (which is not aligned with the EU Taxonomy) and 20.75 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.43% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

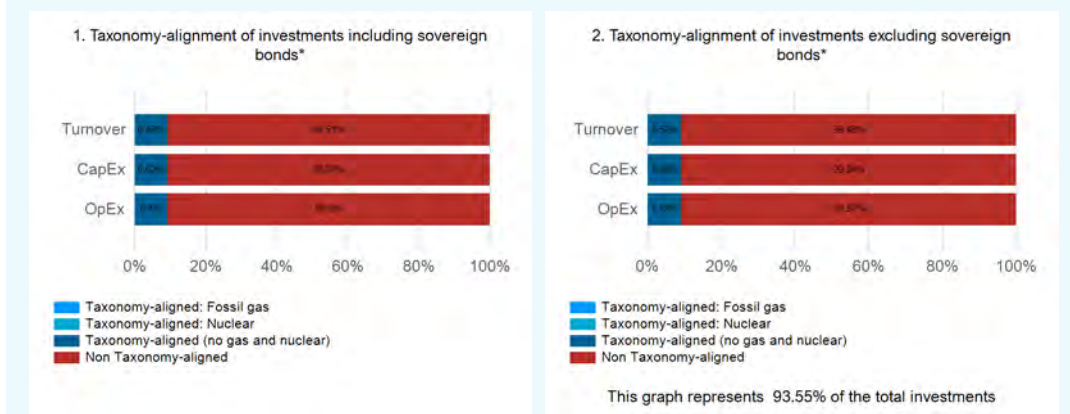

Yes

In fossil gas

In nuclear energy

No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reflecting green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

The share of the fund made in Enabling Activity: 0.33%; Transitional Activity: 0.03%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 29.93 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 20.75 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Fidelity Target TM 2055 Fund

Legal entity identifier:
254900MPPNN4DLXDKB92

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.1% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 82.39% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 51.1% of the fund invested in sustainable investments;
- iv) 29.95% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 20.72% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.1% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 23/01/2024-30/04/2024

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.1% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 82.38% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 51.1% of the fund invested in sustainable investments;
- iv) 29.94% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 20.73% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.1% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 23/01/2024-30/04/2024

Largest investments	Sector	% Assets	Country
Microsoft	Information Technology	3.71%	US
Apple	Information Technology	3.62%	US

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 51.1 % in sustainable investments.

What was the asset allocation?

The fund invested in:

- 82.38 % of its assets in securities of issuers with favourable ESG characteristics;
- 51.1 % in sustainable investments of which 0.43 % have an environmental objective (which is aligned with the EU Taxonomy), 29.94 % have an environmental objective (which is not aligned with the EU Taxonomy) and 20.73 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.43% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

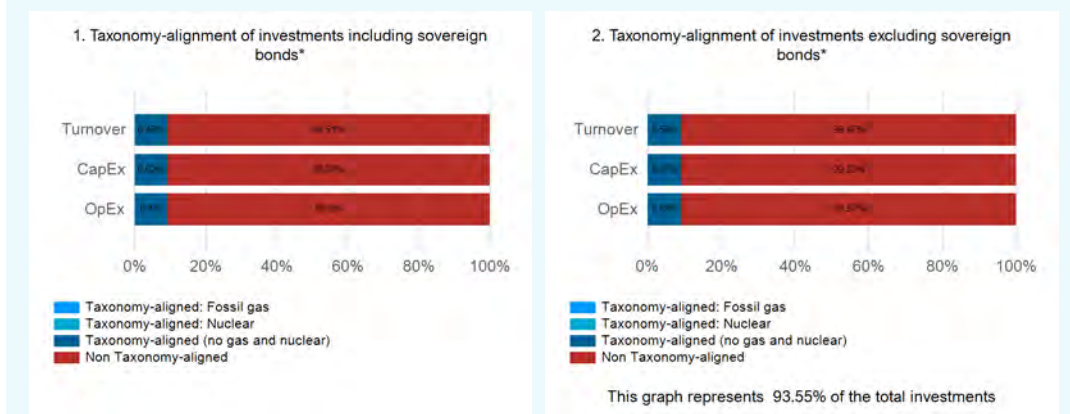

Yes

In fossil gas

In nuclear energy

No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reflecting green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

The share of the fund made in Enabling Activity: 0.33%; Transitional Activity: 0.03%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 29.94 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 20.73 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Institutional Emerging Markets
Equity Fund

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52.96% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 94.65 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 52.96 % of the fund invested in sustainable investments;
- iv) 20.97 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 31.99% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 86.45% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 45.69% of the fund was invested in sustainable investments;
- iv) 14.87% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 30.83% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 52.96 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 52.96 % in sustainable investments.

