Objectives

Investment Objective

The Fund's investment objective is to provide a high level of current income.

Investment Policy

- The Fund will seek to achieve its investment objective by investing at least 70% of its net asset value in high-yielding debt securities and instruments of US issuers (such investment may be directly in such shares or indirectly via investments in other investment funds) that are denominated in US dollars that are listed or traded on regulated markets listed.
- The Fund may invest up to 10% in contingent convertible bonds (bonds that can convert into equity upon a specified event taking place).
- The bonds purchased by the fund may be issued by corporations and governments.
- The Fund may invest in debt securities rated as low as D by S&P or the equivalent by another NRSRO, which ratings indicate that the obligations are highly speculative and may be in default or in danger of default as to principal and interest. The Fund may invest in derivatives, financial instruments whose value is derived from the value of other assets, to help try to achieve the Fund's objective as well as to reduce risk or cost or to generate additional growth or income for the Fund.

- This is an Article 8 fund under the EU Sustainable Finance Disclosure Regulation.

- **Benchmark:** Bloomberg US Corporate High Yield, 2% Issuer Cap Index

- **Manager's Discretion:** The Fund is actively managed, and the investment manager is not constrained by the benchmark. The benchmark is used for performance comparison purposes and by the investment manager in measuring and managing investment risk. The Fund's investments will include components of the benchmark, although the weightings of the Fund's holdings may differ materially from those of the benchmark and will normally include instruments not included in the benchmark.

- **Transaction Costs:** The Fund bears costs in buying and selling investments, which may have a material impact on the Fund's performance.

Share Class Policy

Income and gains from the Fund's investments are not paid but instead are reflected in the Fund's share price.

Processing of subscription and redemption orders

You can buy, sell and switch your shares on each day that the New York Stock Exchange is open for business.

Intended retail investor

The Fund may appeal to investors looking to receive a high level of income by obtaining exposure to high yield (riskier) debt securities and instruments of US issuers that are denominated in US Dollars as well as derivatives. Investors should be willing to hold their investment over the medium to long term for a minimum period of 3 to 5 years. The Fund is suitable for investors who do not need to have specific knowledge and/or experience of financial markets with the understanding that they may not get back the full amount invested in the Fund.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payment in a different currency, so that the final return you get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the product not included in the summary risk indicator:

- Credit risk
- Concentration risk

For the other risks applicable to this Fund, please refer to the Primary Risks section of the Fund supplement contained within the prospectus of the Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 is invested

| | If you exit after 1 year | If you exit after 5 years |
|-------------------------------|---------------------------------|----------------------------------|
| Total costs | 174 USD | 996 USD |
| Annual cost impact (*) | 1.7% | 1.7% each year |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.2% before costs and 2.5% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Please note that the figures shown here do not include any additional fees that may be charged by your distributor, advisor or any insurance wrapper in which the fund may be placed.
