What is this product?

Type

Shares of a sub-fund of Fidelity UCITS ICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS).

SFDR product category: Article 8 (promotes environmental, social and governance ("ESG") characteristics).

Term

This fund is open-ended.

Objectives

Objective: The fund aims to provide investors with a total return, taking into account both capital and income returns, which reflects, before fees and expenses, the return of the Fidelity Metaverse ESG Tilted Index NR (the "Index").

Investment Policy: The investment policy of the fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the fund's performance and that of the Index.

The fund will aim to replicate the Index by holding all of the Index securities in a similar proportion to their weighting in the Index.

The fund may use derivatives for efficient portfolio management and currency hedging purposes.

Investment Process: The fund uses a benchmark "index tracking" (also known as "passive") investment management approach by tracking the Index.

The Index is designed to reflect the performance of a global universe of companies that develop, manufacture, distribute, sell products or services related to establishing and enabling the "Metaverse", which is a term used to describe a future state of the internet characterized by a network of both augmented reality and virtual worlds that can be experienced persistently and in a shared environment by large numbers of users (the "Index Theme"). The Index comprises equity securities of the relevant companies.

To be eligible to be included in the Index, stocks must pass a screen particular to the Index Theme, meeting certain theme-specific criteria.

The Index also applies environmental, social and governance (ESG) screens and integrates ESG rating in the index construction as part of its methodology so that a minimum of 50% of its

constituents are deemed to maintain favourable ESG characteristics.

The Index also applies an ESG controversies screen to exclude certain issuers based on data rating controversies depending on their impact on the environment and society as well as the risks to the issuer's business.

For more information on the Index, please refer to the publicly available index methodology at <https://moorgatebenchmarks.com>.

Benchmark: Fidelity Metaverse ESG Tilted Index NR, an index that takes into account ESG characteristics. Used for: index tracking.

Base Currency: USD

Additional information: You may sell (redeem) some or all of your shares on any Valuation Day.

As this is a non-distributing share class, dividends are re-invested. This key information document describes a sub-fund of Fidelity UCITS ICAV. A separate pool of assets is invested and maintained for each sub-fund of Fidelity UCITS ICAV. The assets and liabilities of the fund are segregated from those of other sub-funds and there is no cross-liability among the sub-funds.

Depository: Brown Brothers Harriman Trustee Services (Ireland) Limited.

Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds, who plan to hold their investment for a recommended holding period of at least 4 years, who seek capital growth over the recommended holding period and income; and who understand the risk of losing some or all the capital invested.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 4 years.
The actual risk can vary significantly if you cash in at the early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Additional risks: none.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If FIL Investment Management (Luxembourg) S.A., Ireland Branch is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 4 years Example investment : USD 10,000		If you exit after 1 year	If you exit after 4 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	1,930 USD	2,320 USD
	Average return each year	-80.7%	-30.6%
Unfavourable	What you might get back after costs	5,620 USD	8,310 USD
	Average return each year	-43.8%	-4.5%
Moderate	What you might get back after costs	11,220 USD	15,250 USD
	Average return each year	12.2%	11.1%
Favourable	What you might get back after costs	18,420 USD	25,410 USD
	Average return each year	84.2%	26.3%

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 06/2021 and 01/2024.

The moderate scenario occurred for an investment between 09/2015 and 09/2019.

The favourable scenario occurred for an investment between 01/2017 and 01/2021.

What happens if FIL Investment Management (Luxembourg) S.A., Ireland Branch is unable to pay out?

The assets and liabilities of this product are segregated from those of FIL Investment Management (Luxembourg) S.A., Ireland Branch. There is no cross-liability between these entities, and the product would not be liable if FIL Investment Management (Luxembourg) S.A., Ireland Branch or any delegated service provider were to fail or default.

Shares of this product are traded on a stock market and settlement of such transactions are not affected by the position of FIL Investment Management (Luxembourg) S.A., Ireland Branch.

This product does not participate in an investor compensation scheme.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.

	If you exit after 1 year	If you exit after 4 years
Total costs	52 USD	270 USD
Annual cost impact (*)	0.5%	0.6% each year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.7% before costs and 11.1% after costs.

Composition of Costs