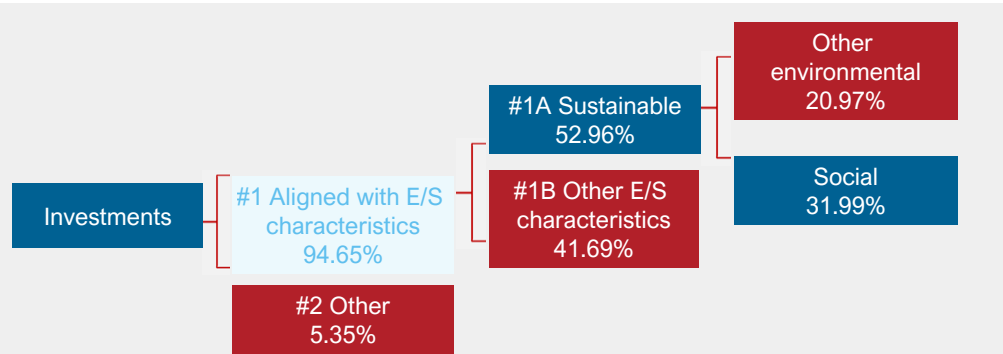

What was the asset allocation?

The fund invested in:

1. 94.65 % of its assets in securities of issuers with favourable ESG characteristics;
2. 52.96 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 20.97 % have an environmental objective (which is not aligned with the EU Taxonomy) and 31.99 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 86.45% of its assets in securities of issuers with favourable ESG characteristics;
2. 45.69% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 14.87% have an environmental objective (which is not aligned with the EU Taxonomy), and 30.83% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

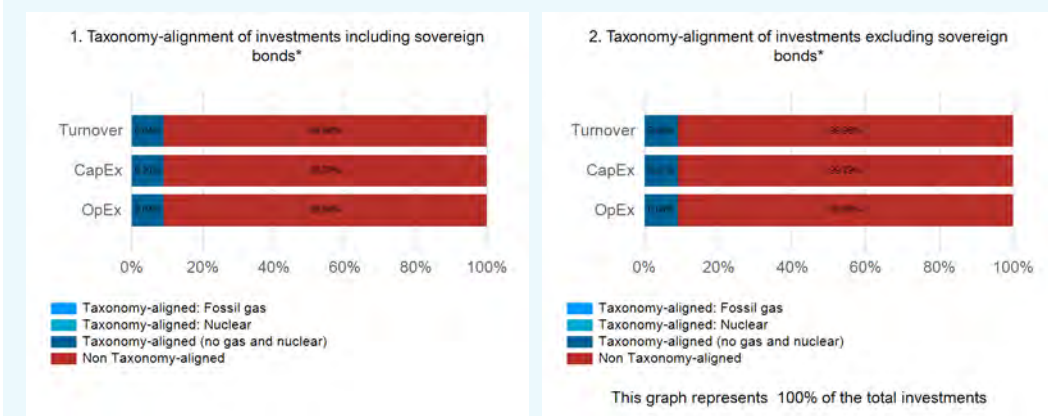

substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.04%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 0%
 Opex - 0%
 Capex - 0.2%
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 0%
 Opex - 0%
 Capex - 0.2%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 20.97 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 31.99 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Institutional European Larger
Companies Fund

Legal entity identifier:
549300ORQ1QXBQUTFE13

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.33% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 94.18 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 68.33 % of the fund invested in sustainable investments;
- iv) 29.51 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 35.92% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 92.66% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 55.51% of the fund was invested in sustainable investments;
- iv) 23.02% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 32.21% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 68.33 % of sustainable investments.

The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Roche Holding AG	Healthcare	4.47%	CH
SAP SE	Information Technology	4.29%	DE

SCOR SE	Financials	2.52%	FR

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 68.33 % in sustainable investments.

