Investment Policy

• As an Article 8 fund under SFDR, the investment manager applies its ESG sustainability leader criteria to 100% of the portfolio of the fund. The investment manager's portfolio construction process restricts the companies in the fund's investable universe by at least 20% to accommodate only those companies that are sustainability leaders.

• The investment manager will try to focus on companies that, in their view, offer products and services that have a positive impact on society by doing less harm to people and the planet relative to other companies within the same industry.

• The fund may invest in derivatives (financial instruments whose value is derived from the value of other assets), to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth or income for the fund.

• **Benchmark:** Russell 3000 Index

• **Manager's Discretion:** The fund is actively managed. The investment manager has discretion in selecting investments within the fund's objective and investment policies. The benchmark is used for performance comparison purposes. While most of the fund's securities will be components of the benchmark, the weightings of the holdings may differ materially from the weightings in the benchmark. The fund may also invest in securities that are not included in the benchmark. The fund's percentage exposures to sectors and industries may differ materially from those of the benchmark.

• **Transaction Costs:** The fund bears costs in buying and selling investments, which may have a material impact on the fund's performance.
