Objectives and investment policy

The objective of the investment policy of the Flossbach von Storch - Multiple Opportunities II sub-fund is to achieve reasonable growth in the sub-fund currency while taking account of investment risk. The investment strategy is based on a fundamental analysis of global financial markets. The sub-fund is actively managed. The fund manager determines, regularly reviews and, if necessary, adjusts the composition of the portfolio exclusively in accordance with the criteria specified in the investment policy. The sub-fund is not managed in reference to a benchmark.

When making investment decisions for the sub-fund, the fund manager shall take into account the requirements of the sustainability policy of the management company and the criteria it contains as specified in detail in the "Sustainability policy" section of the sales prospectus. In compliance with the "Additional investment restrictions" and in accordance with Article 4 of the management regulations at least 25% of the sub-fund's net assets shall be continuously invested in equity participations. Up to 20% of the sub-fund's net assets may be invested indirectly in precious metals. No more than 10% of the sub-fund's assets may be invested in other investment funds. The income from this share class will be distributed.

Risk and reward profile

The historical data used for calculating the synthetic indicator is not a reliable indication of the future risk and reward profile of the share class. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.

This share class has been placed in the aforementioned risk class because its unit price is subject to medium to significant fluctuation, therefore the profit potential and loss exposure may be moderate to high.

Because of the calculation model used, all risks may not be taken into consideration when placing the share class in a risk class. Detailed information can be found in the section entitled "Risks" of the prospectus. The following risks have no direct influence on this categorisation, but may be significant for the Fund:

Credit risks:

The Fund may invest part of its assets in bonds. The issuers of these bonds could become insolvent, causing the bonds to lose some or all of their value.

Liquidity risks:

The Fund may invest part of its assets in securities that are not traded on a stock exchange or similar market. It may be difficult to find a buyer for such securities in the short term. As a result, the risk that share redemptions will be suspended may increase.

Counterparty risks:

The Fund may enter into various transactions with counterparties. If a counterparty becomes insolvent, that party will not be able to meet some or all of its open obligations to the Fund.

Risks relating to the use of derivatives:

The Fund may enter into derivative transactions for the purposes listed above in the section "Investment policy". This means increased opportunities, but also increased risk of losses. The use of derivatives to hedge against losses may also reduce the profit opportunities of the Fund.

Operating risks and custodial risks:

The Fund may fall victim to fraud or other criminal activities. It may suffer losses through misunderstandings or errors on the part of employees of the investment company or third parties or be hurt by external events, such as natural disasters. There is a risk of loss associated with holding assets in custody, especially abroad. This risk may result from insolvency, negligence or misconduct on the part of the Depositary or a sub-depositary.
