Objectives

Investment Objective

The Fund's investment objective is to achieve total return, through income and capital appreciation.

Investment Policy

- The Fund invests mainly in higher rated corporate bonds (rated A- or higher by S&P or the equivalent by another NRSRO, or if unrated deemed to be of comparable quality) issued in certain developed countries.
- The Fund will only invest in those corporate bonds that have priority over certain other bonds in a claim against the issuer.
- The Fund may invest in bonds issued by international organisations.
- The Fund may invest in securities denominated in any currency; however, the Fund will attempt to hedge all non-US Dollar positions to the US Dollar, so that the fund is not exposed to any currencies other than the US Dollar.
- The Fund may invest in derivatives (financial instruments whose value is derived from the value of other assets), to help try to achieve the Fund's objective as well as to reduce risk or cost or to generate additional growth or income for the Fund.

- This is an Article 8 fund under the EU Sustainable Finance Disclosure Regulation.

- **Manager's Discretion:** The Fund is actively managed. The investment manager has discretion in selecting investments within the Fund's objective and investment policies.

- **Transaction Costs:** The Fund bears costs in buying and selling investments, which may have a material impact on the Fund's performance. A benchmark is not used for performance comparison purposes.

Share Class Policy

For this share class all, or some portion of, net income is declared daily and paid monthly to shareholders.

Processing of subscription and redemption orders

You can buy, sell and switch your shares on each day that the New York Stock Exchange is open for business.

The debt securities purchased are expected to have an average portfolio duration of 0 to 5 years. Investors should be willing to hold their investment over the medium to long term for a minimum period of 3 to 5 years. The Fund is suitable for investors who do not need to have specific knowledge and/or experience of financial markets with the understanding that they may not get back the full amount invested in the Fund.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payment in a different currency, so that the final return you get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario

	If you exit after 1 year	If you exit after 5 years

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