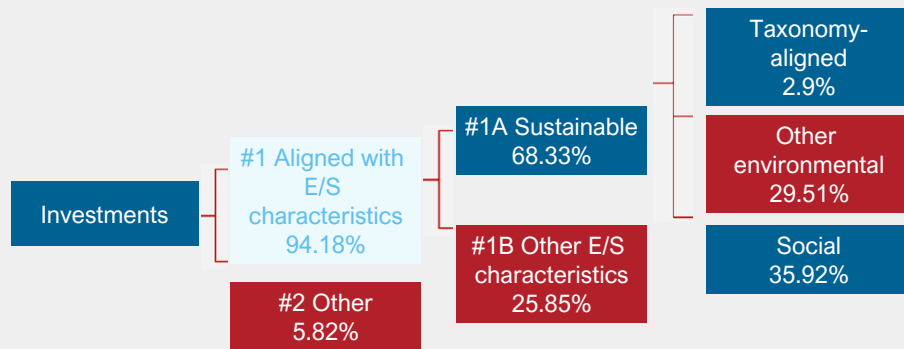

What was the asset allocation?

The fund invested in:

1. 94.18 % of its assets in securities of issuers with favourable ESG characteristics;
2. 68.33 % in sustainable investments of which 2.9 % have an environmental objective (which is aligned with the EU Taxonomy), 29.51 % have an environmental objective (which is not aligned with the EU Taxonomy) and 35.92 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 92.66% of its assets in securities of issuers with favourable ESG characteristics;
2. 55.51% in sustainable investments of which 0.28% have an environmental objective (which is aligned with the EU Taxonomy), 23.02% have an environmental objective (which is not aligned with the EU Taxonomy), and 32.21% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

	Electric Utilities	1.25%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.9% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

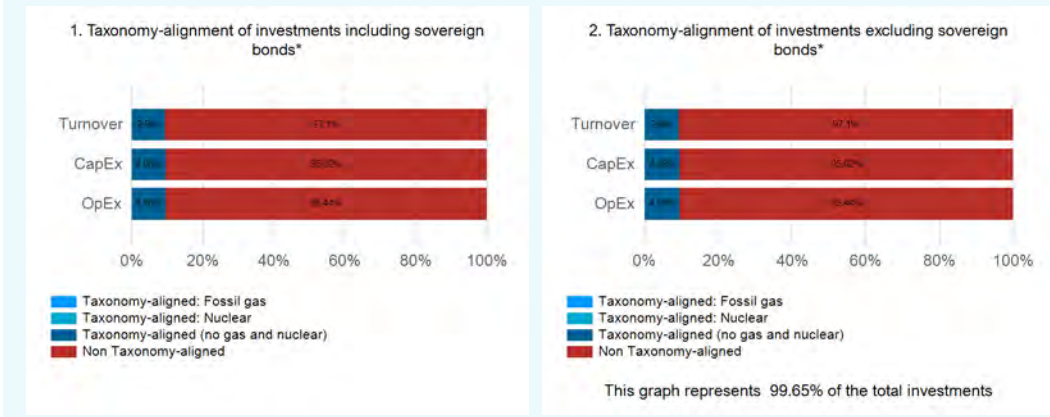

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.57%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
 Taxonomy - alignment of investments including sovereign bonds
 Turnover - 1.4%
 Opex - 1.9%
 Capex - 2.7%
 Taxonomy - alignment of investments excluding sovereign bonds
 Turnover - 1.4%
 Opex - 1.9%
 Capex - 2.7%

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 29.51 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 35.92 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Institutional Global Focus Fund

Legal entity identifier:
5493003YW9GTX4AB509

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 64.23% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 86.56 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- iii) 64.23 % of the fund invested in sustainable investments;
- iv) 34.48 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 29.56% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

... and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:

- i) 82.75% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 54.78% of the fund was invested in sustainable investments;
- iv) 30.66% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
- v) 24.01% of the fund invested in sustainable investments with a social objective.

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 64.23 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

- a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
- (iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Berkshire Hathaway (B)	Financials	4.21%	US
Microsoft	Information Technology	4.02%	US
Amazon.com	Consumer Discretionary	3.59%	US
Arthur J Gallagher &	Financials	3.44%	US
Visa	Financials	3.32%	US
Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	3.31%	IE
Alphabet (A)	Information Technology	3%	US
S&P Global	Financials	2.8%	US
QUALCOMM	Information Technology	2.56%	US
Airbus SE	Industrials	2.56%	FR
Canadian Pacific Kansas City	Industrials	2.41%	CA
Taiwan Semiconductor Manufacturing	Information Technology	2.33%	TW
Canadian National Railway	Industrials	2.21%	CA
Meta Platforms (A)	Information Technology	2.08%	US
Norfolk Southern	Industrials	1.88%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The fund invested 64.23 % in sustainable investments.

