

Franklin U.S. Government Fund

Class AX (acc) USD • ISIN LU0138076046 • A sub-fund of Franklin Templeton Investment Funds
The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin U.S. Government Fund (the “Fund”) aims to earn income over the medium to long term.

The Fund pursues an actively managed investment strategy and invests mainly in:

- debt securities issued or guaranteed by the U.S. government and its agencies (up to 100% of the Fund’s assets), especially Ginnie Mae (GNMA) mortgage-backed securities and asset-backed securities

The investment team takes advantage of research to find opportunities in the GNMA markets, while carefully managing risks.

The Fund may distribute income gross of expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital.

You may request the sale of your shares on any Luxembourg business day.

The income received from the Fund’s investments is accumulated with the result of increasing the value of the shares.

For further information on the Objectives and Investment Policy of the Fund,

please refer to the section “Fund Information, Objectives and Investment Policies” of the current prospectus of Franklin Templeton Investment Funds.

The benchmark of the Fund is the Bloomberg Barclays US Government - Intermediate Index. The benchmark is indicated for information purposes only, and the Fund manager does not intend to track it. The Fund can deviate from this benchmark.

Terms to Understand

Debt securities: Securities representing the issuer’s obligation to repay a loan at a specified date and to pay interest.

Mortgage-backed securities: Securities whose value and income payments are derived from the ownership of a pool of underlying mortgage debts.

Ginnie Mae (GNMA): Government National Mortgage Association—A wholly owned subsidiary of the U.S. government tasked with maintaining liquidity for government-guaranteed mortgage loans.

Asset-backed securities: Debt securities whose value and income payments are derived from a pool of underlying assets.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in debt securities issued or guaranteed by the U.S. government and its agencies. Such securities have historically proven to present some stability over time and have benefitted from a limited exposure to interest rates or movements in the bond market. As a result, the performance of the Fund can fluctuate to a small degree over time.

Risks materially relevant not adequately captured by the indicator:

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.

Securitisation risk: investment in securities which generate return from various underlying groups of assets such as mortgages, loans or other assets may bear a greater risk of loss due to possible default of some of the underlying assets.

For a full discussion of all the risks applicable to this Fund, please refer to the “Risk Considerations” section of the current prospectus of Franklin Templeton Investment Funds.