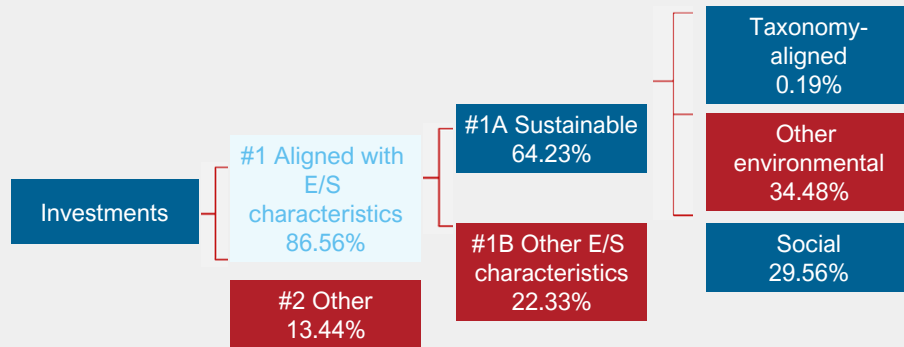

What was the asset allocation?

The fund invested in:

1. 86.56 % of its assets in securities of issuers with favourable ESG characteristics;
2. 64.23 % in sustainable investments of which 0.19 % have an environmental objective (which is aligned with the EU Taxonomy), 34.48 % have an environmental objective (which is not aligned with the EU Taxonomy) and 29.56 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:

1. 82.75% of its assets in securities of issuers with favourable ESG characteristics;
2. 54.78% in sustainable investments of which 0.1% have an environmental objective (which is aligned with the EU Taxonomy), 30.66% have an environmental objective (which is not aligned with the EU Taxonomy), and 24.01% have a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Media	0.49%
Consumer Discretionary	Multiline Retail	5.44%
	Auto Components	1.11%
	Household Durables	1.07%
	Textiles & Apparel	0.98%
Consumer Staples	Food Products	0.98%
	Personal Products	0.77%
	Beverages	0.48%
Financials	Insurance	8.5%
	Commercial Banks	7.37%
	Diversified Financial Services	13.41%
Healthcare	Health Care Providers & Services	1.49%
	Health Care Equipment & Supplies	1.47%
	Life Sciences Tools & Services	1.06%
Industrials	Road & Rail	6.22%
	Aerospace & Defence	6.08%
	Industrial Conglomerates	0.98%
Information Technology	Internet Software & Services	6.18%
	Computers & Peripherals	4.47%
	Semiconductor Equipment & Products	13.89%
	Software	13.87%
	IT Services	1.46%
	Electronic Equipment Instruments & Components	0.29%
Materials	Chemicals	1.54%
Open Ended Fund	Closed Ended Cash Fund	0.56%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.19% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure**

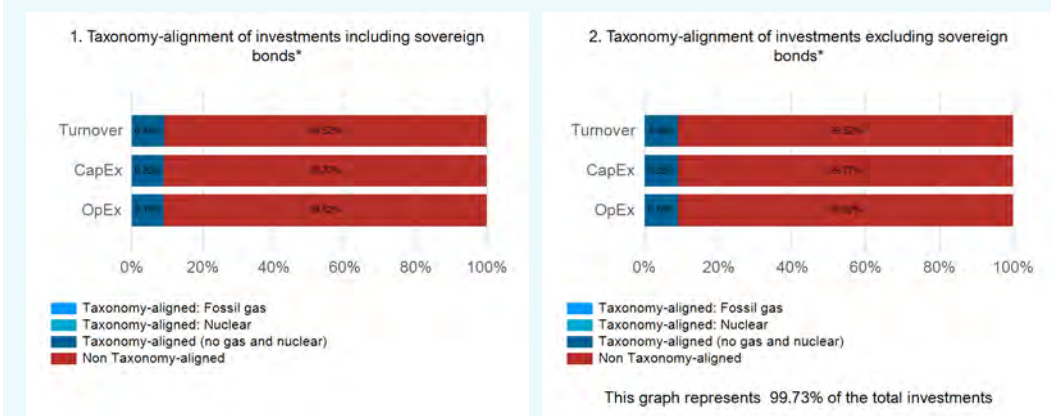

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

operational activities of investee companies.

operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.24%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

Taxonomy - alignment of investments including sovereign bonds

Turnover - 0.3%

Opex - 0.1%

Capex - 0.3%

Taxonomy - alignment of investments excluding sovereign bonds

Turnover - 0.3%

Opex - 0.1%

Capex - 0.3%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 34.48 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 29.56 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:

1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable
